VOL. XV. MONTREAL AND TORONTO, APRIL 11, 1903. NO. 15.

ON PARLIAMENT HILL

Ruminations by "Zed."

SO diversified are Canadian industries, and apparently so numerous their wants, that before the average bewildered legislator has had time to peruse one half of the literature with which he has been deluged on some particular subject, another with its attendant pamphlets and interviewers is upon him.

Under these circumstances we may say that nothing keeps the centre of the stage long at Ottawa, and further that proceedings are rather on the scale of the modern circus with three rings in which simultaneous performances take place, and where, having paid your money you take your choice.

The Coal Tariff.

Having already had skirmishes with regard to salt, binder twine, coal oil, beet sugar, steel rails, and a pitched battle or two on the wide subject of increased protection all along the line, we are now asked to turn our jaded attention to the very important and interesting question of bituminous coal. Each member has received a communication worded as follows:

The following resolution was passed unanimously at the Mining Convention, held in the Board of Trade on February 17 and 18, 1903: "Whereas, the Province of Ontario is largely dependent upon foreign coal as a source of power, and the mining and other industrial interests of the Province are unable by reason of our distance from the mines to purchase Canadian coal at any but prohibitory prices, and the present duty on foreign coal is a direct burden upon the mining, metallurgical and industrial interests, and in no way extends the use of Canadian coal in Ontario; Resolved, that the present duty on bituminous coal should be repealed, and that this convention use every means in its power to procure from the Dominion Government the repeal of the same."

The probable cause of the present agitation as above expressed is to be found in the action of the United States Government, action resulting from the great coal strike of last year, whereby for a year to come a rebate equal to the amount of the import duty is to be allowed by that government on coal going into the United States. This, it is thought, affords a good opportunity for negotiation with the American Government, with the object of procuring by treaty for a term of years the abolition of the import duty on coal.

The Maritime Provinces take very strong ground against the abolition of the Canadian import duty because of the year of grace accorded by our neighbors, and their reason is not far to seek. At the end of the year we have no assurance that the time will be extended, and meantime settled avenues of trade which have taken years to develop will be very much upset.

At present the coal miners of the Maritime Provinces have the Canadian market as far as Montreal, and this, owing to the protection accorded to them by the section of the Tariff which provides that "Coal, bituminous, round and run of mine, shall pay fifty-three cents per ton of 2,000 lb. (being the equivalent of sixty cents per ton of 2,240 lb.)" With a removal of this protection, they could not hold this trade for a day against the American coal, and unless a binding treaty for several years to come secured for them the entry into the New England market, their business would be utterly ruined.

In Nova Scotia particularly coal mining is of such vast importance to the whole province, that any blow at its healthy condition would raise a small rebellion. Thousands upon thousands of persons are engaged in it, millions of money are invested in it, the farmers get a large home market for their produce in the mining towns, and lastly the Provincial Government, by its royalty of ten cents per ton, derives a substantial revenue from it, of which every inhabitant of the province gets a very direct benefit in the schools of the country.

Now the people of the Maritime Provinces are largely importers of flour and its kindred products, upon the former of which there is a duty of sixty cents per barrel (including the duty on the barrel itself), and this is furnished to them by the Upper Provinces. The minute you mention the abolition of the duty on coal they reply, "certainly, as soon as you abolish the duty on flour." They claim, at least some of them do, for on this point they are more or less divided, that even with reciprocity in coal, unless the duty were done away with on flour, a profitable trade with New England could not be carried on, because the ships carrying it would get no adequate return cargo. Others say that this would not be an insuperable difficulty, as the coal is now being carried in large vessels of ever increasing tonnage, which, as the return trip would take only from two to three days and they would thus be idle so to speak only for that short time in each round trip, could not afford to wait a lengthy lading, which almost any freight other that coal would entail. The majority seem to feel that a reciprocity in coal for a period of from ten to twenty years would be all right in any case, with or without flour on the free list, although of course they are fully alive to the benefit that change would be to the consumers of the province.

The reason assigned for naming ten years as the shortest time for which a reciprocity treaty could be accepted is that to develop this new trade very large sums indeed would have to be expended for improved facilities at both the shipping points and the destinations, for which a trade for a short period would by no means furnish the necessary sinking fund.

Soft coal is, of course chiefly used in connection with manufacturing purposes, the anthracite going in large part to do-

domestic furnaces and stoves, so that it is interesting to note the fact that while in 1896 we consumed in Canada, native and imported, 5,845,511 tons, we used in 1901 (see p. 156 Statistical Year Book of Canada; the volume for 1902 not yet being available) 9,718,272, a splendid showing for the enterprise with which Canadian manufacturers have enlarged their business operations in five short years.

From the general standpoint of Canada the question of the loss of revenue entailed by putting soft coal on the free list must not be lost sight of. In the case of the proposed legislation to abolish the sale, importation, and manufacture of cigarettes, a motion approving of which was by the way carried by nearly two votes to one, a loss of revenue to the extent of $400,000 was involved, but in that case it was felt that the future health of the community demanded a drastic course, and the question of the shrinkage was never even mentioned in the debate, which moved along higher lines. In the financial year ending June 30th, 1902, the revenue from soft coal and coal dust (anthracite is, of course, already on the free list) amounted to the very large sum of $1,652,993.50. It may be said that with large annual surpluses this sum might very well be foregone as a remission of taxation. The fact remains, however, that while there have been numerous large surpluses of late of revenue over ordinary expenditure, there have been since Confederation but three surpluses of revenue over all expenditure, that is, ordinary and capital account combined. The country is growing rapidly, and like all growing countries the requirements for public works, transportation facilities, and a thousand and one other things are heavy and bound to continue so. Curtail the revenue and you must either leave undone those things which ought to have been done, or spend the money and add to the public debt, a course only permissible when actually necessary. If, in the interests of commerce any tax must be remitted, then the loss of revenue must be borne, but where there are two sections of the country so strongly opposed in a measure as that proposed, where we find the Maritime Provinces arrayed so to speak against old Canada, it behooves any government to move with caution, for we must remember Confederation, our desire for a United Canada, and that no advantage must be taken of our superior voting power in the Upper Provinces to deal unjustly with our good friends down by the sea.

* * *

SO intimately is the wheat trade bound up with the transportation question that we can scarcely discuss the one without introducing the other, and as wheat, if not "King" in Canada, is certainly at the least "Heir Apparent," anything concerning it must be of interest to all engaged in every kind of trade in the Dominion.

The Wheat Trade.

Now no commerce can flourish which gives a full cargo one way only, and hence if the immense wheat crops of Manitoba and the Territories are in large part to go out through American channels, many of them crossing the boundary as far west as Manitoba itself, we cannot reasonably expect a profitable trade with the west in the products of the east. In a word, the grain of that great country must come to the Canadian seaboard, and the cars and ships transporting it must go back laden with the factory output of older Canada. While tens of millions have been spent already in supplying railway and water facilities for the west, it is freely stated that of last year's crop 25,000,000 bushels remain still unmoved, and with the prospect of a large increase in the growth of the coming season, the problem becomes more and more serious.

One of three things will happen :—First, the surplus grain will go through American channels with the attendant loss of return trade from old Canada outlined as above, or second, it will go through Canadian channels to Canadian sea-ports owing to large increase in facilities both by land and water, or thirdly, it will find an inadequate outlet through both, with a consequent set-back to the settlement of the country, which would be the most disastrous blow imaginable to the present and increasing prosperity of Canada. It is pleasing to know that while much remains to be done, present improvements in our lake ports are beginning to bear fruit. On March 26th Mr. Holmes asked the Minister of Customs as to grain shipments from Port Arthur and Fort William during the years of 1901 and 1902, and elicited the following most encouraging information :

GRAIN SHIPMENTS OF TWO YEARS.

	Bushels. 1901.	Bushels. 1902.
Port Arthur.....	709,032	6,801,209
Fort William.....	13,856,168	29,400,652

of which in 1901 Port Arthur shipped to other Canadian ports, mainly to Parry Sound, Meaford, Collingwood, Point Edward, Sarnia, Kingston, Goderich, Montreal, Midland, Owen Sound and Depot Harbor 665,444 bushels, and in 1902, 4,955,023 bushels, while Fort William shipped to Canadian ports in 1901 9,181,978, and in 1902 18,096,575.

And this brings us very naturally to the large and important delegation from Port Arthur, North Bay, and other neighboring points, which on March 27th waited upon the Premier and the Minister of Railways and Finance to urge upon the Government the improvement of the French River navigation so that a deep water-way might be provided from the Georgian Bay to North Bay on Lake Nipissing.

This, it is said, could be accomplished for $5,000,000. It would greatly shorten the route east and would relieve the congestion in the upper lake ports. Even if it never went further, the expenditure it is claimed would be justified, but by many it is hoped that this would be but the first step towards the building of the Georgian Bay Canal, which, taking advantage of the configuration of the country near North Bay, and later in its course utilizing the splendid stretches of the Ottawa, would eventually reach the sea-board at Montreal, immensely shortening distances and providing means of outlet for the enormous crops which in ten years the westerners will be harvesting.

The latter part of the scheme is undoubtedly very ambitious, for it would involve the expenditure of from 75 to 100 millions of money, although the present estimate is, of course, somewhat less.

The Hon. Mr. Tarte strongly supported the delegation, and the Minister appeared as sympathetic as gentlemen in their responsible positions ever allow themselves to be.

The Premier remarked that railways and waterways had each their special advocates as transportation channels, but in his opinion both would be required for the trade of Canada.

He remarked that the transportation question was as old as Canada itself, and instanced the primitive canal at the Soo, a section of which is still retained as an historical relic, an endeavor in the early traders of those days to lighten the labor of their fur-trading industry by avoiding the arduous portage at that point. He took issue with the statement that Canada was behind the United States in liberality of appropriation for purposes such as these, and maintained that in proportion to wealth and population the comparison was all in our favor.

Mr. Tarte spoke vigorously against allowing any of our great national water-

WIRE
Prompt Shipment
The ONTARIO TACK CO.
Limited
HAMILTON, ONT.

ways to pass into private hands, for while railways could always be duplicated and the necessary competition thus procured, it would be impossible to meet a "water" monopoly in that way. He proclaimed Midland and Depot Harbor as the rivals of Buffalo, and if trade continues to increase in these and neighboring ports as it has done in the last two years, his contention will before a great while be justified, although it is of course always difficult to wrest trade from well established channels. He made an extremely good point when he said the United States have no right to any of our grain trade, but we have a right to some of theirs, because we have the shortest route.

Mr. Kendal, of Sydney, Cape Breton, one of the best informed members in the House, said that the building of the Ottawa & Georgian Bay Canal would make it possible for the manufacturing towns of western and new Ontario to use the coal of the Maritime Provinces, as it could be shipped by an all-water route for about fifty cents per ton per thousand miles, whereas by rail that was the cost per hundred miles. As the Government has pledged itself to the appointment of a transportation commissioner to report on the best methods of improving our present position along these lines, it is pretty certain that no very extensive new work will be undertaken until after the report of the gentlemen composing it has been presented and very carefully considered.

* * *

IN busy Canada nearly every man is a borrower, and this condition is likely to continue as long as many tempting chances for investments of all kinds exist. "Tight money," is the constant complaint; more capital is what we need—the ever present cry—and so any legislation which permits to loan companies a wider lending discretion, always provided it be along conservative lines, will be welcome to all.

Loan Companies.

The Act "to extend the power of loan companies," introduced by Mr. Thompson, of Haldimand, has for its object the widening of the loaning powers of certain companies, that they may be placed on an equal footing with other corporations of a similar nature. Many of the longest established loan companies were created under the old Companies Act. Subsequent to that, in 1899, a Loan Companies Act was passed, which was not retroactive, which gave much larger powers to companies incorporated under it. Thus it came about that new comers in the field found themselves with more valuable rights than old timers possessed, and it is to wipe away this injustice that legislation is now sought. The most interesting extension of the present rights of the old companies is a permission to lend up to a certain percentage on its own permanent paid up stock.

Many stock-holders who require money for a temporary purpose only, and who do not wish to sell out good stocks, will no doubt be glad of this new extension to their credit.

* * *

One of the recent deputations to wait upon the Government for an increased duty, came from the salt manufacturers of Ontario. At present all salt imported from British possessions comes in duty free, and the duty on salt imported from other countries is 7½ cents per hundred pounds on package, and 5 cents per hundred pounds on coarse. The deputation asked that the duty be made the same as in the United States, to wit 12 cents on package and 8 cents on coarse per hundred, and that this should be on all importations from whatever country, British or foreign. The reason generally assigned for the admission of British salt free is that the salt is needed for the fish trade, chiefly in the Maritime Provinces, but as no provision was made in the Act restricting the exemption to salt used for those purposes alone, all consumers got the benefit. Not wishing to interfere in the raw material of the fishermen, the deputation proposed that in the event of the imposition of the duty as asked, a rebate equal to the full amount of the duty should be allowed to those engaged in that trade. It was pointed out that the salt manufacturers were heavily taxed in the import duties of many articles required in the production of their output, as, for instance, soft coal, which at 53 cents per ton duty means a cost of about 4 cents per barrel.

The Salt Tariff.

At present American salt has been quoted at Fort William as low as 52 cents per barrel, and it would cost some

MAR-NOT
REGISTERED

Mar-not, a durable floor varnish, is the result of special attention and study, and is absolutely unequalled as a perfect floor finish.

There is no similar line of goods that you can sell so satisfactorily as Mar-not. It is right in every respect. Every can of it used will be an advertisement and trade-getter for your paint and varnish business.

Mar-not is a varnish for the painter and householder. We are advertising it directly to them. It is a varnish that will bring them to your store.

If you are not now handling Mar-not, write us for prices and full information. Do it to-day.

[illegible] cents per barrel to deliver salt from the Canadian fields to that point; put the cost of the barrel at twenty five more and, of course, trade becomes an impossibility.

It is said that the above quotation for American salt is, however, an exceptional one and represents a sale well below cost a sale made in an endeavor to drive a couple of American independent concerns into a large combine in that country, and that before a very long time trade will resume its normal conditions again.

Be this as it may, the salt industry of Ontario is not under even ordinary conditions in a flourishing state. It is of very considerable magnitude, two of the largest concerns, Ransford Bros., of Clinton, and Henderson, of Windsor, having a capacity of one thousand barrels of salt per day, so that the proposals of the deputation are well worth the consideration of the Government, which, as usual, has of course been promised.

We may say that about 750,000 bbls. of salt manufactured in British possessions now comes in duty free, while the Canadian production is about 350,000 bbls.

ORDERS FOR CANADIAN RAILS.

Shipbuilders in all the chief centres of the industry have recently booked orders for new tonnage, which, in the aggregate, must reach a very respectable total, and as a result the outlook along the Clyde and northeast coast is brighter than was the case a few weeks ago, while hopes are entertained that still more business may be released. Resulting from the placing of these orders the plate trade is in rather a better position, and where there was a dearth of work in sight some good business has been booked, and the outlook is spoken of in more encouraging terms than for a number of months. The engineering trades generally must also participate in the improvement. We understand that the order for 25,000 tons of rails for Canada placed with a Glasgow merchant house was not given to works in this country. The order entrusted to Cammel & Co., and referred to in last week's issue, was for a smaller lot, but the big order has been split up among a number of continental makers at about 92s. 6d., f.o.b.—Ironmonger, London.

George Harris, a Brampton blacksmith, has a patented locknut, which promises to be of very great value, to railways in particular, but to machinists in general. The device is intended to prevent nuts shaking from bolts on moving trains, thereby lessening the possibility of danger from this cause. A company is being formed to put the article on the market

MACHINERY

THE ADVENT OF THE TURBINE.

THERE is nothing new under the sun, and it is difficult to say whether some of the latest mechanical inventions are not merely adaptations of principles well known in thousand years ago. Many principles carried in this age to a fine point of perfection were commonplace to the ancients, and the main reason for their non-development was the disturbed condition of national and social affairs, and the lack of communication, in itself sufficient to isolate each country or province or state from the rest of the world.

In these days, an idea that has proved commercially economical in its adaptation is at once the servant of the whole world, thanks to the interchange of thought that has been so marked a feature of the last century.

James Watt directed the trend of mechanical invention along the line of utilization of the expansive power of steam, the main facts of which he made use having been known to the Chinese for ages. After following slavishly the application of steam power as suggested by Watt in the reciprocating action of piston and crank, and carrying this idea to the zenith of its perfection, or at least to a point beyond which improvement is no more economical, modern mechanical inventiveness reverts to a type that preceded Watt's discovery by hundreds of years.

In the common form of steam engine, the piston is forced outwards by the pressure of steam in the cylinder, to the end of its "stroke." Steam is then automatically admitted to the other end of the cylinder, and the piston is forced back again.

In converting this horizontal or vertical motion into circular motion, two serious losses occur: first, there are two "dead points" over which the momentum of the fly-wheel carries the piston and crank; next, the momentum acquired by the piston in its linear thrust must be destroyed at each end of the stroke, and the power necessary to accomplish this is lost completely, so far as utility is concerned.

To offset this, double, triple and quadruple expansion cylinders are used, in which the steam is almost fully expanded before leaving the engine: condensers are also attached, producing a negative or vacuum pressure to assist in overcoming the piston's momentum. Rotary engines are but a partial solution of the difficulty, and the intricacy of their construction has militated against their adoption.

In the steam turbine, the power is applied directly to the periphery of the wheel, in much the same manner as water is admitted to the wheel-pit of the more common water turbine.

The general form of all turbines is a drum with peripheral slanting flanges, which the water, in passing, causes to rotate. Single water and steam turbines differ only in details belonging to the realm of advanced mechanics. Compound or parallel-flow steam turbines are, in a sense, triple-expansion engines, the steam first passing longitudinally along the flanges of the drum, then returning along an outer series of parallel flanges, and so on until its energy is expended.

Machinery is steadily receiving more attention from hardware retailers. During March an Eastern Ontario hardware firm fitted several cheese factories with boilers, machinery and tools.

The first compound turbine was made in England in 1884 by the C. A. Parsons Company, and so successful was it that by 1890 there were 360 such plants in existence, varying from 4 to 120 h.p. At the present time plants aggregating not far short of 350,000 h.p. have been set up.

The Metropolitan and District Railways of London, Eng., are installing 10 turbo-generators of 5,000 h.p. each.

The economic results of the steam turbine in the generation of electricity compares very favorably with those of the reciprocating engine, the chief claims being less steam-consumption, running cost, up-keep, oil, attendance and initial cost, and greater efficiency. Another point not to be overlooked is the durability of the "turbo." No such contingency as a broken cross-head, causing the cylinder-end to go 'way back and sit down in an undignified manner can arise with a turbo, and dead centre is a term with as little significance to the turbineer as the sea serpent is to an Arizona ranchman.

Since the building of the "Turbinia," Parsons' first turbine-propelled boat, marine experts have been closely watching the progress of these "rotifer engines," as they have been called, and it may be that ere long Atlantic liners will use the turbo as the means of propulsion.

Whether this latter view is too optimistic or not, it is safe to say that notwithstanding the vested interests in modern triple-expansion engines, the steam turbine has come to stay.

ENGINE FOR THE "MIDLAND KING"

IN the Bertram Shipbuilding Company's shop at Toronto, a monster marine engine for the new leviathan of the lakes, the "Midland King," is nearing completion. The foreman, Ed. Verney, under whose supervision the giant engine is being built, explained the special features to our representative with justifiable pride.

The engine is of the triple-expansion type, with 20, 33½ and 55-in. cylinders. A new feature is the placing of the low-pressure cylinder fore instead of aft, the object being to throw the weight forward, the low-pressure being, of course, the largest and heaviest of the three cylinders. The pistons have a 60-in. stroke, and directly connected with a horizontal piston beam are two condenser pumps. There are double port valves in the intermediate and low-pressure cylinders, and a piston valve in the high-pressure.

The construction of the engine has occupied, with the preparing of patterns, etc., nearly a year, and it is expected the whole contract will be ready for shipment to Collingwood in about a week.

The Bertrams are also building two incline tug engines for the side-wheel steamers they recently shipped in sections to Lake Temiskaming. These are compound condensing engines, with 24, 40, and 21, 48 in. cylinders respectively.

VANCOUVER IRONWORKERS' WAGES

The demand of the various trades employed in and about the iron foundries and machine shops of Vancouver for a nine-hour day with the same pay as given for a ten hour day has been granted by the employers, going into effect April 1.

Several meetings between the men and the employers occurred within the past two weeks, and as a result the demands

Vancouver Province.

MECHANICAL WINDOW DISPLAY.

ANYONE passing along King street, Toronto, during the last few days, must have been struck with the unusual crowd gathered in front of the Canada Cycle and Motor Company's store. The specific appeal to one's innate curiosity is made through the medium of one of the cleverest conceptions in the way of advertising seen in many a long day.

Mounted upon two Massey-Harris wheels of similar build are two dummy cyclists, slowly pedalling their machines over a road that knows no ending, as it consists of two rotating drums with

CUSHION FRAME PARTS. 1—Spiral Spring, which keeps the cushion distended. 2—Brass Cartridge, in which the lower and large end of the spring is seated. 3—Plunger, in which the upper and small end of the spring is seated. 4—Bushing, into which the plunger fits. 5—Upper Rear Tube. 6—Leather Washer. 7—Steel Washer. 8—Dust Cap.

longitudinal cleats to give an interesting variety to the evenness of the surface.

The expression on the face of one of these wheelmen is similar to that we imagine Tantalus must have worn when the water surrounding him receded beyond reach every time he stooped to martyrdom is not far to seek, for the most casual observer will readily perceive that as the rugged cleats come around and pass under the rear tires, one machine receives a nasty little jerk that is almost enough to jump the rider from his saddle, while the other sits in smiling contentment, without a trace of vibration. The secret of it all is in the hygienic cushion spring fitted in the frame of one of the machines, and no amount of oral demonstration could ever be so effective as this mechanical portrayal of the troubles of that man who shall ignore the merits of the latest improvement in cycles.

The mechanism is driven by a belt from a small dynamo, running over a wooden pulley on one of the drums. The models are life-size, and the motions most natural.

A sectional view of the hygienic cushion device is given above. It is placed between the seat and fork of the back bay.

AN ENCOURAGING OUTLOOK.

THE excuse for pessimistic forebodings among Canadian business men is rapidly passing, and the man who does not look with confidence on the signs of the times will soon enjoy a commercial ostracism he richly deserves. Existing firms are pulling down their barns to build greater; new enterprises are springing up on every side, and success is assured them from the first. Messrs. James & Reid have found it necessary to add a $1,000 lathe to their new equipment at Perth, and the growth of this firm from a pay-roll of one man and a boy, has been little short of phenomenal.

It would appear as if an old truism had been reversed, for it was not necessity, but prosperity, that gave Mr. Thompson, of the Dickson Company's saw mill at Peterborough, the idea of inventing a new boom anchor to supplant the unsightly cribs usually built out from the lake shore to secure the boom-sticks. Mr. Thompson took a number of great stones that had lain on the beach for centuries, and drilled them with holes; chains were run through these holes, and the stones carried out and sunk, thus forming a cheap and invisible anchorage.

Davidson and Thackeray will start a new saw-mill at Pontiac, Ottawa.

The Perrin Plow Company have more orders than they can fill, and are increasing staff and plant.

Burridge and Cooper have been literally forced out of their premises in Winnipeg by the unprecedented development of their Western trade, and are building a new store on Henry avenue.

The farmers of Ladner, B.C., are forming a joint-stock company to build and operate a grist-mill.

Brandon business has grown so much that the Hanbury Mfg. Co. are installing a new planing mill and sash and door factory.

AN AGGRESSIVE CANADIAN FIRM.

It is a pretty sure sign of Canada's awakening and advancement that several enterprising firms have been able to scale the high protective tariff wall Uncle Sam has built along his borders, and have descended on the American side of the boundary with a disposition to stay and enter into friendly competition with American producers.

Not the least notable among such aggressive establishments are the Canada Carriage Company, of Brockville, who, if the advertising space they carry in American trade papers counts for aught, find the market south of the line a profitable one.

There can be but one reason for the company's successful operation in the States, and that is, Americans know a good thing when they see it.

MACHINERY AND ELECTRICAL NOTES.

Machinery for the Mersey Tunnel is being shipped from America by the Westinghouse Electric Company, of Pittsburg.

The Hamilton Herald states that at the present time 60,000 persons in Canada are employed in the various lines of electrical business.

The Laurentide Mica Co., of Ottawa, have started operations with a staff of 50 girls. The product of this factory is sent to the Westinghouse Electrical Co., Pittsburg, Pa.

The differences between E. Leonard & Sons, London, Ont., and their boilermakers and helpers, have been amicably adjusted, and the strike, which lasted a day, is now an event of the past. By the settlement the helpers get 15c. per day advance, and the boilermakers 20c.

The shareholders of the Montreal Light, Heat & Power Company have authorized the issue of bonds and debentures to the amount of $4,000,000 for the acquisition of the Lachine Hydraulic & Land Company, the Standard Light & Power Company, and the Citizens' Light & Power Company.

Toronto's list of civil engineers has had a decided acquisition this week in the person of Mr. Alfred J. Stevens, Mem. Can. Soc. C.E., who has opened an office in the Temple Building. Mr. Stevens was formerly assistant engineer with the Intercolonial Railway, and while so employed, designed and constructed many of the important works on that road. He intends giving particular attention to the erection of power and construction of contractors' plants, draught apparatus and hot glass system of heating.

ELECTRICAL SUPPLIES CATALOGUE

If the style and printing of their recent catalogue be an indication of the class of work turned out by them, Veritys Limited, makers of electrical supplies, are in the forefront of high-class machinery factors. Their motors and dynamos are well known in England, and one of the best electric organ-blowing outfits is their "Astor-Lundell," which has given complete satisfaction wherever it has been installed.

DEPARTMENT OF ADVERTISING SUGGESTION AND CRITICISM

Edited by **W. Arthur Lydiatt,** TORONTO.

NOTE. Herein are discussed the principles and practice of advertising. Subscribers are invited to send Mr. Lydiatt specimens of their newspaper and other advertising, for the purpose of review in this department. Address care of Department of Advertising, HARDWARE AND METAL.

What are you doing to advertise your store? What methods have you found most successful in increasing business, and what schemes have you tried that didn't pan out just as you thought they would?

Take a half hour some day and write me—tell me what you are doing and what you have done toward extending the scope of your business. Then I can tell other readers about the things you have done that turned out successfully, and warn them against schemes that meant "wasted money." Don't hang back—tell your experience first. Make this department the medium for the exchange of ideas so that we may all profit by each other's experiences.—THE EDITOR.

ABOUT fifty per cent. of those retailers who make any effort to do good advertising use syndicate ads. Syndicate newspaper ads are ready-made ads. covering all the principal lines of retail trade, which are regularly sent to as many as will take them and pay for them.

The subject matter, while written for some particular trade or another, is usually of a general character, and with a few slight changes, might be used with equal effectiveness by merchants in any one of a half dozen trades.

Some of these ads are very good—and some are very bad.

The majority are neither.

They are written to meet the requirements of a great many different stores, so that it is next to impossible to inject any degree of individuality into them.

Used as written, they do not make for good advertising. But used as they ought to be used—merely as suggestions for ads.—they can be made of inestimable value to every retailer.

Looking through over a thousand of these ads. I found about 50 which were really good. Two or three hundred more of them could, with slight changes, be made useful. Most of the remaining ones offered suggestions for the subjects of as many ads., but in order to be of any use would have to be entirely re-written.

Most syndicate ads. are illustrated. In fact, it is usually for the purpose of selling the cuts for the illustrations that the ads. are written.

These illustrations are proportionately good, bad and indifferent, like the reading matter, though perhaps uniformly worse. The drawings are, as a rule, poorly executed, and the pictures devoid of interest, in many instances being absolutely meaningless.

Now it is pretty generally conceded that good illustrations are essential to effective advertising. An illustration when used in accordance with the meaning of the headline or text of the ad, conveys an idea to the mind of the reader quicker than would simple type argument.

But the trouble with most of these syndicate illustrations is that they do not illustrate.

The meaning of the word illustrate is to make plain—to simplify, and unless the illustration embodies this meaning, it would be far better for the advertiser to depend altogether on plain type.

Here's a "syndicate" illustration which was used to illustrate an ad. for a dairy:

The old gentleman is connected with a nursing bottle by the usual coupling, while the youngster gleefully puffs at a cigarette. It is called "Another Absent-minded Beggar" but might better be called "Another Absent-minded Sucker"—which appellation might fittingly be applied to the party who drew the picture, and to the man who would use it to advertise his business. It illustrates an ad. about milk, but might just as well be used to advertise a brand of cigarettes, a livery stable, or a circus.

The main purpose of an illustration in an advertisement is to convince the reader that the article offered possesses merit.

Still there are advertisers who think that pictures are used solely to attract attention, and believing this, they write their copy to fit the picture, whereas the picture should always be made to illustrate the copy. The copy is of primary importance—the picture is always secondary.

The text of the ad. and the illustration should always have a close connection, especially if the picture is intended to illustrate the article or articles advertised. The text should describe the article—the illustration picture it.

Of course, there are illustrations which are used for the same reason that a border is used—to make the ad. attractive in appearance—in which case it is not necessary that the picture should illustrate the text or the article advertised. And perhaps after all, this is the purpose of "syndicate" illustrations, but since an attempt is made to illustrate something (what that something is, is usually a puzzle) we feel justified in judging them critically.

Here is another syndicate illustration and headline, which is taken from an ad. about butter and eggs. This reproduction illustrates an illustration that does not illustrate.

A Sign of Quality.

The animal looks like one of those little Noah's ark cows we used to play with when we were children—or perhaps it's an "animal" biscuit. The whole picture might be a prize drawing from a kindergarten class.

It illustrates neither butter nor eggs, nor the headline, nor anything connected with the text of the ad.

And it is called "A Sign of Quality."

While illustrating syndicates are able to sell illustrations like this for ads., there is surely great room for improvement in retail advertising.

I'll have something more to say along this line in later issues.

A hardware dealer can't advertise garden tools too much just now. After the

snow has melted and the ground becomes soft a man's thoughts turn to his garden. He needs garden tools. He'll either use his old ones or buy some new ones and if you tell him about the kinds you have, and how much they cost, chances are he will come to you to get them.

An ad. something like the following, with a few prices added, ought to do:

EASY WORK
TO FIX THE GARDEN

if you have the right sort of **Garden Tools.**

Takes good tools to do good work at prices like these they're inexpensive.

We have anticipated your wants, and have a complete stock of the substantial kind of Spades, Hoes, Rakes, etc.

(PRICES AND PARTICULARS)

NEED ANY?

Hard, Ware & Co.,
246-8 Main St., - IRONTOWN.

THE UPS AND DOWNS OF BUSINESS.

WHEN does a hardwareman become discouraged? Hardware Hints answers with the following instances: "When there is such a hard wear on his book that they become heavy with uncollected accounts. When his stoves won't draw trade. When the scythes he bought last summer cut nothing but profits. When his girl stenographer asks him to razor wages, especially if he is temporarily strapped. When he finds that the guns won't go off, which may cause him to explode with wrath. When he can't get a head on his nails, or fails to see the point about a reduction. And finally, when the only advertisement with his name attached is inserted by the sheriff.

"But he has reason for rejoicing: When he counts his cash and discounts his bills. When he attaches credit to his name by not lending it. When his range of good lines includes a good line of ranges. When he doesn't allow the tail of expense to wag the dog of profit. When he keeps his eyes open to profit and does not countenance too many prophets who tell him he should buy goods whether he wants them or not. When he strikes a balance and never becomes unsteady on his footings. When he walks the chalk line in management but does not chalk up too many bad accounts, and lastly, but chiefly, when he and his books are posted and there are no deductions to be made for bad judgment and uncollected accounts."

Walton & Moulton have succeeded the hardware firm of Butchard & Co., Carman, Man.

PRINCE EDWARD ISLAND'S WINTER SERVICE.

By Frank S. Murdoch of the Canada Paint Co.

A TRIP to Prince Edward Island in winter is not always a pleasure excursion. Towards the end of December the heavy ice which forms in the gulf drifts into the straits and fills up the passage. At the time of confederation the Canadian Government promised to maintain a winter steamship service with Prince Edward Island. With this end in view they had an ice-breaking ship built and named her Northern Light. The Northern Light was a wooden steamship and did fairly good service for a number of years, but sometimes got stuck in the heavy ice, and was at times out as long as six weeks, making a trip which in good weather takes from five to six hours. Her route was from Pictou, N.S., to Georgetown, P.E.I.

Finding the Northern Light a failure, the Government sent to Scotland and had a steel ship of the most modern ice-breaking type built. This ship, in honor of the Governor-General at the time, was called Stanley. The Stanley did good work, but also, at times, found the heavy drift ice, which is sometimes 15 to 20 ft. thick, too much for her.

Three years ago, finding that this ship was not giving good satisfaction, still another steamer was ordered from the Clyde. She was called Minto, and has been giving good satisfaction until this winter. The Stanley started in December to make daily trips between Cape Tormentine, N.B., and Summerside, P.E.I., but early in January got stuck in the ice, and drifted down to the Nova Scotia Coast, off Pictou. The Minto, which was on the Pictou-Georgetown route, went to her rescue, but lost her propellor, which, of course, made her helpless. Both steamers were frozen in the ice for a month, and consequently communication with the island was cut off entirely.

Before the Northern Light was built, the mails and passengers crossed in iceboats from Cape Tormentine, N.B., to Cape Traverse, P.E.I. These boats have ever since been kept in reserve for emergencies. They are odd-looking craft, being a combination of a sleigh and a boat.

The ice boats are 18 to 20 feet long, Lapstreak build, and are sheathed from stem to stern with heavy tin plate. On the bottom of each boat is a pair of runners.

The boats' fitting out consists of three pairs of oars, two paddles, a small square sail and a water keg. Arranged along the sides are ten straps, five on each side. These are for the crew of six and the passengers, which are limited to four for each boat. When good ice is encountered the boat is hauled upon the ice field and all hands securely fastened to the boat by means of these straps, for perchance there may be a hole in the ice and if a man drops in one of these holes it would be impossible to fish him out as he would be rapidly carried away under the ice by the heavy tide. All hands haul the boat over the ice until water is again reached, when they launch their little craft and row or sail to the next ice, when there is more walking and more hauling.

The distance between the capes is only nine miles, but boats' crews have been known to be out for 24 hours, and have suffered severely from frost bites. The average time for crossing is from three to four hours. Anything under three hours is considered an extra good crossing.

When the steamers got stuck this year the ice boats with their jolly, hardy crews were called out, and the mails and passengers transferred for the first time in years by the "Capes."

WANT CHANGE IN MINING LAWS.

The Executive Committee of the British Columbian Mining Organization, will present a resolutions to the Provincial Government on April 20.

The special points covered are: The appointment of a competent geologist, modification of charter fees for organized companies, abolition of the existing 2 per cent. mineral tax, rebate of timber dues, the framing of a safe code of mine signals, exemption of Crown-land grants from taxation, establishment of fair income tax, rigorous treatment by the Government of those making fraudulent statements of British Columbian mining properties, boiler inspection reform, and details regarding Indian reserves and roads and trails.

HE KEPT KNIVES FOR YEARS.

"Do you keep knives?" asked an innocent-looking newspaper boy, popping his head into a well known hardware shop one evening.

"Oh, yes, we've kept them for years," returned the shopkeeper.

"Well," shouted the young imp, preparing to fly, "you should advertise 'em, and then you wouldn't keep 'em so long."

TRADE OBSERVATIONS

By Rambler.

Up from the south there cometh a voice,
Up from the south, where the soft winds blow,
It whispers a word and the brown old earth
Throbs and thrills with the tender glow,
Of telling again the grand old story
Of waking from sleep to spring-time glory.

SPRING is coming with all her beauties and attractions. These bright, warm days we have been having lately suggest to our mind that the season for the budding of all the different plants and flowers is drawing near. The woods and fields will soon be bright with the numerous kinds of wild flowers; the meadows will be yellow with dandelions; the shady hillside will be blue with violets, and the rivers and marshes will be beautiful in the sunshine with the blue and white fleur-de-lis waving in the breeze and the pretty yellow buttercups nestling in among the reeds and grasses.

* * *

With this pretty sight in our mind's vision, the thought naturally comes to us of how we are going to lay out our garden in order to have a repetition—although perhaps, a poor one—of nature's beauty within sight of our windows. We begin to look up all our old gardening tools, and find, perhaps, that the rake has disappeared in some mysterious way; that the hoe is weak and the handle split; that the spade is in fairly good condition, but might be better, and that the watering-can is entirely demoralized. Ah! next time we are down town we must remember to purchase these necessary articles.

* * *

Now is the hardware merchant's time to make a good window display of gardening tools, but "How to do it?" is the question. Of course there are very many and good ways which the merchant can think of and adopt. A scheme which would, I think, attract the attention of the public comes to my mind. The idea represented is unique although simple, and for that reason it would make a very suitable window display. The window is roughly made to represent a garden; this can be done well enough for the purpose without any elaborate fixings. The back of the window is closed in by an imitation fence; the floor of the window is covered with sand to represent a gravel path in the garden; and two stands of blooming plants in pots are placed in the window, one, the larger, being set across the corner made by the fence and the wall and the other right against the fence. A small hose coming through a hole made in the fence, although not being necessary, would give things a more real appearance. Now the window is all ready for the tools. I will not say anything about that arrangement, but let the dresser use his own judgment. He, having everything in front of him, can easily try different arrangements until he gets the most suitable. One word only! Make them appear as if they had just been thrown down there after use.

* * *

Now is the time for merchants, who handle sporting goods, to make a display of fishing tackle. With the return of spring comes the keen desire of the true sporting fisherman to be splashing through pools and wading rivers while "playing" the trout or salmon. The desire takes possession of him and he cannot resist it—it seems to be running through his blood; he must go and fish. It is not only the "true sportsman" who has this feeling when the fishing season opens. The little urchins, who are too small and unimportant to have the title of "sportsmen" to be applied to them, are also interested, and a striking display of fishing luxuries would appeal strongly to them. They would not be satisfied until they had coaxed enough from their dadys—or perhaps, in most cases, from their indulgent mothers—to buy the coveted articles.

* * *

A window neatly dressed with fishing goods of all kinds makes a pretty and striking appearance, especially to the eyes of the sportsman. He catches sight of the window and stops to feast his eyes on the —to him— enchanting sight. First he admires, then he wants. He tries to reason with himself somewhat in the following manner: "What do I want with those things? I have some pretty good ones at home. But say! it would be fine to have that fishing rod; mine isn't nearly so good. That basket would also be very much handier than that little, awkward thing I use. Hang it all, I must have that rod anyway!" He goes in and gets it. The next sport that comes along, having reasoned somewhat in the same way, finally purchases the basket, perhaps. The next is struck with some other article in the window. There is nothing like attracting people's attention to things in order to make sales. If people really want a ceratin article they will, of course, ask for it, but very often people forget their wants unless they are reminded of them; and window dressing is one very good way of doing so. Besides, even if people are not really in need of certain things they are very often persuaded to buy merely by having their attention drawn to them.

FOREST CITY GOSSIP.

LONDON, April 8, 1903.

Office of HARDWARE AND METAL.

INFORMATION regarding the condition of the hardware and metal trade, both in wholesale and retail branches, is this week a repetition of last. Shelf goods are still moving, but sales of fence wire and paints are a long way ahead. From far and near travellers' orders and letter orders keep dropping in by every mail.

* * *

The strike at Leonard's boiler works, which took place early in the month, when 45 men went out of work, has now been satisfactorily settled; the men state that their demands had been practically met by the firm, and they were content.

* * *

Alfred Watts and Wm. Lowry were at the Canadian Fire Engine Co.'s factory this week made the recipients of costly presents. These gentlemen will be much missed by their former associates, who wish them every success in their new occupation.

* * *

W. H. Edgecomb, of James Cowan & Co., hardware merchants, leaves this week on a three months business trip to the coast.

* * *

Mr. James Morrison, a merchant for over a quarter of a century on Dundas street east, died suddenly of apoplexy on Monday morning.

* * *

Lord Dundonald, of South African fame, and commander-in-chief of our Canadian militia, who is now visiting this city in his official capacity for the first time, was dined at the barracks last evening by officers of this district.

W. H. L.

W. D. Mace, Tamworth, Ont., has purchased Henry Hilton's interest in the Boyce Carriage Co., Winnipeg. Mr. Mace took over the management on April 1.

LAKE AND RAIL FREIGHTS.

NAVIGATION is opening up this year as early as has been the case for many seasons. Practically all the railway and boat lines have completed their arrangements, at least for the first of the season. Generally speaking, rates are the same both as to summer rail service throughout Ontario and Quebec and for lake and rail service to points west of Port Arthur. The Canadian Pacific Railway have issued a circular stating that from Tuesday next, April 14, their boats, "Alberta," "Athabasca" and "Manitoba," will leave Owen Sound every Tuesday, Thursday and Saturday, and that agents commence at once to accept lake and rail freight for Port Arthur, Fort William and points beyond, also for Georgian Bay ports and Sault Ste. Marie.

The Northwest Navigation Co. have issued their schedule of sailings from Sarnia for Sault Ste. Marie, Port Arthur, Fort William and Duluth. Their boats will leave Sarnia on Mondays, Wednesdays and Fridays, starting next Monday. This line provides G. T. R. connection to Lake Superior points and Ontario connections for the Canadian Northern at Port Arthur; the C. P. R. at Fort William; the Great Northern and the Northern Pacific at Duluth. The Canadian Northern offers freight service via this line as far as Erwood, N.W.T. and Grand View, Man.

The Northern Navigation Co. start their service for Georgian Bay ports, connecting with the Canada Atlantic at Depot Harbor, on Monday, April 13. The "Soo" division of this line starts its sailings from Collingwood on Tuesday, April 14, and will continue on each succeeding Tuesday, Thursday and Saturday, giving both C. P. R. and G. T. R. connections at Georgian Bay ports, and C. N. R. and C. P. R. connections at Port Arthur and Fort William.

THE BOOM IN IMMIGRATION.

THE enthusiasm manifested in all parts of Canada over the remarkable increase of immigration to the Dominion, particularly from Great Britain and the United States, is neither surprising nor unwarranted.

For years we bewailed the "exodus" of the young men of the older provinces to the United States. For decades the cry has been, "All that Canada needs is population." It is but natural, therefore, when, instead of the "exodus," we have an "influx," an "American Invasion"; when we see our fertile lands of the Northwest filling with a population of the most desirable class, that patriotic Canadians should have visions of our Canada taking her rightful place as one of the first countries of the earth; that keen-sighted Canadian business men should see ahead an era of progress and prosperity, and that all Canadians should extend an enthusiastic welcome to the newcomers.

One of the most satisfactory features of the situation is that Canada has something concrete and valuable to offer the army of settlers daily arriving. These men have not been brought to Canada on any false representations—in the hope of a success in life that is not justified by existing conditions. True, there may be a bad crop year in the Northwest, but judging (and the judgment is fair and sound) from the past, the many fat years so much more than compensate for the few lean ones, that the immigrant who is capable of hard work and of adapting himself to the conditions need have no fear of his future.

SOCIETY AND THE BICYCLE.

THERE is an impression held by a number of people in Canada, as well as in the United States, especially in the larger cities, that the wealthy, or rather the fashionable, people have given up the bicycle; that they do not use it for either pleasure or business; that messenger boys and mechanics are the only people who use the bicycle to-day.

Needless to say, an even superficial study of the conditions would readily show the fallacy of this idea. True, the fad made of the bicycle by the fashionable set a few years ago soon spent its force, and now the "100" have ceased to form clubs, organize runs, parades, etc., yet, to say that the bicycle has been discarded by society is far from the truth, for both men and women of this class use the bicycle for pleasure and for exercise in the open air. Instead of the parade in the city, as in days gone by, the bicycle is used at the country places of the wealthy to an extent that would surprise one who judges from what he sees in the cities.

Neither golf nor the automobile has superseded the bicycle in the minds of those seeking health and pleasure. If it has been neglected it has been by the imitators of the fashionable, who so readily "caught on" to the idea of party runs and parades, and who literally covered the roads during the fad days. These to-day have dropped out, but now the wealthy are taking advantage of the excellent roads adjacent to the city and of the highly improved bicycle as at present constructed to derive a pleasure which is secured in no other way than in bicycling.

Hardware dealers should thoroughly recognize this fact, and should be ready to use it in meeting the arguments of those who say that the bicycle is "out of date" for pleasure purposes. It will be found that the more clearly this argument is met by the bicycle dealer the more ready will the average buyers be to recognize the real merit of the bicycle.

Knowledge acquired at school and college is not well secured until the possessor of it has had years of experience in practical life.

GIVE ENCOURAGEMENT TO LOCAL INDUSTRIES.

THERE is no class of merchant that should take a more comprehensive and intelligent interest in the matters which affect the prosperity and growth of the municipality in which he does business than the retail hardwareman. If the people of his town are busy and are receiving good wages; if new families are continually coming into his neighborhood, his business is bound to expand and his profits are sure to increase. It is, therefore, but reasonable to expect that when any matter of public interest is broached, the retail dealers of the locality will be at least interested, and that they will, if possible, lend their energies to effect any improvement suggested.

For this reason the extracts quoted below from The St. John, N.B., Sun, should receive the most serious consideration of the business men of that city:

In shipbuilding days, St. John was the greatest industrial centre in Eastern British America. The lumber industry is now by far the greatest that is carried on in this neighborhood. That, like shipbuilding, is a trade to which our people naturally turn. For it we have abundant raw material. We have cheap water power and steam power, cheap transport for logs, and for the produce of the mill and factory. Why not, then, develop this industry as far as it will go, and ship the product in the most advanced condition? * * * St. John is not more than holding its own, if it is even doing that, as a manufacturing centre. As a seaport, a great advance has been made by the development of the winter business. As a commercial and distributing centre, this city has kept well to the front. But, as an industrial centre, there has been no considerable development during the last decade. Some industries have expanded and prospered. Others have continued without much increase or decrease in the number of hands employed. In some industrial lines there is less activity than 10 or 20 years ago.

The matter which suggested these remarks on the part of The Sun was a proposition that encouragement should be given to a furniture factory. It is pointed out that the greater part of the soft wood shipped from New Brunswick is sent to Great Britain in the form of deals, and that the least possible amount of labor and skill is expended in the province on the hardwood products sent abroad.

While there is no direct connection between the retail hardware business and the manufacture of furniture or other products from lumber, yet the encouragement of such an industry with the resulting increase of industrial activity in St. John would be bound to have its effect on the local hardware trade. Therefore, the retail hardware merchants of the town should lend what influence they have to encourage any such proposals of new industries. And what is true in this case of St. John is true in a score of cases of other towns.

ATTRACTIVE HARDWARE STORES.

MUCH has been said and written about the improvement which has been made during recent years in the appearance of Canadian hardware stores. Window display and interior decoration have received a large share of attention, with the result that the majority of retailers' stores have a much more inviting appearance than was the case a few years ago.

Yet, there is room for still greater improvement. The average hardware store is neat and clean, but it lacks—in the cities in any case—the attractive and pleasing appearance that makes any kind of store popular with the ladies.

Is there any hope of making a hardware store popular in the sense that a dry goods, a florist's or a jewellery store is popular in Canada? The answer must be in the affirmative, for the reason that hardwaremen in several Canadian towns have made their stores as attractive and well-patronized as any in the town.

In many cases, however, hardwaremen have apparently not made any attempt to win the attention and approval of the ladies. In arranging their stock on shelves, counters, floors, and even in their window displays, there seems to be an entire lack of method or purpose. In a few cases the goods seem to have been thrown or shoved into place. More frequently the merchant and clerks have had due regard for neatness, but do not seem to realize that artistic effects are possible or would be appreciated in a hardware store.

There are, nevertheless, many lines which the hardwareman sells which could be made to add to the attractiveness of his store, both from the masculine and feminine standpoint. It would be folly to try to make artistic a display of staples such as nails, rope, window glass, metals, etc., but if such lines as cutlery, silverware, house-furnishings, lamps and sporting goods were bought wisely and attractively arranged in the store they could be made as interesting a feature as could be shown by any class of merchant. But the hardwareman who makes of these lines as inviting a display as might be done is rare indeed.

The representative of a large English brass and copper art furnishings house remarked to the writer this week that Canadian hardwaremen did not make nearly as good use of house-furnishings as is done by the English ironmonger. With the latter this line not only directly adds to his aggregate trade and to his net income, but it is made one of the most popular features of his store, because of its own beauty and attractiveness. The English ironmonger's store is consequently, he believes, a more popular store with all classes than the Canadian hardware store.

If attractive displays of cutlery, silverware, lamps, etc., as well as housefurnishings, were part of a hardware stock, there would be, no doubt, a greater possibility of making the appearance of the whole store more pleasing than is the case to-day.

This would probably necessitate extensive alterations to many stores, for it would be useless to try to make a display of these lines without proper facilities. But to the hardwareman who can find the money for such an advance this step would unquestionably be a wise one; money so spent would be well invested, for if the hardware dealer is to preserve his trade against the catalogue houses he must make his store so attractive that the ladies will like to buy goods in it.

NEW BANK AT CARDINAL.

There is no question of the enterprise of Canadian banking establishments. A few weeks ago arguments were advanced in these columns, at the suggestion of a wide-awake traveller, showing the opening for

a branch of some prominent bank at Cardinal, Ont.

Since that time representatives of several banks have been to Cardinal to look over the field. The Bank of Toronto has already opened a bank, with Mr. Kimball, late of the Gananoque branch, as manager.

The business men and general public of Cardinal and district are to be congratulated in having a branch of such a progressive institution in their midst.

SPRING CLEANING.

HOUSE-CLEANING season is here. The custom of making a thorough overhauling of the moveable articles in the house, cleaning the carpets, the curtains, the furniture, windows, shelves and every nook and corner, is a good old custom that men would never have thought of if they alone were the inhabitants of the earth, but owes its origin to that particularly cleanly animal, woman.

But since the worse half of each couple has been taught that it is necessary in the house, might he not awaken to the fact that such an operation would do much good to the house he rules over, namely, his store. The hygienic standard of a home is not necessary in a store; but cleanliness is as necessary in one place as the other for the sake of the goods and to give a favorable impression to customers.

A thorough overhauling of the goods, not only to dust them, as is done in every store, but to rearrange them in order to give them something of the appearance of "newness," will do much good. Even their place in the store can be changed from one side to the other, at the rear or in the centre, according to their importance. The counters and showcases, if moveable, can be rearranged so as to give a different look to the store interior. The old advertisements, showcards, pictures, and all the rest of them can be removed and be replaced by others. Such a change can be produced in this way that customers will look around them with pleased surprise at first; and afterwards look around to see what they can see, since they have found out that they didn't know all the merchant had to show them.

This shifting of things from place to place is a bother, no doubt, but it comes no oftener than Christmas, and very little is ever obtained without bother anyway. A fresh appearance is an excellent thing for a retail store, and this is the way to get it.

THE TURPENTINE MARKET.

TOWARDS the end of last week the Savannah turpentine market, which has been controlled by local manipulators for several months, and which has maintained a remarkable firmness during that period, showed its first tendency to weakness, prices being lowered slightly. Each day since the weakness has been more apparent, and while offerings have not been large, buyers have held back so consistently that holders are now offering prices 10 to 11c. lower than prevailed the week previous.

At the moment a steadier feeling is manifest both in New York and at Savannah, but there seems to be no disposition to advance prices to the level which has been ruling for some time. The local market has not felt the effect of this change in conditions at the primary markets, as the stocks here were bought at old prices and are so light that holders are not disposed to reduce prices until offerings bought in Savannah at current quotations start to arrive here freely.

Local jobbers maintain that the demand, while of a hand-to-mouth nature, is bound to consume present holdings before cheaper turpentine can be offered here.

AN ADVANCE IN PARIS GREEN.

AN advance of 3c. per lb. has been made by the largest Canadian manufacturer of paris green. The new price, however, cannot yet be accepted as the sole market quotation, for the reason that jobbing houses who have good stocks bought at a lower range of values, and who have been unable to dispose of the same owing to the severe cutting which has prevailed during the season, are now disposed to clear out at least some of this stock before advancing their quotations to meet those of the manufacturers. It is quite probable, however, that the market has seen the last, for some time at least, of the ridiculously low prices that have been prevailing.

Several retailers, who had fairly large stocks left over from last year's poor season, have not yet placed orders for this year, and if there should be a good crop of potato bugs, there will be, in all probability, considerable business done yet, and jobbers who have not raised their prices hope to clear out much of their surplus for this trade.

A PREMIUM FOR QUICK WORK.

A PAPER was recently read before the Institute of Mechanical Engineers in Great Britain on the premium system as applied to engineering shops. The system, in brief, is the stipulating of a certain time in which a workman is supposed to complete a certain job. If he completes it inside the time allotted he is allowed a premium thereon, in proportion to the ordinary wages which he receives. For instance, suppose a man is allowed 16 hours to do a job, but saves four-sixteenths of the time allowed, that is 25 per cent., and accordingly his wages would be increased for the time worked. The time allowed includes all time necessary to procure tools, set up machine and obtain material for doing the job. Should the workman not complete the article in the time allowed he of course loses the premium, but there is no reduction made in his regular wages. If he has several jobs on hand and loses the premium on one it does not effect the premium on the others. A defect in the article also means the loss of the premium only and nothing in the regular wage rate.

Each workman, on starting a job, receives a job ticket, on which is a description of the job, the time when started and the time allowed. When the job is finished, he returns his ticket to the foreman, who, if satisfied with the work, initials and writes on it the time when finished.

There is much in the system which should commend itself to all who are interested in economical questions. It may not apply to every phase of industrial life, but, it seems to us, could be made to apply to a great many. Possibly it may not meet with the approval of some champions of organized labor, with whom the tendency appears to be to produce as little work as possible, but it certainly is in the interest of the working man, as well as that of the employer. it encourages him to do his work more promptly without at the same time risking its efficiency, while to himself there comes reward in the shape of increased remuneration.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

HARDWARE.

Montreal, April 9, 1903.

THE new freight rates having taken effect on April 1 heavy shipments seem to be the most prominent feature in the hardware markets this week. All the wholesale men are filling orders which were booked as far back as February 1st for shipment after the summer rates came into effect. Owing to the scarcity of material used in the manufacture of wheelbarrows and the high prices paid for same, together with the increase in wages, the price of wheelbarrows has advanced from $2 to $3 per dozen. The fixed price on oiled and annealed wire is $2.50 base, 10 per cent. off, and bright wire $2.50 base, 2 per cent. thirty days, or sixty days net. Heavy strap hinges have advanced 25c, and sizes 6, 8, 10 in. now sell for $1.50, and 12 in. and over, $3.50. The new list on Champion scales, which we mentioned in our last report, has been issued, and reads as follows: Even balance 4 lb., $5.00, stamping, 30c.; even balance 10 lb., $7.50, stamping, 50c.; union, 240 lb., $10.50, stamping 50c.; platform, 600 lb., $28.00, stamping, $1.00; platform, 1,200 lb., $33.00, stamping, $1; platform, 2,000 lb., $40.00, stamping, $1; platform drop lever, 2,000 lb., $48.00, stamping $1; discount 50 per cent. on scales, stamping, net. The market generally is reported to be firm, and nearly all lines are moving rapidly.

AGRICULTURAL WRENCHES.—The market is firm, and several good orders have been booked during the week. Our quotations are as follows: No. 6, $9; No. 8, $10; No. 10, $12; No. 12, $14; No. 15, $24; No. 18, $30; No. 21, $36. Discount 70 per cent.

CANT HOOKS.—Exceptionally large orders for cant hooks have been received by several houses since April 1. Our quotations are as follows: No. 12, $10.00; No. 8, $11.50; No. 8a, $11; No. 2, $12; No. 7a, $16; No. 6a, $14.50; No. 5a, $11.50.

LAWN MOWERS.—There has been a falling off in orders during the past few days, but dealers anticipate a much better season than last. Our quotations are as follows: 10½-in. wheel x 12-in. cutter, $7.50; by 14-inch cutter, $8.00; by 16-inch do, $8.50; by 18-inch do, $9.00; by 20-inch do, $10.00. Star, 9-inch wheel by 12-inch cutter, $5.50; by 14-inch do, $5.75; by 16-inch do, $6. Daisy, 8-inch wheel by 12-inch cutter, $4.90; by 14-inch do, $5.10; by 16-inch do, $5.30. Philadelphia pattern, 7½-inch wheel by 10-inch cutter, $6; by 12-inch do, $6.50; by 14-inch do, $7; by 16-inch do, $7.50. Grass boxes are quoted as follows: 12-inch, $2.25; 14-inch, $2.25; 16-inch, $2.50; 18-inch, $2.50; 20 inch, $2.75. The discount on all the above is 50 per cent. off.

BARB WIRE.—A brisk movement is reported in barb wire for immediate shipment. We are still quoting as follows: $2.80 per 100 lb. f.o.b., Montreal, $2.45 f.o.b. Cleveland in carlots of 15 tons, and $2.67½ f.o.b. Cleveland in smaller lots.

GALVANIZED WIRE.—The demand is only fair and prices are steady. Quotations are as follows: No. 5, $3.70; No. 6, 7 and 8, $3.15; No. 9, $2.55; No. 10, $3.20; No. 11, $3.25; No. 12, $2.65; No. 13, $2.75; No. 14, $3.75. In carlots, f.o.b. Cleveland: No. 5, $2.20; Nos. 6, 7, 8 and 9, $2.15; No 10, $2.20; No. 11, $2.25; No. 12, $2.30; No. 13, $2.40; No. 14, $2.50. In less than carlots, 12½c. per 100 lb. extra is charged.

SMOOTH STEEL WIRE.—Fixed prices have been arranged on both oiled and annealed wire and bright wire. Prices are still as follows: Bright and annealed, $2.50 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE STEEL WIRE.—The movement in this line continues good with a firm feeling as regards prices. The discount is 25 per cent. with the following extras: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c. and ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—There is a fair demand for brass and copper wire at unchanged prices. The discount is 60 per cent.

PRESSED SPIKES.—A decided improvement is noted in this market, and the quotations are firm. The discount is 20 per cent, f.o.b. Montreal, Toronto, Hamilton, London, St. John and Halifax.

FENCE STAPLES.—There is a small movement reported, but few orders are being booked. Quotations are as follows: $3.00 per 100-lb. keg for galvanized staples and $2.80 for bright, with 25c. extra for 25 and 50-lb. packages.

WIRE NAILS.—The market is still firm but as yet no advance is reported. We quote: Carlots, $2.40 and small lots, $2.45 per keg f.o.b. Gananoque, Montreal, London, Hamilton, Toronto, Brantford, Windsor, Ont., and St. John.

HORSE NAILS.—There is no change in prices, and the amount of business being done is considered good for this season of the year. Quotations are as follows: "M" brand, "Oval" and "New City" heads, 55 per cent.; "Countersunk" heads, prices quoted on application. "C" brand, 40, 10 and 7½ per cent. off; "Monarch," 60 per cent. and "Peerless," 50 per cent.

HORSESHOES.—Only a limited amount of trade is doing, and prices are steady. Quotations are as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.40; No. 1 and smaller, $3.65; snow pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.55; No. 1 and smaller, $3.80; featherweight, all sizes, 0 to 4, $5.10; toe weight, all sizes, 1 to 4, $6.35. Shoes, more than one size in a keg, 10c. per keg extra f.o.b. Montreal only.

RIVETS AND BURRS.—The prices remain unchanged and discounts are: Best iron rivets, section carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS AND NUTS.—Prices remain very firm, owing to the scarcity of nuts. The discounts are as follows: Norway carriage bolts, 55 per cent.; common, 50 and 10 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 and 10 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50, 5 and 10 per cent. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ½c. per lb. is allowed.

SCREWS.—The market is steadier than for weeks past. Quotations are as follows: Round head bright, 82½ per cent.; flat head bright, 82½ per cent.; brass, round head, 75 per cent.; brass, flat head, 80 per cent.

CORDAGE.—British pure Manila has been reduced ½c. during the past week. We quote: Pure manila, 14c.; British pure manila, 12c.; sisal, 11c.; double lathyarn, 10½c.; single lathyarn, 10c.

BUILDING PAPER.—There is a good inquiry for building paper, and as a boom is looked for in the building trade during the coming summer dealers look for a heavy season. Quotations are as follows: Tarred felt, $1.75 per 100 lb.; 2-ply, ready-roofing, 90c. per roll; 3-ply, $1.15 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 55c. per roll; tarred fibre, 60c. per roll, O K and I X L, 65c. per roll; heavy straw and sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—A very active market is reported and shows a tendency to increase. At present the ruling price is $1.40 per 100 square feet.

FIREBRICK.—Several orders have been booked since our last report. We quote: English, $16 to $22, and Scotch, $17 to $22 per 1,000.

CEMENT.—Inquiries are being received daily and the market is more active. We now quote as follows: Canadian cement, $1.90 to $2.25; German, $2.25 to $2.40; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl. ex-store, and American, $2.20 to $2.40 ex-cars.

COAL HODS.—The quotations are as follows: Japanned, 16-in., $4.50 per doz.; 17-in., $4.80; 18-in., $5.10; with gold band, 17-in., $5.10; 18-in., $5.40. Galvanized, 16-in., $6.20; 17-in., $6.50; 18-in., $6.80 per doz. The discount is 45 per cent.

FIRE SHOVELS.—The following are the discounts on fire shovels: No. 70, 38½ to 40c. per doz.; No. 55, 55 to 60c.; No. 57, 82½ to 90c.; No. 60, 82½ to 90c.;

LANTERNS.—A small trade is being done at last week's quotations, which are Tilt, lift or hinge, No. 0, $4 per doz.; Cold Blast, $7.00 per dozen; dash board, No. 0, $5.75 per dozen; cold blast dashboard, $9 per dozen. Extras are as follows: Japanning, 50c. per dozen; copper plating cold blast, $2 per dozen. The prices quoted are f.o.b. London, Hamilton, Toronto, Belleville, Kingston and Montreal.

SHOT.—The market is steady and no further advances are looked for at present. We quote: Ordinary drop shot, A.A.A. to dust, $6.50 per 100 lb.; chilled Nos. 1 to 10, $7 per 100 lb.; buck and seal, $7.50 per 100 lb.; ball, $8 per 100 lb. Trade discount, 15 per cent. f.o.b. Montreal, Toronto, Hamilton, London, St. John, N.B., and Halifax.

METALS.

The iron market shows marked improvement, as the difficulty of scarcity of fuel and lack of transportation facilities is gradually being overcome. The movement in structural iron, railway and agricultural implement iron and steel keeps up well, and indications point to continued activity well on into the year 1901, unless the movement is arrested by strikes or diminished by cancellation. Most metals are firm. A good inquiry is reported for cements, the season being now far enough advanced for the movement in this line to start, and a contract involving some 20,000 barrels was placed with an American firm by the Montreal Light, Heat & Power Co. for their Chambly works. Sheet zinc is very scarce in Montreal and prices are looked upon to advance at any moment, although it can be bought cheaper to-day in the United States than some time ago. The foreign market is without feature and no advances are reported. The demand is brisk, and according to a letter received a few days ago the supply is booked well into the summer. Canada plates are very brisk on the English market, and the prices are firm.

BAR IRON.—The supply is more plentiful than for some time past. We quote as follows: Merchants' bar, $2; horshoe iron, $2.25, and forged, $2.30.

BLACK SHEETS.—Prices are steady with a brisk demand. Our quotations are as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50; 8 to 20 gauge, $2.50

GALVANIZED IRON.—With the opening of navigation dealers will be taxed to their utmost to fill orders already booked. We quote: 28 Queen's Head, $4.50; Apollo, 10¾-oz., $4.30; Fleur de Lis, $4.15; Comet, $4.10; "Bell" brand, $4.05. For less than caselots 25c. extra is charged.

LEAD PIPE.—The lead pipe market is very brisk and the prices firm. We quote: Composition and waste, 8c. and ordinary, 7c. The discount is 30 per cent.

IRON PIPE.—Several large shipments have been made during the week. We quote as follows: Standard pipe per 100 ft., in lengths under 19 ft.: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85; ¾, $3.65; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.20; 2 in., $16.85. Extra heavy pipe,

Wire Rope.

OPEN HEARTH STEEL

THE MARKETS

plain ends, are quoted per 100 ft. as follows: Black, ½, $4.20; ¾, $5.25; 1-in., $7.55; 1¼, $10.55; 1½, $12.75; 2-in., $17.00. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings on extra heavy 5 per cent. net is added. Trade discount, 5 to 7½ per cent.

TINPLATES.—The market is steady and a fair trade doing. We now quote: Coke, $4.25 to $4.50 and charcoals, $5 to $5.25.

SOIL PIPE AND FITTINGS.—A few orders were booked the first of the week, but as yet there is not much doing. The discounts are as follows: Light soil pipe, 3 to 6 inch, 50 per cent.; medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8 inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.: extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—Considerable difficulty is experienced in filling the orders on hand. We quote $33.50 to $34.50 ex-store, Montreal.

INGOT COPPER.—The market continues firm, but no further advance has taken place. We quote $15.50 to $15.75 per 100 lb.

INGOT TIN.—This market remains unchanged in price, but the demand is somewhat heavier than last week. The ruling price is $33 to $33.25 per 100 lb.

PIG LEAD.—A strong feeling exists on the pig lead market, and small lots are being ordered. We quote carlots at $3.50 and less than carlots at $3.75.

STEEL.—Structural steel shows a decided improvement. Our quotations are as follows: Mild, $2.05; sleighshoe, $2.10 to $2.20; tire, $2.15 to $2.25; spring, $2.85 to $3; reeled machinery, $2.75 to $3; toecalk, $2.60 to $2.75; machinery (iron finish), $2.10; mild steel, $2.05; square harrow, $2.15.

TOOL STEEL.—A scarcity is reported in some quarters, but the majority of local dealers claim they can fill all orders. We quote, Black Diamond, 8 to 9c.; Sanderson's, 8 to 9c., according to the grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 10 to 20c.; "Air Hardening," 50 to 65c. per lb.

CANADA PLATES.—A much easier feeling is noted on the English market, and the local market is steady. We quote: 52s $2.60 to $2.70; 60s, $2.70 to $2.80; 75s, $2.80 to $2.85; full polished, $3.75 and galvanized, $4.25 to $4.35; galvanized, 60s $4.45 to $4.55.

TERNE PLATES.—The current price is $7.75.

COIL CHAIN.—There is a good movement in coil chain, principally with lumber and navigation men. Quotations are: No. 6, 11½c.; No. 5, 10 to 10½c.; No. 4, 9 to 9½c.; No. 3, 8 to 8½c.; ¼-in., 6½ to 7c. per lb.; 5-16, $5 to $5.20; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4; ½, $3.95 to $4.05; 9-16, $3.85 to $3.95; ⅝, $3.65 to $3.75; ¾, $5 to $5.20; ⅞, $3.30; 1-in., $3.15 to $3.25. In carlots an allowance of 10c. is made.

SOLDER.—No further advance has taken place, but the market is very active, and has a tendency to go higher. We quote: Bar solder, 20c., and wire solder, 19c.

ZINC SPELTER.—A fair trade is reported. We quote $6.25 to $6.50.

SHEET ZINC.—A great scarcity in sheet zinc is noted and an advance may be looked for. We quote $6.75 to $7.

SCRAP METALS.

A large amount of scrap metals is daily arriving, and the local dealers say that there is an abundance of all kinds with the exception of copper, which continues to be scarce, and shows every indication of an advance in price. Cast iron, which showed a scarcity a few weeks ago, has fallen off considerably in sales, and a good supply is now on hand. Our quotations are as follows: Heavy copper and wire, 10c. per lb.; light copper, 9c.; heavy red brass, 10c.; heavy yellow, 8½c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2½ to 2⅝c.; iron, No. 1 wrought, $17 to $17.50; No. 2, $7.50 per ton; machinery scrap, $17.50 to $18; stove plate, $13; malleable and steel, $6; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6¼ to 6⅜c. per lb.

HIDES.

There has been no change in the hide market during the past week. Calfskins seem to be firm at 11 cents, but sales are small. We quote as follows: No. 1 hides, 8c.; No. 2, 7c.; No. 3, 6c.; calfskins, 9 to 11c.; and lambskins, 75c.

RAW FURS.

Further changes in the price of raw furs at the March sales in London include: black muskrat, 10 per cent. higher than March, 1902; fall muskrat, 20 per cent. higher; winter muskrat, 10 per cent. higher; spring muskrat, same as last January; Kangaroo, wombat and wallaby, same as last January; real and bastard chinchilla, same as last January; Australian opossum, 7½ per cent. higher than last January; American opossum, same as last March; squirrel, 40 per cent. higher than last March. The sales showed pretty general advances and the outlook is for dearer furs. We quote:

ONTARIO MARKETS.

HARDWARE.

Toronto, April 10, 1903.

BUSINESS continues exceptionally active, orders coming in for the delivery at once of all lines booked for May and June, both for Ontario and Northwest account. Materials for building purposes and for use in manufacturing are in particularly good request. In screws, the demand on forward account has been larger than usual, and is well cleaned up, but good orders are coming in daily for present delivery. Wire nails present a unique feature. Very heavy booking has been reported for some time throughout Ontario and during the past fortnight several large orders have been received from the Northwest. As a result all mills are behind their orders and are likely to continue so for some time. Owing to the firm feeling in the United States, and to the fact that according to present quotations it would cost about $2.90 per keg to lay down nails from the United States on this market, it is maintained in some quarters that the Canadian nail manufacturers could easily secure an advance of 10 to 50 cents over present quotations, yet there have not been any indications of such an advance being made. Manufacturers of axe, fork and shovel handles have, owing to the advance in the price of hickory, put up the price of these goods. An advance is anticipated in Vaughn's post hole augurs. White door knobs have been advanced 20c per dozen. Barn door hinges are 25 to 50c. higher. The discounts on malleable fittings have been cut in two within ten days and are now 15 per cent. Cast iron fittings are also dear. In other lines the market shows a decidedly firm tone but is without change.

BARB WIRE.—An excellent trade continues from all quarters, shipments to the West being particularly large. The base price is quoted as follows: $2.25 from

MONTREAL NOTES

An advance of 25c. has taken place in the price of strap hinges.

Large shipments have been received during the month by the Canada Hardware Co., Limited, of King air rifles, cast iron hammers and hatchets.

Cleveland and 10c. less in carlots. From stock, Toronto, $2.80.

GALVANIZED WIRE. A good trade is also doing in this line. The prices are firm throughout. Quotations are as follows: Nos. 6, 7 and 8, $3.15 to $3.35 per 100 lb.; No. 9, $2.50; No. 10, $3.20 to $3.40; No. 11, $3.25 to $3.45; No. 12, $2.65; No. 13, $2.75; No. 14, $3.75 to $3.95; No. 15, $4.30; No. 16, 4.55. Nos. 6 to 9 base from Cleveland are quoted at $2.27½ in less than carlots.

SMOOTH STEEL WIRE. The demand for oil and annealed continues excellent, while the sale of tinner's wire has improved materially. The base price is $2.50 per 100 lb. Oiling 10c.; coppering 60c.; and tinning, $2 per 100 lb. extra. Shipping points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—Business has been so brisk that practically all the mills in the country are behind their orders. Prices are firm, but have not advanced in anything like the same proportion as the price is quoted as follow .25 from this market and the United States. We quote: $2.45 per keg and 5c. less for carlots. The shipping points are Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS. There is considerable improvement in the demand for all sizes, particularly shingle nails. An advance of five cents per keg is noted in the United States, but the market here is unchanged at $2.50 per keg.

HORSE NAILS. A good steady trade is doing, with prices firm, and discounts as follows: "C" brand oval head, 40 and 10 and 7½ per cent.; on "Monarch," 60 per cent. and "Countersunk" head, 60 per cent.; on "Peerless," 45 and 7½ per cent.

HORSE SHOES.—An improvement in the demand is noted and prices are steady, as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—There is an excellent demand for immediate delivery and the mills are likely to be kept going to the limit for some time. We quote: Flat head bright, 87½ per cent. discount; round head bright, 82½ per cent.; flat head brass, 80 per cent.; round head brass, 75 per cent.; round head bronze, 70 per cent.; flat head bronze, 75 per cent.

RIVETS AND BURRS. All classes of buyers are paying considerable attention to this line, manifesting a continuance in manufacturing activity. Prices are firm. we quote: Iron rivets, 60 and 10 per cent. discount; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.

BOLTS AND NUTS. A good steady trade is reported with prices stiffening throughout. Quotations are as follows: Carriage bolts, common ($1 list), 50 and 10 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3 list), 55 and 10 per cent.; machine bolts, all sizes, 50, 5 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.; elevator shaft and whiffletree bolts,

SPADES AND SHOVELS. The principal feature of this line is the trouble retailers are experiencing in securing their supplies. Discount is 15 per cent and the list price has been reduced $3 per dozen for Old's goods, $2 for Gray's and $1 for Burns'.

HARVEST TOOLS. The movement continues large and the advance in shovel and fork handles has given a further impetus to buying. Discount is 60 per cent.

REFRIGERATORS. An excellent trade is opening up in this line. Prices are ranging slightly higher than last year.

CARPENTER'S TOOLS. There is an excellent trade doing. The discount is steady at 55 per cent.

LAWN MOWERS. Manufacturers are not yet caught up with orders, which continue to come in nicely. We quote: Woodyatt, 12 in. wheels, $5.50; Daisy, 22 in. wheels, $4.90; Philadelphia, 10 in. wheels, $6; Ontario, 10 in. wheels, $12.75. The discount is 50 per cent.

BUILDING PAPERS. There is an excellent trade doing. Prices are steady as follows: Tarred felt, $1.75 per 100 lb.; 2-ply ready roofing, 90c. per roll; 3-ply, $1.15 per roll; carpet felt, $2.25 per 100-lb. dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre 50c. per roll; tarred fibre, 60c. per roll, O K and I X L, 65c. per roll; heavy straw and sheathing, $30 per ton; slaters' felt, 60c. per roll.

RANGE BOILERS. The demand for this line from Ontario points continues large and an improvement is noted on North Western account. We now quote: 18 and 30 gal., $5.50; 35 gal., $6.50; 40 gal., $7.50; 52 gal., $12.50; 63 gal., $19; 82 gal., $23; 100 gal., $31 and 120 gal., $37.

SCREEN DOORS. Trade is moderate, with prices firm. Our quotations are: Screen doors, common, two or three panel, walnut stained, 4-in. style, $6.80; stained, yellow or green, $7; in natural colors, oil finish, $8.15; 3-inch style, 20c. per dozen less.

CEMENT.—The market has been stiffening for some time and now prices for large quantities are about ten cents higher than was the case when the season opened. Several large contracts have been made on municipal account, while the demand for building purposes throughout the country generally continues to manifest a steady growth. Prices are unchanged for ordinary quantities. We quote: Canadian Portland, $2.40 to $2.50; German, $2.30 to $2.60 and hydraulic, $1.50.

METALS

An exceedingly good movement is recorded, notwithstanding the fact that tin, copper and antimony are lower on both English and United States and easier here. The pig iron market is steady as far as present deliveries are concerned, but buyers hesitate to place orders too far ahead, as opinion differs as to which way the market is likely to turn. The tin market has gradually weakened during the week, having lost £4 per ton on the London market in the week. On Wednesday it steadied up, gaining back over £1 of this reduction. There is no change in any prices here.

PIG IRON. The market is somewhat unsettled, but a big business is doing for

present deliveries. There is little No. 1 offering for future delivery, but No. 2 can be had at $22.50 to $22.75. No. 2 Summerlee continues steady at $25 on track, Toronto.

STEEL BOILER PLATES—There has been a good demand and prices are firmly maintained. We quote $1.96 f.o.b. Toronto.

TOOL STEEL—A good movement continues at steady prices. Our quotations are as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 10 to 20c.; ditto, "Air Hardening," 70c. per lb.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's "Special," 15 to 20c.

MACHINERY STEEL—A fairly good trade is reported. Prices are steady at $2 to $2.05 f.o.b. Toronto.

BAR IRON—The demand is improving. Prices are firm. We quote: $2.05 for extras, cut to length while rolling.; 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft., by special agreement, according to length and size.

BLACK SHEETS—An active demand continues. We quote: Common, $3.15 for 28 gauge and dead flat; $3.50 for 26 gauge.

CANADA PLATES—The demand has fallen off considerably and is now quiet. We quote: All dull, $2.90 to $3; half-polished, $2.85 to $3.10, and all-bright, $3.75 to $3.85.

GALVANIZED SHEETS—A good demand is reported. Prices keep firm, as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 24 gauge; Bell brand, $4.30 for 28 gauge; Gordon Crown, $4.50 for 28 gauge.

TIN—There is a considerable movement in small lots. Outside markets are depressed, showing a material reduction in the week. We quote $33.00 to $33.25.

TIN PLATES—The market is decidedly strong, as United States mills have been unable to keep up with their orders and Welsh mills are maintaining prices firmly. We quote: Charcoals, $4.75 to $5, and cokes, $4.25 to $4.50 per box.

NEW LIGHT STEEL RAILS ALL WEIGHTS, ALL SECTIONS

We offer for immediate shipment from stock, all sections from 12 up to 56 pounds to the yard with fastenings. CORRESPONDENCE SOLICITED.

Is it worth 10 cents a Day to sell your oil without loss of time and labor?

Is it worth 10 cents a Day to have no leaky, dirty measures and funnels to handle?

Is it worth 10 cents a Day to keep your oil room neat and clean?

We might propound a hundred questions equally as pertinent. If any one of these is worth 10 cents a day, is not the combination of the many worth more than the cost of a **Bowser Self-Measuring Oil Tank,** which will give you all these advantages.

Let us give you full particulars. **Ask for Catalogue "A."**

S. F. BOWSER & CO., Factory FORT WAYNE, IND.

COPPER—Trade in ingot copper is quiet, but the demand for sheet copper is excellent. We quote: Ingot copper $13 and sheet copper $21 to $22 per 100 lb.

BRASS—The market is steady, with the discount unchanged at 10 per cent.

LEAD—Business continues excellent. The firmness in the outside markets is re-

flected here. Quotations are as follows: $3.50 per 100 lb. for pig lead and $3.75 for bar lead.

IRON PIPE—The demand continues brisk. Quotations are: Per 100 ft.: Black pipe, 1/8-in., $3.25; 1/4-in., $2.40; 3/8-in., $2.65; 1/2-in., $2.85; 3/4-in., $3.65; 1-in., $5.20; 1 1/4-in., $7.35; 1 1/2-in., $8.95; 2-in., $12.55; 2 1/2-in., $21; 3-in., $25; 3 1/2-in., $32; 4-in., $38.

ZINC SPELTER—The market is firm, with a big trade doing. We quote 6 1/4 to 6 1/2c.

ZINC SHEETS—A steady trade is reported, with stocks moderate. We quote the base price as follows: Cask lots, $6.75 to $7, and part casks, $7 to $7.25.

SOLDER—The market is strengthening, but there is no change in prices. Guaranteed half-and-half is quoted at 18 to 19c. and wiping 17 to 18c.

OLD MATERIAL.

A good demand is noted for all materials. Prices are firm. We quote as follows: Heavy copper and wire, 12c. per lb.; light copper, 10c. per lb.; heavy red brass, 10c. per lb.; heavy yellow brass, 8 3/4c. per lb.; light brass, 5 1/2c.; lead, 2 3/4c.; scrap zinc, 3c.; iron, No. 1 wrought, $14 per net ton; No. 2, wrought, $5; machinery cast scrap, $16; stove plate, $11; malleable and steel, $7; old rubbers, 6 1/2c. per lb. and country mixed rags, 50c. per 100 lb.

SEEDS.

The seed market still remains very good There is nothing special to note in regard to the general market except that clover is a little closer this week. We quote as follows: Red clover, ex warehouse here, $6.30 to $8; alsike, ex warehouse here, $5.25 to $8.50; Timothy, ex warehouse here, $2 to $2.75.

HIDES, SKINS AND WOOL.

The market remains much about the same as last year. The calf skin market is strong; the wool and hide market remains weak. Sheep skins have gone up 10c. each. Unwashed wool has fallen in price 1/2c per lb. and pulled wool has also come down a little.

HIDES.—No. 1 green, 7 1/2c.; No. 2 green, 6 1/2c. per lb.; No. 1 green, steers, 8c.; No. 2 green, steers, 7c. per lb.; cured, per lb., 7 3/4 to 8 1/4c.

CALF SKINS.—Veal skins, No. 1, 6 to 14 lb. inclusive, 10c.; No. 2, 8c.; No. 1, 15 to 20 lb. inclusive, 9c.; No. 2, 7c. Deacons (dairies), each, 60 to 70c.; sheepskins, 90 to $1.10.

WOOL.—Unwashed wool, per lb., 8 to 9c.; fleece wool, 15 to 16c; pulled wools, super., per lb. 15; ditto, extra, 18c.

TALLOW.—Tallow is very scarce. We quote 6 to 6 1/4c. per lb.

THE ROOF

Gets the worst of it.

There's no shelter for it. It shelters the rest from the elements. That's why every one needs the very best shingles.

EASTLAKE SHINGLES

are absolutely fire, lightning, rust and leak proof, and easy to apply.

They've long since been proved the most reliable, perfect and longest-lasting kind to be found.

With them in stock you're certain of satisfied customers and increased business.

The Metallic Roofing Co., Limited

TORONTO MONTREAL WINNIPEG

NOVA SCOTIA MARKETS

HALIFAX, April 7, 1903.

THE hardware trade, which has been remarkably strong since February 1, continues to be very active in nearly every line. The greatest activity, however, is shown in the business done in outfitting the fishermen for their season's work. A very large number of vessels find it very convenient to come here for their outfitting and do their business direct with the firms specially dealing in their lines. This business is now about over, and other lines will have to be worked on if the general activity continues. Besides the outfitting here, considerable orders were previously shipped to dealers on the south shore, where considerable outfitting was done at the various home ports—Liverpool, Lunenburg, Clarke's Harbor, etc. In the summer season considerable of this trade goes to St. John, but at this season there is easier communication with Halifax.

* * *

An advance of 10 per cent. is reported on a number of lines of haying tools and farmers' implements. The travellers on the road have booked considerable orders in these lines, and a good business is expected this season as the time works round for the provincial dealers to stock up. There is evidence, however, that there will not probably be as great a sale in these lines as last season. Money is not so plentiful as it should be, and no doubt the drainage of the country through the "stock slump" partially accounts for this. Provincial dealers are conservative in their orders, and this idea suits the wholesalers.

* * *

Turpentine and linseed oil are still firm at the high prices previously quoted, and there has been a corresponding advance in paints and varnishes. There is not likely to be any easier feeling in these for the present, and contractors are complaining that the high prices will materially affect the value of contracts entered into last fall before the advances took place.

* * *

Builders' material is still in heavy demand and as spring opens up it is found that very few of the building operations throughout the province, planned during the winter, have been called off, and the trade in all lines of building materials will be quite as good for the season as has been anticipated from the reports sent in by the various travellers on their early trips of the year. Spring has opened up early and building operations in Halifax are in full swing, creating an unusual demand, both for the wholesaler and the retailer.

* * *

This is also the season when householders commence to brighten up their homes and premises, and the retailers of tinned paints, varnishes, brushes, glass, putty and other sundries report a good trade even this early in the season. The hardware men who handle bicycles, sporting (athletic) goods, etc., are doing a fair trade, and there has been the usual general demand for fishing gear.

R. C. H.

ADVANCE IN POCKET CUTLERY.

Owing to a large increase in the price of pearl, the principal English and German manufacturers have been forced to raise the prices on their pocket cutlery with pearl scales. The price of pearl scales has advanced all the way up to 33 1/3 per cent., and that even at these price scales are hard to procure, as the supply seems to be limited. In consequence of this a number of increases on pearl scale knives have taken place, and these advances average between 5 and 10 per cent.

MANITOBA MARKETS.

Winnipeg, April 7, 1903.

TRADE is good in all lines and shipments of spring stock are now well forward. There is a good inquiry for bluestone for treating seed grain. The only change in the whole hardware list is the advance of 5c. on Champion scales on which the discount is now 45 per cent.

In paints, oils and glass, the interest of the week is the enormous advance in turpentine. The advance is 6c. per gallon, making the price $1.03 for barrels and $1.08 for less than barrel lots.

NOTES.

W. C. Bond, of Gladstone, is opening a branch at Plumas and has added a lumber business as a side line, having purchased the yard of Munro & Shirray at that point.

E. H. Briggs & Co., brushes and brooms, have purchased a warehouse site fronting on Adelaide street and in the rear of their present building. It is their intention to build a new broom factory and warehouse during the coming season.

Tenders are being called for the addition of two storeys to The McClary Company's building. This will give them five storeys and basement. It is not three years since they moved into their present quarters, and already they are seriously hampered for room.

One of the men who for the past 21 years have been connected with hardware and oil stove trade of the West, is J. Thompson Black, who, throughout that entire time, has been with The McClary Manufacturing Co. Mr. Black has accepted the position of office manager for Clare & Brodgett, who are the western representatives of Clare Bros. and The Metallic Roofing Co.

TRAVELLERS HAVE AN ORGAN.

The Commercial Traveller and Hotel News is the name of the new official organ of the N. W. C. T. A. The first number is well gotten up, well printed and a bright newsy little sheet. The publishers, Messrs. S. M. Fisher, and J. Evans, are both well known in the newspaper circles of the west and they have received many congratulations on their new venture. The paper will issue on the 10th of each month and will be devoted "to the interests of the commercial travellers of Canada". Already the travellers of the west have shown marked appreciation of the new sheet and the publishers have been successful in securing an excellent line of advertising.

PERSONAL MENTION.

Mr. Walter Grose, Montreal, sails from Boston on Saturday for England. He will spend some ten weeks visiting his childhood's home in Cornwall, and touring through the British Isles. He is expected back about the middle of June.

OBITUARY.

OTTO LAURSEN.

THE death of Mr. Otto Laursen is announced from Vancouver. Mr. Laursen has been travelling in California for his health, but no benefit accrued and consumption claimed him. He was a son of Mr. J. U. Laursen, of Mount Pleasant, and had carried on the plumbing business for several years in Vancouver.

J. A. WEBSTER.

There passed away recently in New Westminster, B. C., one of its oldest pioneers, John Alfred Webster. Mr. Webster was born in Wellingborough, Northamptonshire, England, in 1838 and came to British Columbia in 1861. In his early days he was a merchant but later engaged in the sawmill business. Deceased was a director of the Westminster and Vancouver Tramway Company and the Westminster Slate Company.

GEORGE H. RICHARDS.

George H. Richards, a well known young business man of Halifax, N. S., and a member of the hardware firm of H. H. Fuller & Co., died very suddenly March 17th. Deceased for several years travelled for H. H. Fuller & Co. and after the death of Mr. Fuller was admitted into partnership. He was 39 years of age and unmarried. Pneumonia was the cause of his death.

SPECULATION IN NOVA SCOTIA.

This matter of stock speculation in Nova Scotia—and it may be somewhat the same elsewhere—has been carried to such an extent that Mr. Justice Weatherbe, of the Supreme Court, a week ago, in addressing the Grand Jury on a stock case that was come before them, severely condemned the whole business of speculating on margin. Nova Scotia's favorite stock for the last year or so has been Dominion Iron and Steel. Hundreds all over the province held anywhere from 10 to 100 shares on a ten point margin. Much of this stock was bought between 45 and 60. I know of one case of a party who put up his margin at 57 ; two weeks ago he had put up in all $25 more ; last week he was again called on, and on his ten shares has now put up $45 a share — nearly double what the stock could be bought for outright. It is estimated that of those who were thus speculating, one third dropped out when their first margin disappeared ; another third dropped out when a second ten dollar margin disappeared, while possibly one third or less would be able to margin up indefinitely or buy out the stock. That the loss in this respect throughout the province has been enormous, and will seriously affect the business of the coming summer cannot be doubted, nor can its extent be wholly estimated at present.

BETTER TELEPHONE SERVICE.

Douglas & Ratcliff, dealers in paper and paper bags, of West Market street, Toronto, on account of the large increase of city customers, have been compelled to instal an additional telephone, the number of which is 1375.

ELECTRICAL POWER FOR A SMALL MILL.

The experience of A. Bowen & Sons, Andrewsville, Ont., will be of interest to many Canadian manufacturers. This firm has a 100 barrel flour mill and a 75 barrel oatmeal mill, but for some time past the cost of motive power has been eating up their profits. After mature consideration it was decided to instal an electric plant at a suitable power near by and to make it capable of lighting the village of Kemptville, Ont., as well as operating the mill. Last week power was turned on, and although the circuit is 15 miles in length, everything has proved extremely satisfactory. Now the firm have cheap motive power and a revenue for supplying Kemptville with light.

DEPARTMENT OF RAILWAYS AND CANALS

TRENT AND CORNWALL CANALS.

NOTICE TO MANUFACTURERS OF AND DEALERS IN PORTLAND CEMENT.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Portland Cement" will be received at this office up to 16 o'clock on Monday, the 6th April, 1903, for the supply and immediate delivery of 37,000 barrels, or any portion thereof, of Portland Cement, on the Trent and Cornwall Canals as per Specification.

Specifications and Forms of Tender and full information can be obtained by the parties tendering at the office of the Chief Engineer of Railways and Canals, Ottawa.

The Department does not, however, bind itself to accept the lowest or any tender.

By order,

L. K. JONES.

Secretary.

Department of Railways and Canals,
Ottawa, March 31st, 1903

TRADE IN COUNTRIES OTHER THAN OUR OWN.

PIG TIN HIGHER.

THE London pig tin market took an upward turn yesterday, recovering £1 2s. 6d., or nearly half of the previous day's decline by noon, but later made no further progress and closed quiet. In New York the disposition on the part of buyers to hold off was still marked and very little business was done. However, the close was steadier in sympathy with London advices, the closing quotations being 29.25c. bid and 29.75c. asked for spot to June. The Minneapolis arrived from London with 160 tons.—New York Journal of Commerce, April 8.

WIRE NAILS IN THE STATES.

Demand keeps up well, and the market is strong at present quotations. An outside mill have been quoting $2.05 as their lowest price for two or three weeks, and it is understood that they are sold ahead for two or three months. Improvement in delivery is noticed in so far as isolated cases of lost cars are not so frequent, but there does not appear to be much general improvement in shipments being received promptly.

LIVERPOOL TINPLATE TRADE.

The market continues firm. The inquiry during the week has been fully up to the average, and a very fair business all around has resulted for delivery over the next six months. Prices are well maintained; 14 by 20 Bessemer cokes have again been done at 12s., 12s. 1½d., and 12s. 3d. per box f.o.b. Wales, and are now quoted as follows: Bessemer steel, 12s. 1½d. to 12s. 4½d. per box; Siemens' steel, 12s. 3d. to 12s. 6d. per box f.o.b. Wales, with lights and crosses at the usual differences.—Iron and Coal Trades Review, March 27.

CUT NAILS HIGHER IN THE UNITED STATES.

At a meeting of the Cut Nail Manufacturers' Association held in Pittsburgh on Wednesday, March 25, the price of steel and iron cut nails was advanced 5c. per keg for April shipment. The market is firm and the demand is quite large. It is understood, says Iron Age, that a few of the larger cut nail manufacturers were opposed to any advance in prices, but some of the mills insisted that the present high prices for steel and fuel warranted an advance. We have revised quotations, and quote as follows: Steel cut nails $2.15, base, in carloads and $2.20 in less than carloads; iron cut nails, $2.25, base, in carloads and $2.30 in less than carloads, plus freight in tube rate book to point of destination, 60 days, less 2 per cent. off in 10 days.

MANUFACTURED IRON AND STEEL IN GREAT BRITAIN.

Although the advance in prices which has taken place in this branch of the iron and steel trades reversed the usual order of things, beginning in pig iron and extending to finished material, instead of following the opposite course, it appears to be substantially founded upon a real improvement of trade, and, far from showing any unfavorable signs, seems likely to continue. Several upward movements have been made during the past week, and in other directions, where there is no quotable change, there is a stronger feeling. The brighter prospects of the shipbuilding industry, and, consequently, of shipbuilding material, has resulted in the price of ship plates on the Tees being firmly maintained, and steel ship plates in that district are now at £5 15s. and iron ship plates are at £6 10s., less 2½ per cent. in both cases. In Scotland platemakers have advanced their quotations, and steel ship plates are now at £6 and boiler plates at £6 2s. 6d. to £6 5s. A steady trade is doing in bar iron. Scotch merchant qualities are now quoted at £6 2s. 6d. to £6 5s. for ordinary brands and angle iron and £6 8s. 9d. to £6 12s. 6d. for selected, all f.a.s. Glasgow.—Iron and Coal Trades Review, March 27.

PIG IRON DEPRESSED.

The influence of the recent reduction in prices on Southern foundry pig iron for delivery during the last half of the year seems to become more pronounced in the matter of unsettling the confidence of buyers and inducing them to withhold orders. Added to this, cable advices of a considerable decline in the English markets within the past few days has created a fear that foreign sellers will seek an enlarged outlet for their product here by cutting under the reduced prices of the American furnaces. The market is reported to be very dull and the tone as easy. Advices from the South, however, are to the effect that it is asserted by leading factors there that there will be no further reduction in prices. Supplies of iron available for spot delivery are small in this section and the furnaces are reported to be well sold up for the first half of the year, so that if deliveries are taken up promptly prices on deliveries in the first half of the year are not likely to change materially. It is generally understood, however, that the market is in a transitory state and that it will take time for the trade to accommodate itself to the changed conditions. The unsettled condition of the market for the base material is reflected in the uncertainty prevailing in the market for finished lines. The mills are reported to have a good deal of work in their books, but specifications are said to be rather slow and there is no difficulty in getting good deliveries on new business. But the demand, partly as a result of the labor situation, is not active and the market is held to be barely steady.

The downward movement in prices in the British iron market is becoming more pronounced. Late advices by mail state that while there is a considerable tonnage in pig iron to be shipped to this side on old contracts, few new orders are being received from the United States. Yesterday's closing prices on Scotch pig iron warrants in Glasgow were 2s. a ton below those at the close of last week, and 2s. 4d. lower than on March 30. In Middlesborough foundry iron the decline has been even greater within the past eight days, yesterday's quotation showing a decline of 3s. a ton since March 30.—N. Y. Journal of Commerce, April 8.

BINDER TWINE PRICES IN THE UNITED STATES

The International Harvester Co. announce the new schedule of prices for binder twine, effective April 1, f.o.b. Chicago, in less than carload lots, as follows:

	Cts. per lb.
Jute	8¼
Sisal	10½
Standard	10½
Standard manila, 550 ft	11¼
Manila	12
Pure manila	13

Carload lots ¼c. per lb. less.

April 1 had been the date set when the combined factories would announce prices. The majority of orders taken without price in the West, it is understood, called for April 1 as the date upon which the price was to be quoted, when if satisfactory to the buyers the orders were to stand. Thus the long wait for the announcement of prices is ended, and binder twine business can be carried forward intelligently.—Iron Age.

HAVE REMOVED THEIR OFFICE

The Montreal Rolling Mills Co., A. H. Hough, representative, and The Hamilton Powder Co., have removed their office from 56½ King street west to room 408 Temple Building, Toronto.

PAINT, OIL AND BRUSH TRADES

LAKES AND ANILINE COLORS.

IN a paper on "The Chemistry of Well Known Colors," Dr. Max Lock gave the following information re lakes and aniline colors. "Brilliant pigments which are more or less transparent, and generally made from organic dyes, precipitated or mineral basis, are termed "lakes," and the oldest and perhaps best known of these lakes is carmine. Carmine has been known for three centuries. It is the coloring matter of the dried cochineal bug, which is precipitated with alumina. This coloring matter is practically an acid, which, combined with alumina, forms an alumina lake. Pure carmine is completely soluble in ammonia and is non-poisonous. In former years it was used to a very large extent as a decorative paint, but the aniline colors have practically driven it out. It is, however, used as a coloring matter for candies and syrups. The aniline lakes are all precipitated in much the same way as carmine, depending, however, largely on their chemical compositions. Some are treated with chloride of barium, some with tannic acid, some with lead salt and some developed.

When coal tar is distilled one of the first derivatives is known as benzole and is well described in the benzoin series. When this benzole is treated with nitric acid nitro-benzole is formed, and when nitro-benzole is again treated with iron in the presence of hydrochloric acid an aniline oil is then produced which is the progenitor of certain aniline colors. The subject of aniline colors is too vast for extended reference here. Many of them are acted upon by acids and alkalies, only to form different colors; some of them are developed and others are made by direct fusion and melting, and still others are made synthetically by low temperature in the presence of ice."

NEW METAL POLISH.

The Francis-Frost Co., Limited, Toronto, are placing on the market the "Canadian Militia" metal polish, which is recommended for general use by the permanent force in Canada. This polish can be used on all metal surfaces by applying with a soft cloth, then after drying, rubbing to a polish with a brush.

THE SUN VARNISH.

Owing to the great demand for the cabinet containing 10 gallons of Sun varnish, the Canada Paint Company have been forced to order the second supply. The cabinet is exceedingly handsome, and probably the finest ever issued for this purpose. Customers who have not already ordered will do well to order early, as when the incoming supply is exhausted no more will be issued, as this company is pushed for space for their heavy spring importations, which will arrive by the first steamers. The manufacture of Sun varnish will continue as long as the sun shines.

PAINT AND OIL NOTES.

Halifax painters are asking $12 per week, their former wages having been $10.

Kingston, Ont., journeymen painters have struck for $2 per day of eight hours.

The Winnipeg Paint and Glass Co., Winnipeg, are building a warehouse at the foot of Thistle street, Winnipeg. James McDiarmid is the contractor.

CREATING A DEMAND FOR GOODS

THE ground taken by "Hardware and Metal," that the paint and oil business can be largely extended by energetic pushing, that a demand for these lines can be created, is sustained by the following article from "Good Paint," published by John Lucas & Co., the Chicago paint concern: "A clever retail business man is one who knows how to create a demand for the goods he sells. Where his cleverness comes in is very plain. In every town and village there are from three to a half dozen dealers selling, we will say, practically the same kind of wares. But out of the whole number it is generally the case that one or two sell as much as all the rest together. These successful dealers have discovered the way to create a demand for their goods, and this is why they are successful.

The man who waits for the demand to be created for goods usually keeps on waiting, and nothing is truer than that a retailer who does not know how or makes no effort to attract the attention of people to his goods will, and is, finding himself greatly outdistanced by competitors and the pace too swift. And this is why advertising or, in other words, intelligent business publicity, is a subject progressive retailers to-day study closely at every opportunity. They study it in order that they may learn best how to create a demand for their goods. This demand once created, they know that the hardest part of their work is over in establishing a profitable business."

PAINT AND OIL MARKETS.

MONTREAL.

OWING to the sharp advance in chemicals there has been a jump in pure Canadian Paris green of three cents per pound, and our quotations have necessarily been changed to meet this advance. Paris green is not only used for the potato bugs, but a large quantity is consumed in spraying trees, and in this way the demand is yearly increasing. Quotations for linseed oil and turpentine keep remarkably steady, and there is no change to note in either of these staples. An excellent demand for dry colors is reported, and orders have been freely shipped for the last two weeks. Immense quantities of lead have left Montreal since April 1, and some very heavy booking has been made for May shipment. The recent advance does not seem to have checked the demand in the least. We quote as follows:

GROUND WHITE LEAD.—Best brands. Government standard, $5.25 to $5.50; No. 1, $4.52½ to $5.12½; No. 2, $4.65 to $4.75; No. 3, $4.27½ to $4.37½; No. 4, $3.90 to $4., all f.o.b. Montreal. Terms, four months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5 in casks, and in kegs, $5.25.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c.; No. 1, zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No. 2, 6c.

PUTTY.—We quote: Bulk, in barrels, $1.60; bulk, in 100-lb. packages, $1.85; bladders, in barrels, $1.90; bladders, in 100 or 200-lb. kegs, $2.05; 25-lb. tins or irons, $2; 12½-lb. tins, $2.30. f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax. Three per cent. discount for cash in 30 days.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50 and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

A Good Guide

As the compass guides the sailor, so should the label and name on a tin of Paint, and the reputation of the firm that makes the paint, guide a discriminating buyer or user. You cannot find better Paint for outside or inside use than

"ARK Brand Paint."

TORONTO.

The demand for general lines continues brisk, the movement of prepared paints, varnishes and general sundries being extremely large. There is, however, not much doing in Paris green, turpentine or linseed oil. Spring orders for Paris green have been about covered and an advance of 2 to 3c. has been announced by Canadian manufacturers. The advance has not yet been followed by the local jobbers, some of whom have good stocks yet on hand. Turpentine is weakening at Savannah, a decline of 5 to 6c. being reported on that market. Yet, as turpentine of the new crop has not been offered here prices have not been changed locally. Linseed oil is also lower in London and weaker in the United States, but unchanged here. White lead is the strongest article on the list, the majority of dealers quoting an advance of 10 to 15c. this week. Other lines are unchanged. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, $5.00 to $5.25: No. 1, $4.62½ to $4.87½; No. 2, $4.25 to $4.50; No. 3, $3.87½ to $4.12½; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. packages; genuine dry white lead, in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $4.75 to $5; ditto, in kegs of 100 lb., $5.25 to $5.50; No. 1, in casks of 560 lb., $4 to $4.25; ditto, in kegs of 100 lb., $4.25 to $4.50.

LITHARGE.—Genuine, 6 to 6½c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6 to $6.25.

SHINGLE STAIN.—In five-gallon lots, 60 to 85c. per gallon.

PARIS WHITE.—90c. to $1 per 100 lb.

WHITING.—65c. per 100 lb; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35 to 37c.; in less than cases, 40 to 42c per lb.

LIQUID SHELLAC.—Pure orange, in bbls., $2.30 to $2.40; white, $2.35 to $2.45 per gallon; in less quantities, 10c. extra.

GLUES.—Broken sheet, in 200-lb. bbls., 8 to 8½c. per lb.; cabinet glue, in bbls., 11½ to 12c.; emery glue, in bbls., 17c.; bookbinders', ground, 10½c.; finest American, white, 19c.; No. 1 American white, 15c. per lb.

PUTTY.—Bladders, in barrels, $2.10; bladders, in 100-lb. kegs, $2.25; bulk in barrels, $1.80; bulk, less than barrels, and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.75.

PARIS GREEN.—Petroleum bbls., 13 to 15½c. per lb.; arsenic kegs, 13½ to 15½c.; 50 and 100-lb. drums, 14 to 16c.; 25 lb. drums, 14½ to 16½c.; 1 lb. packages 15½ to 17c.; 2 lb. packages, 17 to 18c.; 1 lb. tins, 16 to 18c.; ½ lb. tins, 17 to 19c.

PLASTER PARIS.—New Brunswick, $2 per barrel.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls. and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gallon; No. 1, $1.10 per gallon.

BARN PAINTS.—65 to 70c. per gallon.

CASTOR OIL.—English, in cases, 8 to 9c. per lb.; and 9 to 10c. for single tins.

LINSEED OIL.—Raw, 1 to 2 bbls., 61c.; boiled, 64c.; 3 to 5 barrels, raw, 60c.; boiled, 63c.; 6 to 9 barrels, raw, 58c.; boiled, 61c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 barrels and over of linseed oil sold only f.o.b., Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 95c.; 2 to 3 bbls., 94c. delivered; Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

ST. JOHN.

In burning oil there continues to be a large sale, though season is late. There is no sign of any change from the present high prices. The active line is lubricating oil. The early business has been very large. The very firm market has caused larger orders than usual for early in the season to be placed. In paint and oils there is an increased sale. Linseed oil is low, but the high price of turpentine somewhat evens matters up. We quote: Petroleum, American water white, 22½c.; best Canadian, 21½c. prime, 20½c.; linseed oil, raw, 64c.; boiled, 67c.; turpentine, 95 to 96c.; cod oil 29 to 31c.

WINDOW GLASS

MONTREAL.

The local market shows a decided improvement during the past week and jobbers seem to think that the local sales during the coming season will be much heavier than a year ago, as contractors are of the opinion that there will be more building done in Montreal this year than for several years past. As yet no change has taken place in the prices. We quote as follows: First break, 50 ft., $2; second, $2.10 for 50 ft.; first break, 100 ft., $3.80; second break, $4; third break, $4.50; fourth break, $4.75.

TORONTO.

There is a good business doing, but nothing new as to prices has developed. We quote as follows: Star, under 26 in., $3.80; 26 to 40 in. $4; 41 to 50 in., $4.50; 51 to 60 in., $4.75; 61 to 70 in., $5; 71 to 80 in., $5.50. Toronto, Hamilton and London. Terms, four months, or 3 per cent., 30 days.

J. O. Bastien, general merchant, St. Leonard de Port Maurice, Que., has sold out and removed to St. Louis de Mile End.

The general stock of Blais & Proulx, St. Anne de la Pocatiere, Que., has been sold to Gaspard Rochette at 61 and one half cents on the dollar.

FIRES.

D. Conboy, mfr. carriage tops, etc., Toronto, suffered a slight damage by fire; fully insured.

DEATHS.

E. A. Farr, of the firm of J. & E. A. Farr, general merchants, Chilliwack, B.C., is dead.

The Berlin and Preston Street Railway have agreed to convert their line into an electrical railway.

EASTER

- 1903 -

"Her feet beneath her petticoat
"Like little mice stole in and out.
"As if they feared the light.
"But O, she dances such a way!
"No sun upon an *Easter Day*
"Is half so fine a sight."

SIR J. SUCKLING.

THE CANADA PAINT COMPANY, LIMITED,

Sincerely wish their many friends and customers

A HAPPY AND JOYOUS EASTER!

CHAT

CHAS Gough has purchased the blacksmith business of W. F. Johnston, Indian Head, N.W.T.

Charles F. Boyd, hardware merchant, Simcoe, Ont., who was taken suddenly ill recently, is able to be out again.

H. C. Holland, Carman, Man., has moved to Roland, where he will be in the employ of Mr. Mason, hardware merchant.

George Munn, manufacturer and retailer of tinware, 356 Spadina Ave., is gradually extending his business, and has lately put in a stock of hardware.

R. Chappell, of Fleming, has remodelled his hardware store in a way which adds to its inside appearance and allows a better arrangement of his heavy stock.

An entrance was made to Drysdale's hardware store, 645 Craig street, Montreal, by burglars last Thursday night and it is said that about $40 in cash was taken from the register.

E. M. Shildrick, formerly of the firm of Shildrick & Collver, hardware merchants, Waterford, Ont., is leaving that place to locate in Paris, where he has purchased the stock of L. D. Haney.

J. E. Ryan, who has been a member of the hardware firm of Skinner & Ryan, Pembroke, Ont., is now senior partner in the business, and the firm name has been changed to Ryan & Co.

The death of Mr. Joseph K. Dunlop, formerly engaged extensively in the shipbuilding industry, took place in St. John, N.B., on April 4th. The deceased is survived by a widow and three children.

Sergt. Jas. Pringle, of Stanley, N. B., who for some time has been employed with the firm of Douglas Bros., of that place, has accepted a position in Fredericton in the hardware store of Jas. S. Neill.

Mr. Anderson, has purchased the hardware business of B. Gerry, Goderich, Ont., and has added to this stock a good supply of up to date goods. Mr. Anderson was formerly employed with Mr. Gerry.

J. F. Black, who for 21 years has filled the position of cashier to the McClary Manufacturing Co., Winnipeg, has severed his connection with that firm, and has taken over the management of the local agency of the Clare Bros. Co., at Preston Ont.

Mr. Charles D. Waldon, of the J. F. Pease Furnace Co., Toronto, was in town this week, arranging the agency of the Pease furnace here, and has appointed Mr. G. Gerry, Wallace street, as their representative, where one of their Economy coal furnaces will be on exhibit.—Listowel Banner.

HEATING AND PLUMBING

BUILDING NOTES.

WILLIAM YULE has secured a permit for the erection of a glass blowing factory at the corner of Guy and St Luke streets, Montreal.

S. B. Weber, Berlin, will erect eight or ten houses for rental, this spring.

An exceptionally busy season is expected by the large saw mills along the Ottawa river.

The Aleck Black Lumber Co. has purchased the property in stock of the Rat Portage Lumber Co.

A. O. Boehmer has purchased central property in Berlin, upon which he will erect large buildings.

J. J. Reilley & Sons, are erecting an office building on St. John street, Montreal, at a cost of $11,200.

The Hudson Bay Knitting Company, Montreal, are spending $10,000 on their new factory on Lagauchetierre street.

Strang & Co. will erect a new warehouse on Fort street, near Graham street. The building will be 120 x 35 ft.

E. Long, Orillia, intends building a brick addition to his foundry the coming summer, and is asking for tenders for the same.

The new building of the Eastern Townships Bank, corner of St. James and McGill streets, Montreal, will be eight storeys high.

The Capital Brewing Co., of Olympia, Wash., will erect in Vancouver this summer, extensive buildings for bottling and cold-storage purposes.

A new seven-storey building, to cost $54,000, is to be erected during the coming summer at the corner of St. Catherine and University streets, Montreal.

A SERIOUS GASOLINE EXPLOSION

An unfortunate accident happened at the general post-office, Melbourne, which resulted in the serious injury of three men employed on the sewerage connections. Owing to the impossibility of using live fires in the building, gasoline and kerosene stoves were used for the heating of wiping metal, etc. A gasoline stove, which had been in use for some time, was being lit by one of the assistants. The trap screw, through which the reservoir is filled, had been fitted with a leather washer, which soon became defective; and when the furnace was lit the gasoline ignited at this point. This was not at once attended to, as it should have been, and the heat generated at this point melted the solder of the reservoir, with the result that the gasoline in the reservoir ignited. A small bag was thrown over the furnace, but this unfortunately was removed in order to replace it with a larger bag. As soon as the bag was lifted the flames from the burning gasoline rose to the ceiling, and out through the windows and door, three workmen being severely burned. Another mishap, but fortunately of a less serious nature, occurred a few days later. Another small contract was being carried on at the same building and molten lead was used for fixing wrought iron brackets into the stone wall. A workman was melting old lead pipe in the large melting pot, and the pipe being wet outside, lifted the hot lead out of the pot on to several interested bystanders. Beyond some splattering of lead on to the clothes and faces of two men, no damage was done. The practice of putting old lead, especially pipe, into hot lead is very dangerous, particularly if the old pipe is not first heated.

PLUMBING AND HEATING NOTES.

Richards Bros., plumbers, Toronto, are overhauling their new premises at 500 Yonge street. Their shop will be a good one when finished.

Contract work has not yet opened up in Toronto as well as should be the case, owing to the labor troubles, but an improvement is expected within a fortnight.

M. Osborne, Brandon, Man., has the contract for installing heating systems in Christie's bookstore and in the "Times" office, and for overhauling the steam heating of A. E. Philip's residence.

James Greenway, plumber, having purchased the property, No. 370 King street, Toronto, has removed his business from the old stand on Dundas street, and can now be found at the above address, where he intends to carry on his business for the future.

The Beach Foundry Co., Limited, Winchester, Ont., capital $50,000; directors, B.C. Beach, J. W. Nesbitt, Salem Coons and Robert Hall, of Winchester, and M. H. Beach, of Iroquois; purpose to manufacture and sell stoves, furnaces and acetylene-gas-machines and to do general foundry and machine work.

AUER LIGHT CO., 1682 NOTRE DAME ST., MONTREAL.

air in furnace heating systems, would [illegible] to melt air according to a paper by W. G. Snow in "The Metal Worker." Dead it is advantageous to supply air at a low temperature, say 120 degrees in zero weather, rather than to heat the supply to a high temperature.

Of course, a greater volume of air is necessary at the lower temperature, but it tends to fill the room more evenly, whereas superheated air rises rapidly to the ceiling.

A source of annoyance in furnace heating systems is the control of the air supply, an insufficient supply causing injury to the furnace from overheating and an unwholesome air supply from the same cause. Happily a successful device for automatically controlling the cold air supply may now be applied to any furnace, which, combined with a temperature regulator, leaves little to be done by the attendant but to put on coal and remove ashes.

LONDON PLUMBING GOSSIP.

THE Stevens Manufacturing Co. has recently had some changes and is now controlled by other capital, but no change will be made at present in the style of the firm. Mr. A. W. Mann, for many years with The James Robertson Co., Limited, of Toronto, who, as mentioned by "Hardware and Metal" recently, has assumed the management, states that in conjunction with all lines now manufactured by the Stevens Co., a complete range of plumbers' supplies will be added, and everything will be up to date, and business will be energetically pushed. Mr. Mann also says the factory is very busy and working overtime at nights to overtake and keep up with orders.

A new manufacturing concern named the Empire Brass Foundry Company has been formed here with Thomas Stevens, I. R. Muhlinnick, and Geo. D. Trudell as directors. The old premises of J. Wright & Co., on Talbot, north of Carling street, are being utilized, and the necessary machinery plant will soon be completely installed, and operations begun.

Negotiations between the master plumbers and journeymen have been going on for the last two weeks to arrange the scale of wages and hours of labor. They have had several meetings, and prospects for an early settlement are good.

The master plumbers of the city are working hard to make it pleasant for all who may attend the provincial convention to be held in London on Good Friday, April 10.

W. H. L.

AN EXTREME OF UNIONISM.

The love that the union plumbers of Buffalo have for other plumbers is demonstrated by one of the demands which they have made on their employers. They insist that only members of the local union shall be employed by Buffalo master plumbers, no matter in what cities the master plumbers may do work. It would be only logical if the plumbers of other places were to ask where they came in. The Buffalo plumbers, not content with protecting themselves at home, would go much further and protect themselves abroad.

TORONTO PLUMBERS' MEETING.

The meeting of the Toronto Master Plumbers' Association on Monday evening was attended by nearly eighty members, President Ross occupying the chair. The association has several important matters under consideration at the moment, but nothing is yet ready for publication. The meeting closed with some new yarns by some of the older members.

NEW PRICES ON PLUMBING GOODS.

During the past week advances have been made in several lines.

The discount on malleable fittings, which was recently reduced from 30 per cent. to 20 per cent., has again been decreased, now being 15 per cent.

The discount on cast iron fittings has been lowered to 50 per cent. for all fittings but unions and nipples. The discount for unions is now 55 per cent. and on nipples, 60 per cent.

The discount on standard radiator valves, which has been 65 per cent., is now 60 per cent.

The general feeling is that prices on practicaliy all lines will continue stiff for some time to come.

THE PROVINCIAL CONVENTION.

According to all reports the convention of the Ontario Master Plumbers' and Steamfitters' Association at the Pythian Hall, London, Ont., on Friday and Saturday this week is to be a meeting to be remembered. Word has not been received from all local associations up to the time of our going to press, yet all answers, particularly those from Western Ontario towns, were enthusiastic and the attendance is likely to be large. Many of the supply houses will be represented at some of the meetings.

FROST AND ACETYLENE APPARATUS.

FROM The Acetylene Journal we reprint the following, by J. E. Strayer, Waterloo, Iowa, in reference to protecting acetylene generators from frost and thawing them out with safety when necessary:

"Without exception, I believe a dwelling house where acetylene will be used should have a cellar or frost-proof room, and there is where the generator should be placed. But it is not really necessary that such room should be perfectly frost proof. Generating apparatus will work at some degrees below freezing. In the generating chamber no harm can be done unless a cover of ice is formed thick enough to hold up the carbide, or that it might freeze hard enough that the expansion would burst the apparatus. In the bell a similar amount of cold would do no particular harm.

"Perhaps a recital of some experiences will give a clearer idea. About a year ago I set up an apparatus in an improvised hall where a farmers' institute was to be held in a room used for storing machinery. Unknown to myself the workmen had filled the generator and let the water remain for three days of the coldest weather of the season, and when I arrived just before the time of meeting I found that the apparatus was full of ice. But a few kettles of hot water poured into the bell and over the sides of the generating chamber put it in operation. There was an occasional hitch in the movement of the bell, which was fully accounted for when the apparatus was emptied after the close of the meeting and some chunks of ice were found in the bell, although it had all been dissipated from the generating chamber. Of course the continuous operation of a generator under such conditions would not be advisable, but this experience shows that considerable cold does little harm.

"During the past summer I had a generator in operation in the open, and kept it there until late in November. Frequently in the morning I found a heavy covering of ice around the bell, but after breaking the same with a hammer or loosening it with hot water, the apparatus worked perfectly. Whatever ice may have formed in the generating chamber did no damage. Occasionally it may be necessary to permanently place a generator where there is no protection from the cold. I have one such in a church where there is no fire from one week until the next. In this case there has been built a box around the apparatus large enough for the attendant to get inside. Such a box may be covered and lined with paper, or anything to make it warm, and it does not require much to make the small place frost proof. It should be remembered that at such times as the lights are on considerable heat is developed in the process of generation.

"Last fall I installed an acetylene plant in an all night restaurant, where conditions made it necessary to place the generator in an old building on the first floor and little protected from cold. But as the apparatus is in continuous use no ice has been formed to do any damage. I would therefore reiterate the statement that under ordinary conditions no trouble should be experienced from freezing where the generator is within a building. As acetylene is a 'fixed' gas and neither heat nor cold affects it, it does not matter how much the pipes are exposed, provided there is suitable provision for the drainage of condensation."

(OPPOSITE UNION STATION).

INDUSTRIAL GOSSIP

The Canadian Pacific Co. will build shops at Nelson, B.C., for the repairing of rolling stock on the Crow's Nest Pass line, and the different branches.

The Rand Evans Co., Sherbrooke, Que., have leased the Sherbrooke stove foundry, which they will operate. Mr. Evans will represent the firm on the road.

The strike of the six hundred men employed at the Collingwood steel shipbuilding yards has been settled; and the men have received an advance of 2½c. per hour.

A big strike movement is hovering over Hamilton. The moulders of that city are demanding an increase in wages of 10 per cent. all round, and they have been refused point blank.

It is possible that the Montreal shipping companies will have serious labor trouble this spring. The ship laborers are completing an organization with the purpose of asking considerably higher wages.

Wm. Broomall proposes to invest $15,000 in the Cream Separator Factory at Durham, Ont., and to employ thirty workmen if the town will grant him a free site, tax exemption for ten years and a loan of $7,000.

The Canadian Pacific Railway Company have placed a contract for 50 new steel bridges with the Canada Foundry Co. The contract price is a very large one and means the employment of a big staff of Toronto workmen.

The employes of the Canadian Bridge Co., Walkerville, Ont., have struck for higher wages. The firm was so busy that they asked the men to work overtime whereupon they immediately asked for an all round advance of 10 per cent.

M. G. Lonner, Montreal, representing several German steel manufacturers, states that ten steamers will leave Antwerp and Rotterdam for Canada during April with cargoes of billets, structural steel, steel sheets, axles, hooks and hand rails.

Wm. Coyne, traffic manager of the Dominion Coal and Steel Company, Halifax, has resigned to accept a position as traffic manager of the Clergue system at Sault Ste. Marie. J. R. McIsaac, at present assistant traffic manager, will likely succeed Mr. Coyne.

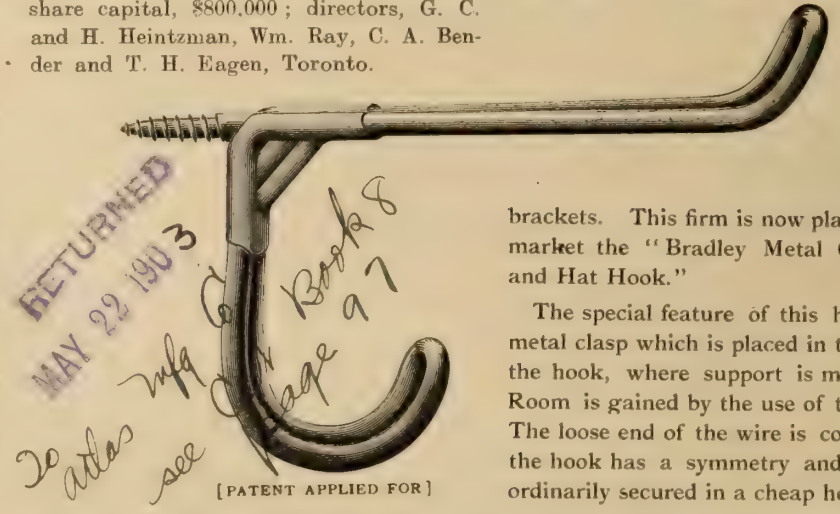
It seems that the industries in Perth, Ont., are booming just now. The employes at the car shops, at the woollen mills, at the Fay knitting mill, at James & Reid's machine shops and at James Bros'. foundry are all working overtime in order to fill all orders.

A meeting of the shareholders of the Walkerton Binder Twine Company was held recently at which a thorough investigation of the company's business was made. It was agreed that the business was far from being a failure. A vote of confidence in, and loyalty to, the present directorate was unanimously carried.

The present conditions would warrant the establishment in Canada of a large works for the manufacture of freight cars of all kinds. The Grand Trunk Railway has placed an order with the American Car & Foundry Company, of New York, for 500 freight cars for early delivery. Such an order should never have been sent outside the Dominion.

NEW COMPANIES INCORPORATED.

Heintzman & Co., Limited, Toronto: share capital, $800,000; directors, G. C. and H. Heintzman, Wm. Ray, C. A. Bender and T. H. Eagen, Toronto.



The Canadian Broom Co., Limited, Ottawa; capital, $40,000; directors, T. H. Blow, T. F. Sullivan, W. J. Usher, J. D. McCann, W. N. Condell, all of Ottawa.

The Hanover Portland Cement Co., Limited, Hanover, Ont., capital, $500,000; directors, Daniel and Joshua E. Knechtel, James Henry Adams, Henry Peppler and Jacob Stadelbauer Knechtel, all of Hanover.

The Erie Oil Co., Limited, St. Thomas, Ont.; capital, $100,000; directors, C. F. Maxwell, R. J. Miller, G. K. Crocker, F. N. Griffin and S. Chant, J. Fulton, D. A. McKillop, J. H. Coin, of St. Thomas; purpose, to prospect for and sink oil wells.

Fader's Screwless Doorknobs, Limited, Orillia, Ont.; capital, $100,000; directors, Silas Fader, R. J. Sanderson, R. H. Montgomery, T. H. Sheppard and Thos. Vennar, of Orillia, Ont.; purpose, to manufacture and sell doorknobs, locks, builders' and other hardware.

The Princess Royal Gold Mining Co., Rothesay, N.B., capital, $1,250,000; directors, Hon. A. I. Trueman, James Robinson, Hon. Wm. Pugsley, Wm. H. White and Wm. A. Ewing, of St. John, N.B; purpose, to purchase and acquire mines, mining areas, licenses and leases, also to carry on a business as general merchants and traders.

The Grand River Metal Works Co., Limited, of Galt, Ont.; capital, $40,000; directors, J. E. Wescott and George Hancock, jr. This company will manufacture hardware specialties of various sorts, which are now, as a rule, imported from the United States. Some intricate and costly machinery is being installed in their new factory. At present carpet stretchers are being turned out.

NEW COAT AND HAT HOOK.

THE Atlas Manufacturing Co., New Haven, Conn., have won an enviable reputation for their hardware specialties, particularly their steel shelf brackets. This firm is now placing on the market the "Bradley Metal Clasp Coat and Hat Hook."

The special feature of this hook is the metal clasp which is placed in the angle of the hook, where support is most needed. Room is gained by the use of this device. The loose end of the wire is covered, and the hook has a symmetry and finish not ordinarily secured in a cheap hook.

It will be noticed from the cut that the lower hook has a slight fulness at the back. This will strike the wood first as the hook is screwed in, and, being made of spring wire, will offer considerable pressure, and at some distance from the screw, thus providing a most practical device for keeping the hook in place.

There is also much less tendency to scratch the wood than in those hooks which bear first near the screw, or which are made rigid, offering no chance to spring. These hooks are made in three sizes: No. 15, japanned, $2.25 per gross; No. 25, coppered, $2.40, and No. 35, tinned, $3.40 per gross.

THE OFFICE

DEVOTED TO THE OFFICE STAFFS OF BUSINESS ESTABLISHMENTS

OFFICE MANAGEMENT.

By W.N.H.

ONE of the most surprising facts that one meets in the management of the average retail hardware store, and indeed, the same applies to a great many other retail stores, is the sad need of a proper office arrangement and systematic management. The drummer can tell you into how many stores he goes where perhaps a small desk in the corner of the shop constitutes the whole "office" of the establishment. On it, besides a limited supply of poor writing material, will be found the books, which, in all probability, will tell what each credit customer owes, and nothing more. Even then, it is likely to waste the patience of a customer who wishes to pay his bill, to find his name and the amount he owes with an itemized account of the articles bought.

A file, in the shape of a single bent wire, will often be found to contain the entire correspondence for many months back. Letters, statements, quotations, copies of orders, and even invoices, will all be stored away on the same wire, regardless of date or alphabetical arrangement. And still this same man will often wonder why it is that he cannot put his hands on a letter or quotation of weeks ago, which, if he could find instantly, might be of vital importance in making a sale, if not in saving much of his valuable time and temper. Besides, it is unbusinesslike, and to be businesslike always pays in the end, even though one may not see returns for his trouble in the little things just at the time.

And still you will find men who will laugh at such ideas and say that a set of books, properly kept in balance, whereby a man can, at the close of his business year, tell to a cent his yearly profit, the expenses of every department, and his net gain since he last took stock, is all quite unnecessary. True, the merchant who knows the total value of his stock and his collectable accounts and deducts the amount of his liabilities, knows what he is worth, and in this way, from year to year, how much he has made or lost. But if he were able to carefully review a statement of the year's business, showing in what proportion his expenses were divided, and the profits yielded by each department of his store, he could very often regulate the management of the next year's business to far greater advantage.

Many will tell you that it is a waste of time and money to spend the price of a few "Shannon" or "Eclipse" files, and every few days take time enough to sort out the accumulation of papers into their respective places, so they can be found on a moment's notice, even to dates of years ago, long since put away in the binding cases. They say that such system is not necessary in the case of a retail business of average size. Certainly it would be hard to imagine anything approaching a wholesale business run on such lines But, if a large business needs care and system in the financial end of its management, why will it not also pay in proportion in the case of a smaller one?

Count up the expense of fitting up an office in which you can keep your business matters well and neatly arranged and your books kept on correct principles. It need not be expensive, for all the requisites can be purchased at comparatively small cost. You will find it to be a profit earning expense, and your constant satisfaction at knowing exactly where you are at any time will fully repay you for your trouble.

The merchant who runs his business on the principles of a larger one throughout, keeping, of course, his expenses in reasonable proportion, will succeed far quicker than he who aims low and then grumbles because his business does not increase. Whatever be the means employed, the schemes which will in the end produce profit, must come from the brain of the man who oversees, unless, perhaps, he uses the ideas of those who work for him, and the man who is too narrow-minded to see that he can make more by properly superintending the activities of others, but thinks he must do everything himself, without using his brain, is not likely to become a captain of industry or increase his own business to very large proportions.

VALUE OF COMMERCIAL EDUCATION.

THE principal of a Westmount, Montreal, school, has been making inquiries by circular as to the advantages to a student of a knowledge of typewriting and shorthand when entering upon a business career. Replies have been received from various leading business men, managers of banks, railway companies and other large concerns, all of which are to the effect that a knowledge of shorthand and typewriting would be of much value to a young man with a business career in view, and that, other things being equal, the beginner so equipped would probably command a larger salary than others. It is also stated that the school which pays most attention to the commercial subjects confers much more benefit on students of this kind than any other.

All the writers indicated also that as far as the Province of Quebec was concerned, one of the most important subjects should be the study of the French language. They state that the average French boy is better equipped for a commercial career than the average English boy, as, in most cases, the former understands both languages, which can seldom be said of the latter.

A CANADIAN INSTITUTION.

Incorporated under Canadian laws, with a purely Canadian directorate, the Canadian College of Correspondence is well entitled to the support of the young men of the Dominion. The faculty list includes the best of British and Canadian teachers, and the agricultural department is looked after by professors of the Ontario Agricultural College, Guelph. It is the only institution thoroughly preparing students for chartered accountant, civil service and insurance examinations, and the greatest care and attention are given to all branches of commercial education.

The list of correspondence students is already large, and it is worthy of note that the institution gives every promise of success.

OUR TRADE A MARK

AUER LIGHT MANTLES

LONGEST LIFE & BRIGHTEST

OUR TRADE A MARK

A COMPARISON

TRASH A cheap mantle gives a fair light for a few nights, then grows dim and shrinks up to a "wasp-waist" like this:

The "Wasp-Waist"

Cheap chemical.

This is caused by the cheap chemicals which the manufacturer used.

QUALITY A good mantle, which cannot shrink, made of the purest chemicals, is the only kind we put our trade mark A on. It guarantees you the best that is made and will satisfy your customers.

The Auer Light Mantle

Pure chemicals.

Lowest prices on mantles, shades, chimneys, globes and sundries.

Write us if you are ...

AUER LIGHT CO., MONTREAL

CATALOGUES, BOOKLETS, ETC.

STEVENS' RIFLE TELESCOPES.

THE J. Stevens Iron and Steel Co., Chicopee Falls, Mass., have issued a catalogue, showing their compre[illegible] range of rifle telescopes. This, they state is the largest and most complete line of telescopes they have yet shown and that while heretofore telescope manufacturers have not been able to furnish a telescope of merit for less than about $20.00, they are now placing the "Favorite" line on the market for $8, $9, and $10, and the "Ideal" line at $12 and $18, and are, moreover, prepared to furnish scopes fitted to rifles of any standard make, ranging in price from $8 to $40. This firm can also furnish scopes for pistols, etc., as noted in the catalogue they are now sending out. Hardware dealers can have a copy of this catalogue on request, also any electrotypes which they might desire for local advertising putposes.

MANN'S BONE CUTTER.

The F. W. Mann Co., Milford, Mass., are sending out to the trade an exceedingly attractive catalogue, showing the many different styles of green bone and vegetable cutters manufactured by them, and so well known to the trade. The catalogue is one that would be of much interest to poultry dealers and to hardware men, who supply the former with green bone, which is recognized as so valuable in the egg producing business.

IDEAL FEED MILLS.

The Stover Mfg. Co., Freeport, Ill., are sending out to the trade their annual catalogue, showing their feed mills, crushers, elevators, corn and cob mills, feed mill and horse power combined, and other valuable machinery for the farm. As this catalogue is artistically illustrated it would be a very useful one for hardware men selling these goods. A copy can be had on application by all readers of "Hardware and Metal."

EMPIRE CREAM SEPARATORS.

The increase of dairying throughout Canada has been such that the up to date farmer in many districts has found the cream separator an essential adjunct to success in his work. The Empire Cream Separator Co., Bloomfield, N. J., have gotten up a neat catalogue, showing in addition to the general appearance of their separator many illustrations, giving practically the details of every part or movement. Readers of "Hardware and Metal" should write for this.

A HARDWARE PERIODICAL.

The enterprise of Emerson & Fisher, St John, N.B., is abundantly shown by their publication from time to time of an illustrated periodical devoted to the lines of hardware, housefurnishings, kitchen utensils and labor-saving novelties, sold by that firm. It is an eight page paper, slightly larger than the pages of this paper and is entitled, "Household News." In the issue just to hand are illustrations of enamelled ware, cutlery, washing and ironing utensils, kitchen supplies, bathroom fixtures, mantels and tiles, oil stoves, lawn mowers and refrigerators, shown in a manner likely to win the attention of the buying public and to extend their trade.

THE QUALITIES OF SILOXICON.

A DESPATCH from Niagara Falls, N.Y., describes Siloxicon, which E. G. Acheson, of that place, recently compounded. "Siloxicon is," according to the despatch, "a compound of silicon, carbon and oxygen. It is not found in Nature; not a hint of it. It is a greenish white powder and it is formed in the electric furnace at the intense heat of 4,500 and 5,000 degrees. Its uses are manifold. It happens that just at this time the rapidly increasing uses of firebrick and refractory furnace linings demand something in the way of a substance that will withstand great heat and prove infusible far beyond what ordinary clays can produce. Siloxicon will supply this need.

"For 100 extensive uses manufacturers have wanted a material that should be insoluble metals, incombustible, neutral in slags and holding its shape under great heat. Siloxicon, from important tests, just fills the bill. Clay is not neutral to slags, and this being the case, the fireclays are acted on by the slags and become fusible, so that metal workers find great difficulty in its use. Siloxicon comes opportunely. It is cheap, it possesses all those qualities that a refractory lining should possess. No heat save that of the electric furnace, which gives it birth, produces any effect on it. It is self binding. It solves a dozen minor problems.

"Mr. Acheson discovered that just before his mass of sand and coke became carborundum it went into a peculiar form. Experimenting with this he so regulated a furnace that the product just stopped short of being carborundum. The substance thus formed is siloxicon.

"Its use promises to be enormous. Although self-binding and thus forming a substance that can be moulded into shape for crucible use, it is found that when mixed with a refractory clay it gives much better results. This introduces Mr. Acheson's otner discovery, which is considered of very far-reaching effects.

While investigating the subject the use of straw by the Egyptians was thought of. It has been generally believed that this straw was used to bind the bricks together. Mr. Acheson treated clay with an extract of straw and found that the bricks made from it were wonderfully strong. The patent he has obtained is for the treating of clay with tanning substances. Tests show that clays thus treated possess about 50 per cent. higher tensile strength than clays not so treated, that they shrink less and that the plasticity of the clay is greatly increased. Practically, the discovery affects the clay and pottery interests of the whole world.

"Tests have been made to show that brick made of clay thus treated and dried at an ordinary temperature is stronger than bricks expensively burned in a furnace."

CURRENT MARKET QUOTATIONS.

April 10, 1903.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

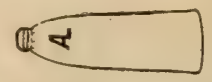
OUR TRADE A MARK
AUER LIGHT MANTLES
LONGEST LIFE & BRIGHTEST
OUR TRADE A MARK

The Value of Annealing.

Annealing is the most costly step of mantle making—consequently a cheap mantle cannot be properly annealed—That is the reason a cheap mantle caves in like this if you lay it on its side, after burning off the coating—Try one—They injure your trade.

Mantles branded A are thoroughly annealed over pressure gas—They fit the burner—They don't shrink—They stand up this way—They are reliable—They help your trade.



—We are the sole manufacturers of A mantles.
—Write us if you are interested.

Lowest prices on Mantles, Shades, Chimneys, Globes and Sundries.

AUER LIGHT CO., MONTREAL.

TRADE MARK FOUR REGISTERED TRADE MARKS.

VOL. XV. MONTREAL AND TORONTO, APRIL 18, 1903 NO. 16

TECHNICAL TRAINING

By Prof. Henry T. Bovey, F.R.S., of McGill University.

EVEN to a most superficial observer, it is evident that the trade conditions now obtaining throughout the civilized world are rapidly changing and that in directions requiring the utmost care and watchfulness on the part of all interested in industrial development.

I need only instance the application of scientific knowledge to many special manufactures and processes, and with this, the inability of the average schoolboy to grapple with the problems so arising; also the increasing introduction of labor saving machinery; the practical collapse of the apprenticeship system; and, what might be called, the tyranny of voluntary and often irresponsible associations of men, which, not content with their first objects, have assumed the functions of a sort of government within a government.

Some of these "conditions" are distinct benefits; some are evils, either unavoidable or for which no adequate remedy has yet been found; but benefits or evils, they must be met by suitable measures, in the one case, that they might be used to the best advantage, in the other, that they might, if possible, be rendered innocuous.

The application of scientific knowledge is not sufficiently general or thorough: the elementary education of our boys and girls is not continued long enough to give them the power of comprehending and appreciating the fundamental principles which underlie all sound progress.

The large introduction of labor-saving machinery is constantly altering the number and kind of operatives required, so that, where formerly, an all-round mechanic was needed, a mere automatic machine-tender will do now, but, on the other hand, a new class of designers of special tools and machines has come into existence.

The rigid limitations imposed by the trades unions as to the number of apprentices, prevent many most desirable young men from having that fair chance to learn which ought to be an inalienable right of every man. In other days, the apprenticeship system gave us some of our best men, men who became leaders and not infrequently proprietors of great establishments. If such as these should happen to be shut out from learning by the new rules, the country would lose one of its most valuable assets.

The state of trade in any nation has always been of the first importance to its well-being, since the days when Solomon's servants brought linen yarn from Egypt, apes and peacocks from Tarshish, gold from Ophir, and cedar trees from Lebanon. Foreign commerce, bringing wealth and stability to a country, must depend either on the value of its natural products, as lumber and minerals, or on its power of producing grains and other cultivated fruits of the soil, or on the amount and excellence of its manufactures. How enormously the product in each of these departments can be influenced by a thorough training of those who are engaged in their production, has received a striking exemplification in the commercial evolution of Germany, which has made such rapid strides as to excite the rest of the world to a laudable emulation of the methods by which it has been brought about. As soon as the Government and people woke to the fact that the keen competition of the civilized world necessitated special measures, they studied the subject theoretically, and came to the conclusion that improvement must come from the direction of the application of scientific principles to industry, and that, for this purpose, a greatly improved education was necessary. They did not hesitate to use large sums of money, and the development of the idea seems practically endless, as there and elsewhere each department of science is gradually becoming more specialized and more combinations with other branches are becoming possible.

The German forests were placed under strict regulations to prevent the deforesting of the country. The felling of trees in any given year was to be balanced by the planting of new ones. Their mines were trained to extract ores at the least possible expense. The best methods of fertilizing were studied, and men instructed so as to put them into practice. They made the most exhaustive study of chemistry and of the application of chemical methods, and manufacturers found it to their interest to retain chemists, at high salaries, to study their special manufactures, perhaps for years without results, but then a discovery (say, of aniline dyes—actually found out in this way)—was a more than ample return for the expenditure.

Schools sprang up all over Germany for the purpose of training the workers: no expense was spared in their equipment, and the Government gave liberal assistance, recognizing that it was possible in this way to attain a better supremacy than could ever be reached by military conquest.

In every country where these methods have been adopted in any measure—Switzerland, England, the United States and Canada—results have been obtained quite surprising, when we consider the comparatively short period during which the experiment has been tried.

This national benefit [illegible] it rested on the elevation and advancement of the individual.

The advantage of [illegible] a subject much too large to be entered upon here; but in general, it may be

Paper read before the Insurance Institute of Montreal.

at least is proved that science taught in a scientific manner—that is, proceeding by careful induction from experiments to conclusions—must cultivate habits of attention and accuracy; must have great effect upon the powers of observation, reasoning and will. Now, the new education, given in connection with industrial development, necessarily partakes of this character to some extent, and can be best based on a general education of the same kind, but intended purely for the cultivation of these mental powers. Thus, we find that the establishment of industrial schools was followed by an instant demand for such preparation of children as should give them the qualifications necessary to enable them to profit by their improved advantages.

In many countries a very general system of education has developed a fair degeee of mental capacity in the children. After leaving school the boys know something of the kind of knowledge to be gained from books and oral instruction, but, in many cases, they cannot do anything, and, so far as society is concerned, they are often but drones in the hive.

Again, even where education is compulsory, it often ceases so early as to leave a gap between the child's arriving at the end of school life and his coming to an age when he will see the advantage to himself of entering an industrial school.

Knowledge has an inconvenient faculty of evaporating, and, worse still, the power of acquiring is easily lost.

When the Manchester Technical Institute, the largest in the world, was in contemplation, this was found to be one of the great difficulties, the knowledge of the boys had largely leaked away. The preliminary education is not even continued long enough to bring the children up to the required standard, if there were no leakage, nor is it in itself exactly of a character to do this, so that time is only one of the factors to be considered.

Thus we find a consciousness of these evils in the results of the House of Commons' Inquiry, given as follows, as long ago as 1869

1. Efficient elementary instruction should be placed within the reach of every child.

2. Regular attendance for a sufficient period should be insisted upon.

3. The instruction should be supplemented by drawing and nature study.

To this slight sketch of some of the present conditions of trade in its relation to the well being of the nation, and of the present preparation of individuals for their place among the producers, I would like to add a few remarks, which call attention to some very important points in connection with the advancement of the individual, namely, that the highest industrial rewards come from new labor-saving apparatus, in which America is facile princeps, and in new art industrial designs, in which France has long led the world.

Let us look now, in some detail, at the remedies which have been proposed. These are many, or at least, they have many names. We hear of—

Manual training, including Sloyd work and other systems;
Technical schools;
Industrial schools;
Trades schools;
Institutions of Technology;
Polytechnics;
Art schools;
Engineering schools;
Engineering colleges;
Agricultural colleges;
Experimental farms;
and what not?

It is very natural, in fact exactly what we might expect, that a movement involving the proper development of all kinds of natural resources, in many different countries, should take many forms, that these at first—and even at last—should be somewhat chaotic, and overlapping of one another from want of that clear understanding which only comes from experience. We even find a name employed, in one case, to attain a special end. Thus, the Derbyshire County Council disguised its agricultural classes under the name of Elementary Science, and thus overcame the prejudices of the farmer who, like many other purely practical men, was naturally convinced that he could not be taught anything about his farm by a man who perhaps had never followed the plough.

We seem to see now, however, under several names, the evolution of a complete series of industrial training schools.

At the top of the series, and, in many places, the first in point of establishment, we find the engineering college, or the engineering faculty of a university, as in McGill. Here are trained in the highest branches of industry and sometimes of art, the young men who are fitted to become the directors of the great engineering works of the countries of the world, works which have made so strong an impression on our modern civilization, that we can now hardly imagine ourselves in a town without telegraphs, telephones and railways. In order to produce men of this type, these colleges must be kept up to a very high standard; their work must include the most abstract theories of mathematics, physics and kindred subjects, as well as that general knowledge which ought to distinguish the university graduate. As might be expected, large numbers of bright young fellows are unable, for different reasons, to fulfil the required conditions and so are excluded from the university. What is to be provided for these? Are they to be allowed to drift away and become of little value to the State, when out of this material might be drawn some of the rank and file of those whose tastes fit them to be the developers of the natural resources of the country. It has always seemed to me that the university, as being the highest authority in educational matters, should have a voice in recommending the course to be pursued in all cases and should assume some responsibility—at least that of advice.

What could it recommend to this particular class? I think that where it is in existence, the technical school would be the best provision for them, as well as for the thousands of boys and girls, young men and young women, who desire to be trained to do something useful, something artistic, something, in fact, which will raise them to a higher level and make them feel their own value and responsibility, will make them proud of their country's development because they have a personal share in it, will give them a delight in work for its own sake, which may yet revive the days of the ancient craftsmen, when

"In the ancient days of art,
Builders wrought with greatest care
Each unseen and unknown part,
For the gods see everywhere."

This idea of a technical institute will include all institutions now known under the name of polytechnics, agricultural colleges, trade schools, schools of domestic science, the higher grades of industrial schools, etc.

Again, the students of both the engineering college and the technical institute must be drawn chiefly from the public schools, but I have already called attention to the fact that two difficulties meet us here, which apply in different proportions in both cases.

First: The school education is often not long enough; second, it is often not so arranged as to prepare the child to make the best use of either college or institute.

The ideal of elementary education has been well striven for, but it is a subject that will apparently absorb the continued efforts of great minds for some time to come. Lately, however, it has come very much to the front and is now being studied on new lines in the schools of pedagogy. In the meantime, till the ideal can be better explained, the best thing seems to be to be practical. If we want a man that can do something, let us teach the boy to do something.

The three R's have held the place of honor for long. Reading opens the door to every department of knowledge and is an absolute necessity, if only to save the expense of teaching. Arithmetic is supposed to train the reasoning powers and does so if it is not taught by rule. Many parts of it are of course necessary and useful in themselves. Writing, one would

think, was manual work, but strange to say, it seems to be the least attractive of the three. Is it that the object is strictly utilitarian? It is certainly not taught with a view to training the hand at all.

Other subjects are added in varying proportions, acording to local estimates of their importance.

In Sweden, France, Germany, England and America, the idea of adding further a study which will train the producing faculties, has taken deep root. The means by which this is done at present differ widely, the essential principle being that manual training is intended to train the mind through the hand. It does not fit a boy or girl for any special calling, but its students are well adapted to go at once into any practical trade or business. It is of course possible, if we have the rather rare kind of teacher who can steadily keep the real aim in view, to employ as the means of training the mind a subject which is also intrinsically useful, but in the majority of cases it seems safer not to allow this and so to force the attention of teacher and pupil to concentrate itself on the process.

The introduction of such manual and artistic training will be found to be no waste of time, nor even to be a new idea, for about the year 400 B.C. the philosopher Plato seems to have understood all about it and to have called attention to the important direct and indirect results from the combination of beauty and utility in the materials of common life. He says, "Such qualities, I presume, enter largely into painting and all similar workmanship, into weaving and embroidery, into architecture, as well as the whole manufacture of utensils in general; nay, into the constitution of living bodies, and of all plants; for in all these things gracefulness or ungracefulness finds place. And the absence of grace, and rhythm, and harmony, is closely allied to an evil style, and an evil character; whereas their presence is allied to, and expressive of, the opposite character, which is brave and sober minded."

The subject which is on the border-land and perhaps the most difficult to form a judgment about, is domestic economy. It differs in one important respect from any other calling in this, namely, that it is not a trade to be followed by a certain section, like carpentry or tailoring, but affects the health and even the morals of every member of the community, boys as well as girls.

There is also a pressing practical reason for giving the manual training of girls the form of cooking and sewing, which is, that you cannot be sure of capturing them later. In a more ideal state of things it would be far better to distribute the manual training throughout the whole course, in which case it would occupy but a small part of the average daily programme, would be in itself a refreshment and would, in the opinion of many, go far to create that interest which would make the boys and girls themselves anxious to stay at school for a longer period.

Also, up to the age of twelve, say, the teaching might have no ulterior object, as it were, that is, it might be directed solely to the fitting of the mind for its after work. Teachers in the cooking schools of New York have told me that twelve to fourteen was a good age, but from fourteen to eighteen would probably be better still, and if we could be sure that most of our children would take at least one or two courses in a technical institute, all special training, even of domestic science, could be much more cheaply and effectively given there.

Again, a special development of manual training claims the attention of educators. It seems to be established, as has been already quoted, that the artistic character of a design greatly enhances its value. The actual instruction in the carrying out of artistic designs in wood, metal and the like, can best be provided for in a technical institute, but if these institutes find the boys and girls utterly untrained in hand and eye, it is evident that much of their effectiveness will be wasted in bringing pupils up to the point at which they should have arrived before entrance.

Aaron Child & Son, hardware dealers, Gravenhurst, Ont., under date of March 8, wrote: "Your paper is a great help to us in keeping us posted on the markets, and we really think it would be impossible to get along without same."

Also, as has been well pointed out, art can only thrive under conditions of general comprehension and appreciation. We need an art atmosphere. To create this requires time in which to educate the whole people along artistic lines and to get at the whole people the work must be well begun in the public schools.

If this be true, and there is much truth in it, in my opinion, something must be devised all along the school course to educate the artistic faculties and to bring once more into friendly relations the useful and the beautiful, so often rudely divorced. When this is done, it is possible that even our language may hesitate to describe our buildings as sky scrapers.

There is no other argument for preserving the public school from any introduction of special training. There is danger of fostering materialism and of the setting of an undue value on riches; there is not only the possibility of losing sight of the far more essential training of the mind which has been referred to, but the serious risk of either crowding out or counteracting the training in the fine instincts of honor and purity and the right consness which exalteth a nation.

We have thus found a place for the engineering college and the technical institute, and for manual and artistic training in the common schools as a preparation for both.

The present series of institutions, differentiated as they are by subject, aim, class and age of students, might all fall under this general classification, which seems to cover the whole ground, and can be made to include every special branch for which it may be found necessary to provide from time to time.

Now, what are the results, so far as they can be observed at present, of the new ideas?

As an example, first, of the result of manual training carried right through a school, I would call attention to the Central School at Monomonie, Wisconsin. Here the management has had wise counsel and financial aid from a private citizen, but the city will doubtless undertake the whole charge, as the school has the loyal and enthusiastic support of every citizen. Both the appliances and the instruction are said to be of the highest order and the results are well calculated to astonish anyone who has never seen this system of public instruction in successful operation from the kindergarten through the high school.

Secondly, we find the results of present day industrial schools, equivalent to the technical institute, described as very satisfactory. They have a distinct tendency to raise the men so trained into another class. This is cited by shallow critics in disparagement, as leaving the ranks which they have filled depleted, but the cure is manifestly not in keeping back those who have it in them to fill a higher place, but in raising others to take their places.

We see this actually done in many cases where labour-saving machinery has been introduced. The new machine-tenders, who do not require to be skilled mechanics, are drawn from the ranks of the labourers and the old "all-round" skilled mechanics have not disappeared, but have risen to be tool designers. Further, it must be remembered, that this result is to a certain extent temporary, because if the learning were nearly universal, as it ought to be, the men would cease to be differentiated by training and would only be distinguished by natural [illegible].

Now to turn to our own city. What have we here to represent this great movement?

In the city of Montreal full provision has already been made for what may be called the higher branches of technical education. I [illegible] especially of McGill

University there the various scientific departments are now thoroughly well equipped and arranged for giving the very highest and best education for those who are intended to direct and superintend the great engineering and industrial works of the country. The same great benefactor, who has provided so liberally for the advanced training, has always felt the vital necessity of preparing a suitable foundation for it in the schools. He has shown this in a most useful manner by giving a large sum of money for the purpose of spreading throughout the country, from east to west, from north to south, that system of manual training, which is becoming a fundamental factor in leading boys and girls to realize that they can be of some practical value in this world.

Sir William Macdonald's work in this direction has demonstrated the utility of the movement. All the provincial governments, with one exception, have given encouragement to what has been done by placing the whole work on a solid foundation and paying for it. I regret to say that the single exception is the province of Quebec, and this in spite of the fact that the townships in which these schools have been established in our province have expressed their willingness to pay a sum representing about one-third of the expense and expect within a short time to be able to take charge of the whole; in spite also of the fact that the Protestant Board of School Commissioners has expressed its strong desire to continue the work, if only the necessary money could be found. The Provincial Government has merely expressed its sympathy and will give nothing at present, but is sending a commissioner to make enquiries in France as to the results of the system there. If the training now initiated so successfully is allowed to lapse for a year, it will certainly be a great check to the growing interest in the work on the part of the pupils and public and there will be serious risk of losing valuable teachers, to say nothing of the want of appreciation of the great benefit already conferred on the city and province. Such lack of appreciation can scarcely be considered an encouragement to future givers. I understand that a sum of $3,000 only would maintain throughout the whole province for one year the work as it is now conducted, but which is of course only a commencement.

In addition to the engineering school and the elementary manual training, some attention has been paid, but in a very insufficient degree, to the provision of technical education in several forms, under the Board of Arts and in connection with lectures given at the Monument National, to the cooking classes given under the Protestant Board of School Commissioners and under the auspices of the Y. W. C. A., etc.

What is evidently wanted is greater and more united effort. Several classes are much in need of help. The experience of the schools of Trinity Parish and the Hebrew Institute in New York, for instance, would lead one to the conclusion that by similar efforts in Montreal much might be done to redeem what, if left to itself, is so likely to become a kind of waste humanity, but what is now merely a mischievous boy, with much potentiality for good or evil.

Besides the children who are now getting no help, we have to consider the case of those who have just left school. You will be as sorry as I was when I heard the rector of the high school, who is doing such fine work in the educational field, make the statement the other day, that a very large proportion of the children in our schools leave them between the ages of ten and twelve.

There is now a call for compulsory and, of course, free education. It seems to be very necessary when such a statement as this can be made.

Another class needing help is of a very different kind. Numbers of young men, engaged in labouring work all day, are anxious to learn a trade. No provision has yet been made by which they might be turned into much more valuable citizens.

Again, there has certainly been, ever since I came here, a deep and increasing demand on the part of mechanics for more knowledge and more instruction in the details and principles of the work on which they are engaged. They have discovered, in some degree, that this work becomes more interesting and profitable if they understand it thoroughly and can perceive its relations to other departments. You may be surprised, as I was, to learn that more than 3,000 mechanics in the city of Montreal have, for this purpose, joined correspondence schools in the United States, and that a sum of more than $100,000.00 thus goes out af the city and out of the country annually, for an education, which, even if valuable in some respects, could be much more cheaply and effectively given here.

The problem is really one of great dimensions and there is no doubt that a strong effort should be made to meet the demand by the organizing of a really effective technical institute. Of course the difficulty is to get the necessary funds to make a start, but it does seem as if once started it must nearly pay itself in direct returns and certainly in indirect returns must repay the outlay many times over.

It ought undoubtedly to prevent waste of material, as all true knowledge must. To prove this, I might tell the story of one of my own graduates, whose father equipped for him a small laboratory in the works, in which to study methods, with the result that, at the end of a fortnight, the saving effected had paid for the equipment, while at the end of the year it was estimated at something like $3,000.

The technical institute should also prevent waste of force, by teaching careful planning before commencing work. We ought never, for instance, to see cases parallel to the re-making of one of our streets last year, where the steam roller looked down proudly on the smoothed and finished surface, quite oblivious of the cable men following immediately behind, and diligently digging up their trenches for the excellent purpose of putting the wires underground.

Not least, it ought to have a considerable effect in preventing the frequent and worse than wasteful commercial wars and the continual struggle, which the Germans well call "Klassen-Kampf," by developing those interests which are common to all classes, and by gradually evolving a clearer conception of the inter-dependence of all forms of mental and physical work.

CORN HUSKERS AND SHREDDERS.

A GREAT many American manufacturers, says The American Exporter, are now going into the business of making corn huskers and shredders, a fact that proves that these machines are meeting a widespread demand. As this machine is a comparatively recent one, a few facts regarding it may be of general interest. The purpose of the corn husker is to enable the farmer to save the whole of his crop, utilizing each part of it to the best possible advantage. In many parts of the West, not only the grain, but every part of the cornstalk, is used as fodder, and the farmers frequently prefer to cut their corn when rather green, haul it to the barns, husk it and cut it up fine immediately. The cattle eat this greedily, whereas, if it had been permitted to dry in the field, much of the nutriment would have been lost. Those farmers who intend to sell their grain, also employ the husker and shredder extensively, as it en

WIRE NAILS
TACKS
WIRE

Prompt Shipment

The ONTARIO TACK CO.
Limited
HAMILTON, ONT.

ables them to utilize the stalk and husk more easily than any of the methods formerly in vogue. Some of the huskers and shredders now placed upon the market are of very large capacity, since they are designed to meet the requirements of threshermen whose work is done usually upon a large scale. Smaller machines are also made, however, in a variety of strong and durable types, by several manufacturers. As this is not a technical paper, we need not detain our readers with the mechanical details of any of these machines, our purpose being merely to point out their advantages in a general way.

One of the latest uses to which shredded corn fodder has been put is the manufacture of baled corn hay, samples of which have been found to be as sweet and perfect after two years as on the day they were baled. This form of preservation permits the farmer to save any portion of his corn hay not required for use on the farm, and dispenses with the "bulk" which heretofore induced him to leave his valuable fodder in the fields, in shocks, to be blown down by winds, saturated by rains and melting snows, and destroyed by frosts. It is claimed that the corn hay crop of one acre is from three to five tons, worth from $8 to $10 per ton, the compressing of this hay for storage or market giving it a value never before anticipated by the grower of corn, who has relied solely upon the grain. The shredder and husker not only reduces the entire stalk to the finest condition for use, but also husks the ears from the stalks and carries the hay to the highest barn loft or stack. Baled corn hay is rapidly finding favor in the cities, not only as a food for horses, but also because the residuum is one of the best absorbents known for preserving the manure. The shredder doubles the value of the corn crop by opening more markets for its use.

Good Results follow always

the sale and use of The Sherwin Williams Buggy Paint and The Sherwin-Williams Enamel Leather Dressing.

They give the dealer a good profit and one of quality that will advertise and build up his paint business. They satisfy the consumer on every point.

They are particularly adapted for use in livery stables. You can push hard for this trade, the quality of the goods will back you up. They will hold and win trade every time.

The Sherwin-Williams Buggy Paint will give satisfaction on porch or lawn furniture and wherever a gloss for severe exposure is desired. It is made for that class of work.

These two products are made to win trade. They will win trade for you.

You will find them right.

PROSPEROUS BRANDON.

MR. T. R. HORNER, who carries on a retail grocery business in Brandon, Man., has been in the east for two or three weeks on business. Mr. Horner has been in Brandon for twenty-three years. Prior to that he was for some time in Toronto.

In conversation with THE CANADIAN GROCER he said that business in Brandon was in excellent condition. "The town," he said, "is rapidly growing. A house it is almost impossible for new arrivals to get. As a result people are crowding into boarding houses and hotels. The construction of houses is going on as rapidly as possible, but the difficulty is to secure enough mechanics to carry on the work as rapidly as desired. To give you an idea of how scarce houses are let me tell you that I know of instances where three months' rent in advance has been paid in order to secure a dwelling that was for rent. The C.P.R. are enlarging their premises. They have bought a tract of land northeast of the town, where they are putting up workshops and a large roundhouse. The roundhouse will accommodate three times the number of engines which the present one does. Within the last two years a binder twine factory has been built and it is running on full time. The Brandon Machine Works are doing exceedingly well. I believe that eventually the works will be as large as anything you have in the east. They manufacture threshing machines, threshing engines, fanning mills and pickling machines. A good many people in the east will not know what pickling machines are. These are machines which are made for the purpose of treating seed grain in order to prevent smut. This company also manufactures chemical engines. A short time ago a firm in Michigan wanted to place an order with the Brandon Machine Works for 100 of their threshing engines, but the company had to turn the order down."

Speaking further in regard to the trade, Mr. Horner said that the firms in the vicinity of Brandon were a most prosperous lot of men, and that in consequence terms of credit were much higher than they used to be. He said that since the number of villages and towns in the vicinity of Brandon had increased the number of farmers who came from [illegible] miles distant to sell their [illegible] and purchase supplies had altogether disappeared. "But," said Mr. Horner, "the increase in the number of farmers [illegible] Brandon has so increased that it has more than made up for the loss of the trade hitherto obtained from the far distant farmers."

MINERAL PRODUCTION OF NOVA SCOTIA.

The report of Dr. Edwin Gilpin, Jr., inspector of mines of Nova Scotia, for the year ending September 30, 1902, gives the following statement of production ;

		1901.	1902.
Gold	oz.	30,537	28,279
Iron ore mined	tons.	.....	15 214
Iron ore imported	tons.	419,567	474,517
Manganese ore	tons.	10	150
Coal raised	tons.	3,625,365	4,362,869
Coke made	tons.	120,000	406.152
Gypsum	tons.	135.637	173,000
Grindstones, etc.	tons.	315	4.000
Limestone	tons.	95.794	223,606
Barytes	tons.	600	742
Pig iron	tons.	90,034	206,193
Moulding sand	tons.	.....	1,390

The figures above give the returns of coal mined. The coal sold in 1902 was 3,898.626 tons, which was distributed as follows: Nova Scotia, 1,382,563 tons; New Brunswick, 319,338; Prince Edward Island, 56,203; Newfoundland, 105,287; Quebec, 1,243,980: West Indies, 5,982; United States, 751,382; other countries, 33,891. The sale of coal in Nova Scotia increased 383,749 tons, due principally to the requirements of the Dominion Iron & Steel Co., which drew its supply for coke and other purposes from the Dominion Coal Co. The sales to New Brunswick show a slight decrease. The sales to the United States show an increase of 200,000 tons.

FAILURES IN CANADA.

The following from Dun's Review shows the failures in Canada during the first three months of 1903 :

	1903. No	1903. Liabilities	1902. No.	1902. Liabilities.	1901. No.	1901. Liabilities
Iron	..	.....	..	.....	..	.....
Tools	4	$5,050	1	$1,500	5	$11,600
Wool	1	25,000	..	.....	1	5,000
Cotton	..	..	..	..	..	..
Wood	3	4,550	2	7,500	5	40,500
Clothing	9	24,400	12	286,150	16	23,843
Hats	3	21,450	..	.....	..	.....
Chemicals	..	..	..	.....	2	38,000
Printing	..	..	3	18,983	4	12,900
Mining	1	52,598	7	25,200	3	31,372
Leather	4	22,000	1	1,000	7	191,760
Leather	1	2,000	..	.....	..	.....
Earthenware	..	..	1	3,300	..	.....
Miscellaneous	29	283,588	22	428,843	30	363,254
Manf'g	60	$450,636	49	$772,476	73	$718,229
General Stores	76	$380,150	93	$962,967	86	$433,530
Grocers	44	158,881	64	200,227	54	427,670
Hotels	13	87,841	16	48,212	21	54,699
Liquors	8	18,500	9	411,650	9	28,100
Clothing	14	41,650	28	202,348	32	124,148
Dry Goods	22	189,000	26	430,471	45	680,888
Shoes	14	56,905	20	77,480	21	111,442
Furniture	2	15,000	7	82,110	9	240,779
Stoves	8	89,903	9	59,018	12	57,710
Drugs	4	10,000	2	6,700	8	50,364
Jewellery	3	3,100	7	40,500	7	47,650
Books	4	33,100	2	13,100	5	27,216
Cigs	2	11,100	1	20,283	1	800
Miscellaneous	9	113,847	24	235,113	35	218,007
Trading	223	$1,187,173	308	$2,497,070	345	$2,503,023
Transporters	5	116,344	6	159,437	6	112,470
Total	288	$1,754,173	363	$3,439,992	424	$3,333,722

Commenting on the above, Dun's Review says : "Canadian returns according to occupation show that in five of the fourteen manufacturing classes there were no insolvencies, and in none of the others were losses at all heavy, although in number there was a slight increase over last year's statement. In every respect the trading failures were more satisfactory than last year, with notably smaller liabilities in general stores, liquors, clothing and dry goods."

INQUIRIES ABOUT CANADIAN TRADE

The following were among the recent inquiries relating to Canadian trade received at the Canadian Government office in London :

1. A Glasgow firm interested in wood pulp is looking for a new source of supply, and asks to be referred to Canadian producers not already represented in the United Kingdom.

2. Inquiry is made for names of Canadian firms requiring an agent to represent them on commission in the Midlands, by a person, offering good references, who has had experience in selling manufactured leather goods, stationers' sundries, fancy goods, etc.

3. A Sheffield firm of tool makers have asked to be placed in touch with Canadian buyers of such goods as they manufacture.

4. A North of England firm desires to get into touch with Canadian importers of oakum and dry spun yarn.

5. An inquiry for Canadian seed peas has been received from a correspondent at Angers, France.

The following are among the recent inquiries received at the Canadian Section of the Imperial Institute :

1. A Lancashire firm of provision merchants desires addresses of a few Canadian shippers of produce.

2. A Scotch manufacturer of jute and linen goods wishes to be placed in communication with Canadian importers of these lines.

[The names and addresses of the above applicants can be obtained on application to the Editor of HARDWARE AND METAL.]

A BIG ORDER.

There has been some keen competition against inquiries for large quantities of galvanized sheets, and we hear that one large order, amounting to several hundred tons was secured by Messrs. Caverhill, Learmont & Co. for their "Comet" brand last week.

MACHINERY

MOTIVE POWER ON THE FARM.

THE evolution of Canada from a sparsely populated strip along the banks of a great river, to the most prosperous and promising of "The King's Dominions beyond the Seas" is rivetting the attention of the world upon the vast resources and possibilities of our country. The phenomenal advancement of the United States during the last two decades is being rapidly paralleled, if not exceeded, by the marvellous growth of the Northwest, and the increased business activity of the older provinces.

No greater metamorphosis has taken place in any department of industry than in farming. The days when farmers were content to walk in the straight and narrow path of agricultural rectitude that their forefathers had set forth as the law inviolate of the sons of the soil: when even the weariness of the plowman, who had run his score or so of furrows in the day was an inspiration to the poet; those days are gone forever, and their passing is not to be regretted.

The agriculturist has at last broken away from the fetters of ignorance, and has embraced the opportunities afforded by the expansion of science, and to such good purpose that inventors and manufacturers vie with one another to gain vantage from some new way of reducing the manual labor and increasing the productiveness and profit of the farm. Not only is this advancement noted in such elemental operations as plowing and seeding, where the sulky and the seeding machine have forever ousted the farmer from his position as the central figure of an impressionist's canvas; not only has the hideous-looking but essential separator supplanted the flail and threshing floor, but in every department of farm labor the work of man's hands has been lessened, the effort of his brain increased. Choppers all but masticate the feed for his stock, churning is merely a matter of a little supervision; even milking machines have rudely thrust aside that most picturesque feature of ancient lore, the milkmaid. But in this instance, at least, science has outstripped itself, and milking machinery is pronounced a failure. The great essential of ancient farming was patience and a gigantic capacity for hard work. The most necessary feature in the farmer's stock in trade to-day is brain, the next, mechanical power, and the third muscle. The question that comes to every agriculturist now is, therefore, how to obtain [illegible] power. Much depends on the locality. On a western prairie, where all the fuel must be shipped in from a distance, steam has great disadvantages, while in partly cleared lands where timber is plentiful it is probably the most economical power. Oil engines are coming to the fore, and have certain potentialities not to be found in steam engines. It should be understood, however, that like any other form of machinery, these engines need some little attention. As a recent article in "Hardware and Metal" plainly indicates, gas and oil engines are delicately constructed devices, which must be kept clean to work well.

The one great advantage such engines possess is their portability, and next comes the fact that they are always ready for instant action. For intermittent power at uncertain intervals, probably the wind engine is more economical, because wind, like advice, is cheap. The steel or wooden structure, surmounted by a wheel with slanting vanes, and incidentally, with a very pronounced and persistent "squeak-ety-squeak" in dry weather, is now almost as much a part of the Canadian farm as the cow-shed, and the universal anathema which erstwhile was the sole portion of the lightning-rod man and the book agent now descends on the head of the "squeak-pump canvasser." As a pump for keeping up a supply of water for the stock or domestic purposes, the wind engine has probably no equal.

It may be that the farmer whose lot is cast in a section where "nae wind blaws" and yet where water is precious, is compelled perforce to accept the inevitable, and grumble in true British style at the fates that have been so unkind, when perhaps he is within reach of a power far superior to either wind or steam. Trolley lines are now honeycombing the country, and farmers will do well to ascertain on what terms the companies operating them are prepared to furnish power from their mains. Electricity has but recently been adapted to domestic and farm uses, but wherever such departure has been made, success has been the result.

Companies are everywhere hunting for water power franchises. It would be well for the farmers of a community where water power exists to remember that such energy can be utilized to good purpose not only in lighting, but in conducting every operation that can be done by machinery on the farm.

In a later issue of "Hardware and Metal" some details of the application of steam, oil, wind, water and electric power will be given. Hardwaremen should watch very closely the development of farm machinery, for it means money to them. There is no man in a small community so well able to handle the trade in these little engines and accessories as the dealer in hardware.

MACHINERY AND ELECTRICAL NOTES.

Richmond, Que., has decided to build and operate its own electric plant.

The Horwood Company, of Dog Bay, Newfoundland, are erecting machinery for a new mill.

A 6 x 6 marine engine was shipped to J. Moreau, Waubaushene, Ont., by H. W. Petrie, Toronto.

A large triple expansion engine has been purchased from H. W. Petrie, Toronto, by White & Grills, Lakefield, Ont.

The Regina City Council has decided that a system of waterworks, electric lighting and drainage shall be installed.

Raymond sugar factory, Lethbridge, B. C., is still receiving machinery, although the period of free entry expired April 1.

The Canadian Ship-building Co., which Toronto capitalists are starting on the Welland Canal, are now receiving machinery at their new works.

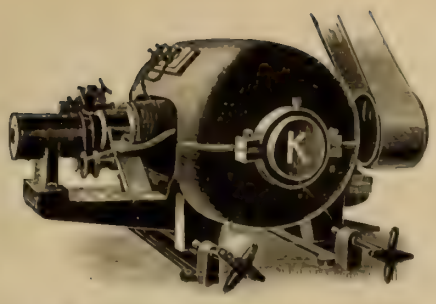
Frederick Nicholls, of the Canada Foundry Co., Toronto, stated that the company had just secured an order from the C. P. R. for 50 new bridges.

The American Cereal Co., Peterborough, Ont., have purchased a London 24 x 10 x 10 in. gap screw cutting engine lathe from H. W. Petrie, Toronto.

A very fine tool in the shape of an 800 lb. London steam hammer was installed in the plant of the Canadian Otis Elevator Co., Hamilton, Ont., by H. W. Petrie, Toronto.

Glasgow papers have recently published reports to the effect that the Fairfield Ship-building Co., among the largest owners on the Clyde, have decided to establish a plant on Sydney harbor, N.S.

Fort William is to be supplied with 5,000 horse-power from the Kaministiquia river by the Anglo American Power Company within two years, at a cost to the consumer of $15.00 per horse pow



Kay Electric Dynamo and Motor Co., Limited

Manufacturers of Dynamos and Motors for all purposes, both direct and alternating currents. Special attention given to repairs.

'Phone Main 1251. Estimates cheerfully given.

PETRIE'S MACHINERY LIST.

(Changed every issue).

AUTOMATIC ENGINES
- 11 x 10 Peerless Self-Oiling (Leonard)
- 10 x 10 " " "
- 70 h. p. Compound Condensing Engine, Kelly-Osborne
- 8 to 65 h. p. "Jewel," new. Always in stock

MARINE ENGINES
- 2½ to 4½ h. p. Gasoline, with shaft and wheel, new
- 1 to 15 h. p. Steam, Dutton, new
- 7½ x 14 x 12 Steeple Compound, Doty
- 3 and 5½ x 4½ Fore and Aft, Compound, Doty, new
- 4 and 5½ x 4 " " " "
- 4 x 4 Polson
- 4½ x 5, with shaft and wheel
- 9 x 9 " " " new

BOILERS
- 19 x 44—13—2 in. tubes, upright, new
- 20 x 43—19—2 in. " " "
- 24 x 50—31—2 in. " " "
- 30 x 60—43—2 in. " " "
- 30 x 72—43—2 in. " " "
- 24 x 60—31—2 in. " " Submerged, new
- 30 x 60—54—2 in. " " "
- 30 x 72—22—2 in. " " Economist, "
- 26 x 36—15—2 in. " " "

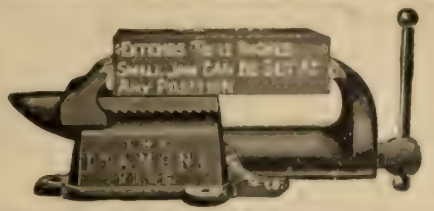
The large addition to my present quarters will soon be completed. Until then I will make close prices on the above. Quotations and Catalogue sent on request.

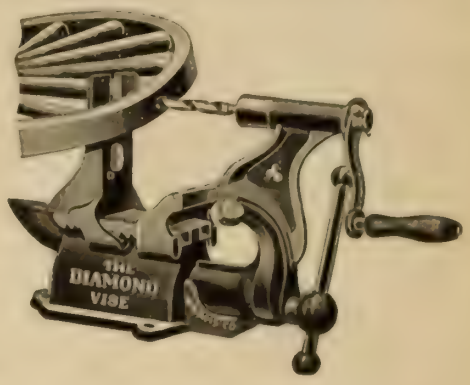
H. W. PETRIE

131-145 Front St. West, 8-22 Station St., Toronto.

DIAMOND VISE AND DRILLING ATTACHMENT.

U. S. Patent Jan. 15, '95. Canadian Patent July 22, '95.





JAWS are faced with steel ⅝ inch wide, 4 inches long, firmly fastened to jaw, checked and hardened. VISE weighs 38 pounds. DRILL weighs 13 pounds.

For Sale by Jobbers of Hardware.

STEAM, GAS, WATER and AIR-TIGHT.

The most easily renewed Globe Valve made.

We will be pleased to mail catalogue and prices on application.

THE FAIRBANKS COMPANY

Montreal **Winnipeg** **Vancouver**

...per annum. English capital is behind the scheme and the contract is signed by Hugo Cooper & Co., of Winnipeg.

The Kingston Locomotive Works Company has now its full complement of machinists for the first time since the strike began a year ago.

The Cramp Steel Ship-building Co., Collingwood, Ont., are pushing the work on two large steel freighters, and have contracts for two other large steel vessels to be built as soon as these are finished.

The business of the Jenckes Machine Company, Sherbrooke, Que., is increasing so rapidly that the question of increased capital for the purpose of enlarging the works is under consideration.

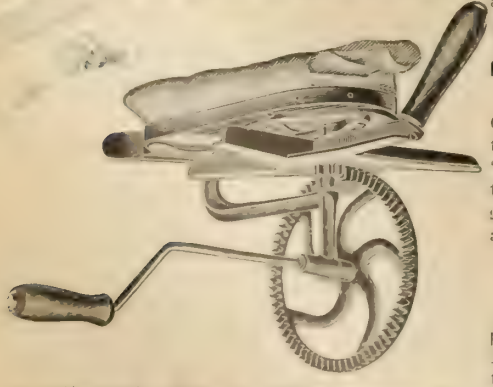
The Belleville Portland Cement Company has offered the promoters of the proposed electric road between Toronto and Cornwall $1,000 towards building the road from Belleville eastward, as the line will be built in close proximity to the works.

Winger Bros., of Edgley, Ont., have installed a 110 horse-power boiler and a 25 horse power engine for the purpose of making cider, apple butter and jelly. A large trade has been worked up in this line, and to meet the demand Winger Bros. have built a considerable addition to their plant. The machinery was installed by H. W. Petrie, Toronto.

Moose Jaw is sorely perplexed over the vexed question of municipal franchise. One faction of the town council would have the proposed electric light plant in the hands of the ratepayers, while others believe the proposition of John Jack & Co. to supply electric light at a stated figure on condition of a ten years' franchise should be accepted. The council were unanimous in the belief that light must be had somehow, and the Fire, Water & Light Committee were instructed to find out the best means of obtaining it. They will report as soon as possible.

BROADCAST SEED SOWERS.

H. S. Howland, Sons & Co., Limited, Toronto, are now selling to the trade the "Premier" broadcast sower, which they claim to be exceptionally strong and compact as well as neat. The frame of the "Premier," which carries all the bearing parts, is made in one piece of metal, thus assuring perfect and permanent alignment. The seed is fed to the fan wheel through



an adjustable shute, in such a manner as to insure an even distribution. The grain bag is supported by a strap thrown across the shoulder and is made of canvas securely fastened to the base of the machine. The "Premier" will sow any seed that is sown broadcast, such as oats, wheat, rye and rice, millet, clover, timothy grass seed, etc.

THE NICKEL-COPPER COMPANY.

A man who is in a position to know says there are still good times ahead for the Nickel Copper Company, which has not for some time back been in the hey day of prosperity. John Patterson has the matter in hand, and the company is in process of reorganization. All the old debts have been settled, and it is said the original shareholders will come out all right. Hamilton Herald.

RESISTANCE OF STEEL BARS.

The results of some experiments made by Brinell on the influence of chemical composition of the resistance of steel bars under impact were given in a recent issue of "Stahl und Eisen." The experiments were made both with notched and unnotched bars, and the temperature at which the tests were made ranged from −28 degrees Cen. up to +30 degrees Cen. Fifteen varieties of ingot iron were tried, and the general conclusions arrived at were as follows: Resistance to shock diminishes rapidity with a decrease in the carbon content, both for hardened specimens and unhardened ones. With unhardened specimens rich in silicon the resistance is greater than with specimens containing little silicon, but with hardened specimens an increase of silicon proved a disadvantage, but it should be noted that samples with little silicon were proportionally richer in carbon, and hardened, therefore, more energetically. In unhardened and unnotched specimens the resistance to impact diminished as the manganese increased, but the inverse was the case with hardened specimens. With notched unhardened specimens the resistance to impact was unaffected by the manganese content, but with hardened and notched specimens an increase in this constituent diminished the strength. At lower temperatures the resistance to impact diminished the more rapidly the greater the carbon content, and unhardened specimens were more affected than hardened ones.

BERLIN TO BUY ELECTRIC PLANT

Berlin, Ont., Council has agreed to buy the plant of the Berlin Gas Co., paying $90,000 for property as it stood on Dec. 1, and such further sum for property built since then as shall be agreed upon, also on condition that the town furnish power to the Berlin and Waterloo, and Berlin and Bridgeport Railways till October 1, 1903 at $350 a month.

MACHINERY FIRM WANTS AN AGENT

Mr. Harrison Watson, secretary of the Canadian section of the Imperial Institute, has received the following inquiry: "A company manufacturing machinery, tools and contractors' plant wish to get into touch with an influential firm in a position to introduce their goods."

BRIDGES IN BRITISH COLUMBIA.

Two most important bridges are in process of erection, one over the Victoria Arm, on the trolley route from Victoria to Esquimalt, and another over the Fraser at New Westminster. The first will be 600 ft. long and 28 ft. wide, and will carry a single track and cost $106,000. The latter will be 880 yards in length, with a railroad track 18 feet above the high water level, and a roadway for pedestrians and wagons 21 feet above the railway. It will rest on eleven piers and have a draw in the centre to permit the passage of steamboats. The Great Northern will probably use this bridge to get to Vancouver. The estimated cost is $850,000.

UNIONISTS CONDEMN BOYCOTTING

The convention of the National Metal Trades Association held recently at Buffalo was, says "Iron Age," one of the most important gatherings of employers ever held in this country. The meeting was remarkable, not only for the unanimity of opinion regarding the plan for action in the correction of evils attending present day trades unionism, but for the aggressive stand and fearlessness of action toward meeting and correcting these wrongs, which characterized the transactions.

Short as the assemblage may seem to have been, every moment of the time was devoted to hard work along the lines of a skilfully formulated and excellently executed plan. The practice of boycotting was strongly condemned, and a very strong resolution in which such practice is characterized as "un-American, illegal and cowardly," was adopted.

THE LATE ANDREW ARMSTRONG.

Andrew Armstrong, who founded the Vulcan foundry on Broad street, St. John, N. B., in 1867, and who has, during the thirty-four years he has conducted the business, been respected as an energetic and progressive man, died in his home suddenly on Sunday at midnight. Mr. Armstrong had supplied his foundry with the latest and most improved plant for the manufacture of light and heavy castings, cast and wrought iron railing, soil pipe, iron building work, etc., all of which products have a standard reputation. He leaves besides a widow five sons and a daughter. The business will, in all probability, be continued by the sons.

TO ENSURE BETTER SOLDER.

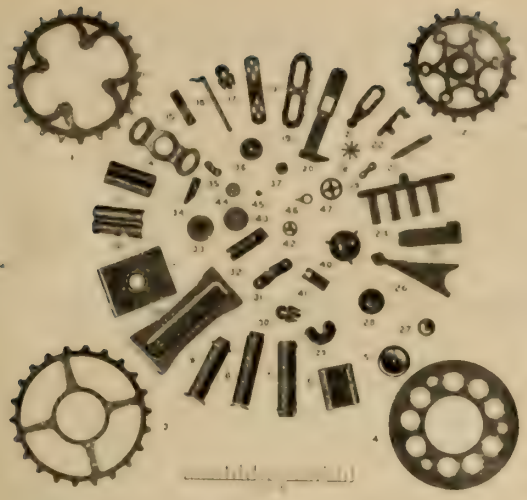
Application is being made in Canada and the United States for the patenting of a device that will be known as the "Fowler-Carthew Solder Pyrometer." The invention is for the purpose of indicating the temperature of solder at a stage when it is possible to obtain a perfect action of the molten compound. It will not only avoid the present large waste of imperfect tins in their manufacture, but will be an almost absolute protection against "leaks," one of the most annoying and costly defects in the canning of salmon and all other tinned products.

RESTORATION OF BRASS ARTICLES

For the regeneration of brass articles, says the "Metallische Rundschau," they are first freed from adhering dirt by the use of hot soda lye, then if they are bronzed, dipped in highly diluted solution of sulphuric acid and rinsed off in clean water. Next they are yellowed in a mixture of nitric acid 75 parts, sulphuric acid 100 parts, shining lampblack 2 parts and cooking salt 1 part; then rinsed off and polished, and, to prevent oxidation, coated with a colorless varnish, a celluloid varnish being best for this purpose.

BRITISH COLUMBIA IN LINE.

We note with pleasure that Vice-President Harry Mahoney is getting a good report together of Vancouver and Victoria for the forthcoming National Convention. Harry's report should not be "taken as read." It will be interesting.



SAMPLES OF PRESSWORK MADE ON OUR PRESSES

DEPARTMENT OF ADVERTISING SUGGESTION AND CRITICISM

Edited by **W. Arthur Lydiatt,** TORONTO.

NOTE Herein are discussed the principles and practice of advertising. Subscribers are invited to send Mr. Lydiatt specimens of their newspaper and other advertising, for the purpose of review in this department Address care of Department of Advertising HARDWARE AND METAL

What are you doing to advertise your store? What methods have you found most successful in increasing business, and what schemes have you tried that didn't pan out just as you thought they would?

Take a half hour some day and write me—tell me what you are doing and what you have done toward extending the scope of your business. Then I can tell other readers about the things you have done that turned out successfully, and warn them against schemes that meant "wasted money." Don't hang back—tell your experience first. Make this department the medium for the exchange of ideas so that we may all profit by each other's experiences.—THE EDITOR.

HERE is a story that has been published more than once, but I guess there are plenty of HARDWARE AND METAL readers who have never seen it, so I'll repeat it again for their benefit.

The story is told of Henry W. Grady, at one time editor, etc., of a newspaper in the Southern States, whose struggles for existence were hard indeed. "Dolph" and "Wes" Rounsaville, big merchants, declined to advertise, notwithstanding Grady's persistent entreaties. "We don't need to advertise," said "Wes," senior partner. "It won't do any good. Nobody reads advertisements anyway." "Don't read 'em!" cried Grady. "I'll show you." The next day's paper followed one of the editor's brilliant articles with this notice:

WANTED—Immediately, 2,000 cats, for which we will pay 50c. each. J. W. Rounsaville & Bro.

It rained, snowed and hailed cats. Every boy in town stole cats to sell. Farmers hauled them in from the country. The railroads brought them in by freight and express. They arrived in sacks, bags, boxes, kegs and barrels. "Wes" and "Dolph," who had not read the advertisement, were nearly paralyzed with fear. It was the town's business to stand about the corner of the store and enjoy the fun. Grady himself leaned against a telegraph pole splitting with laughter and crying with every fresh breath: "Nobody reads advertisements, eh? Nobody reads 'em? The Rounsavilles were glad to compromise on a contract for a year's ads.

People will answer most any ad. that offers anything. They'll sell—even cats whenever they see a good opportunity. They'll buy, too, whenever they see a good opportunity. Of course, the better the opportunity, the more people will want to take advantage of it. But they usually look for such things in the newspapers.

TWO CLASSES—WHICH IS YOURS?

There are two classes of merchants.

In the one we find the man who is bigger, every way, than his store. It doesn't make much difference how big his store is. He runs it on close, practical business principles. He is acquainted with every detail of his business. He is master of every situation.

He knows how to get business, keep it and make a profit.

He advertises to get business—advertises to keep it—and because he gives his advertising due attention it pays a good profit.

In the other class we find the man whose store is bigger than he is. His business is an elephant on his hands. No matter how large or small the store is, it is a great deal too big for him. He don't run the store—the store runs him—often into the bankruptcy court.

He has tried advertising—has proved more than once that it doesn't pay. He advertised in much the same way that he tries to run his store.

Conclusion: There are lots of men in business for themselves who need a pilot. They would make more money working for somebody else.

ADVERTISING IN PROGRAMMES, ETC.

There has lately been considerable discussion regarding advertising in programmes gotten out by charitable, social and educational institutions, and such charitable publications.

Now a really good programme is not without its value, but the trouble is there are so many of them, and most of them are absolutely worthless. Money spent for such advertising should be charged to charity instead of to advertising expenditure.

In some sections this kind of advertising has been sought in such quantity and so persistently that retail merchants have felt constrained to decline such advertising, because they are unable to trace any returns from it.

The New Haven (Conn.) Business Men's Association has decided that advertising of this kind has become such an evil that it required united action on their part. They accordingly passed a resolution prohibiting their members from advertising in such publications, and supplied each member with a card similar to the one here reproduced.

New Haven Business Men's Association.

No member shall advertise in any program, score-card, or any other publication issued by any church, or religious, military, social, benevolent labor, political, charitable or educational organization, or make donations of money or merchandise to, or purchase tickets from, churches or organizations as enumerated above.

It measures 11 x 14 inches and is supposed to be hung in a conspicuous place in the store of each member of the association.

This would seem to be a good plan to abate the nuisance, where it exists.

If more merchants would put the money they spend on advertising in these programmes into the newspapers and other forms of legitimate advertising I don't think we would hear so much grunting about advertising being a necessary "ex

Sweep the Carpet with a Carpet Sweeper.

Takes up all the dirt and leaves you your strength.

We've got the best carpet sweeper to be found don't think you'll find a better one anywhere than the Blank which we sell at $.

Has an easy motion parts are well adjusted dustless and easy running.

It will wear and do perfect work for a lifetime. Come in and look at one.

SWEEPER, CARPET & CO.

Dustless Town, Ontario.

pense." Advertising, rightly done, is not an expense—it is an investment, pure and simple.

Herewith are a couple of suggestions for ads which fit in pretty well at this time of year. Women are cleaning house these days. Good time to talk about all the things you have that will help make it easier for them. Don't forget the prices.

You can create lots of needs by suggesting them. There are some things a little out of order in most every house, which some small article from your store would fix up all right. The occasional suggestion of a broken latch and imperfect lock, broken hinges and such like, might cause some people to decide to put these things in good order.

YOU CAN PICK A LOCK HERE THAT CAN'T BE PICKED WHEN ON YOUR DOOR

If there are doors about your house or outbuildings without a perfect lock, better come and pick a new one out of our complete assortment.

All sorts of locks at all sorts of prices—but they're all worth what they cost.

I'd like to use about a column of this page every week to publish the opinions of different readers on "How a Hardware Store Ought to be advertised." Have you any opinions on the subject? Will you let me have them, then? Tell me something of your experience, and send along a few ads., which I'll reproduce if you wish.

LATE SENATOR GILLMOUR

The death of Hon. Arthur H. Gillmour, Canadian Senator, occurred suddenly on April 13, while on his way to Ottawa on the Canadian Pacific train. He had retired for the night, and suddenly startled his fellow-passengers by springing from his bed. Every effort was made to resuscitate him, but in vain.

He was born in St. George, N.B., in 1824, and from 1854 to 1866 was a member of the New Brunswick Legislative Assembly, being Provincial Secretary in one Government. From 1874 till 1896 he was a member of the House of Commons, Ottawa, when he was called to the Senate by the Liberal Government. He was engaged in both lumbering and farming.

Daniel Gillmour, a partner in the firm of Chase & Sanborn, the coffee merchants, of Montreal, was his son.

THE BEET SUGAR QUESTION IN CANADA.

From our Ottawa Correspondent.

OF all the requests for Government assistance none is being more strongly pressed than that for aid to develop the beet-sugar industry in Canada.

The annual consumption in this country is in the neighborhood of 300,000,000 lb., all of which, we are assured by the beet sugar people, could be produced in Canada.

This would mean the establishment of

AN IMMENSE INDUSTRY,

for, to quote from a lengthy speech made by Dr. Sproule in the session of 1901, it would require to produce all this sugar, 1,500,000 tons of beets, 240,000 tons of coal, 150,000 tons of lime, while 150,000 cars would be required to transport the finished product, and from 150,000 to 200,000 acres would have to be put under cultivation.

REVENUE FOR THE FARMERS

At an average of $4.50 per ton for the beets delivered at the factory, the farmers' revenue from this source would be $6,000,000, to say nothing of the immense amount of employment that would be given to the various transportation companies, and to the laborers engaged in producing the lime. For such an output it is estimated that 30 large factories would be required, which at $500,000 each, would mean an initial outlay in the country of $15,000,000. Making all due allowances for the enthusiasm of promoters and advocates, the vast importance of an industry even half as great as that outlined, would be speedily admitted, and therefore, no one need apologize for discussing the question at some length.

TESTS.

Practical tests made in several parts of Ontario, and, we understand, in other parts of Canada, have proven that both in the matter of yield per acre and percentage of saccharine matter we are as fortunate as the best, and far more fortunate than Germany, where such immense quantities of beet sugar are produced. These facts are very naturally made the basis of the argument on which application for aid is being made. Special tests, however, are always more or less misleading, for in them extra attention is always paid to the cultivation of the crop, and, very naturally, the best land is chosen for the experiment, so that when we hear of a production of 20 tons to the acre, as compared with from 12 to 13 in Germany, we must by no means run away with the idea that such a yield would even be approximated in the average.

AID TO THE INDUSTRY

The industry has made a beginning in Canada; four factories in Ontario, those at Wiarton, Berlin, Dresden and Wallaceburg, and one at Lethbridge, having been established. Nor has aid thus far even been entirely withheld. In 1901, the Ontario Government passed an Act appropriating $225,000 by way of bounty, no more than $75,000 to be expended in any one year, and this sum to be paid out at the rate of ½c per lb for the first and second year, and ¼c per lb for the third year of the existence of any given factory, a proportionate distribution to be made among the factories if there should not be enough to go around in any one year, but the grant on this condition among others, that factories getting it must have paid $4 per ton at the factory for all beets delivered in the first year, and not less than 33 and one-third cents for every 1 per cent of sugar contained in the beets delivered during the second and third years.

In addition to this, while at the time refusing to grant a bounty as asked, the Dominion placed the machinery required for such a manufactory on the free list, an important concession when we remember the great cost of the plant required.

NECESSITY FOR MORE CAPITAL.

Now, on the advantages above noted—climate, soil, and State aid—certain well known shrewd business men invested money for the construction of the factories above referred to, and, it is disappointing to find that more is still required. It suggests the doubt as to our natural advantages, and that these gentlemen having been mistaken once, may again be mistaken. The labor problem is one of the serious ones in connection with this question. For the ordinary pursuits of mixed farming it is now exceedingly hard to get adequate help, and, in the culture of beets an immense increase in the work of the farm necessarily follows.

Of course it is possible by customs duties or by bonuses to make any industry so prosperous that prices can be given for the raw material which will enable its producer to pay such wages as to get the necessary supply of labor—but for the present, at least, with such a strong movement towards New Ontario and the West, the wages offered would have to be high beyond all reason to procure the many hands required for beet culture on a large scale.

COMPETITION WITH CANADA'S [illegible]

Another and very important phase of the present question is the competition with Canadian refining, an industry now well established in Canada after many years of protection. The beet men seem to feel that the [illegible] sugar is receiving undue favor, and that to

should be in some way shorn of his advantages, or a part of them at least, to their gain. Now, when the Tariff was revised in 1897, the protection of the refiner was considerably reduced, of which he has never ceased to complain, so that a readjustment to his further disadvantage means a direct and sharp conflict between two classes of Canadian manufacturers.

More than that: If we are to take literally the leaflet of the Ontario Beet Sugar Association, lately sent out very freely, it means the total extinction of the older industry, for we are told that every pound of imported sugar might have just as well been produced from our own beets. With millions of dollars invested, we may feel very sure that such an obliteration cannot be effected without great hardship and bitter opposition.

ADVANTAGES OF THE HOME INDUSTRY.

But let us leave the Canadian refiner of imported sugar out of the question, and treat the matter as one between the maker of Canadian beet sugar and the importer of foreign refined sugar. We shall see that the Canadian sugar has a very considerable advantage already. The duty on every pound of foreign refined sugar brought into Canada of a quality corresponding with our own beet sugar is a trifle over 1¼c. per lb. True, the refined would come in a trifle lower under the British preference, but importations of that kind figure very little so far as sugar is concerned, inasmuch as, to secure the benefit of the preference, the refined article must have been made entirely from British grown sugar, with which strict condition the British sugar refiners do not seem to wish to comply, if we are to judge from the fact that last year only $237 was collected on sugar which took advantage of the preferential tariff. We have already noted the Ontario bounty, so that between the two, Ontario beet sugar has at least from 1½ to 1¾c. per lb. to go upon.

BEET SUGAR IN THE STATES.

Reference is frequently made to the flourishing condition of the beet industry in various States of the Union, but the duty imposed on sugar going into that country is about 50 per cent. higher than here, and in many cases a bounty of as high as a cent a pound has been granted, while labor conditions seem to be much better there than here, so far as this particular industry is concerned.

FROM THE FARMERS' STANDPOINT.

The request to the Government to foster the industry by State aid of some sort, whether increased import duty or bounty, is urged very strongly as a matter of concession to the farmers of Canada. It is asserted that the farming class bears a very large share of the taxation, which the imposition of duties for the protection of other industries entails, and that here at last is a chance to give him some protection on his own account, to compensate him, in a measure at least. Unfortunately, however, for those who are building upon this argument, the farmers do not seem to be at one with regard to the matter. A request has been sent by the beet sugar promoters to various county councils to assist them in their campaign by petitioning the Government, and in some cases, the county council has refused to do this in the very section of country where beets could best be grown.

The Weekly Sun, a paper which claims to speak with authority for the farming class, notes the fact that when application was being made to the Ontario Government for the bounty subsequently granted, it was asserted that that was all which would be required to set the industry on a sure foundation, but that now the very same men are asking for more, and it winds up a very pronounced article against further aid as follows:

Would the farmers of Canada be benefited by an increase of the sugar duty? They are large consumers of sugar; and there is no question that an increase of duty would result in at least an equal increase in the price. Some farmers, it is true, grow sugar beets, but for one farmer that grows beets there are more than one hundred who do not. Would it be right to force one hundred farmers to pay more for their sugar in order that one farmer may get more for his beets? Would it not be better for us to confine ourselves to growing those products in which we excel and buy our sugar from places where it can be produced cheaper than it can be produced here?

THIRTY-FIVE YEARS IN BUSINESS.

Mr. Robert J. McKelvey, of McKelvey & Birch, retail hardware merchants, Kingston, was in Toronto this week on business. The firm of McKelvey & Birch have been in business continuously for 35 years, and are at present making extensive alterations in their store, which promises to be one of the finest and best in Canada. With a view to making the store thoroughly up-to-date Mr. Robert J. McKelvey has visited a number of commercial centres during the last few months.

PERSONAL MENTION.

Mr. J. O. Carpenter, manager of the Dawson Hardware Co., Vancouver, spent last week at Harrison Hot Springs.

Mr. Wm. Cooper, Apple River, N.S., has been engaged as bookkeeper by the Enterprise Foundry Co., Sackville, N.B.

Mr. R. F. Anderson, of R. F. Anderson & Co., Vancouver, has accepted the position of manager in the Vancouver Hardware Company.

CHAT

JOHN Robertson, stove and tinware dealer, Strathroy, Ont., intends installing a complete stock of hardware, and is overhauling his store for that purpose.

Fort Frances, Ont., has been incorporated as a town.

Wm. Strachan, Ottawa, intends opening a branch store in the same city.

Wilkinson's hardware store, Regina, N.W.T., is being extensively improved.

Kayser Bros. have bought out W. F. A. Fishleigh, hardware dealer, Hagersville, Ont.

Mr. McDermid, late of the Fraser Hardware Co., Galt, Ont., has accepted a situation in Bracebridge, Ont.

Henry Newton, of Orangeville, Ont., has accepted a position with O. B. Henry, Drayton, Ont.

Ketchum & Co., bicycle and sporting goods dealers, Ottawa, have moved into new premises, which are extremely bright and attractive.

The Brandon Hardware Co., have purchased some valuable property on Rosser avenue, Brandon, Man., next to their present quarters.

W. C. Bond, hardware and implements, Gladstone, has bought the lumber business of Munro & Shirray at Plumas. A stock of hardware and tinware will be added.

T. Houghton, of the firm of Scott & Houghton, hardware merchants, Forest, has severed his connection with the firm and left last week for St. Thomas, where he has a good situation in a hardware establishment.—Sarnia, Ont, Canadian.

W. T. McGibbon & Co. have purchased the hardware business of D. J. Nesbitt, Brighton, Ont., and will carry on the same. In subscribing for HARDWARE AND METAL McGibbon & Co. say that they are very much taken with it.

Wes Staples, formerly of the firm of Dutton & Staples, who recently opened business in the O'Callaghan Block, is now well prepared for the season's trade, having on hand a large stock of bicycles and bicycle sundries, while the repairing department is thoroughly equipped. Mr. Staples is a popular young man, and we bespeak patronage for him.— Ingersoll, Ont., Tribune.

The assets of the tanning business of Morin, Frere & Co., Quebec, have been sold.

THE SITUATION IN TURPENTINE.

BUYERS of turpentine have just begun to realize the full import of the sharp decline in turpentine in the south, which was followed by a drop of 4c. here. Even now importers here do not fully understand the situation.

It is conceded now, however, that the decline from 65c. to 49½c. in Savannah was the result of competition against The Standard Oil Company, which huge corporation, it is asserted by good authorities, at present practically controls the turpentine market and will control it in the future. For some years the Standard Oil people have been operating in turpentine, but until this year their power was not generally recognized, when it suddenly became evident to Canadian and American buyers that the Standard Oil Company was the controlling power in the turpentine market.

This action on the part of the corporation has led to new competition in the southern market, resulting in the great drop in prices of about 15½c. For a few days the situation in the south was almost a panic, but prices gradually steadied themselves at the lower figure, and business settled down to a hard fight between the smaller operators and the Oil Company.

The results of The Standard Oil Co.'s controlling the turpentine market will, in all probability, be far reaching, creating conditions which have not before existed. As yet even the most experienced importers are at a loss what to think of the future of the turpentine market. While there is the usual feeling in a case of this kind that prices will gradually advance, there being a limit to the production of turpentine, unlike linseed oil and petroleum, several phases of the situation are indicated which tend to dispute this view. It is admitted, however, that in the near future The Standard Oil Co. will be able to say: "This man may have so much turpentine" and "that man may have so much," and that it will be able to manipulate the market almost as desired.

But it is pointed out that there is a large area of turpentine forest which may be controlled by operators outside the corporation. Some sections have not been used for years. The trees having been tapped season after season, lost their strength, and had to be left some years to regain it and again produce the flow of raw turpentine. These will, in the future, be again producing and place a large quantity of extra turpentine on the market, while others, now flowing, will have lost their strength, and be useless. Consolation is also drawn from the fact that it is to the interest of The Standard Oil Co. to have a certain amount of competition to clear themselves of the laws governing monopolies; and some importers confidently expect they will still be able to obtain all the turpentine they require from outside firms, just as they now obtain linseed oil.

As to the immediate effect on prices, the opinion is that in the south there will be no further decline, though paint men are bearing in mind the exceeding low price at which The Standard Oil Co. sold linseed oil during their first year as the controlling power in that market. It may be remembered that it was quoted at a price lower than the cost of the seed, and they lost considerably over $1,000,000 on it. On the Canadian market importers have fairly good stocks of turpentine, which, though buying will be of the hand-to-mouth kind, should be about equal to the demand until the cheaper turpentine arrives, probably during the early part of next month. "Then," says one of the largest importers, "you will see turpentine cheaper here than for a long time past."

SOME MISTAKES OF BANKS.

THERE is probably no branch of business which is managed as a rule with greater efficiency than the chartered bank. It does not follow, however, that it is infallible. In fact, cases are frequently pointed out to us which prove this.

One of the particulars in which defects have been drawn to our attention is in regard to drafts. Business men in the large trade centres inform us that drafts have sometimes been returned to them which upon investigation were discovered to have never been presented for acceptance to the persons upon whom they were drawn. As far as we can learn the complaint is altogether against branch banks in country places.

Although such mistakes are perhaps not very frequent, they are quite inexcusable, and it would be well if the head officers of the banks would issue a little memorandum on the subject to the members of their staffs.

If the truth were known, it probably would be found that these mistakes were traceable to junior clerks in the banks, who are given to excesses in social affairs. It is a well known fact that young bankers, particularly in country places, are the social lions.

Society is all very well in its place, but when young men who require clear heads and thoughtful minds go to excesses in this particular it is no wonder that mistakes are made.

"KNOWING HOW" THE SECRET OF SUCCESS.

"THE goal of success is not always reached by the roughest road, the path is an easy one for [illegible] That is why so many people miss."

Success in business is not always obtained by those who work the hardest. Merchants have been known to spend years of time in, and to direct all their energy to

the building up of a good business--and have failed. Why? Because they did not go about it in the right way.

Although they worked hard, not having the keen perception of the born business man to point out the direction in which to expend their energy profitably, they wasted time and money on what brought no returns.

Other merchants, having worked not nearly so hard nor spent nearly so much money, have worked up a thriving business by "knowing how." They had the "business instinct," if so the quality may be designated, and utilized it; they took advantage of every little thing (which to those without this "instinct" would appear too trifling a matter to be made use of), to advertise and increase their business.

Merchants who wish to make a success in business should always be on the alert to pick up crumbs of business information; they should despise nothing, no matter how trifling the pointer may be.

If you have a successful neighbor, find out if possible how it comes about that he is successful, and follow suit. Keep up with the times. Never let your business become stagnant; always keep things moving. Above all, never get discouraged. "If at first you don't succeed, try, try again!" Keep pegging away.

A good business man never does anything haphazardly. He always has a good reason for his every action; he never does things merely because it is the custom. An investment is never made by him until he is certain that that investment is a good one—that his business is going to derive some benefit from it.

What a tremendous amount of money is spent in advertising. Is that money wasted? If so, it is the fault of the advertiser. There are merchants who have spent enormous sums on advertising, and, because the results were not so good as they should have been, have made the sweeping assertion that advertising does not pay. What is the reason that advertising pays some merchants and not others? The reason is that some merchants know how to advertise and some do not. A style of advertising that suits the city will not do for rural districts; advertising that brings good returns to one store may not to another. Advertisements to reach a certain class of people must be placed in a certain medium, and to reach other classes must be placed in other media; nor will a system of advertising nsed by a well-known firm do for one just starting, Some firms haven't time to see that the money they set aside annually for advertising is judiciously invested, and thus neglect the most important department of their business. Is it any wonder that such firms have reason to say that advertising does not pay? Advertising, if done well, does pay.

TRUTH IS MIGHTY.

ONE should always be honest in one's advertising. You may "fool all of the people some of the time and some of the people all the time, but you cannot fool all of the people all the time."

Some time or other the little deceits in your advertising are going to come out and count against you. Each time these little deceits are exposed part of your good reputation goes, until finally it is entirely lost.

"You may mend a broken reputation, but your neighbors will keep their eyes on the crack." It is also much harder to "mend" your reputation than it was to build it up in the first place.

Honesty is certainly the best policy in advertising, although at the time better results may be had from "ads." which are not strictly honest.

Never say anything in your advertising that you cannot verify in your store. An advertiser who believes thoroughly in what he is going to say has a far better chance of convincing people than he who only half believes what he is saying.

"Truth is mighty," especially when it looms up in an attractive advertisement.

INTERNATIONAL UNIONS AN EVIL.

REFERENCE was made in a recent issue of this paper to the injury that was being wrought to the industrial life of Canada by international labor organizations. Another instance of the injury thus effected has been brought to the attention of the public by the strike of the miners at the Crow's Nest mines. The men there were apparently satisfied with the conditions as they existed until the representative of an international organization came along, and not only persuaded the members of the local union that it was to their advantage to affiliate with the United States organization, but that they also had serious grievances which should be rectified.

The result is a strike, and not only are mines lying idle and the business interests of the community seriously affected, but there have been repetitions, although on a smaller scale, of the outrages which characterized the coal strike last fall in Pennsylvania.

As our readers are well aware, a number of labor unions in Canada have seceded from the Dominion Trades and Labor Congress, because of the machination of the officers of the international organization.

The unions seceded from the organization in question because they were fully persuaded that the aim of the officers of at least some of the international organizations was to put obstacles in the way of the development of the industrial life of Canada. This is no matter of hearsay, but the circular, which the seceding unions issued, when forming the National Trades and Labor Council, clearly sets this forth. "The great objection," the circular said, "to international organization in Canada is that strikes are fomented and carried out by labor officials from the United States to the disadvantage of Canadian enterprises."

International labor unions should be helpful to members thereof; but when the officers of such organizations use their influence to bring about strikes for the evident purpose of injuring Canada, it is time the members of such orders in Canada recognized the fact and confined themselves to a national instead of an international organization.

Some Significant Changes in the Tariff

WHILE the Government has decided to make no general revision of the Customs tariff, some significant changes were announced by Hon. Mr. Fielding in his Budget speech on the 16th inst. In fact, some new principles have been introduced into the Canadian tariff which are quite new to it, and will create a new epoch in Canadian tariff legislation. The most significant of these changes is the retaliatory clause which is to be introduced into the Tariff Act.

As our readers are well aware, ever since Canada, in 1897, succeeded in inducing the British Government to abrogate the treaties with Germany and Belgium, which prevented the Dominion granting the Mother Country a preference under the tariff, Germany has discriminated against the products of Canada. In inducing the British Government to take the step it did Canada had no desire to injure Germany. It was purely born of a desire to remove an old treaty arrangement which tied the hands of the Dominion and prevented our according the Mother Country privileges which we deemed to be in the furtherance of our own interests.

During the last five years the Dominion Government has repeatedly made efforts to induce Germany to remove the discriminatory tariff legislation against this country. This it has failed to do and it now proposes to retaliate in kind. There is a clause in the German tariff which permits the Government to impose a surtax on products imported from countries whose tariff is deemed unfavorable to Germany. This surtax ranges as high in some particulars as 100 per cent. The principle of this surtax the Dominion Government now proposes to adopt, although it is not to exceed one-third of the duty, as fixed by the general tariff.

The tariff resolution providing for this surtax also provides that it "shall apply to any article, the chief value of which was produced in such foreign country, although it may have been improved or advanced in value by the labor in another country, notwithstanding the provisions of the British preferential tariff and regulations thereunder." In other words, German goods exported to Great Britain in a raw or partially manufactured state and there further advanced in manufacture, shall not, as heretofore, enjoy the privileges of the British preferential tariff.

It will thus be seen that the surtax will discriminate against the indirect as well as the direct imports from Germany. What these indirect imports are, it is not possible to approximately estimate ; but in regard to direct imports, they last year reached the total of nearly $11,000,000.

Legislation of this kind is always regrettable, but there are times when it is necessary, and in this instance it is decidedly so.

The efforts that have been made to induce the Government to place a protective duty on steel rails may be said to have been successful, or at any rate partially so, for the Government announces that a duty of $7 a ton is to be imposed on steel rails imported into the country, on the Governing Council being satisfied that the mills in Canada are capable of manufacturing rails of the best quality and suitable for the use of Canadian railways.

In order, therefore, to secure this protection, it will only be necessary for the manufacturers of rails to satisfy the Government that they are able to comply with the conditions laid down in the tariff resolution.

The only rail mill in actual existence in Canada to-day is that at Sault Ste. Marie, the capacity of which is 500 tons a day. The proposed plant at Sydney is yet to have an actual existence. Allowing that the Sault Ste. Marie mill alone could turn out 500 tons a day for 300 days in the year, it would be about sufficient to supply present requirements, based on the imports of last year ; but, of course, the requirements of the railways in this country during the next few years would be very much larger than they are at present.

With the mill at Sydney in operation, to say nothing of others that may be forthcoming, the home manufacturers ought in a short time to be able to make all the rails the country will require.

The period for bringing in free machinery for the beet sugar factories has been further extended and all the machinery and appliances of the kind not made in Canada for the exclusive use in alluvial gold mining are to be put on the free list until June 30, 1904.

No change is to be made in the duty on lead. This will, no doubt, be somewhat disappointing to those engaged in the lead industry in British Columbia, but they may not be like men without hope, for Mr. Fielding announces in his Budget speech that the Government will consider the scheme for providing a bounty in place of an increase in the Customs tariff. On account of the many interests which would be effected by a substantial increase in the tariff on lead, this seems to be a better way for alleviating the undoubted disabilities under which the lead industry of British Columbia is at present laboring.

Mr. Fielding also promises some alleviation to the binder twine manufacturers in regard to the ⅜c. export duty on manila hemp, which militates against the Canadian manufacturers to the advantage of the manufacturers in the United States, as far as binder twine made from this particular hemp is concerned.

In his reference to the British preferential tariff Mr. Fielding pointed out that the Government had been negotiating with the Imperial Government with a view to securing reciprocal tariff arrangements, but so far without success. The Canadian proposition was to give further preference to British products provided that the British Government would concede a preference to Canadian products. During these negotiations, however, it was clearly pointed out that the preference must be so arranged that Canadian manufacturers would not suffer thereby. In other words, the tariff would be arranged so that the preference would be at the expense of foreign importations. The question is still pending.

Taken on the whole, the new tariff arrangements seem to be based on good business principles.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

HARDWARE.

Montreal, April 16, 1902.

THERE has been no marked change in the conditions of trade in Quebec Province. The usual spring activity in shipments of heavy goods prevails, and as the season advances it becomes apparent that the volume of trade for spring of this year will exceed in no small measure that of spring 1902. There have been very few quotable changes during the week, screen wire cloth and cordage being the only lines affected. Some classes of American goods, among which are included carpenters tools and lawn mowers, are becoming in rather limited supply, owing to the scarcity of malleables. In fact, some houses have experienced great difficulty in obtaining supplies of such tools as planes and some lines of augur bits. On an order placed as far back as April, 1902, the remnants of it are just now coming in, fully six months behind time. The malleable iron factories, particularly in the United States, are far behind with their orders; and even fittings have been stiffened by the position of malleable iron. There is a disposition on the part of many retailers to demand their deliveries of lawn mowers a month ahead of time. For instance, orders placed for delivery between April 15 and May 1 have been asked for between March 15 and April 1. Obviously, such requests cannot be acceded to, both stock and freight conditions being opposed to them.

CANT HOOKS.—The demand for these has slackened off somewhat, and trade this week is of a very ordinary nature. There is no change in prices, which are as follows: No. 12, $10; No. 8, $11.50; No. 8a, $11; No. 7a, $16; No. 6a, $14.50; No. 5a, $11.50.

AGRICULTURAL WRENCHES.—A fair trade continues; prices firm. We quote: No. 6, $9; No. 8, $10; No. 10, $12; No. 12, $14; No. 15, $24; No. 18, $30; No. 24, $36. Discount 70 per cent.

LAWN MOWERS.—Shipments are going forward rapidly, though few new orders are being received. The retail trade are impatiently awaiting deliveries of their orders. There has been no change in the price. We quote: 10½ in. wheel x 12-in cutter, $7.50; by 14-inch cutter, $8.00; by 16-inch do, $8.50; by 18-inch do, $9.00; by 20-inch do, $10.00. Star, 9-inch wheel by 12-inch cutter, $5.50; by 14-inch do, $5.75; by 16-inch do, $6. Daisy, 8-inch wheel by 12-inch cutter, $4.90; by 14-inch do, $5.10; by 16-inch do, $5.30. Philadelphia pattern, 7½-inch wheel by 10-inch cutter, $6; by 12-inch do, $6.50; by 14-inch do, $7; by 16-inch do, $7.50. Grass boxes are quoted as follows: 12-inch, $2.25; 14-inch, $2.25; 16-inch, $2.50; 18-inch, $2.50; 20 inch, $2.75. The discount on all the above is 50 per cent. off.

BARB WIRE.—Factories are a little behind in making deliveries. Orders previously booked are being filled promptly, but for new business no promises of quick deliveries are given, indicating a demand taxing the factories to their utmost. The price is $2.80 per 100 lb. f.o.b. Montreal, and $2.67½ f.o.b. Cleveland. Carlots of 15 tons are quoted f.o.b. Cleveland at $2.45.

GALVANIZED WIRE.—There is but little doing, and no quotable change whatever. We quote: No. 5, $3.70; No. 6, 7 and 8, $3.15; No. 9, $2.55; No. 10, $3.20; No. 11, $3.25; No. 12, $2.65; No. 13, $2.75; No. 14, $3.75. In carlots, f.o.b. Cleveland: No. 5, $2.20; Nos. 6, 7, 8 and 9, $2.15; No 10, $2.20; No. 11, $2.25; No. 12, $2.30; No. 13, $2.40; No. 14, $2.50. In less than carlots, 12½c. per 100 lb. extra is charged.

SMOOTH STEEL WIRE.—There is no change. We quote: Bright and annealed, $2.50 per 100 lb. f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE STEEL WIRE.—A fairly good business has transpired this week in this wire, and the tone of the market remains steady to firm. The discount is 25 per cent., with the following extras: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c. and ¼ lb. hanks, 50c.

BRASS COPPER WIRE.—The market is quiet. Discount 60 per cent.

PRESSED SPIKES.—These are going better as the season advances. The building of wharves, railway buildings, etc., now in active progress, require good quantities of these spikes. The discount remains at 20 per cent., f.o.b. Montreal, Toronto, Hamilton, London, St. John and Halifax.

FENCE STAPLES.—Business has been of small proportions and the market has developed no new phase. We quote as follows: $3.00 per 100-lb. keg for galvanized staples and $2.80 for bright, with 25c. extra for 25 and 50-lb. packages.

WIRE NAILS.—Most factories are very short of wire nails and some wholesale houses report difficulty in obtaining full supplies. The price is firm at last week's quotations, and dealers are still expecting an advance. Carlots are quoted at $2.40 and small lots at $2.45 per keg f.o.b. Gananoque, Montreal, London, Hamilton, Toronto, Brantford, Windsor, Ont., and St. John.

HORSE NAILS.—A number of small orders are being received. We quote as follows: "M" brand, "Oval" and "New City" heads, 55 per cent.; "Countersunk" heads, prices quoted on application. "C" brand, 40, 10 and 7½ per cent. off; "Monarch," 60 per cent. and "Peerless," 50 per cent.

HORSESHOES.—The market is quiet, as usual at this time of year, and prices are unchanged. We quote as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.40; No. 1 and smaller, $3.65; snow pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.55; No. 1 and smaller, $3.80; featherweight, all sizes, 0 to 4, $5.10; toe weight, all sizes, 1 to 4, $6.35. Shoes, more than one size in a keg, 10c. per keg extra f.o.b. Montreal only.

RIVETS AND BURRS.—Trade is fairly good. Discounts unchanged, as follows: Best iron rivets, section carriage and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS AND NUTS.—Nuts continue firm at unchanged prices. The market is fairly active. Discounts are as follows: Norway carriage bolts, 55 per cent.; common, 50 and 10 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 and 10 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50, 5 and 10 per cent. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3½c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ½c. per lb. is allowed.

SCREWS.—There is nothing special to to report on this market. Quotations are unchanged, as follows: Round head bright, 82½ per cent.; flat head bright, 82½ per cent.; brass, round head, 75 per cent.; brass, flat head, 80 per cent.

CORDAGE.—British pure manila was reduced ½c., the price now being 11½c. Otherwise prices are unchanged, under a fair demand, and we quote: Pure manila, 14c.; British pure manila, 11½c.; sisal, 11c.; double lathyarn, 10½c.; single lathyarn, 10c.

BUILDING PAPER.—This is moving rapidly; prices steady and unchanged. We quote: Tarred felt, $1.75 per 100 lb.; 2-ply, ready-roofing, 90c per roll; 3-ply, $1.15 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 55c. per roll; tarred fibre, 60c. per roll, O K and I X L, 65c. per roll; heavy straw and sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—As intimated in last week's report there has been an advance in wire cloth, amounting to 2½c. per 100 square feet, the price now being $1.12½.

FIREBRICKS.—There is a fair trade doing at unchanged prices, business being done on a basis of $16 to $22 per 1,000 for English and $17 to $22 for Scotch.

CEMENT.—A moderate inquiry is reported for cement. Prices are still unchanged, and we quote as follows: Canadian cement, $1.90 to $2.25; German, $2.25 to $2.40; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl. ex-store, and American, $2.20 to $2.40 ex-cars.

SHOT.—A number of small orders continue to be received for shot. Trade this spring has been very good, due in some degree to the movement toward the Northwest. We quote: Ordinary drop shot, A.A.A. to dust, $6.50 per 100 lb.; chilled Nos. 1 to 10, $7 per 100 lb.; buck and seal, $7.50 per 100 lb.; ball, $8 per 100 lb. Trade discount, 15 per cent. f.o.b.

METALS.

The local metal market shows no pronounced change. Prices have been steady and a good movement has characterized the week's business. Buying for spring shipment in foreign markets is about over for the season, and importers state that the amount of goods coming from the Old Country this year has been much in excess of last year's importations for a corresponding period. The movement in structural shapes in steel and iron continues heavy, and with the advance of the spring season there is apparently no falling off in requirements of finished steel. Merchant pipe, agricultural and other machinery and tools of all descriptions are in active demand, the only disturbing element being the scarcity of some lines of tools. The foreign markets do not evince any new characteristic of importance. Easter week in Great Britain was, as usual, a holiday season, and business was quiet. A letter under date of April 4 states that both iron bars and sheets were firming up and might be expected to advance in price. Tin plates and Canada plates were also stronger and an advance was looked for in the latter of 2s. 6d. per ton. Factories and rolling mills here are awaiting the bringing down of the budget with some eagerness; its provisions may result in several price changes in the metal markets.

BAR IRON.—There is no change locally. The tone of the English market is firmer. We quote: Merchants' bar, $2; horseshoe iron, $2.25; forged iron, $2.30.

BLACK SHEETS. — The movement keeps up still in black sheets and prices are steady as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50; 8 to 20 gauge, $2.50.

GALVANIZED IRON.—There is an active demand, and considerable competition has been noticed this week. Prices are steady and unchanged. We quote as follows: 28 Queen's Head, $4.50; Apollo, 10¾-oz., $4.30; Fleur de Lis, $4.15; Comet, $4.10; "Bell" brand, $4.05. For less than caselots 25c. extra is charged.

LEAD PIPE.—Orders for lead pipe continue to arrive freely and business is done on a basis of 8c. for composition and waste, and 7c. for ordinary. The discount remains at 30 per cent.

IRON PIPE.—Trade has been brisk this week. The market shows no new feature. Prices are as follows: Standard pipe per 100 ft., in lengths under 19 ft.: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85; ¾, $3.65; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.20; 2-in., 416.85. Extra heavy pipe, plain ends, are quoted per 100 ft. as follows: Black, ½, $4.20; ¾, $5.25; 1-in., $7.55; 1¼, 410.55; 1½, $12.75; 2-in., $17.60. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings on extra heavy 5 per cent. net is added. Trade discount, 5 to 7½ per cent.

TINPLATES.—There is a slightly firmer feeling on the local market, in sympathy with the British market, but no advance in prices is spoken of. The price of charcoals remains at $5 to $5.25, and of cokes $4.25 to $4.50.

OPEN HEARTH STEEL.

[illegible] end this week, and at present soil pipe is going forward rapidly. We quote the discounts as follows: Light soil pipe, 3 to 6 inch, 50 per cent.; medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8 inch, 15 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.; extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—As the supply of fuel increases furnaces gradually become better able to supply the demand. It is estimated that in the United States and Canada about 20,000,000 tons will be the annual supply in a short time. The feeling is still firm, but with a more liberal supply of pig iron, the market has not the same great strength which characterized it a few months ago. Local quotations remain at $33.50 to $34.50 ex-store Montreal.

INGOT COPPER.—This is firm at former quotations, $15.50 to $15.75 per 100 lb.

INGOT TIN.—There is a fair demand at steady prices. $33 to $33.25 per 100 lb. is asked this week.

PIG LEAD.—A small movement continues in lead, though prices are inclined to firmness. Carlots are quoted at $3.50, and smaller lots, $3.75.

STEEL.—This is still very firm, though prices have not advanced. Locally quotations are as follows: Mild, $2.05; sleighshoe, $2.10 to $2.20; tire, $2.15 to $2.25; spring, $2.85 to $3; reeled machinery, $2.75 to $3; toecalk, $2.60 to $2.75; machinery (iron finish), $2.10; mild steel, $2.05; square harrow, $2.15.

TOOL STEEL.—This is in good demand. Supplies are said to be ample, though one complaint was made of difficulty in procuring tool steel. We quote Black Diamond, 8 to 9c., Sanderson's, 8 to 9c., according to the grade; Jessop's, 13c.; Leonard's, 7½c; Jonas & Colver's, 10 to 20c.; "Air Hardening," 50 to 65c. per lb.

CANADA PLATES.—On the local market there is a fairly good demand for Canadas, and prices are steady. The English market is firmer. We quote: 52s $2.60 to $2.70; 60s, $2.70 to $2.80; 75s, $2.80 to $2.85, full polished, $3.75 and galvanized, $4.25 to $4.35; galvanized, 60s, $4.45 to $4.55.

TERNE PLATES.—Jobbers report a quiet trade in this line. We quote $7.75.

COIL CHAIN.—There is a good demand still and an active movement. We quote: No. 6, 11½c.; No. 5, 10 to 10½c.; No. 4, 9 to 9½c.; No. 3, 8 to 8½c., ¼ in., 6½ to 7c. per lb.; 5-16, $5 to $5.20; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4; ½, $3.95 to $4.05, 9-16, $3.85 to $3.95; ⅝, $3.65 to $3.75; ¾, $5 to $5.20; ⅞, $3.30; 1-in., $3.15 to $3.25. In carlots an allowance of 10c. is made.

SOLDER.—The price of solder is firmer though no actual change has taken place, and bar solder still sells at 20c.; wire at 19c.

ZINC SPELTER.—The market is quiet and unchanged. We quote $6.25 to $6.50.

SHEET ZINC.—The tone of the market is firm. Prices tend upward. We quote $6.75 to $7.

SCRAP METALS.

There is but little change in the situation of scrap metals since last report. Copper is scarce and firm, but other metals and materials are in good supply. Our quotations are: Heavy copper and wire, 10c. per lb.; light copper, 9c.; heavy red brass, 10c.; heavy yellow, 8½c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2½ to 2¾c.; iron, No. 1 wrought, $17 to $17.50; No. 2, $7.50 per ton; machinery scrap, $17.50 to $18; stove plate, $13; malleable and steel, $6; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6¼ to 6¾c. per lb.

HIDES.

The market remains steady and prices are unchanged. The Order-in-Council prohibiting the importation of raw hides from the Eastern States has been modified to apply only to carlots of hides which are under quarantine. They must be disinfected before shipping. Local prices are: No. 1 hides, 8c.; No. 2, 7c.; No. 3, 6c.; calfskins, 9 to 11c.; lambskins, 75c.

RAW FURS.

The week has been rather quiet. It is getting late in the season, and no changes are reported in prices. We quote:

ONTARIO MARKETS.

HARDWARE.

TORONTO, April 17, 1903.

BUSINESS continues active, orders for rush deliveries of general lines being a feature of the market. Retailers throughout the country seem to be very busy, and are already sending in repeat orders for many lines. There is a heavy demand for fence wire, poultry netting, wire nails and all kinds of building hardware. The scarcity of spades and shovels is becoming more pronounced, manufacturers explaining that they are unable to get handles. An inquiry for screen doors and windows has set in. Prices are, as a rule, firm. Carpenters' braces are 10 per cent. dearer; United States coffee mills have been advanced 5 per cent.; an advance of about 20 per cent. in rope halters is announced by the manufacturers, owing to increase in the price of hemp and of malleable castings. German pearl-handled pocket knives are 5 per cent. dearer. An advance in copper and brass goods is anticipated, owing to the rise in copper ingots. Binder twine prices are now given. They are 1 to 1½c. lower than a year ago. British pure manilla rope is ½c. lower, owing to competion of United States goods.

BARBED WIRE—The demand continues excellent. The base price is quoted as follows: $2.25 from Cleveland and 10c. less in carlots. From stock, Toronto, $2.80.

MONTREAL NOTES

Turpentine has been reduced 1c. per gallon.

Screen wire cloth has advanced 2½c. per 100 square feet.

GALVANIZED WIRE—A brisk trade is reported from all sections. Quotations are as follows: Nos. 6, 7 and 8, $3.15 to $3.35 per 100 lb.; No 9, $2.50; No. 10, $3.20 to $3.40; No. 11, $3.25 to $3.45; No. 12,

$2.65; No. 13, $2.75; No. 14, $3.75 to $3.95; No. 15, $4.30; No. 16, $4.55. Nos. 6 to 9 base from Cleveland are quoted at $2.27½ in less than carlots.

SMOOTH STEEL WIRE—All lines continue in excellent demand. The base price is $2.50 per 100 lb. Oiling, 10c.; coppering, 60c.; and tinning, $2 per 100 lb. extra. Shipping points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

COIL SPRING WIRE.—Deliveries have been large. Prices continue firm. Quotations are as follows: No. 9, $2 75; No. 11, $3.40; No. 12, $2.95. Freight up to 25c. per 100 lb. allowed on 500 lb. or over. Carlots of 15 tons, 5c. less, with freight up to 20c. allowed.

WIRE NAILS—Business continues active. Considerable difficulty in filling orders is experienced by the mills. Prices are firm. We quote: Carlots, $2.40, and small lots, $2.45 per keg f.o.b. Gananoque, Montreal, London, Hamilton, Toronto, Brantford, Windsor, Ont., and St. John.

CUT NAILS — The demand keeps fair. Last week's advance of 5c. is well maintained, the price now being $2.50 per keg.

HORSE NAILS.—The demand keeps active with prices firm as follows: "C" brand oval head, 40 and 10 and 7½ per cent.; on "Monarch," 60 per cent. and "Countersunk" head, 60 per cent.; on "Peerless," 45 and 7½ per cent.

HORSE SHOES—A fairly good trade is reported. Prices are steady as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3 80; featherweight (all sizes), $4.95.

SCREWS — The demand keeps brisk. Prices are stiff. We quote: Flat head bright, 87½ per cent. discount; round head bright, 82½ per cent.; flat head brass, 80 per cent.; round head brass, 75 per cent.; round head bronze, 70 per cent.; flat head bronze, 75 per cent.

RIVETS AND BURRS—Prices are firm, business keeping up excellently. We quote: Iron rivets, 60 and 10 per cent. discount; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.

BINDER TWINE—Trade is beginning to open up. The season opens with twine 1 to 1½c. lower than a year ago, yet manufacturers claim that there is likely to be a scarcity and that prices will soon be higher. We quote: 660 ft., 13c.; 600 ft., 12c.; 550 ft., 11¼c.; 500 ft., 10½c.

CORDAGE—Severe competition has resulted in a decline of ½c. in British pure manila. There are no other changes. We quote: Pure manila, 14c.; British pure manila, 11½c.; sisal, 11c.; double lathyarn, 10½c.; single lathyarn, 10c.

TINWARE AND ENAMEL WARE—The activity is remarkable, all lines being asked for by dealers in all parts of the country

BOLTS AND NUTS—The activity continues, with prices firm. Quotations are as follows: Carriage bolts, common ($1 list), 50 and 10 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3 list), 55 and 10 per cent.; machine bolts, all sizes, 50, 5 and 10 per cent.; coach screws, cone points, 66⅔ and 10 per cent..

SPADES AND SHOVELS — Manufacturers state that, owing to a scarcity of handles, they are unable to keep up with their orders. It is reported that this condition of affairs is equally manifest in the United States. Discount is 45 per cent. and the list price has been reduced $3 per dozen for Old's goods, $2 for Gray's and $1 for Burns.'

HARVEST TOOLS—The demand is exceedingly active. Prices are steady. Discount remains at 60 per cent.

LAWN MOWERS—Dealers are still having trouble in getting deliveries. We quote: Woodyatt, 12-in., $7.50; 14-in., $8; 16-in., $8.50; 18 in., $9; 20-in., $10; Star, 12-in., $5.50; 14-in., $5.75; 16-in., $6; Daisy, 12-in., $4.90; 14-in., $5.10; 16-in., $5.30; Ontario, 12-in., $14.25; 14-in., $15.80; 16-in., $16.80; 18-in., $18.90; 20-in., $20·50; Philadelphia, 12-in., $6.50; 14-in., $7; 16-in., $7.50. Discount, 40 and 10 to 50 per cent.

BUILDING PAPERS—The demand continues excellent. We quote: Tarred felt, $1.75 per 100 lb.; 2-ply ready roofing, 90c. per roll; 3-ply, $1.15 per roll; carpet felt, $2.25 per 100-lb. dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre 50c. per roll; tarred fibre, 60c. per roll, O K and I X L, 65c. per roll; heavy straw and sheathing, $30 per ton; slaters' felt, 60c. per roll.

RANGE BOILERS—A good steady trade keeps up. We now quote: 18 and 30 gal., $5.50; 35 gal., $6.50; 40 gal. $7.50; 52 gal. $12.50; 63 gal. $19; 82 gal., $23; 100 gal., $31 and 120 gal., $37.

SCREEN DOORS—Trade has started to open up nicely. Prices are firm as follows: Screen doors, common, two or three panel, walnut stained, 4-in. style, $6.80; stained, yellow or green, $7; in natural colors, oil finish, $8.15; 3-inch style, 20c. per dozen less.

CEMENT—The demand is keeping right up to the production and prices are stiff. We quote: Canadian Portland, $2 40 to $2.50; German, $2.30 to $2.60 and hydraulic, $1.50.

METALS

The demand is even larger than a week ago, all lines showing activity. A general steadiness is manifest, though copper is dearer locally. Pig iron is $1 lower in New York, but unchanged in Pittsburg. The consumption both in Canada and the United

PULLMAN MNFG. CO.
Rochester, N.Y., U.S.A.

States is reported large, but buyers are cautious about placing future contracts. Copper has advanced $2 per ton in the week in London, while the New York market is ⅛ to ¼c. per lb. higher. On the local market last week's advance is maintained. Pig tin is steady on all markets. Pig lead is slightly higher in the United States, but unchanged locally. Other lines are unchanged.

PIG IRON—The uncertainty recently noted is still manifest, and buyers, while using a great quantity, are inclined to defer purchases for the last half of the year. Locally, No. 2 is quoted at $22.50 to $22.75; No. 2 Summerlee, $25 on track, Toronto.

CANADA PLATES — A better trade is doing. Prices are steady. We quote: All dull, $2.90 to $3; half-polished, $2.85 to $3.10, and all-bright, $3.75 to $3.85.

GALVANIZED SHEETS—The activity is increasing. Prices keep firm, as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 24 gauge; Bell brand, $4.30 for 28 gauge; Gordon Crown, $4.50 for 28 gauge.

TIN—The market has steadied since last week's declines at outside markets, but there has been no advance. We quote $33 to $33.25.

TIN PLATES—The market is stiff, both locally and in foreign markets. We quote: Charcoals, $4.75 to $5, and cokes, $4.25 to $4.50 per box.

COPPER—All markets are advancing. A good demand is reported. We quote: Ingot copper, $15, and sheet copper, $21 to $22 per 100 lb.

BRASS — The market is active, with prices steady. Discount is 10 per cent.

STEEL BOILER PLATES—The demand keeps large with prices firm. We quote: $1 96 f.o.b Toronto.

TOOL STEEL—Prices continue firm, with an active demand. Our quotations are as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 10 to 20c.; ditto, "Air Hardening," 70c. per lb.; Chas. Leon-

ard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's "Special," 15 to 20c.

MACHINERY STEEL—A better enquiry is reported. Prices are steady at $2.00 to $2.05 f.o.b. Toronto.

BAR IRON—The demand for present delivery is active, yet buyers are not placing orders as far into the future as has been the case. We quote: $2.05 for extras, cut to length while rolling; 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft., by special agreement, according to length and size.

BLACK SHEETS—The demand continues excellent. We quote: Common, $3.15 for 28 gauge and dead flat; $3.50 for 26 gauge.

LEAD—All markets are steady. A good demand is reported. Quotations are as follows: $3.50 per 100 lb. for pig lead and $3.75 for bar lead.

IRON PIPE—The demand continues brisk. Quotations are: Per 100 ft.: Black pipe, ⅛-in., $3.25; ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2 85; ¾-in., $3.65; 1-in., $5.20; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; 2½-in., $21; 3-in., $25; 3½-in., $32; 4-in., $38.

ZINC SPELTER—A larger movement is recorded. Prices are steady. We quote 6¼ to 6½c.

ZINC SHEETS—Stocks are still moderate and a good inquiry keeps up. We quote the base price as follows: Cask lots, $6.75 to $7, and part casks, $7 to $7.25.

SOLDER—The market is strengthening, but there is no change in prices. Guaranteed half-and-half is quoted at 18 to 19c. and wiping 17 to 18c.

OLD MATERIAL.

An advance of 50c. is noted in No. 1 wrought and machinery cast. Other lines are unchanged. Prices are firm. We quote as follows: Heavy copper and wire, 12c. per lb., light copper, 10c. per lb., heavy red brass, 10c. per lb.; heavy yellow brass, 8¾c. per lb.; light brass, 5½c.; lead 2¾c.; scrap zinc, 3c.; iron, No. 1 wrought, $14 per net ton; No. 2, wrought, $5; machinery cast scrap, $16; stove plate, $11; malleable and steel, $7; old rubbers, $6½c. per lb. and country mixed rags, 50c. per 100 lb.

HIDES, SKINS AND WOOL.

The market remains the same as last week. There is no special feature. The calf-skin market is strong. The wool and hide market still remains weak. The prices are unchanged since quoted last week.

HIDES.—No. 1 green, 7½c.; No. 2 green, 6½c. per lb.; No. 1 green, steers, 8c.; No. 2 green, steers, 7c. per lb.; cured, per lb. 7¾ to 8¼c.

CALF SKINS.—Veal skins, No. 1, 6 to 14 lb. inclusive, 10c.; No. 2, 8c.; No. 1, 15 to 20 lb. inclusive, 9c.; No. 2, 7c. Deacons (dairies), each, 60 to 70c.; sheepskins, 90 to $1.10.

WOOL.—Unwashed wool, per lb., 8 to 9c.; fleece wool, 15 to 16c.; pulled wools, super., per lb. 15; ditto, extra, 18c.

TALLOW.—Tallow is very scarce. We quote 6 to 6¼c. per lb.

Practical Capability.

Isn't that the necessity in building materials ?

Most experienced builders all over the country use our

Sheet Metal Building Materials

Because they are honest, capable goods that give the acme of artistic effect as well as sterling endurance.

We make every conceivable need in Shingles, Ceilings, Sidings, etc.

To sell our goods is to secure the best trade.

The Metallic Roofing Co., Limited

TORONTO MONTREAL WINNIPEG

MANITOBA MARKETS.

WINNIPEG, APRIL 13, 1903.

TRADE goes merrily on, and the only trouble is the old one in the West of not being able to get goods in or out with anything like expedition. Spring is opening up with all promise. Good Friday and Saturday the heavens wept, and Winnipeg was proportionately dirty and disagreeable, but with the dawn of Easter came the most glorious weather. The wet streets are dry, the sun is pouring down all over the country and spring work is being pushed forward rapidly. On the lighter lands of the province considerable seeding has already been done, and also in the Territories. Implement men report an excellent sale of farm implements; in fact, they are finding difficulty in keeping abreast of orders. All building trades are active, and demand in these lines very strong. We quote this week a price list revised to date, and though there are really no important changes, there are some variations from the old list that are of interest.

We quote :

Barbed wire, 100 lb.		$3 25
Plain twist		3 25
Staples		3 65

NOTES.

The James Robertson Hardware Co., Limited, have sold out their Winnipeg retail branch to A. P. Macdonald, of Winnipeg, and D. Fleming, of Portage la Prairie. Both men are well known in the west. They are putting in a large additional stock, and expect in the course of a few days to issue a circular to the trade setting forth sundry new lines which they will carry.

NOVA SCOTIA MARKETS

HALIFAX, April 14, 1903.

THE exceptional activity which has prevailed here in the hardware trade for some time still continues, and a large amount of business was done, notwithstanding a slight interference by the Friday holiday break. The business of the season so far is considered a record one, though that of both 1901 and 1902 was exceptionally good. The travellers on the road send in most encouraging reports of the retail trade being done throughout the province, and this means good business for the wholesalers.

* * *

There has been a very heavy trade in shipping supplies and vessels outfitting for some time, but the bulk of this trade which comes periodically—at this season and to a less extent in the Autumn—is now about over. There have also been considerable sales of lines and gear for the lobstermen on the north coast, where the season opened on April 1. During last Autumn and Winter a number of vessels, to be used principally in the fishing trade, were built on the south shore, the sails and rigging for which were procured here, though some of this trade, naturally, goes to St. John. Dealers report larger sales during the last year in canvas, cordage, wire rigging, chains, anchors, etc., than for some years past.

* * *

Besides the ordinary demand for shelf hardware, there has been a heavy demand for all lines of builders' materials. In this there has been an unusually heavy local demand. There have been a great many transfers of property in the business centre of the city. The Bank of Montreal purchased the property formerly occupied by the firm of Murdoch's Nephews, and the contractors have been at work refitting it for over a month, work being carried on for a considerable portion of the night as well as the day. Other buildings have been rushed along in the same manner. The Bank of Commerce will probably build this summer, and other business blocks, formerly mentioned, will also soon be in the hands of the contractors. There has not been so much local demand for builders' hardware for a number of years. The same conditions apply to many of the more prosperous towns in the provinces, and, in fact, all over the Maritime Provinces.

* * *

All lines of hardware are firm, and some have been subject to advance. All lead products have been marked up, and all lines of goods in the manufacture of which lead in any form is used are also affected. Plumbers' supplies, all around, are costing considerably more than a year ago. Agricultural tools, for which there has been a good demand this season, are quoted at about 10 per cent. advance. Paints and varnishes are 10 per cent higher, with prices very firm. No change in turpentine or linseed oil is reported. In wire and cut nails there is an impression that an advance will soon take place. Advances are reported in zinc and sheet lead.

R. C. H.

REMOVED TO LARGER PREMISES.

The J. Stevens Arms & Tools Co., Chicopee Falls, Mass., have removed their New York office from 80 Chambers street to 98 Chambers street. In April last year this firm removed from 318 Broadway to 80 Chambers street, thinking the quarters there would be ample to take care of their increased business, but they found that they soon needed much more room and were obliged to remove to 98 Chambers street, where they will have four times the present space and better facilities for executing their business with despatch.

This is but in keeping with the growth of this firm at Chicopee Falls, which has increased from 44 men seven years ago to 1,100 men to-day, but even with the addition of a third factory and this increased force, they have not been able to fill orders as promptly as the trade desires.

The business hitherto carried on by H. Bentley, importer and dealer in general merchandise, Lethbridge, N.W.T., will hereafter be conducted under the style of the Bentley Co., Limited. Mr. M. Barford is the secretary-treasurer of the new company.

Green wire cloth has been advanced to $1.50 per 100 square feet.

M. Daignault, general merchant, St. Etienne De Beauharnois, Que., has compromised.

CATALOGUES, BOOKLETS, ETC.

ATKINS NOISELESS SAW VISE.

E. C. ATKINS & CO., Inc., Indianapolis, Ind., are placing on the market a new saw vise which is strong and durable, heavily japanned and well finished. All the wearing parts are reinforced. It is made of the best material and finely finished. Also has rubber cushions in the jaws to prevent the disagreeable noise. Will make no more noise than if filing a solid piece of iron. The vice operates with the lock lever principle, and there is no chance of overstraining it, as is the case in others where the screw is used. The jaws are made to open and close by simply pushing same forward and back.

One of the most desirable features is the ease with which the saw can be gauged or adjusted with both hands, so that the teeth will be just the right height above the face of the jaws and the vise instantly tightened without removing the hands. Another good point—the vise is set so low on the bench that there is no leverage to cause vibration, and in consequence is very rigid. Write for illustrated circulars giving full information re this vise.

GOOD ROADS MACHINERY.

Hardware merchants have double interest in the improvement of roads into their town. Such improvement is bound to bring buyers to town in greater numbers, and is sure to cause a demand for machinery designed for road building, the sale of which might well be made by hardwaremen. For this reason the trade should make a point of securing the catalogue of The Good Roads Machinery Co., Limited, Hamilton, Ont., manufacturers of "Champion" road making machines. This firm make practically everything in their line, and their catatogue should be secured by every hardwareman interested in this class of machinery.

"IRONMONGER" SPRING ISSUE.

The 1903 spring issue of Ironmonger, Universal Engineer and Metal Trades Advertiser, London, Eng., marks another step forward in English trade publications. An examination of the advertising and editorial pages of this paper discloses a comprehensive and thorough grasp of the British hardware, metal and engineering industries which is a credit to its constituency as well as to its publishers. The cover is an exceedingly artistic view of old "London bridge," a scene possibly even more interesting to "colonials" than to Londoners themselves.

SUMMER ICE TOOLS.

Wm. T. Wood & Co., Arlington, Mass., makers of high-grade ice tools, now have ready for the trade their 56-page 1903 catalogue of summer ice tools. As every hardwareman should handle ice tools, and as this firm enjoy an enviable reputation on account of the quality of their product, the trade should make a point of securing this catalogue. It will be sent, upon application, to all readers of HARDWARE AND METAL.

THE "ROYAL HURON" RANGES.

The Western Foundry Co., Limited, Wingham, Ont., are issuing a neat circular describing their square and extension "Royal Huron" range and their "New Ontario" range for lumber camps, hotels, etc.. As the illustrations are practically perfect in detail, they should be seen by all hardware dealers. This circular and other literature will be sent on application to all readers of HARDWARE AND METAL.

LIQUID TO ETCH ON STEEL.

In replying to an inquiry for a liquid to etch on steel "The Scientific American" says: "For etching brands and marks on polished steel surfaces, such as saws, knife blades, and tools, where there are many pieces to be done alike, procure a rubber stamp with the required design made so that the letters and figures that are to be bitten by the acid shall be depressed in the stamp. Have a plain border around the design, large enough to allow a little border of common putty to be laid around the edge of the stamped design to receive the acid. For ink use resin, lard, oil, turpentine, and lampblack. To ½ lb. of resin put 1 teaspoonful lard oil; melt, and stir in a table spoonful of lampblack; thoroughly mix, and add enough turpentine to make it of the consistency of printer's ink when cold. Use this on the stamp in the same manner as when stamping with ink. When the plate is stamped, place a little border of common putty around and on the edge of the stamped ground. Then pour within the border enough acid mixture to cover the figure, and let it stand a few moments, according to the depth required, then pour the acid off. Rinse the surface with clean water; take off the putty border, and clean off the ink with turpentine. Use care not to spill the acid over the polished part of the article. For the acid, 1 part nitric acid, 1 part hydrochloric acid, to 10 parts water by measure. If the effervescence seems too active add more water.

Raoul Paquet, general merchant, Sault au Recolet, Que., is out of business.

CONDENSED OR "WANT" ADVERTISEMENTS.

Advertisements under this heading, 2c. a word each insertion; cash in advance. Letters, figures, and abbreviations each count as one word in estimating cost.

SITUATIONS VACANT.

BLACKSMITH'S HELPER.—From one to five years experience; for horseshoeing and general work; state wages. Thomas Colton, Lambton Mills. f

BRASS MOULDERS, also brass patternmaker, for engineers' and plumbers' goods. James Morrison Co., 93 Adelaide West. f

BLACKSMITH wanted, two or three years experience horseshoeing and general repairing; state wages with board. Apply to William Butchart Lions Head, Bruce Co., Ont. f

WANTED — Carriage trimmer and carriage painter; first-class; highest wages paid. Apply W. F. McKenzie, Leamington, Ont. f

WANTED — Tinsmith; none but first-class mechanic need apply; with good furnace experience and general jobbing; must be sober; state age and wages wanted; steady job guaranteed. J. P. Straube, Treherne, Man. f

WANTED—first-class tool makers, used to cutting and forming dies, etc.; also wood pattern makers. Apply Canadian General Electric Co., Limited, Peterboro, Can. f

WANTED—Carriage blacksmith; must be first class. Apply, stating experience and wages, Campbell Carriage Factory, London. f

MACHINISTS, first-class lathe and bench hands, steady work, prettiest and healthiest city in Canada. The Canadian Fire Engine Co., Limited, London, Canada. f

WANTED—Cabinet makers, improvers, brush hands and rubbers. 757 Yonge. f

WANTED — Carriage painter and carriages woodworker; first-class; wanted at once; highest wages paid. Apply Box 93 Leamington, Ont. f

WANTED — A blacksmith with two or three years' experience. Jas. Minard, Uxbridgee Ont. f

FOR SALE.

FOR SALE—Good blacksmith business; country stand; good general trade. Emil Dietrich Walkerton. f

BLACKSMITHING BUSINESS, shop and lot to sell or rent, first-class stand, lake shore road, New Toronto. E. L. Heaslip, Mimico. f

SITUATION WANTED.

POWER PLANT.

Elevating and Conveying Machinery for Coal and Merchandise. HEATING AND VENTILATING.

ALFRED E. STEVENS [illegible] and Contractor, Temple Building Toronto.

TRADE IN COUNTRIES OTHER THAN OUR OWN.

BRITISH PIG IRON MARKES.

SHIPMENTS of pig iron during March were remarkably good, amounting to 123,551 tons, but the shipments to Germany—formerly a large buyer—have fallen off very much. In West Coast hematite warrants there is no business being done, and though yesterday the nominal quotation was 3d. lower at 60s. 10½d., this does not agree with makers' prices, which are distinctly firmer. As is well known, there is practically no stock of warrant iron, and makers are all agreed that the position is even better than it has been for several months. The shipments for the first quarter of this year were 95,000 tons, 7,000 tons less than in 1902, but local consumption and deliveries by rail more than account for the difference, and there is now one active furnace less than last year. At Birmingham yesterday, as already noted, there was a decidedly firm market, and the tendency of prices was slightly upward. There was more than an average trade done in foundry sorts; hematites sold readily; but forge iron, held at fractionally higher rates, did not go off very well. Forge masters, although inclined to believe in better trade, hesitate to purchase supplies until they are certain of improved selling prices for finished iron.—Iron and Steel Trades Journal.

TIN IN NEW YORK AND LONDON.

There was no material change in the situation here, but the lack of demand and the absence of stimulating advices from the other side caused an easy feeling. Closing quotations are 29.65 to 29.80, bid and asked for spot to June delivery. The London market opened at an advance of 7s. 6d., but lost all of the gain in the afternoon, closing easy at the previous day's quotations. According to mail advices from London the recent big holders of tin have liquidated the bulk of their stock, and there is now a more general bull account in America, London and Holland. The Statendam has arrived at New York with 125 tons, making the total imports at Atlantic ports since the 1st instant 685 tons. The Hindustan will be due from the Straits on the 18th instant with some 1,500 tons, the Maniton from London on the 22nd with 175 tons and the Gibraltar from Singapore on the 28th with 275 tons. The Indradeo is expected on May 10th with 125 tons from Singapore.—New York Journal of Commerce, April 15.

PITTSBURG IRON MARKET

The movement in Southern iron in the Pittsburgh district has not been very large since the new prices went into effect April 1. It does not take a great deal of forge to fill up the nearby consumers, while the Southern furnaces can not make early deliveries of foundry, and local foundries are well covered for the next few months. In basic there has been a fair movement, but the district does not get the benefit of a dollar differential as compared with the West, as it does on forge and foundry. Altogether we believe something over 10,000 tons of Southern forge have been sold locally since April 1, all at the straight rate of $19.85, delivered. Some quotations have appeared which would indicate that Southern furnaces had been cutting on foundry, which is denied, and it seems the quotations were a mistake. The price for No. 2 is $21.35, delivered Pittsburgh. —American Metal Market, April 15.

COKE TROUBLES.

Following the large purchases of Bessemer and basic, which we have recorded in the past couple of weeks, furnaces have a good bit of unsold capacity for second half, but are not anxious to sell. They are in no pleasant mood over the troubles they have had in getting coke on contract, with no immediate prospect of improvement. If they have to pay spot prices for coke they feel they ought to get spot prices for iron. There is particular dissatisfaction with the Steel Corporation, as the merchant furnaces still have a large quantity of $16.50 iron to deliver to the Corporation, but are not getting enough coke on contract to make it with. They put the blame on the Frick Company, in shipping coke to Corporation furnaces first.—American Metal Market.

LONDON AND NEW YORK COPPER MARKET

As expected, the London copper market opened higher yesterday, an advance of 10s. being recorded at noon; while a further rise of 6s. 3d. occurred before the close, the tone then being firm. There was no improvement here. Trade was as dull as ever, and while leading producing interests continue to quote 15 to 15⅜c. for Lake and electrolytic and 14⅝ to 15c. for casting there were sellers at much lower prices whose offerings apparently failed to arouse the interest of buyers. Lake copper was openly offered for spot and April delivery at 14.55c., and it is intimated that some holders might shade 14½c. cash on round lots, but so far as could be ascertained no business resulted. Electrolytic is reported to be scarce for prompt delivery, but some was offered to-day at 14.65c. for May. Of casting copper there is said to be no lack, stocks having accumulated during the recent period of inflated prices; and it is offered at 14⅜c., which, however, seems to be above buyers' views. Mail advices from London to the 4th instant state that there had been some irregularity and uncertainty about the copper market, and occasional selling by houses prominently associated with the upward movement tended somewhat to diminish the feeling of confidence which had been induced by the persistent buying, that a few weeks since formed the leading feature of the situation. However, it was held that as the advance had been very rapid it was only reasonable that a disposition to realize the substantial profits offered should be occasionally manifested. The closing quotations at New York Metal Exchange yesterday were above some of the open market prices, being 15 to 15¼c. nominal for Lake and electrolytic and 14⅝ to 14¾c. nominal for casting.—New York Journal of Commerce, April 15.

LIVERPOOL TINPLATE MARKET.

The markets for both block tin and steel bars rule very strong, and manufacturers of the finished article are all asking higher prices for forward delivery. The inquiry during the week has been good, but not a great deal of actual business has resulted, buyers proceeding cautiously.—Iron and Steel Trades Journal.

A REMOVAL.

H. P. Hubbard, sales agent for Canada of E. C. Atkins & Co., saw manufacturers, Indianapolis, has removed his office from 44 Scott street to 30 Front street east, Toronto. The new offices are conveniently situated and nicely fitted up.

PAINT, OIL AND BRUSH TRADES

PAINT AND OIL NOTES.

GRAPHITE, explains an exchange, is classified as "crystalline" and "amorphous," the former being the finer grade and used in the manufacture of crucibles and other refractory products, lubricants, etc., while the use of the amorphous variety is limited to foundry facings, paint, stove polish, and like purposes.

The painters' strike at Kingston, Ont., is still unsettled.

Work on the Owen Sound Linseed Oil Company's factory is progressing rapidly. The concrete footings are nearly completed, and the heavy stone foundations for over one half of the walls are built.

The difficulties between Toronto master painters and their employes has been settled by the former agreeing to pay 35c. per hour, the price asked by the men. The employers tried to compromise at 32½c. per hour, but the men refused to consider that offer, so as there is much work ahead the price asked was given.

An interesting point has been raised by Sarnia, Ont., master painters in conference with the union painters of that place. The latter asked for an advance of 2½c., making the regular wage 22½c. an hour for a nine-hour day. This was satisfactory to all concerned, but before signing, the men were asked to enter into an agreement not to take jobs on their own account when laid off during slack times. It would be unfair, the employers say, that they should be asked to pay union wages and employ none but union men if the men are to do contracting themselves in slack times. The men oppose this proposition unless the employers are willing to guarantee them work for a stated number of months.

EMERALD AND CHROME GREEN.

Emerald green is much valued because of its durability, its resistance to chemical and atmospheric influences, as well as for its brilliancy of tone, and on these accounts is in demand both as a painter's color and for the manufacture of colored printing inks, in dyeing textile fabrics, and in the manufacture of glass, says "The Oil and Colourman's Journal."

It is prepared by mixing together one part of patassium bichromate and three parts of a soluble borate, moistening and thoroughly incorporating them, and subjecting the dried compound to a dark red heat in a current of air. The furnacing is similar to the process employed for converting litharge into red lead.

The glowing mass is dropped into water when the proper degree of oxidation has been attained, and is carefully freed by washing, grinding, and filtering from the residual borate or boric acid.

Chrome green is found in the market comprising a long series of shades and tones, but the name properly belongs exclusively to that extraordinarily valuable green, consisting almost entirely of chromic oxide, and is one of the most stable and reliable colorants for all shades of bright green glass. There is scarcely any other chemical pigment for which so many formulae and processes have been brought forward as for this, or of which the tint and tone of the product so entirely depends upon the manner of preparation. This is, indeed, a peculiarity of all chromium compounds.

Chromic oxide is prepared most cheaply by heating potassium bichromate with sulphur, leaching out the potassium salt with very dilute sulphuric acid, and washing the residual chromic oxide. In the reaction the sulphur reduces the chromic acid, and in treating the heated mass with sulphuric acid sulphur dioxide is given off and potassic sulphide and sulphide go into solution, while the chromic oxide remains behind.

The greater the portion of sulphur used the lighter will be the color of the chromic oxide obtained by this method. This beauty of the color depends upon the purity of the potassium bichromate used, and if it contain rosin in appreciable quantity a good product can never be obtained—it will inevitably be off-color.

Nineteen parts of bi-chromate, with four parts of sulphur, yield nine and one-third parts of chromic oxide. The formula may be varied infinitely, but the rule is inviolable that the higher the proportion of sulphur the lighter is the color of the product.

RINALD'S ENAMEL PAINT.

The following enquiry has been received by "Hardware and Metal." We would thank any of our readers furnishing a reply:

Editor "Hardware and Metal:"

"Can you supply me with the address of any Canadian agent of Rinald's Enamel Paint?

"SUBSCRIBER."

LINSEED OIL IN NEW YORK.

Crushers report that the movement of linseed oil is about in the same volume as last year at this time. Buyers are inquiring but are holding off in hope of lower prices. Crushers, on the other hand, are waiting for the large jobbing demand they confidently believe will set in soon, and are not anxious to sell. All talk of 39c. oil is regarded by them as largely imaginary. While some oil may have been sold at that figure, we have been unable to identify it or learn what, if any, mill has offered any considerable quantity below the quoted prices of 41 to 42c., as per seller.—Paint, Oil and Drug Review, April 8.

PARIS GREEN SITUATION.

The Canadian manufacturers of Paris green are maintaining the advance of 3c. per lb. in their quotations, but jobbers, in Toronto at least, continue to sell at old figures. The market is undoubtedly in a peculiar condition. Retailers are, as a rule, well stocked up and do not seem to be hurried in placing orders by the advance in quotations, as it is too apparent that the jobbers who are quoting the old figures are anxious to clear out the bulk of their present holdings, and so are not likely to follow the advance for some time to come. On the other hand, many of the jobbers have quite light stocks and have followed the lead of the manufacturers, and are hopeful that the jobbers who are still "cutting" will be soon sold up, which will enable them to get into the market again.

TURPENTINE FROM TEXAS.

The steady depletion of the turpentine forests in the Southern States has, during the last two or three years, caused much study and attention from the National Department of Forestry of the United States. Now, according to "The Paint, Oil and Drug Review," the Department of Forestry has taken up the matter of opening up the pine forests of southeast Texas, and has decided to send an investigating party to visit that district to determine the extent of turpentine that the forests will yield. The new method, which replaces the present wasteful system of boxing, is to be given a thorough test in the Texas pine forests. An interesting feature of the situation lies in the fact that this matter was first brought to the attention of the Department of Forestry by the Industrial Department of the Southern Pacific Railway, which is endeavoring to build up the country through which it passes, in the hope of ultimate increase to its own revenue.

PAINT AND OIL MARKETS.

MONTREAL.

The Easter holidays gave the paint manufacturers a little breathing space and enabled them to catch up with the orders fairly well; but after the holidays business resumed all its activity and, as one operator says, "The word 'rush' appeared on almost every article." Paris green is firm at the advance reported last week, as the consuming demand is only beginning. Linseed oil is steady at former quotations. The feature of the week has been the reduction of 4c. in the price of turpentine, in sympathy with the weakness displayed in the south. No further reduction is looked for at present, either locally or on the producing markets. Stocks of turpentine held here are quite large, as indeed, they are all over the country, and none of the cheaper turpentine will reach this market until the early part of next week. We quote:

GROUND WHITE LEAD.—Best brands, Government standard, $5.25 to $5.50; No. 1, $4.52½ to $5.12½; No. 2, $4.65 to $4.75; No. 3, $4.27½ to $4.37½; No. 4, $3.90 to $4., all f.o.b. Montreal. Terms, four months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5 in casks, and in kegs, $5.25.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c.; No. 1, zinc; in casks, 5¼c.; in 100-lb. kegs, 5¾c.

"ARK BRAND"

IS INVALUABLE FOR IRON WORK OF ALL KINDS

because it is not affected by expansion and contraction, and under all circumstances and conditions will greatly outlast all other paints.

This is but one of the individual qualities possessed exclusively by "Ark Brand" Paint that go to make it the most profitable paint for dealers to carry.

Let us tell you more about "Ark Brand" Paints, and the inducements we offer to dealers and in the meantime think over this letter.

AMELIASBURG, DEC. 29.

TO THE FRANCIS-FROST CO., Limited,
TORONTO.

GENTLEMEN:—I have sold your "Ark Brand" Paint for several years and beg to say that I am pleased with the results. I find that my customers after using your "Ark Brand" Paints once, ask for them again and will not have other makes. I find your mixed paints true to name, good colors and good wearing paint. Yours,

JOHN SPRAGUE.

PUTTY.—We quote: Bulk, in barrels, $1.60; bulk, in 100-lb. packages, $1.85; bladders, in barrels, $1.90; bladders, in 100 or 200 lb. kegs, $2.05; 25-lb. tins or irons, $2; 12½ lb. tins, $2.30, f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c higher, f.o.b. St. John and Halifax. Three per cent. discount for cash in 30 days.

ORANGE MINERAL.—Casks, 7c.; 100 lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100 lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50 and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 1 to 4 barrels, 59c.; boiled, 62c.; raw, 5 to 9 barrels, 58c.; boiled, 61c. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gallon advance.

TURPENTINE. Single barrels, 91c.; 2 to 4 barrels, 90c. Terms, net cash in 30 days.

BENZINE.—25 to 26c.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.40 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PURE CANADIAN PARIS GREEN.—Petroleum barrels, 16½c.; per lb.; arsenic kegs, 16½c.; 50 and 108 lb. drums, 17c.; 25 lb. drums, 17½c.; 1 lb. packages, 18c.; ½ lb. packages, 20c.; 1 lb. tins, 19c.; ½ lb. tins, 21c.

PURE ENGLISH PARIS GREEN.—Petroleum barrels, 14½c.; arsenic kegs, 14½c.; 50 and 100 lb. drums, 15c.; 25 lb. drums, 15½c.; 1 lb. paper boxes, 16c.; 1 lb. tins, 17c.

TORONTO.

The feature of the market is the continued downward tendency in turpentine at primary markets, and the reduction of 1c. on the local market. As the decline in the United States has been fully 13c for wine gallons in less than a fortnight at Savannah it is clear that there will be further heavy drops on the local market as soon as stocks can be imported. Jobbers, however, are selling out for as much as can be secured for hand to mouth orders. Linseed oil has declined 2c. in the United States, but would have to drop materially further before the Canadian market, which seems firm, would be affected. White lead is steadily at $5.10 being the lowest quotation made by the majority of houses. Paris green quotations continue at the advance noted last week, but some jobbers are selling 2 to 3c below prices quoted. There is an excellent trade doing in all lines. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, $5.10 to $5.25; No. 1, $4.62½ to $4.87½; No. 2, $4.25 to $4.50; No. 3, $3.87½ to $4.12½; No. 4, $3.50 to $3.75 in packages of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. packages; genuine dry white lead, in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $4.75 to $5; ditto, in kegs of 100 lb., $5.25 to $5.50; No. 1, in casks of 560 lb., $4 to $4.25; ditto, in kegs of 100 lb., $4.25 to $4.50.

LITHARGE.—Genuine, 6 to 6½c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6 to $6.25.

SHINGLE STAIN.—In five-gallon lots, 60 to 85c. per gallon.

PARIS WHITE.—90c. to $1 per 100 lb.

WHITING.—65c. per 100 lb; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35 to 37c.; in less than cases, 40 to 42c per lb.

LIQUID SHELLAC.—Pure orange, in bbls., $2.30 to $2.40; white, $2.35 to $2.45 per gallon; in less quantities, 10c. extra.

GLUES.—Broken sheet, in 200-lb. bbls., 8 to 8½c. per lb.; cabinet glue, in bbls., 11½ to 12c.; emery glue, in bbls., 17c.; bookbinders', ground, 10½c.; finest American, white, 19c.; No. 1 American white, 15c. per lb.

PUTTY.—Bladders, in barrels, $2.10; bladders, in 100-lb. kegs, $2.25; bulk in barrels, $1.80; bulk, less than barrels, and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.75.

PARIS GREEN.—Petroleum bbls., 13 to 15½c. per lb.; arsenic kegs, 13½ to 15½c.; 50 and 100-lb. drums, 14 to 16c.; 25-lb. drums, 14½ to 16½c.; 1-lb. packages 15½ to 17c.; 2-lb. packages, 17 to 18c.; 1-lb. tins, 16 to 18c.; ½-lb. tins, 17 to 19c.

PLASTER PARIS.—New Brunswick, $2 per barrel.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls. and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gallon; No. 1, $1.10 per gallon.

BARN PAINTS.—65 to 70c. per gallon.

CASTOR OIL.—English, in cases, 8 to 9c. per lb.; and 9 to 10c. for single tins.

LINSEED OIL.—Raw, 1 to 2 bbls., 61c.; boiled, 64c.; 3 to 5 barrels, raw, 60c.; boiled, 63c.; 6 to 9 barrels, raw, 58c.; boiled, 61c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 barrels and over of linseed oil sold only f.o.b., Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 91c; 2 to 3 bbls., 90c. delivered; Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 55c. and 10-gallon packages, 80c. will be charged.

WINDOW GLASS.

MONTREAL.

Prices are steadily held on this market and no change is spoken of at present. There is an active movement in window glass to all parts of the country, and in view of the unusual building activity, this healthy state of affairs is not likely to cease for some time. We quote: First break, 50 ft., $2; second, $2.10 for 50 ft.; first break, 100 ft., $3.80; second break, $4; third break, $4.50; fourth break, $4.75.

TORONTO.

There is an active trade doing, with prices as follows: Star, under 26 in., $3.80; 26 to 40 in., $4; 41 to 50 in., $4.50; 51 to 60 in., $4.75; 61 to 70 in., $5; 71 to 80 in., $5.50. Toronto, Hamilton and London. Terms, four months, or 3 per cent., 30 days.

Martineau, Antoine & Fils, carpenters and contractors, Three Rivers, Que., have been registered.

About "C" Horse Nails.

We ask your consideration of the following reasons for our making the claim that the "C" brand horse-nails made by our company since 1865 is the best for you to buy.

First:—The material of which they are made. It is the best obtainable—Swedish charcoal steel nail rods—made especially for our work, and imported direct by us from Sweden. We unhesitatingly affirm that no better material is used by any manufacturer of horse-nails in the world for this purpose.

Second:—The process of manufacture. We forge the nails to the desired pattern from the nail rods while they are hot, and, therefore, in a malleable condition. Our process thoroughly hammers and consolidates the nail, making it tough and enduring: no other method will do this as satisfactorily. Our methods for polishing, rolling, pointing and finishing the nails differ from those used elsewhere in Canada, and, we are satisfied, with much better results.

Third:—When the nails are finished, they are subject to a final careful examination and sorting by hand, so as to prevent a single imperfect nail being found in a box bearing our "C" brand.

Fourth:—We guarantee to every purchaser, that each box of horse-nails bearing our name and trade mark (the letter "C") is perfect and ready for immediate use. They may be returned at our expense if found otherwise.

Any dealer who wishes to secure the farrier trade, can only do so by selling the best horse-nails: The "C" brand will be found the best. They are the standard nails of Canada, and have been thoroughly tested by thousands of farriers from the Atlantic to the Pacific for the past thirty-four years.

We ask those who wish to favour us with their orders, through any wholesale hardware merchant, to be particular and specify for the "C" brand made by the

Canada Horse Nail Co.

MONTREAL.

Philip Gies, hardware and stove merchant, Berlin, Ont., is succeeded by Gies, Wolfhard & Co.

John Gray, agricultural implement merchant, La Riviere, has been succeeded by Gray & Carlton.

La Cie Manufacturiere de Gentilly, manufacturers of doors, furniture, etc., have been registered.

HEATING AND PLUMBING

Master Plumbers' Association of Ontario.

A Successful Meeting at London of the Provincial Organization.

LONDON, Ontario, was, at the end of last week, the rendezvous for the plumbers, gas and steam fitters from many of the towns and cities of this province, who had with very pleasant anticipations gathered together as one section of the National Association of Plumbers, Gas and Steam fitters of the Dominion, to hold their second annual meeting as a provincial association.

Some years ago the first meeting of the parent society was convened, and since that memorable occasion the National Association of the Dominion has grown to such proportions as required its being divided up into provinces for its better control and management. Each province of the Dominion has now its own staff of officers, with places of annual meeting selected to suit the majority of its members.

A preliminary provincial convention was held last year in the month of March, in Toronto, which was chiefly of a formative character. A constitution and by-laws were adopted, and officers and standing committees elected for the ensuing year, and a place selected for first regular annual meeting. The Forest City plumbers and steam fitters, therefore felt justly proud and highly grati[illegible] because their city was chosen for the [illegible] regular provincial convention under the new arrangement and constitution.

None of the other provinces having yet held their first convention, considerable interest was evinced in, and importance attached to the first convention of the Ontario Provincial Association of Master Plumbers, Gas, Steam and Hot Water Fitters held at London.

At the provincial meeting of the Master Plumbers, Gas and Steam fitters of the Province of Ontario, held in the Pythian Hall, Toronto, on March 28, 1902, the following officers and committee were elected :

William Mansell, president, Toronto.
S. P. Gourlay, past-president, St. Catharines.
W. J. Clarke, vice-president, Hamilton.
W. H. Meredith, financial and recording-secretary, Toronto.
J. H. Wilson, treasurer, Toronto.
Executive Committee—William Mansell, president, Toronto; S. P. Gourlay, past-president, St. Catharines; W. J. Clarke, vice-president, Hamilton; W. H. Meredith, financial and recording-secretary, Toronto; J. H. Wilson, treasurer, Toronto; Philip Gies, Berlin; H. Mahoney, Guelph.

L. Le Grow was at the semi-annual convention held in the city of Toronto in November, 1902, elected as secretary, to take the place of W. H. Meredith, who from pressure of other duties found it impossible to do the work connected with the Provincial Association. With this alteration the London convention began with the officers above named all on hand and ready for business.

Nearly all the officers of the Executive Committee came to the city by the fast express on Thursday evening, 9th inst.,

W. MANSELL, Toronto, President.

and were quartered at the Grigg House, where they diligently set to work in preparation for the duties of the day following.

FRIDAY MORNING SESSION.

In the Knights of Pythias Hall a morning session was opened at ten o'clock. Some matters of importance requiring the attention of the officers and members of the local branch, prior to the opening of the convention proper in the afternoon, were discussed, and satisfactorily disposed of. It was decided that members of the press would not receive admission, and that only their special stenographer would be allowed to take a report of the proceedings, but permission to take extracts from his notes was allowed to the representative of "Hardware and Metal."

The convention proper opened in the Knights of Pythias' Hall at 2 p.m. prompt, by the worthy president, William Mansell, who in felicitous terms welcomed the members present to this their first Ontario provincial convention, after which the following gentlemen were appointed the

COMMITTEE ON CREDENTIALS.

J. H. Wilson, Toronto.
M. A. Brian, Windsor.
J. Watt, Chatham.
E. Russell, London.

The above committee as early as possible reported that certificates had been handed in by the following delegates who were present :

PRESIDENT MANSELL'S ADDRESS

Friends and Fellow Members,

I am pleased to congratulate you on the favorable promises of this, our first annual meeting, meeting as we do in this fair city of London, the Forest City of Ontario, situated, as it is, in one of the most fertile sections of our province, surrounded by as thickly populated and as prosperous a community as exists in this, or any other part of Canada. At

S. F. GOURLAY St. Catharines, Past President

this meeting you are adjacent to some of the most growing and beautiful towns in our province. And, I am happy to say, each of the surrounding cities and towns has sent its quota of master plumbers to this meeting to make it one of the most eventful milestones in our association's history. While our association is still an infant, I think you will agree with me that it is a strong and hearty one, embracing, as it does, members from almost all the cities and towns in our province.

There are a few matters which I consider it important to mention, and I beg your patience while I do so. Passing, as we are, through the fiercest days of competition on the one hand, and hedged in by the strenuous demands of our employees on the other, it behooves us to consider at this meeting the best means of thorough organization. Not for the purpose of merely adding to our membership; not for the purpose of resisting the demands of our men, but for the purpose of shattering the astounding competition that exists among ourselves. Let us then consider the best way to classify and regulate trade as it should be. We are to-day passing through the most stupendous business period of our country. Prosperity never knocked at our doors as it does to-day. And how do we receive it? Are we to-day our brother's keeper? While we are to-day enjoying each other's company, let us also enjoy each other's confidence. Let us make this, the first visit of our association to London, a precedent of the benefits derived by its members and the trade generally.

We are passing through growing times, as I said before. We are in a growing country. Don't let us forget that we live in Canada, and remember, also, that we are Canadians. Let us interest ourselves in everything that we use in our business that is made in Canada. Let us encourage the manufacture of everything we require being made in Canada. Let us take a leaf from the book of our neighbors to the south of us, and encourage home-made goods. Let me emphasize: We have as fair a country as the sun shines on; we have as good mechanics as the best; we can have the goods we want made in Canada, I think, as good as we get them elsewhere. And why not encourage their adoption? While in this train of thought let me say this—I think we are to blame to a great extent ourselves if there are some articles that we use, which are made in Canada, that do not come up to our ideals as far as quality is concerned. Why is it? Here is a useful field for us. You all know that we are invariably straining to get below our competitors' figures. This has been, and is being, carried to such an extent that the situation is truly an alarming one. Our calling stands more in need, to-day, of laws to modify competition than anything else, and while it is injurious to ourselves, it is just as severe on our manufacturers and jobbing houses to meet the competition of ourselves. We jew the manufacturers and jobbers down to the last notch, so that they are compelled to manufacture the articles to meet our rates, much against their own wishes, because they know they cannot put the material and workmanship on them that the goods are entitled to, on account of the pace set by us. While to-day we can number amongst our friends the Canadian manufacturers and supply men in the trade, let us still maintain and extend that friendship by encouraging the adoption and sale of Canadian-made goods, and in return ask them to hang up a sign in their sale departments, "Goods Sold Only to the Trade."

I will close this address by asking the members to stand shoulder to shoulder in making our association a channel, not only for the benefit of its members, but of making the sanitary laws in our province equal to any in the land. In the office of president, which honor you conferred upon me at our inaugural meeting, I thank you deeply. I desire to thank each individual member for his support during the past year. While I have not been able to give it the time I should have, I think our growth has been encouraging, and I hope the result of this meeting will be beneficial throughout the province, and its echo be heard from the Atlantic to the Pacific. Let our deliberation be of so judicious and wise a character that all who shall be enrolled as members may be greatly benefited.

In passing this office to my successor I can assure him who takes upon himself the duties that I lay down that he will have my hearty support, and hope he will receive the same courtesies that have been extended to me. Let us all adopt the motto that our association is formed that the greatest justice may accrue to the greatest number.

SECRETARY'S REPORT.

L. Le Grow, who was elected to fill the vacant place caused by the retirement of W. H. Meredith last November, made a verbal report of all matters pertaining to the work of his department since his appointment, and which gave evident satisfaction.

TREASURER'S REPORT.

J. H. Wilson, of Toronto, treasurer, for the past year, in his exhibit of receipts and disbursements, showed that there had been expenses for the past year of $102.62, and a balance on hand of $287.18.

A resolution was passed to engage a paid corresponding secretary and organizer, and the hope was expressed that they would be able to secure the services of W. H. Meredith, a former president of the National Association. The following were elected as a Legislative and Sani-

W. J. WALSH, Hamilton, Vice-President.

tary Committee: George Clapperton, Toronto; R. Ross, Toronto; George Cooper, Toronto; Wm. Clark, Hamilton; H. Wallace, Hamilton; J. Stewart, Hamilton. Alternative members, J. H. Wilson, Toronto, and W. J. Walsh, Hamilton.

The following gentlemen were elected to form a Nomination Committee: H. Meadows, Windsor; George Clapperton, Toron-

to; Wm. Clark, Hamilton; B. Noble, London; I. Myers, Stratford.

THE NEW OFFICERS.

The election of officers for the ensuing year resulted as follows:

Wm. Mansell, president, Toronto.
W. J. Walsh, vice-president, Hamilton.
S. P. Gourlay, past-president, St. Catharines.
L. Le Grow, financial secretary, Toronto.
J. H. Wilson, treasurer, Toronto.
Executive Committee—All of the above five with the three following added: E. Russell, London; M. A. Brian, Windsor; H. Mahoney, Guelph.

The convention agreed to meet again on Thanksgiving Day in the city of Toronto.

A letter was read from A. W. Mann, manager of the Stevens Manufacturing Company, inviting all members and delegates to the convention to visit the company's works on Saturday forenoon.

It was also announced that a special gala trolley car would be at the disposal of the convention to enjoy a trip over the city on Saturday morning.

The afternoon session was largely taken up by the discussion of matters pertaining to the craft, and the delegates are unanimous in declaring that the session was overflowing with interest and interchange of valuable and practical pointers. The session was a long one, lasting from two o'clock till seven. Every man felt in readiness for the banquet billed for eight o'clock at the Grigg House. It being found necessary to have another session to complete the business on hand and still to be disposed of, the convention was called for 8 a.m. on Saturday morning.

L. LE GROW, TORONTO, FINANCIAL SECRETARY.

THE BANQUET.

Banquets held under the auspices of the National Association of Master Plumbers have always been rated as first-class in every respect, and to maintain the good repute, and emulate the committees of the past, the gentlemen named, E. H. Russell, Chas. Needham and Jas. R. Haslett, of the local branch, put forth their best efforts, and they were indeed successful in breaking the record and upholding the Provincial Association, by setting up a high-class banquet that future conventions will have difficulty in excelling. Notwithstanding the fact that a number of the delegates west of London found it imperative to leave for home on Friday evening trains, there were between 60 and 70 gentlemen sat down to the good things provided. The banquet doors were thrown open at 8.15 and everybody had a ploughman's appetite, the long afternoon's session and many hours' fast giving a sharpened piquancy to every detail. Following are the names of delegates and invited guests who partook of the banquet at the Grigg House on Friday evening:

H. W. Anthes, of Toronto Foundry Co., Toronto; Thos. A. Stevens, Empire Foundry Co., London; Geo. W. Armstrong, of London Brass Works; John McLaren, of Stevens Mfg. Co., London; R. Coleman, of Stevens M'f'g. Co., London; Andrew Mann, manager of Stevens M'f'g. Co., London; W. C. Allen, representing Ontario Lead & Wire Co.; Wm. Buller, Pres. of Journeymen's Union, 374, London; C. W. Walker, London; Wm. Smith, London; Wm. Skelly, Jr., London; Wm. Skelly, Sr., London; Thomas Rich, London; Benj. Noble; London; Ed. Holland, London; W. J. Green, London; F. H. Leigh, London; Wm. Young, London; Wm. Boyce, London; R. J. Haslett, London; James. R. Haslett, London; Chas. Needham, London; L. Robb, London; John R. Foster, representing James Robertson Co., Toronto; Mr. Dawson, representing Darling Bros., Montreal, Que.; H. Wallace, Hamilton; W. J. Walsh, Hamilton; J. Stewart, Hamilton; W. Clark, Hamilton; N. B. Squires, Windsor; H. Meadows, Windsor; Thos. Blackburn, Windsor; J. Pennington, Windsor; R. Paddon, Windsor; M. A. Brian, Windsor; Wm. Mansell, President, Provincial Association, Toronto; L. Le Grow, Fin. Secretary Provincial Association, Toronto; J. H. Wilson, Secretary Provincial Association, Toronto; Geo. Clapperton, Toronto; R. Harrison, Toronto; George Cooper, Toronto; H. Mahoney, Guelph; J. Watt, Chatham; R. Ross, Sarnia; Jas. Scott, Galt; J. H. Neelands, Barrie; S. P. Gourlay, St. Catharines; A. Riddell, St. Catharines; Chas. Taylor, Brantford; Jos. Myers, Stratford; A. Sylvester, Stratford; T. J. Sylvester, Stratford; A. E. Lawson, Stratford; H. Peter, Stratford; Chas. Bull, St. Thomas; A. E. Hamilton, St. Thomas; Jos. Stott, St. Thomas; R. J. Cluff, representing Dominion Radiator Co., Toronto; W. J. Fulton, representing Dominion Radiator Co., Toronto; Mr. Beal, stenographer, Prov. Assn., Toronto; O. M. Ross, representing "Domestic Engineering," Toronto; W. H. Lindsay, representing "Hardware and Metal," Toronto; Stephen King, Ingersoll; Sandy Drennan, entertainer, London; A. L. McCarty, pianist, London; Banquet Committee: E. H. Russell, chairman; Chas. Needham; James R. Haslett, treasurer.

J. H. WILSON, TORONTO, TREASURER

E. H. Russell, chairman of the London branch of the Provincial Association, who worthily and efficiently presided during the evening, was supported right and left by the executive officers. Opening, with grace being said by Mr. Armstrong, of the London Brass Works, the company fell to with a vigor and good humor that could not possibly have been equalled at any former banquet. Full justice having been done the edibles, and the tables put in order the chairman, after a few opening remarks of an appropriate and cheering character proposed the

Toast, "The King," which was enthusiastically drunk by the entire company, after which a

Song, by J. R. Haslett, was well rendered and appreciated, following which came the following in their order:

Toast, "The Dominion of Canada," coupled with the names of A. Riddell, of St. Catharines, and W. J. Fulton, of the Dominion Radiator Co.

Song, by Sandy Drennan.

Toast, "The National Association," coupled with the names of Wm. Smith, of London, and H. Mahoney, of Guelph.

Song, by J. R. Haslett.

Toast, "The Journeymen Plumbers of London," was replied to by William Butler, president of Journeymen Plumbers' Union No. 374, London.

Recitation, by Charles Walker. (Encored).

Toast, "The Local Association," coupled with the names of R. J. Haslett and Benjamin Noble.

Song, by Sandy Drennan.

Toast, "The Supply Houses," coupled with the names of W. C. Allan, of the Ontario Lead and Wire Co. and Andrew Mann, of the Stevens Manufacturing Co.

Toast, "The Ladies," coupled with the names of H. W. Anthes, of Toronto, and John McLaren, of London.

The speeches of the different gentlemen in response to the toasts were short, practical and highly appreciated, round after round of "jolly good fellows" being given before each began to speak, the utmost good feeling and comradeship prevailing during the entire banquet—temperance and common sense being at the same time observable throughout. Prior to closing the enjoyable meeting the chairman made a few suitable remarks, also reminding delegates of the early session on Saturday morning. Three cheers and a tiger and the banquet came to an end at midnight.

SATURDAY MORNING SESSION.

The convention met soon after 8 a.m., to finish up business of importance, which could not be overtaken on Friday. Arrangements in part were made for the meeting to take place on Thanksgiving Day in Toronto. Delegates were also selected to represent the Provincial Association at next annual convention of the National Association. After congratulatory speeches by officers and delegates on the success of the first regular convention of the Provincial Association in London, the proceedings terminated amid many expressions of mutual good wishes.

AN OUTING ON THE TROLLEY CAR.

The balance of the time until dinner was taken up by the acceptance of the invitation tendered the delegates to take a ride round the city on the cars. The handsome special car "Victoria" was placed at the disposal of the plumbers and visiting delegates. Needless to say, the outing was delightful and greatly enjoyed. Places of interest were pointed out by Londoners as they passed along the route. Specially was the stop at Springbank appreciated; here the machinery for pumping the city water was critically examined. The handsome park extending along the front of River Thames for 150 acres was much admired, while a number expressed surprise at the numerous manufacturing concerns in and around the Forest City. On return to the Grigg House dinner was in order.

In the course of the afternoon the majority left for home highly delighted with their visit to London, and thoroughly pleased at the prospects of the Ontario Provincial Association.

NOTES OF THE CONVENTION.

Hello, there, Quebec; when will your province organize?

Windsor in line again! Of course they are, and are there for keep.

"Success! Success! Success!" is stamped on the banner of the Ontario Provincial.

President Mansell is the right man in right place. His report shows he is fully alive to his duties.

London, shake hands with yourselves. You did grandly. Get the same vim in your local association.

If the London Association could carry on their Local as successfully as they did the banquet, what a "corker" it would be.

President Powers, of the National, will be a proud man when Ontario's report is presented at the National Convention. He would be prouder still if Nova Scotia was fully in line.

That was a prime joke got off by the president on the worthy treasurer. The treasurer says there were others. He was not the only one, and he is backed up in his statement.

Say, St. Thomas, what do you feed your master plumbers on? If they do plumbing as well as they crack jokes, no need of any inspectors. You'll have a healthy city.

What an aggregation!—Toronto, Hamilton, St. Catharines, Guelph, Barrie, Galt, Stratford, St. Thomas, Windsor, Sarnia, Ingersoll, Brantford, London, etc. Say, "National," can you beat it?

BUILDING PERMITS ISSUED.

TORONTO.

Robertson Bros., stable, at 113 Queen street, to cost $2,500.

The Bacon Estate, four residences at 118 to 124 Walmer Road, to cost $14,000; Chadwick & Beckett, architects.

The Gutta Percha Co., Limited, a brick building on West Lodge avenue, near O'Hara, to cost $40,000; S. H. Townsend, architect.

The Confederation Life Association, alterations to office building at corner of Richmond and Yonge streets, to cost $30,000; J. Wilson Gray, architect.

MONTREAL.

E. M. Ranouf, seven-storey building at 2238 St. Catherine street, to cost $51,000; Hutchison & Wood, architects.

Wm. Yuille, four-storey building at 193 Redpath street, to cost $30,000; McVicar & Herriot, architects.

BUILDING NOTES.

F. J. Rastrick & Sons, architects, Hamilton, have plans ready for several new residences and for a new bakery for Wm. Lees & Son, Jackson street.

J. L. Meikle & Co. are building a wholesale warehouse at Port Arthur.

E. Noble & Co., Sault Ste. Marie, Ont., will build a produce warehouse 50 x 80 ft., to cost $1,500.

Architect A. F. Dunlap, Montreal, is preparing plans for an apartment house to cost about $300,000, and to have 700 rooms, fitted with the latest improvements.

Architect A. W. Peene, Hamilton, has prepared plans for the new Pennington factory at Dundas; extensive alterations to the Meriden Britannia works; Hazell & Son's store, and a block of stores in Dundas for R. T. Wilson.

Architect Mills, Hamilton, is looking after the erection of residences for J. R. Moodie, on South Bay street, and for Capt. J. B. Fairgrieve, Bold street; of alterations to parsonage of Centenary Church, and to the factory of the Hamilton Cotton Co.; of additions to premises of R. McKay & Co., and of Grafton & Co.

W. & W. Stewart, architects, Hamilton, have charge of the construction of a large annex to the Caledon Mountain club house at Credit Forks; a $50,000 addition to the William Buck stove foundry, and a $30,000 Carnegie library at Brantford; town hall at Winona; canning factory at Burlington; $6,000 residence for E. H. Dyer, St. Louis, in Muskoka; office for Tallman & Sons, Wellington street; residences for J. A. C. Morrow, North Caroline street; C. H. Peebles, Caroline and George streets; and a $15,000 Carnegie library at Collingwood.

PLUMBING AND HEATING NOTES

S. & J. Hisey, Creemore, Ont., are installing a system of waterworks in their private residences and of several neighbors.

John S. Coughlan, plumber and heating engineer, St. John, N.B., intends removing to larger premises at 92 Charlotte street. He intends to make the new shop thoroughly up to date.

Foreman Gus. Nelson, of the Purdy, Mansell Company, of Toronto, with seven assistants, will be finished in a few days installing the sprinkler system at the Deerings.—Hamilton Herald.

NEW BUILDING OF THE WINNIPEG LIBERAL CLUB.

Architect James Chisholm of Winnipeg has prepared plans for the new home of the Liberal Club of that city. The plans will be submitted to the new directors and tenders will be called for almost immediately.

The site chosen is on the south side of Notre Dame street. The frontage is 48 and the depth 120 feet to a wide lane. There will be entrances to the building from both Notre Dame avenue and the lane. The building will be four storeys and basement and will be laid out as follows:

Basement—Up-to-date restaurant, barber shop, bowling alley, gymnasium, baths and the necessary heating apparatus.

Ground floor—A fine main hall entirely unobstructed by posts, the upper floors being carried on iron girders the full width of the building, spacious reading rooms running across the front of the building and well lighted. On this floor also will be smoking rooms, card rooms and the best equipped billiard room that has yet been fitted up in the West.

On the first floor will be organization rooms, offices and apartments to-let. The second and third floors will be devoted to bachelor suites and single apartments.

There will be two fine entrances to the upper storeys, one on each side of the front and main hall and basement through the arcade forming the front of the building.

Many applications for stock have been received, but there are still some small blocks unallotted and anyone desiring to participate from outside points should communicate as soon as possible with Mr. G. J. Lovell, Box 847, Winnipeg.

Those having the matter in charge are full of enthusiasm and confidently expect to have the club lodge in spacious new quarters and with every facility for the comfort and enjoyment of its members before the snow flies again, or indeed, before the geese fly south.

CHEAP GAS FROM CRUDE OIL.

W. H. ANDREWS, a mechanical engineer, president of the Petroleum Gas and Manufacturing Company, 6763-7 South Chicago avenue, Chicago, claims to have solved the problem of making gas cheaply out of crude oil. He has succeeded in forming a company with a capital stock of $2,000,000, says an exchange.

"We can make gas with our outfit," says Mr. Andrews, "at a cost of not more than 5c. a thousand for a plant large enough to use it for heat, light and power purposes combined. Indeed, our tests show that we can produce from a gallon of oil costing about 11c. at retail, 3,000 to 4,000 cubic feet of gas, superior to the gas ordinarily furnished in cities for $1 and upwards per thousand.

"The essential principle of the new process is the pumping of air through oil which has been mixed with certain chemicals. What these chemicals are is my secret, but they do not cost more than a cent for each gallon of oil. I propose for the present to furnish the prepared oil to consumers at about a cent advance over the market rate; later I may patent my process, in which case, of course, the method will become public.

"For illuminating purposes it is necessary to enrich the gas with gasoline, but this can easily be done. For an illuminating gas plant alone, the most expensive possible, the cost is not more than 15c. per thousand cubic feet, including interest on investment. In other words, we can furnish present consumers of coal or gas with a plant that will make gas for them at one-third to one-sixth the cost of the cheapest private gas making plants known heretofore.

"It is necessary to our system to have a machine for pumping the air, and we are planning to get out an improved gas engine which will do this at a very slight cost. For household purposes we can furnish a plant that will derive power from a small water motor, to be attached to the city supply, and will work automatically, that is, will do its work without stopping or starting of the pump, solely through the pressure inequality due to starting the use of the gas. The cost of such a plant for a six to eight room house will be about $75."

RIGHT IN HARNESS.

The convention held at London on April 10 and 11, relegated some important matters to the new Executive Committee for their consideration. Amongst others was the matter of meeting the radiator manufacturers for the purpose of endeavoring to have the system now in vogue of the travellers from these concerns giving quotations, plans and specifications direct to private individuals stopped. The master plumbers claim this would be in the interest of all concerned.

TORONTO ASSOCIATION.

Chairman McKittrick, of the Ways and Means Committee, is a busy man and is fully determined his committee will be of great benefit to the association. He has a lot of good, fine fellows at his back.

The delegates to the recent convention will have an interesting report to make at the next local meeting, Toronto being honored with three officers—president, treasurer and secretary. Judging from recent meetings, the report will not be presented to empty seats.

GROWING IN POWER AND NUMBERS.

We note from an exchange that the supplement to the eleventh edition of the Directory of Recognized Master Plumbers, issued by the National Association of the United States, contains 11 pages of additional names. This shows that the master plumbers in the neighboring Republic are enjoying a growing time as well as the "National" of our own Dominion. The idea of unity is growing

A SPECIAL ANNOUNCEMENT.

We shall have a special announcement to make in our next issue that should be of interest to the plumbing and heating trade, also to manufacturers in these lines.

THE POWER PLANT OF THE ST. LOUIS EXHIBITION.

We note from an exchange that the power plant of the St. Louis Exposition is commencing to take form. Situated at the base of the plateau, in the narrow neck connecting the two lobes of the exposition grounds, it will be directly in the line of travel and one of the prominent features of the display. A boiler house, 300 x 400 feet, will contain not only the boilers but a large number of gas producers of different systems, and several machines for making briquettes of refuse coal. There will be some 40,000 horse power of steam engines, including a 5,000 horse power Reynolds-Corliss of the manhattan type, exhibited by the Allis-Chalmers Company, and a 3,000 horse power Curtis turbine, exhibited by the General Electric Company. John Cockerill, the Belgian builder, will exhibit a 3,000 horse power gas engine, five times as large as that which excited so much comment at Paris, and A. Borsig, of Berlin, who exhibited the largest steam-engine at the Paris Exposition, will have a 1,500 horse-power gas engine, of which he writes as follows:

"An article in No. 2 of your valuable paper deals with the various plants to be erected in Machinery Hall at the St. Louis Exposition. I would like to state that the gas engine which I intend to exhibit at St. Louis will develop a mean power of 1,500 and a maximum power of 2,000 horse-power in one cylinder. It will be of the so-called Oechelhaeuser type, which has many advantages over other types of gas engines, namely, that there are no cylinder covers, no valves except a small starting valve, and that all the moving parts balance each other.

"The dimensions will be: Cylinder diameter, 1,100 mm. (about 43 inches); stroke, 1,350 mm. (about 53 inches).

"The engine will make 100 revolutions per minute, and will be directly connected to an electric generator. The gas for running the engine will be generated in three 800 horse-power gas producers, exhibited by Julius Pintsch, of Berlin.

"A. BORSIG."

BICYCLES IN CONVALESCENT HOMES.

All the principal London hospitals have convalescent homes in the country or at the sea side, to which inmates from the hospital are transferred when they are nearing recovery, for the change of air and surroundings to complete their cure. All these institutions own bicycles for the use of the inmates who can ride. The marked difference in the rapid improvement in the condition of the men who use the wheel over the rest is surprising. As one of them remarked: "The worst of this riding is that I'm getting all right so quick that I shall be discharged very soon." There is nothing like bicycle riding to pull a man together who has lost his grip on health. It gives every part of the body healthful exercise.

INDUSTRIAL GOSSIP

OWEN SOUND saw mills are preparing for a busy season. Maitland, Rixon & Co. start this week; Keenan Bros. begin work next week; John Harrison & Sons will open their summer mill about May 1.

The Canadian Bridge Co., Walkerville, Ont., has shut down owing to labor troubles.

J. A. Gregory's saw mill at Lepreaux, N.B., will open up for the season in the course of a few days.

Dundas, Ont., has voted to grant a loan of $15,000 to J. D. Pennington, who in return will erect a refrigerator factory.

Cyrus White and Joseph D. Montmorency are starting to manufacture in Norwich, Ont., top draft furnaces. Their factory is large and well equipped.

A despatch from Collingwood, Ont., says that the Cramp Co. have about 200 men employed in pushing the plant to completion. Most of the work is done, and a few weeks will see the mills in operation.

The Doherty Manufacturing Co., Sarnia, Ont., are shipping a carload of their famous decarbon stoves to Edmonton, Alberta, next week, making six cars in all which have been shipped to the Territories alone this year.

The Crofton smelter at Osborne Bay, Vancouver Island, was blown in a few days ago, with one furnace in operation, and the other two furnaces will be blown in before very long. The smelter will be operated continuously henceforth, and it is expected that when all three furnaces are in operation 700 tons of ore will be handled daily. At the present time 200 tons of ore will be smelted daily.

TO MAKE WIRE AND WIRE PRODUCTS.

The Imperial Steel and Wire Co. have been organized in Collingwood, Ont., to manufacture rods, wire, wire nails, fencing, etc. The capital of the company is $700,000. Among the directors are: John Charlton, M.P.; Major J. A. Currie, of The Cramp Steel Co.; C. E. Stephens and Capt. P. M. Campbell, of Collingwood; Mr. Notman, of the C.P.R.; Messrs. W. J. Lindsay, of St. Thomas; Lindsay, of Pittsburg; Stevens, of Chatham, and a number of other gentlemen in western Ontario. W. J. Lindsay has been active in the promotion of the company. Mr. Vaughn, of Cayuhoga Falls, Ohio, who is also interested in the plant, was here the other day looking over the site and arranging for the plans and the installation of the plant. The output will be 50 tons of wire daily, and Manitoba and the Northwest will be the principal market.

NEW STEEL WORKS FOR MONTREAL.

A new steel industry will be established in Montreal, the feature of which will be the adoption of the Hunter process. The capital will be in the vicinity of $500,000, and the company is being organized by A. J. McGibbon, of Lachute, Que., who has already met with a good deal of encouragement from Montreal capitalists. The company purposes to manufacture all kinds of machinery castings, automobile castings, railroad castings, horseshoes, harness and wagon hardware, edge tools, and all kinds of steel castings.

It is claimed that cast iron can by the Hunter process be tempered like ordinary high carbon steel, and is available for use in making edge tools, such as hatchets, adzes and axes. When not tempered, the iron after treatment is the equivalent of soft steel and malleable iron and is said to be suitable for all the uses to which soft steel and malleable iron can be put. The prevailing process requires the metal to be subjected to heat continuously for ten days for conversion into malleable iron, while by the new process the same number of hours only are required. A company has been organized at Ottawa, the plant there is now in operation and much success has been achieved.

A PLUMBING YARN.

An old gentleman of Manchester, Eng., somewhat eccentric, but reputed to have considerable means and a collegiate education, owned two large blocks of tenement houses. In the repairing of these he had to employ many different tradesmen. With all these tradesmen he got along admirably with the single exception of his plumber, with whom he was constantly at war, and whom he appeared to hate with a bitter hatred. Every time a plumbing job was done he found fault, and had the delinquent brought back again to do the work all over before it was accepted. Besides being a crank on plumbing, he was also quite a rhymer. At his decease the following was found engrossed on the back page of his parlor album:

OUR PLUMBER!

By and bye
He will die!
And the ledger-book on high
Will reveal
How big a steal
He made by scamp-work years gone-bye.

That this old gentleman was a curiosity was proven by the fact that at his death his will showed a legacy of £500 to each of the same plumber's two daughters, to whom he had taken a liking.

It is possible that if a get-rich quick concern were protected with iron-barred doors and windows there are some "investors" who would secure crowbars and somehow or other break in.

FRANK MILLER'S

HARNESS PREPARATIONS.

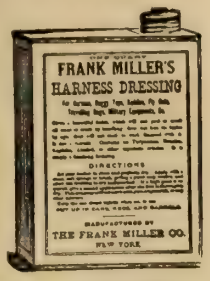
FRANK MILLER'S

HARNESS DRESSING

Recognized as

"THE STANDARD."

Produces a brilliant je black gloss which will not peel or smut and to which dirt will not stick.



Frank Miller's

Harness Soap

Unrivaled for cleaning and softening Harness.

Put up in cakes, pans, boxes and tubs.

FRANK MILLER'S

Harness Oil.

Preserves and softens the leather, hus adding life.

The highest quality of oil on the market.

Window and Interior Displays

Timely Hints and Suggestions.

ONE decided advantage that a hardwareman has over a dry goods merchant, is that none of his goods are injured by displaying them in a window. Almost any article of dry goods suffers to some small extent from the exposure that it receives in a window, as well as from the folds in the goods and from pin-holes and fastenings required in fixing the goods for display. In a hardware store it is entirely different. Handling never soils the articles, and, being of a solid nature, they do not require marking with fixtures, nor does the light injure them.

For this reason a hardware merchant can maintain a well arranged window with far less expense than is required in any other business. In the line of fixtures, too, there is less expense, as few are required and the same ones can be used at various times by merely changing the articles displayed.

In cutlery, windows are frequently quite tastily arranged, but the variety seems to be limited although, in reality, it is greater than in the display of any other line. Such goods as pocket knives, table knives, razors and scissors can be arranged in an endless number of attractive designs on the bottom of the window, or on boards. However, a far more effective plan is to use cork or rubber fixtures, as shown in the designs given.

These fixtures are made of cork and can be cut from large sheets, to be obtained from cork companies in the larger cities. All the large cutlery stores make use of these shapes and find them exceedingly serviceable. The six shapes here shown would not cost more than $1.50 at the most. The large sheets are bought in the form of a rough bark, and by means of saw and knife, are cut into the required shape. They are then covered with baize as a rule, and the knives pushed through into the cork. Unlike wood, the cork will close tight around whatever is pushed into it, and in this way, quite heavy articles are securely held.

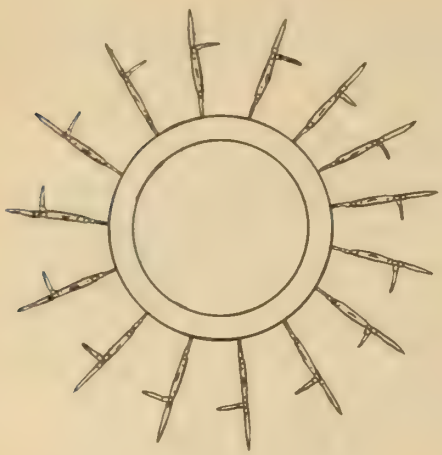

Fig. 1

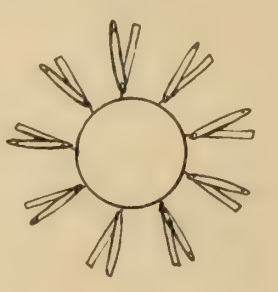

Fig. 2

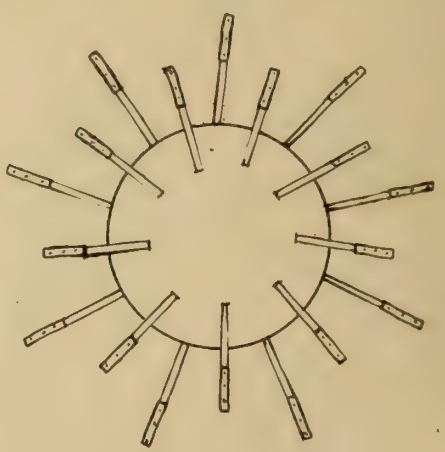

Fig. 3

Fig. 4

Fig. 5

Fig. 6

Fig. 7

Fig. 1. is a circle, in which pocket knives are shown. The circles can be of any size, and knives can be put on the inside as well.

Fig. 2. is a solid small circle the inside of one of the larger open circles. It is suitable for holding razors, which are held by the small end of the blade in a slightly open shape.

Fig. 3. is a larger solid circle, for the display of pocket or table knives. A row is inserted on the outside, and one or more rows slantingly into the front of the circle. Great variety is possible here.

Figs. 4, 5 and 6 are shapes that can be used, and in addition to these, other forms can be thought out by the merchant.

These fixtures are attached to the ceiling by small, neat wires and allowed to hang some feet above the floor of the window. In this way they do not interfere with a floor display, and, in addition, attract far more attention suspended mid-air than could any possible arrangement on the floor. Care must be taken to use good strong wire, as the weight is considerable, and, in the case of razors, a fall means the breaking of many of them. Some merchants affix a layer of rubber outside of the cork, for the purpose of affording a tighter grip on such heavy articles as razors. Two separate strands of wire, attached to separate hooks in the ceiling, must be used to retain the fixtures in the proper position.

Fig. 7, shows the method of fastening scissors together in order to make a string of them for suspending in any position in the window. These strings can be hung in loops of different sizes and shapes, and the result is very pleasing. One attractive display is to hang two or three strings from the centre of the top of the window to a point on the side

Hardware! Hardware!

BARB WIRE. GALVANIZED PLAIN WIRE.
PLAIN TWIST CABLE FENCING.

Telegraph and Telephone Wire, Mattress, Broom, Weaving Wires of every description, Rail Bonds, Bale Ties, Special Wires for all purposes. Springs, Horse Shoes, Wire Rope, Cold Drawn Steel Shafting.

about two thirds down. This presents the appearance of a drapery of scissors and is a good selling arrangement.

Neat price-cards can be printed and hung in the centre of the fixtures, thus even increasing the beauty of the display and assisting in attracting the eye. On account of the neatness of the display, exceptionally neatly printed and shaped cards are requisite.

THE SONG OF A WINDOW.

I feel that it is time to liven up affairs a bit with a song. In America recently, says an exchange, a window display was devoted entirely to washing-day apparatus. Four sizes of galvanized wash tubs and two clothes baskets were set up on their two sides to form a background. In front of these was a row of various sizes and makes of wringers. Then came rollers for wringing machines and masses of clothes pins. In the foreground were all kinds of irons, whilst scattered around were coils of washlines, both wire and hemp. This eminently domestic window display has set the poet buzzing. Let us listen to his buzz :—

This is the song of a window
In a modern hardware store,
Where the people who stopped to inspect it
Admired it more and more

No mirrors of glass ; no silver ;
No paintings of oil on view,
But only four tubs and a boiler
And a neat clothes basket or two.

This is the lay of a window
That captured a lot of trade
And made several sales with quickness
Because of the show it made.

No silks, no velvets or satins :
Or ribbons or bonnets for fall.
But a dozen or so of clothespins
And a wringer the background of all.

But it caught the trade of the women,
It looked so homelike and new--
This brave display of a wringer,
Of lines, and a washboard or two.

A WELL-KNOWN MERCHANT DEAD

Mr. Henri Julien, St. Timothee, Que., one of the best known merchants of Beauharnois district, died on the 8th inst. He was born in Quebec seventy-four years ago, and after residing in Montreal and Ottawa for a number of years, went into the general store business in 1877 in St. Timothee, where he lived up to the time of his death. Besides a widow, he leaves three sons, Henri, The Montreal Star artist ; Telephore, engraver, of Montreal, and Emile, of The St. John's News. The funeral took place on April 10, to Cote des Neiges cemetery, Montreal.

SUBMARINE IS ONLY A TOY.

Considering the articles which fairly inundate the newspapers and magazines regarding the submarine boats, one would think that this type had achieved success, but really the submarine is not worth the space that has been given to it. It would be difficult indeed to outline any points upon which the submarine has been a success, except, perhaps, the single point that it has successfully remained stationary on the bottom of a body of water for a few hours. But even this is a doubtful honor, for the crew suffered great physical and mental fatigue, and it is a foregone conclusion that they were not in a warlike mood at any time during the experiment. It isn't the things that are on the outside of the submarine that need to be worried about it ; it is those which are on the inside. The submarine is without practical manœuvring power and all the experiments which have been held so far justify this statement. To flounder about is not to manœuvre. It has no defensive qualities whatever in itself, and its offensive qualities are largely imaginary. The submarines building in the United States are propelled on the surface by a four-cylinder gasoline engine of 160 h. p. They are propelled under the water by storage batteries, indicating 70 h. p. In the recent trials of the Adder and Moccasin in Peconic bay the storage batteries ran down in three hours and the total radius of action did not exceed 21 knots. Of what earthly use could any such instrument be against a ship in motion ? Moreover when the submarine is being steered with her conning tower out of water she must have a perfectly smooth sea to have any sense of direction. In the trough of the sea she cannot see anything at all except the waves rolling over her, and on the crest the spray blinds the vision of the lens. It is admitted that crews cannot live in them except for periods of a few hours without breaking down both physically and mentally. Living in them is intolerable, for they cannot be heated nor can any cooking be done in them. Testimony is yet to be adduced that the submarine is anything but a naval toy.—From the Marine Record.

IRON AND WOOD PLANES.

On another page attention is drawn to Union iron and wood planes, etc., manufactured by the Union Manufacturing Co., of New Britain, Conn. It has been this company's aim to place upon the market a line of planes that will be standard in every way. This company having had 30 years' experience in manufacturing, coupled with excellent facilities and skilled mechanics, are enabled to turn out tools that are guaranteed in every way. The planes are well made, with an easy adjustment, their cutters of best guaranteed steel, extra heavy, to prevent chattering and are finished by a modern process that gives a keen cutting edge. In point of finish Union tools are surpassed by none now in the market.

"I would like something in oil for my dining-room."

"Yes, madame ; a painting or a box of sardines ?"—Fliegende Blatter.

The reason for using Apollo galvanized iron is: it is the best iron: works easiest: makes the best job, and costs least for labor.

ASK YOUR JOBBER FOR QUOTATIONS.

CURRENT MARKET QUOTATIONS.

April 17, 1903.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

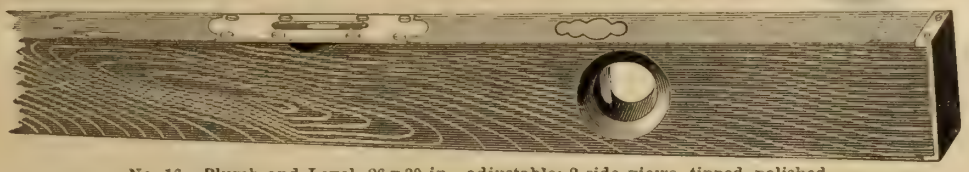
MONTREAL, QUE.

THERE'S A LONG——————————S—T—E—P

Between **DISSTON QUALITY** and the "next best." A mechanic buying tools other than **DISSTON'S**, hesitates—deliberates, in his choice. This is the result of doubt. The name **DISSTON** on a tool removes all doubt. There is an assurance of the very highest quality, far better than the "next best." Could you ask more?

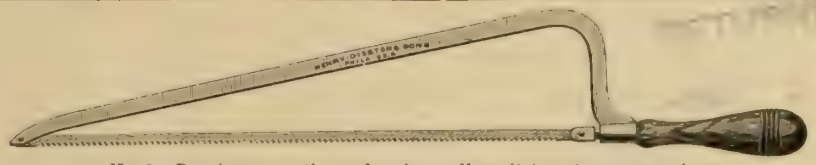


No. 16. Plumb and Level, 26 x 30 in., adjustable; 2 side views, tipped, polished.
No. 21. Mahogany, 2 brass-tipped side views, tipped, polished.

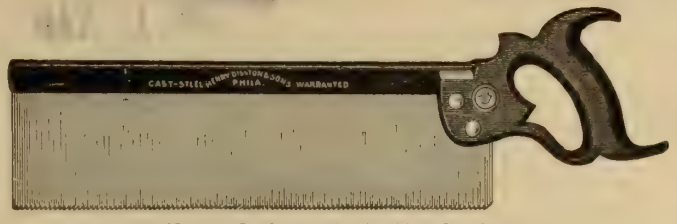
ASK FOR DISSTON'S.

RECOMMEND DISSTON'S.

SEE THAT WEDGE SHAPE?



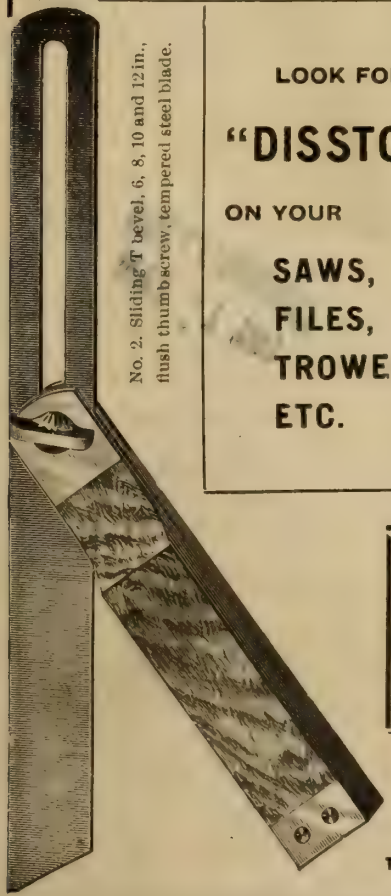
No. 8. Pruning saw; the wedge shape allows it to enter narrow places; 14-in. blade, steel frame, hardwood handle.



No. 4. Back saw, 10, 12, 14 and 16 ins., cast steel, blued back, applewood handle.

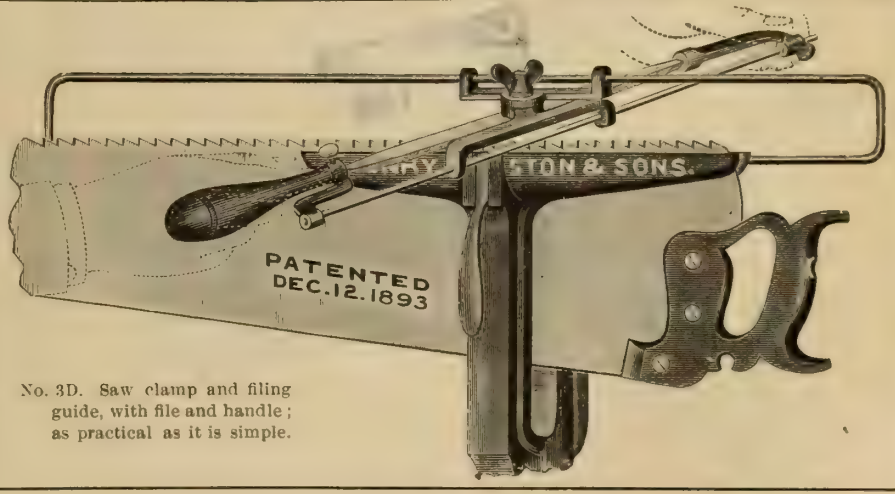
all cuts to Montreal Office May 1st 03

SPECIFY DISSTON'S ON YOUR ORDERS.



No. 2. Sliding T bevel, 6, 8, 10 and 12 in., flush thumbscrew, tempered steel blade.

LOOK FOR "DISSTON" ON YOUR SAWS, FILES, TROWELS, ETC.



No. 3D. Saw clamp and filing guide, with file and handle; as practical as it is simple.

HARDWARE AND METAL

VOL. XV. MONTREAL AND TORONTO, APRIL 25, 1903. NO. 17.

The Alleged Lumber Combine

A Review of its Methods and Possible Legal Eventualities.

HOUSE OF COMMONS, OTTAWA,
April 20, 1903.

PROBABLY the busiest band of members in the House from any one locality are the men from Manitoba and the Northwest. Nor is the reason far to seek. Representing constituencies in all cases large, in some equalling in area the smaller European kingdoms, constituencies which are rapidly growing in wealth and population, they are ever in need of something, and for their necessities they are not slow to ask. From the condition of things in these sparsely settled regions it often happens that from lack of proper competition grievances bearing hardly upon the settlers arise, and against these their representatives, whether Grit or Tory, vigorously protest. Thus it not infrequently happens that we have what is known as a "Northwest Day," when every member west of Lake Superior and east of British Columbia lays his lance in rest and joins in a merry onslaught on some tyrannical transportation company, or what not.

Of course, inadequacy of shipping facilities is the pet grievance, one likely long to remain, with population flowing in so rapidly that railway building can hardly hope to keep up with it, but just at present the most prominent minor trouble is the alleged "Lumber Combine" of the Western Canadian Lumberman's Association. We say "alleged" because there are always

TWO SIDES TO EVERY QUESTION,

and the allegation is met by a sturdy denial on the part of the named company, in view of which it is premature to do more than publish various statements freely circulated in the corridors, statements which it is said will be soon made on the floor of the House. We shall note them briefly.

The Western Canadian Lumberman's Association is composed of

ACTIVE AND HONORARY MEMBERS,

the retailers being the former, the wholesalers the latter. The country dealer must buy only from the honorary member; is allowed to sell only at the price fixed by the association; can carry on his business only within definite territorial limits; must not do contracting or supply lumber on a lump sum basis, and in the event of breaking any of these rules is liable to heavy fines, or to expulsion from the association. As against this the retailer is protected by a provision which forbids an honorary member to sell any stock to any person other than a member of the association, on pain of a fine amounting to 15 per cent. of the value of the material so sold. All agree to boycott any suspended or expelled member, which means practically an entire disability to further carry on his business.

It is said that the regulations are not acceptable to many of the retailers, and that the honorary members, so called, are the real masters of the situation, but so strong is the organization that these men are afraid to enter the slightest protest, as one even suspected is at once cut off from his supply, driven out of business, ruined by this commercial reign of terror.

The effect on the country in general is very serious, as the enormous advance in the price of dressed lumber within the last few years is largely attributed to the operations of this association.

A SHREWD DEALER.

The following story, told by a western member, of his own experience, will give some idea of the strong hold the company seems to have upon the country in general in the west. In 1901 he ordered a carload of lumber direct from Rat Portage, there being no lumber dealer of any kind within thirty miles of his home. He received it in due course, at a very high price, and afterwards learned that the retailer thirty miles distant had received a handsome commission on the transaction, although he had not figured at all in it, but because the consumer happened to live in his "territory." In 1902 the same gentleman required two carloads of dressed lumber, and made a personal trip to Rat Portage. He interviewed a certain wholesaler there, referred to the experience he had had the previous year, said he wanted no man to interfere in his business in that way, that he was buying in a wholesale quantity and would deal if the material were supplied at the price previously named less the commission of the distant retailer. After much humming and hawing, seeing that he meant what he said, and that unless his proposition were granted he would not deal, the sale was put through, and he saved $30 in every hundred as a result of his enterprise. Beyond a doubt not many settlers would be able to do as this gentleman did—each would have to pay an enormous profit to the members of the association.

A TYRANNICAL PROVISION.

A very tyrannical alleged provision is that no new dealer can start up anywhere without the consent of the association, and if he has the hardihood to do so, getting his supplies from some small local mill not in the association, the nearest local dealer is instructed to sell at less than cost till the new man is driven out of business,

the association bearing the loss. If these reports be true, there is established in the west one of the most complete and grinding monopolies that can well be imagined.

EFFECT ON SETTLEMENT OF THE COUNTRY.

What effect has this on other trades, in other parts of Canada? Indirectly a very important and a very deleterious one. The Northwest must fill up, and for many years to come at least its industry will be almost altogether agricultural. The east must manufacture for the west, and furnish it with all goods not produced in that country. It follows then that anything tending to impede the rapid settlement of that country tends also to impede the expansion of eastern trade. Now what can more seriously hamper the settler than an undue price put upon so prime a necessity as lumber?—a necessity ranking next to food itself. And yet, if we are correctly informed, money is being unfairly wrung from these people, and discontent is being engendered at the very time when immigration is setting towards our shores, at the very time when we should have the best inducements and accommodations to offer.

GOD-SPEED TO THE WESTERN MEMBERS.

And so we of the east say to the western members: "God-speed in your crusade. If this grievance exists, as you allege, it is very much in the common interests of Canada that it should be hunted down and wiped out; if it exists not, it is time the association, no doubt composed of respectable men individually, should be cleared of a slanderous imputation."

Two courses lie open to attack the supposed monopoly; one Provincial, one Dominion. In the former the procedure would be, (in Manitoba, for instance) on the motion of the Attorney-General, putting in action section 520 of

THE CRIMINAL CODE,

a section dealing with combinations in restraint of trade, by the provisions of which individuals are liable to fines ranging from $200 to $4,000 or to two years' imprisonment, and corporations to a fine of from $1,000 to $10,000 if it be proven that they have conspired or combined to unduly enhance the price of some commodity. It is quite probable that any private individual might have proceedings instituted under this section through the county crown attorney of the county in which he dwelt, but the evil being widespread (granting for a moment the charges made) and the company a strong one, it is likely that any private individual would think twice before entering the lists even in this indirect way against the corporation.

THE JURISDICTION OF THE DOMINION

comes from Sec. 18 of the Customs Act of 1897, by which it is enacted that when the Governor-in-Council has reason to believe that a combine exists to unduly enhance the price of an article, a commission may issue to a judge to inquire in a summary way and report to the said Governor whether or no such trust does exist. If the judge finds the existence of the trust, the Governor-in-Council may then abolish the duty on the article in question, or so lower it as to admit of a satisfactory competition from the outside.

IN COMMUNICATION WITH THE GOVERNMENT.

It is said that one of the Northwest members is already in communication with the Government in order to obtain the appointment of the necessary commission, but the result of his negotiations is not yet known.

Those favoring the commission claim to be able to furnish overwhelmning proof of the existence of the combine, and they hope for the total abolition of the duty on dressed lumber. If this be granted they say they can buy dressed lumber in the States as cheaply as the undressed, as the dressing materially reduces bulk, and so saves freight equal to the price of dressing it—usually about $3 per thousand. This would certainly mean competition with a vengeance, and would no doubt remedy the existing evil. ZED.

FOREST CITY GOSSIP.

LONDON, April 22, 1903.

Office of HARDWARE AND METAL.

A WALK amongst the hardware merchants to-day, inquiring as to the conditions of trade, made it very clear that there was considerable activity. Wholesale firms say one after the other, Oh! We're very busy! We're hustling for all we're worth! And the appearance of things in the warehouses and shipping-rooms bears out these assertions.

* * *

Turpentine has been making quite a somersault here as elsewhere. In London 60 days ago, the dollar mark had been touched; at the present moment for immediate delivery turpentine can be bought at 81½c., and for May delivery at 76c.

* * *

All wholesale houses are looking for a heavy sorting season. There is every indication of a good building trade that will occupy all the summer months and extend into late fall, and merchants in the hardware business, both wholesale and retail, are feeling cheery on account of the good prospects.

An unusually great demand has taken place for wire fencing and nails, and the McClary Company report the manufacture of a much larger number of gas stoves than usual, ordered for this season.

* * *

Complaints are general about shovel manufacturers being slow in making deliveries. Some of the factories are unable to promise goods until July 1, and this is causing more or less inconvenience to the trade.

* * *

London hardware merchants claim that owing to the conservative system and slow methods of English cutlery and other manufacturers in filling orders, they are compelled to buy from Germany quite a number of lines, such as pocket-knives, scissors, pliers, etc. Orders for nearly all German articles are promptly executed; while for English cutlery and many other staple goods, orders are booked nine and twelve months before delivery. American and German makers appear to be more favored in London, Ontario, than British manufacturers are.

* * *

The Waggoner Ladder Co. have advanced nearly all their range of goods about 20 per cent. The demand is increasing for these goods, and heavy orders keep all hands fully employed.

* * *

A week ago the London City Council received an invitation to celebrate the opening of the London Rolling Mills, which have been recently completed and are now in operation. When in full running order nearly 200 men will be employed, and wages paid will approximate $3,000 every two weeks.

* * *

Business men of every class, religious denomination and stripe of politics, all express regret at the decease of Sir Oliver Mowat. Flags are all at half-mast.

* * *

The plumbing business has opened with a rush. Nearly every master here has contracts on hand that will keep him busy for a considerabfe time. All plumbing work completed in this city is of a good class and will pass the most critical inspection.

* * *

Germany's exclusion of Canada from most-favored nation treatment and Canada's imposition of surtax duties in retaliation is the source of some earnest conversation in London wholesale hardware circles at present.

The ONTARIO TACK CO.
Limited
HAMILTON, ONT.

MANITOBA MARKETS.

Winnipeg, April 20, 1903.

DEALERS report business very satisfactory, but freight still difficult to get in and out. Indeed, this complaint bids fair to be a perpetual one this season. Prices have not been changed during the week on any line, but new lists for malleable fittings and brass goods are promised in a few days, and it is expected these will show an advance of 20 per cent. There seems to be general satisfaction with the binder twine list, and retailers who had not previously ordered are doing so.

ENAMELOID

MAY 27 1903

A new enamel finish for inside walls, and ceilings and woodwork.

see cut Book 9 page 7

Dries with a high gloss that wears well and stands plenty of cleaning with soap and water.

An exceptionally good enamel for the purpose. A splendid thing to push at house-cleaning time. Is easily applied ; doesn't drag under the brush ; is very economical.

We do not know of another enamel finish at the price of **Enameloid** that gives such good results. Place it on your shelves this season and it will help you round out the paint business of your territory.

It carries with it many special advertising features.

Write us for our **Enameloid** proposition in detail. A postal card to-day.

NOTES.

W. J. Kernaghan, of Prince Albert, has sold out his hardware business to O. B. Manville.

A. B. Kent, of the Marshall Wells Hardware Co., has returned from Southern Manitoba, where he had been on a brief business trip. Mr. Kent reports farmers busily engaged in seeding operations.

W. T. Crispin, who had been manager for the Union Mining and Cement Co., has been apointed manager for the Winnipeg Paint and Glass Co., for which letters of incorporation were recently issued.

A. R. Fanning, of Newdale, has sold out his hardware business to Geo. Clark. Mr Fanning is a prominent townsman of Newdale, and has been largely instrumental in the success of the creamery at that point.

The Horseshoers' Association, of Winnipeg, met last week and made a general advance in prices for shoeing horses. The price for a set of new shoes was $1.60 and was advanced to $2; for removing the price was 50c. and will now be $1.

G. F. Stephens & Co., wholesale paints, glass and oils, Winnipeg, had their premises seriously damaged by fire on April 17. Their warehouse is situated on Market street east, with the paint factory erected last year in the rear. The fire broke out in the south end of the east half of the building, which, most fortunately, was divided from the west half by a good fire wall. The stock destroyed was mainly glass, brushes and mixed paints, and the loss is estimated at $15,000. This was well covered by insurance. It is a bad time of year for a fire, as the stock was heavy, in anticipation of the spring and summer trade. However, the company are still going on doing business, and the delay in filling orders for some lines will be only temporary.

TESTED AND TRUE.

Iver Johnson Revolvers

Gustav Persch, of San Antonio, Texas, says:

"I have tested your revolvers and found them true to the sight and workmanship. I shot at a silver dime at 30 feet and hit it seven out of ten times. Your revolvers stand ahead of other makes every time. I recommend it to all."

LEWIS BROS. CO.'S HOCKEY TEAM.

THE accompanying cut represents the officers and players of The Lewis Bros. & Co. hockey team. This club had the most successful season of its career during the past winter. The success was due greatly to the interest shown by every employe and to the substantial aid given by the firm. The team played 14 games, winning 11, tieing one and losing two. The aggregate number of points scored was 54 to their opponents' 14. The team was represented by players from Montreal, Kingston, Pembroke, Smith's Falls, Dunnville and Beaverton.

THE BICYCLE IN THE CITY.

"There is nothing so good for one whose daily life is confined to the city or town as a breath of good country air, and there is certainly no better way of getting it than on a bicycle", writes an enthusiast. "It brings all the shady lanes and green fields of the country within easy reach. Canada is particularly blessed with good roads, and it takes but a few minutes riding to get out of the heart of our cities into the pure air and joyous sunshine of the country. There would be fewer pale-cheeked, listless toilers seeking relaxation in crowded places if they could only once realize the joy of wheeling through the rural districts that are so near at hand to the owner of a bicycle."

MARITIME STOVE FOUNDERS.

The Maritime Stove Founders' Association held their annual meeting in St. John, N.B., last week, the attendance being rather under the average, largely owing to the busy season. The following officers were elected :

President—James Hillis, Halifax.
Vice-President—Frank Wilson, Yarmouth.
Sec.-Treasurer—W. S. Fisher, St. John.

A meeting will be called shortly to discuss matters of interest to the members of the association.

SEASONABLE LINES TO DISPLAY.

The merchant who is thoroughly alive loses no opportunity to legitimately increase his trade. And the merchant who is thoroughly alive does not try to sell steel skates in July. What would you think of a man who dressed his window with straw hats on the 1st of January? Goods that run hand in hand with the season they are shown in will never elope with a man's profits. Those who have, for instance, Nerlich & Co.'s catalogue will find lines listed therein that are quite in keeping with the season. Sporting goods, children's wagons, toy garden sets and numerous other lines are shown (illustrated by clear, correct cuts) that would prove profitable to the trade.

Such lines are particularly seasonable during the next month or so, and displays of them should materially aid the hardwareman in making this line as profitable as any line in his store to-day.

MACHINERY

THE BICYCLE IN THE ORIENT.

THE bicycle trade seems to have taken new lease of life, and, notwithstanding the diffidence with which hardwaremen look upon all things that pertain to wheeling, the few who retained the bicycle as a part of their stock, and sighed for better times, are reaping their reward, while new markets are being daily opened to the wheel maker.

The time was when almost every store was also a cycle emporium. The world went very well then for the cycle dealer, whether he were a hardwareman or a piano man or a butcher. But the immediate and painful result of the tremendous boom following Dr. Dunlop's invention of the pneumatic tire, was a revealing to the dealer in the common or garden type of his own shortcomings in matters mechanical, and the latter state of that man was worse than the first.

Now, however, the trade has really begun to take the bicycle seriously, as a power that must be dealt with; as a topic upon which it is profoundly culpable to be ignorant.

Slowly, steadily, this resurrection of the wheeling Phœnix from the ashes of a conflagration, fed by over-capitalized stock companies, is making itself manifest, and the expansion of the cycle trade is not confined to one country or to one continent. The "open door" of the Celestial Empire has admitted freely the mystic chariot, and the use of bicycles by the Chinese is steadily increasing, and the possibilities of the market are limited only by the abilities of the Chinaman to purchase.

Canadian-built wheels are well suited to the Oriental trade. In North China men travel extensively, and they would make greater use of the bicycle if it were brought within their means. The roads are rather rough, and a substantial vehicle is required to negotiate them. The Chinaman is not a great mechanic and has little ingenuity, and wheels for his use should not be delicate nor should they make great demands on the repair shop. Ladies' wheels are more in favor with "John," on account of his prodigality in the matter of dress.

Lightness might be sacrificed to strength, durability and cheapness, and these three latter features are the "summum bonum" of the successful machine for China. A Chinaman will sit all day on horseback or in a cart, in a position compared with which riding the rail is a luxury to a foreigner. Folks in China do not pay for luxury.

The following suggestions by an experienced bicycle rider in China, taken from the report of Henry B. Miller, United States Consul at Neuchwang, are worth careful study by the manufacturers:

"The modern bicycle has three great disadvantages on Chinese roads, at least in the north: (1) The pneumatic tire is subject to puncture and is hard to repair; (2) the pedals are hung too low and strike obstacles, such as stones and rough ground; (3) the chain gets full of grit, and is annoying in many ways.

The last item is eliminated in the chainless wheels, but this excellent device is as yet rarely met with in China. The chainless wheel is a great advance, and with the cushion frame could be ridden comfortably with solid tires; but its excessively low pedals make it an impracticable mount for rough roads. Some German wheels have the advantage of higher pedals. What is needed for China is embodied in the following specification, and the manufacturer who is bold enough to turn out a strong and plain bicycle along these lines will sell it by the thousand:

1. Chainless, dust-proof gearing. If chain be preferrable, protect against dust.
2. Pedals clearing the ground by at least 6 inches.
3. Cushion frame, with compensating device to equalize pedal reach.
4. Solid or other non-puncturable tires.
5. Extra thick spokes, with strong threads.

Let such a bicycle have the following accessories included in the price: Necessary tools for all nuts and screws, bell, frame, luggage carrier, bar bundle carrier, and brake of simple construction.

Steel rims are liable to rust, and wood rims may warp from excessive moisture. Either kind will answer, though copper escapes danger.

Avoid unnecessary fancy work and nickel plating to reduce cost. Luggage carriers are essential to the traveller in China, for he must carry his blanket and a few extra articles of clothing.

Several years ago, during the time that the short lived cushion tire was in vogue, a number of wheels of the "Whippet" spring-frame pattern, were shipped to China and Japan, and many of them are still in active service. Japanese roads are somewhat better than the Chinese highways, and many of the most modern wheels find favor in the eyes of our allies of the Flowery Land.

A bicycle designed especially for the use of the Chinese, with cheapness as a leading feature and the above suggestions followed, would have a good and growing market for years to come.

It is interesting to note in this connection that The Canada Cycle and Motor Co. are sending a large number of wheels to Japan and China, and other Canadian firms are also looking to an early development of their Oriental trade.

CHAIN-MAKING MACHINE.

MANY attempts have been made to introduce a machine for making chains, and one of the latest products of mechanical genius is the Spuhl chain-making machine, in which the rod is made into links, and the links are welded together with great accurary and rapidity, says an exchange. The process is completed in two machines, the first of which takes the iron rod, straightens, and anneals it, and while still hot from the annealing furnace bends it into the desired form to make a link.

One of these machines will supply several welding machines, which are more complicated, and work more slowly than the link-bending machine. The ends of the bent-up links are raised to a welding heat in a special furnace, in which a number can be treated at one time, and in turn are passed by a boy to the welding machine. The hot link is placed in the welding die under the hammer, and as the workman operates the treadle two dies seen at the side of the machine creep round the link, holding it firmly except at the ends, where the welded joint is to be made. The hammer now descends twice, giving two blows on the link, and automatically the machine stops. The link is then reversed by the workman, and receives two more blows, which completes it. The next link is now ready to be placed in the die, and the whole process goes on with great rapidity. All sizes of chains can be made with equal facility with these machines, which are of several sizes made to suit the requirements of the manufacturer. It is stated that a No. 3 machine can turn out 3,600 tons of chain made from 1-in. bar in a year. These chains have been rigorously tested, and are being extensively used by the chainmakers of England.

ELECTRIC HEATING DEVICES.

THE chief objections urged against the use of electricity for heating purposes are—unreliability and expense. It would appear from a recent departure in the construction of electric heating appliances, that these drawbacks exist no longer.

The British Prometheus Co., Limited, 18 London Road, Kingston-on-Thames, Eng., have perfected a system whereby the intervention of a wire of high resistance in the electric circuit is supplanted by a series of resistance strips or heating surfaces. These strips consist of a thin mica sheet on which a metallic film is deposited, and a very thin metal case in which the sheet is fixed. The emissive surface is very large, so that only a moderate temperature is required to dissipate a large amount of power, and thus the durability of the strips is much greater than that of a wire coil system at a very high temperature.

Hot water jugs, coffee machines, etc., are now fitted with these ring elements, in which perfect mechanical contact between the elements and the vessel is obtained by means of screws adjusted after the element has been secured in position. The appended illustrations of a radiator and a Vienna coffee machine are reproduced from a descriptive pamphlet issued by the firm.

Hardwaremen who live in towns, having a good electric service, will do well to communicate with The Promethens Company.

MACHINERY NOTES.

Windsor Mills, Que., will install a municipal electric plant.

Leitch & Adamson will erect a new mill in Weyborn, Ont., and may install an electric plant.

D. Fraser & Co., Woodstock, N.B., are installing new machinery in their mill and are overhauling their boiler.

C. J. Johnson, Saskatchewan, N.W.T., has decided to start a new brick yard, and will buy machinery for it in Ontario.

J. W. Cumming, New Glasgow, N. S., is completing arrangements to start manufacturing boring machines, etc., at that place.

A 3 x 5 marine engine and two Petrie boilers were purchased from H. W. Petrie, Toronto, by the Laurie Engine Co., Montreal.

The Winnipeg, Selkirk & Lake Winnipeg Electric Railway Co., Winnipeg, propose to build a road from Winnipeg to Selkirk, commencing work soon.

The Gurney Foundry Co. have added to their plant a 23-in. Barnes back-geared drill. This machine was installed by H. W. Petrie, Toronto.

The Canadian Bridge Works have been unable to settle the strike of their employes, and President McNath is now looking for new machinists.

Montreal foundry and machine shop helpers have formed a union and are asking for an advance of 3c. an hour for a ten hour day and for arbitration in case of disputes.

The production of pig iron in the United States, according to Iron Age, was at the rate of 376,576 gross tons per week during April. Yet stocks are well cleaned up.

The Eastern National Copper Co., of Halifax, are extending their business and are opening an office on State street, Boston. Day and night shifts are now at work on their mine.

Two fine tools in the shape of an 80-lb. Scranton power hammer and a 21-in. x 8 ft. Crosby lathe were purchased by the Canadian General Electric Co., Peterboro', from H. W. Petrie.

The Deseronto, Ont., Car Works have an order for four special derrick cars for the Dominion Bridge Company, of Montreal. These cars are to be 54 ft. long and to have a capacity of 80,000 lb. each.

A 4-h. p. Haggas gasoline engine has been shipped to James Foster, Guelph, Ont., by H. W. Petrie, Toronto. There is hardly any service that these engines cannot perform. This machine is to be used for the purpose of well drilling.

S. P. Benjamin's sawmill in King's County, N.S., was destroyed by fire last week. As it was insured for $14,000, and as there is a full supply of logs in the adjacent mill pond, this mill will probably rebuild and re-equip with machinery.

The contract for the boiler equipment of the new East End shops for the Canadian Pacific Railway has been awarded to the Babcock & Wilcox Company, Limited. The contract amounts to more than $75,000, and includes boilers, superheaters, pumps, patent shaking grates, feed pipes and economizers.

The Baden, Ont., foundry plant was sold by sheriff's sale on Saturday. John Lewis, of Berlin, bought the machinery and scrap iron for $1,700; I. E. Shantz & Co. purchased a planer, and Mr. Hood, of Buffalo, secured the pig iron.

The foundries of Ottawa are doing very little business at the present and very few of them are running full time. Some of them are practically shut down altogether and only open when a big order is received. "Nothing doing," explained one of the foundrymen this morning.—Ottawa Citizen.

Bagster R. Seabrook, who has held the position of manager of the Albion Iron Works, Vancouver, was presented last week with an illuminated address, the gift of the employes of the company. The occasion was Mr. Seabrook's secession from the company:s employ, to embark in business as a manufacturers' agent, with an agency in Victoria and another in Vancouver.

The Crofton smelter, at Osborne Bay, Vancouver Island, B.C., which was blown in several days ago, handles 200 tons of ore per day in the furnace started. Two more furnaces are to be blown in shortly, which will give a total capacity of 700 tons of ore per day. It is expected that this smelter will be kept going at full capacity as long as the present high price rules in the copper market.

NOW HAVE A BRANCH IN WINNIPEG.

The Fairbanks Company have opened up a branch of their Montreal house in Winnipeg. They are now having erected a six-storey warehouse which will have a front of 51 ft., and will be 100 ft. deep, extending from Prince and Arthur streets, and fronting on both of these streets. The site is in the heart of the Winnipeg business district and will afford their customers' great convenience in doing business with them.

The branch will be in charge of F. Ross Newman, formerly with the Fairbanks Company, Montreal, and previous to that, purchasing agent of the Laurentide Pulp Co. E. R. Whitehead will be cashier; J. J. Jessup will look after the gas and gasoline engine department. John Aiken also goes from Montreal to look after the shipping department. Until this warehouse is constructed the Fairbanks Company have temporary quarters, which will enable them to look after this season's business. Henry J. Fuller, general manager for the Fairbanks Company, for Canada, has just returned from completing arrangements in Winnipeg, and is very enthusiastic about the prospects of the Northwest, and especially those of the company with which he is associated.

The Fairbanks scales have been used for many years in the grain elevators in the Northwest, and the increasing volume of business made it absolutely necessary that a stock should be kept in Winnipeg. With this, their leading line, the usual lines carried by the Fairbanks Company will also be handled in Winnipeg, including Fairbanks valves, gas and gasoline engines and a full line of steamfitters' and plumbers' supplies.

The Vancouver branch of the company, which was started only about a year ago, is meeting with great success, and with the three warehouses in full operation the Fairbanks Company will be in a position to meet the requirements of their customers to better advantage than any other mill and machinery supply house in Canada.

REMOVED TO LARGER PREMISES.

The Dominion Motor and Machine Co., of 60 Esplanade street, Toronto, are moving to more commodious premises at 231 King street east. The special line of this company is gasoline engines, and they are crowded out with orders. Thirty-five small marine gasoline engines will be delivered in a few days to the Canada Launch Co.

This summer the firm will place on the market a new coal-oil engine, which is sure to find a ready sale among the farmers. The fuel is ordinary coal oil, and it is worthy of note that the temperature of the oil remains normal until it is actually in the cylinder. Vaporization is effected at first by a hot plate, and after the engine has been set in motion, this vaporization and firing is effected by compression, as in the new Diesel engine that caused so much comment in Europe a few months back.

REMOVING THE NORTHEY CO'S. PLANT.

The plant of The Northey Manufacturing Company, makers of steam and gasoline engines, etc., Toronto, is being removed to the works of The Canada Foundry Company, Toronto Junction. It will be remembered that The Northey Company sold out to The Canada Foundry Company, Limited, some weeks ago, and it will thus be seen that the purchasers have decided to place both concerns under one roof.

DEPARTMENT OF ADVERTISING SUGGESTION AND CRITICISM

Edited by **W. Arthur Lydiatt,** TORONTO.

NOTE.—Herein are discussed the principles and practice of advertising. Subscribers are invited to send Mr. Lydiatt specimens of their newspaper and other advertising, for the purpose of review in this department. Address care of Department of Advertising, HARDWARE AND METAL.

I HAVE never been to Parkhill, Ont.,—don't know the exact location of the place—but quite recently I have had occasion to think it must be a pretty lively place—in the hardware business, at any rate.

I read in HARDWARE AND METAL a couple of weeks ago about one progressive hardware firm in that place, and must admit that I was a little surprised to learn that such progressive advertising methods were adopted in a comparatively small place like Parkhill. But when I received the large advertisement which is reproduced this week, I began to enquire where this "Parkhill" was situated and what kind of a town it was.

Where is the ad. that cannot be? But this ad. is so much out of the ordinary—so much better than the ordinary hardware ad. we see—that it is worthy of special mention.

Who can read this ad. and then say that hardware advertising cannot be made interesting? Every section of it makes a direct and appealing bid for trade—just the kind of a bid that brings people to the store in an enquiring mood.

There are no extravagant claims—no wonderful bargains proclaimed. Just good earnest talk—the kind that makes people wonder if they don't want some of the things advertised.

Notice particularly the paragraph about

MAGLADERY BROS.

To Our Customers :

We thank you very sincerely for your patronage during the past season, and hope that our dealings with you have been so satisfactory that you will again favor us with your trade. We are proud of the business we have done, but not satisfied. We want more. If honorable dealing, strict attention to our customer's needs and selling good articles at low prices will do it, we will get more. From those who have not dealt with us we deserve at least their best wishes, as hardware has never before been sold as cheaply, and it don't take much of a guesser to guess why.

To all we wish a prosperous season, and if you keep this advt. under your hat it will help you to have it.

Yours very truly,

MAGLADERY BROS.

The Right Paint To Paint Right IS RAMSAY'S.

EVERY CAN IS GUARANTEED

We sold a lot of this Paint two years ago. Last year we doubled our sales. This year we will sell more than the two years put together. Why, because it

Looks Well, Lasts Well, Covers Well,

We have a large stock on hand of all colors and every can is guaranteed. If it is not exactly as represented we will replace it or give you your money back. That's fair, isn't it? Remember that, when you are thinking about buying paint.

A Few Prices.

Royal Canadian Wringers, guaranteed rolls	2.50
Family Weigh Scales, capacity 24 lbs	2.50
Charcoal Iron	1.25
Poultry Netting, 24 inches wide, per yard	3c
Poultry Netting, 60 in. wide, per yd.	8c
Manure Forks, four tang	60c

Have You Seen the New Fence ?

It is the heaviest on the market. Every wire is No. 9, and the price not high. We would like to have you see it.

MASSEY-HARRIS BICYCLES FITTED WITH COLUMBIA TOP TIRES

is a combination that is hard to beat. If you want other kinds we have them—Cleveland, Quadrant, Premier, Grendon, etc. These are all well known wheels and we can supply you with any of them

Are You Going to Get a New Stove This Spring?

The SOUVENIR has features that puts it ahead of all others. It is the only stove that has the AERATED OVEN, and no other stove maker will give as long a guarantee as its maker. We always have them on hand.

BERT SMITH is still in charge of our tinshop, and is always on hand to pass you a kind smile when you bring him your repairing. How many eavestroughing do you think he put up last year? A trifle over 2½ miles. That sounds big, doesn't it? But he did it. Do you know why? Just because we supplied him with the best material that can be bought (Queen's Head Iron) and he never leaves a job until the customer is satisfied, and he is satisfied himself. He has been twenty years at the business, and ought to be on to his job by this time. Try him and see.

MAGLADERY BROS.

This ad. of Magladery Bros. is about the most interesting retail hardware advertisement I have ever had the pleasure of reading. True, it might be improved. "Bert Smith." I have no doubt there are lots of tinsmiths in this country just about as good at putting up eavetroughing as "Bert Smith" is. There may be a couple of them in Parkhill. But don't you think you would want to give "Bert" a trial after reading this paragraph? I think I would.

Upon receipt of this advertisement I wrote and asked Magladery Bros. for some particulars about their methods—a little history of their business. But I guess they are too busy just now. I hope they will at some future date, for I am sure their story would prove interesting to other HARDWARE AND METAL readers.

This ad. might be improved by a rearrangement of the matter. I would have combined the talk "To Our Customers" and the little story about "Bert Smith" and continued it down the left-hand side as a sort of editorial. The other paragraphs would then have fitted in very nicely underneath each other on the right hand side. My idea is illustrated by the sketch herewith :

Magladery Bros.

To our Customers :

The Right Paint to Paint Right, etc.

Have you seen the new Fence?

Massey-Harris Bicycles.

Bert Smith, etc.

Are you going to get a new Stove this Spring, etc.

A Few Prices, etc.

Magladery Bros.

PARKHILL, ONT.

I would also have included the address. Parkhill is not a very large place, and no doubt Magladery's is large enough, so that you wouldn't be in the town long before you knew where their store was situated. But, nevertheless, I think it just as well to include the street address, or "Parkhill, Ont.", at any rate.

I have another ad. of Magladery Bros., which is not quite so good, yet withal, quite above the ordinary. If I have room I may reproduce it next week.

In sending in these ads. they take occasion to remark : "We are very pleased that you are starting a page of this kind, as no doubt it will be a great help to those who are interested in advertising. We take a great deal of interest in your page as well as the rest of HARDWARE AND METAL.

The "TIP-TOP" Shoe Holder

Patented in Canada, Great Britain and United States.

The best idea yet, so simple too, why didn't some one else think of it before?

Patented and designed by a Canadian.

Will hold any style or shape of boot or shoe tightly stretched for cleaning. Can be used for Men's, Ladies' or Children's Boots. The three piece last is what does it. If you haven't a set yet, order one with next goods from your jobber, put it up in the store where your customers can see it, and it will start right off to make money for you. It sells itself.

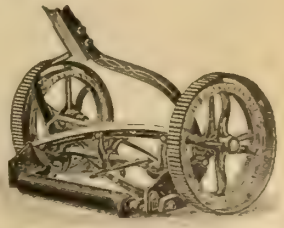
Steel Frame Churn.

DAVID MAXWELL & SONS,

ST. MARYS, ONT., CANADA.

"Maxwell Favorite Churn"

Patented Features: Improved Steel Stand, Roller Bearings, and Foot and Hand Lever Drive, and Detachable Driving Link. Improved for season of 1903. Steel or Wood Frame as desired.



LAWN MOWERS.

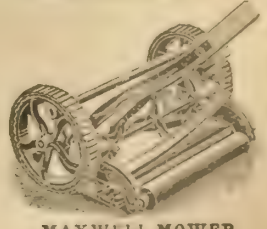
High and Low Wheels, from 12-in. to 20-in. widths. Cold Rolled Steel Shafting, Crucible Steel Knives and Cutting Plate.

If your Wholesale House does not offer you these articles

SEND DIRECT TO US.

"THE MAXWELL" LawnMower. High Wheel 10 inches.

Wheelbarrows. In four different sizes.



MAXWELL MOWER. Stitch Low Wheel

Oil Stoves. Ice Cream Freezers. Refrigerators.

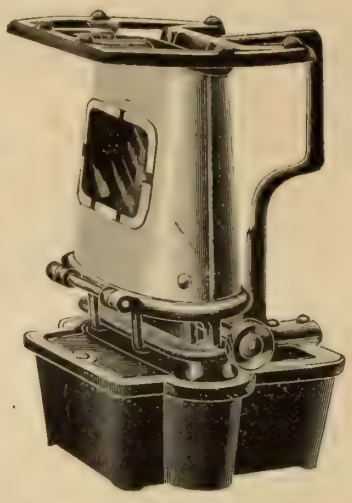
We have heavy stocks in all these goods and can make prompt shipment.

(Without Extension Top)

"Summer Queen"

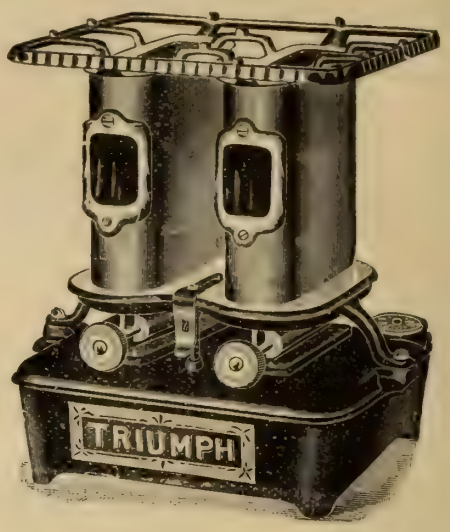
We guarantee this stove to work as well as any oil stove of its size made.

Has two burners and can be fitted with Oven, Extension Top, Sad Iron Heater, and Broiler.



"Golden Star"

Cast-iron oil tank, 4-inch brass burner, bright tin cylinder with mica illumination, all cast-iron parts japanned.



"Triumph"

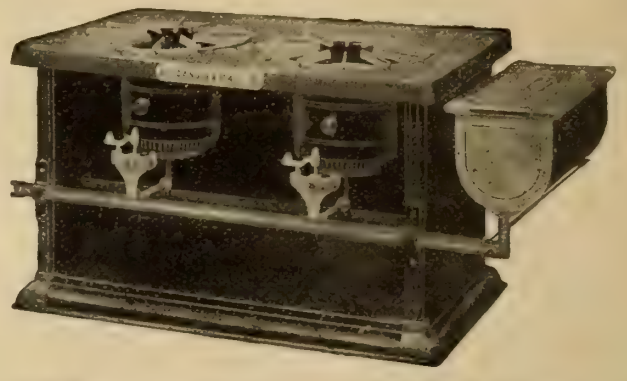
Made in two sizes—2 and 3 burners. Has cast-iron oil tanks, 4-inch brass burners, bright tin cylinder with mica illumination. All cast-iron parts nicely japanned. As easy to operate as an ordinary lamp.

"MODEL" Refrigerator

Our own make.

"LEONARD CLEANABLE" Refrigerator—Zinc and genuine porcelain lining.

Order these goods early and be prepared for the first rush of business.



"Dangler" Wickless Oil Cooking Stove

Heavy Brass Burners.
Brass Outer Tank.
Inner Tank Removable.
Full Cabinet Frame.
All Sizes and Styles.

DEAR COD LIVER OIL.

IN our market reports last week we called attention to the scarcity of cod liver oil; to the fact that the Norwegian article was almost impossible to get at any price and that the Newfoundland cod liver oil, on which Canadian importers are now depending for their supplies, has advanced to about $2.40 per gallon in wood. The Newfoundland market is quite firm in sympathy with the situation in Norway. The market price of Norwegian cod liver oil is now about four times as high as is usually the case at this season of the year, and the end may not be yet.

Norwegian cod liver oil has advanced from about $25 per barrel to $110 per barrel on this market in a very limited space of time; and in New York since January, 1902, the price has advanced from $21.50 to $125 per barrel.

The general belief that this has all been due to the small catch of Norway cod is not entirely correct. While the cod fishing was not as successful as in former years, it was by no means so great a failure as ot warrant the advances in prices that have been made. The trouble, however, is that the production of oil from the fish was much less than usual, the livers being "leaner" — so lean that about 50,000 fish were required to produce one barrel of oil. The fishing season ends about the end of March each year. Taking this as the end of the season, it is shown that in the year 1897 the catch was 20,400,000 fish, yielding 14,200 hectolitres of oil (hectolitre = 22 gal. imp.); in 1898 the catch was 10,800,000 fish, yielding 8,200 hectolitres; 1899, 11,500,000 fish, 14,200 hectolitres; 1900, 6,500,000 fish, 8,000 hectolitres; 1901, 9,600,000 fish, 12,000 hectolitres; 1902, 10,800,000 fish, 7,500 hectolitres, and in 1903 the catch has been 4,000,000 fish, yielding 252 hectolitres of oil. By these figures it will be seen that the annual catch is much below that of a few years ago, and also that the yield of oil is less per fish than formerly.

THE ADVANCE IN WHEELBARROWS.

WHEELBARROWS of all sorts may be dearer later on in the season. Manufacturers have notified the jobbing trade that an advance of from $2 to $3 per doz. has been made, and give as the reason for the higher prices the advanced cost of lumber and other materials used in the manufacture of wheelbarrows, as well as the increased rate of wages.

While it cannot be said that there is any scarcity of wheelbarrows, jobbers have nevertheless found it difficult to get orders filled promptly by the manufacturers, some of whom are now considerably behind in their orders. The manufacturers, in their turn, place the responsibility for the delay on the iron and steel manufacturers, from whom it is almost impossible to obtain sufficient supplies of bolts, etc., to keep their wheelbarrow factories going.

Stocks now in jobbing hands are fairly large, and in a few cases may be sufficient to last through the season, but with many houses it will be necessary to place further orders under the advanced prices, which will mean, of course, a higher price to the retailer for these goods, though, as a matter of fact, a fairly large margin is allowed on the price of wheelbarrows by wholesalers, and an advance corresponding to that made by the manufacturers is not anticipated. On present stocks there is as yet no talk of advancing prices.

THE PASSING OF A GREAT MAN.

It is not Ontario alone that mourns Sir Oliver Mowat. Every province drops a tear on his bier. He was one of the greatest of her sons, and even though his years ran beyond man's allotted span his passing away cannot but be regretted.

He helped to bring the Dominion into existence, and no man was more zealous for her future development and for her national eminence.

Sir Oliver was not without his political sins; and because of the strong moral fibre that so characterized him his lapses therefrom politically were looked upon with less charity than were similar offences of other politicians.

But the ideal politician this or any other country has not yet produced. At any rate few of his contemporaries stood on the same moral plane politically, and certainly none stood on a higher one. And no man in Canadian politics ever approximated so closely as he to the late William Ewart Gladstone.

BRITISH IRON AND STEEL EXPORTS.

A report on Britain's foreign trade for the first three months of this year in iron and steel has been issued by the Board of Trade Returns.

British merchants may well be satisfied with the returns. The imports during the three months show an increase of £924,000 over the same time last year and £1,197,000 over the year before. The exports make an equally good showing, being, as they are, nearly £5,000,000 more than they were for the first quarter of last year and nearly £2,000,000 more than in 1901.

It will be interesting to watch the trend of the British export trade in iron and steel during the second three months of the year, and particularly during the subsequent periods in the year, as the lower prices now ruling in the United States market will naturally tend to reduce their purchases in Great Britain.

Notwithstanding the fact that Canadian manufacturers advanced the price of paris green 3c. per lb. a fortnight ago, several Toronto jobbers are still selling at the old figures.

THE SURTAX AND THE HARDWARE TRADE.

IT IS to be regretted exceedingly that a tariff war between Canada and the German Empire appears to be inevitable, for tariff warfare like physical warfare is certain to cause injury to both combatants, but in the one, as in the other, warfare is as a rule waged in an effort to bring about a better state of affairs when all other means of securing the desideratum have failed. And in reading over the correspondence which was laid before the Dominion Parliament the other day it is evident that the Canadian Government, before deciding to impose a surtax against the products of the German fatherland, had for four years up to nearly the close of 1902 made every effort to induce, by means of diplomacy, the German Government to relax its discrimination against the products of this country.

As we have said in previous issues, the position that Germany has taken in regard to Canada is decidedly unjust. When Canada induced the British Government to abrogate the Anglo-German Treaty of 1865, which was negotiated and ratified before the Dominion had an existence, it was merely with a view to being allowed to grant the products of Great Britain and her colonies preferential tariff treatment. In other words, to make an arrangement of a purely internal and domestic character. It was at this purely internal and domestic arrangement that Germany took umbrage. The discrimination which followed this umbrage was made notwithstanding that no such action was or has been taken against the French colonies, which give the metropolitan country a preference under their tariff.

In a letter which came through the British authorities from the German foreign office at Berlin it was pointed out Canada had deprived Germany of a valuable right. Naturally, Germany was desirous of the privileges being continued which had accrued to her under the treaty of 1865, but in which Canada had no voice. At the same time, however, the results do not appear to have been in any way injurious to the export trade of Germany with Canada. Her export trade to Canada last year was the largest on record, amounting to about $10,800,000, while our exports to Germany were only a little over $2,600,000.

As we have pointed out, both countries are likely to suffer somewhat from tariff war, but it is evident that Germany stands to lose the most thereby. At the same time, however, it is to be hoped the present unpleasant relations between the two countries will only be of a temporary character, and that Germany will finally see the injustice of the position which she has taken.

Few branches of trade are more interested in the surtax than those appertaining to hardware and metals, and particularly so in view of the fact that our imports from Germany in those lines have very much increased of late years. Last year the total imports of metals, and manufactures of, aggregated over $2,000,000 against $369,000 five years ago. Even in 1901 the value of our imports under this general classification was less than $400,000 worth. As will be noticed by the interview in another part of this issue, it is anticipated that the surtax will be particularly felt by the import trade in heavy goods, as the relative cost of labor is small in Germany compared with the other costs entering into the production of the manufactured article. A few of the principal articles appertaining to the hardware and allied trades which were imported from Germany last year were as follows :

Cutlery of all kinds	$141,472
Iron or steel ingots, billets, puddled bars, etc	157,558
Iron or steel sheets	5 174
Machinery	31,464
Rolled iron or steel angles, tees, beams, etc , of all kinds	139 344
Steel rails	386,024
Tubing	43 359
Wire	28 131
Tools and implements	19 949
Guns, rifles and other firearms	8,735
Enamelled ware	13,711
Skates	41,858
Springs, axles, etc., for railways	19 138
Paints and colors	9 794
Brass manufactures	16,141
Locomotives and car wheel tires in the rough	45 458
Tin, manufactures of	12 955
Brooms and brushes	32,484
Glue	56,877

As a rule, Canadians, while realizing the unpleasantness of tariff warfare, are thoroughly in accord with the action of the Government. At the same time business men who had ordered goods in Germany some time ago, which could not be delivered for some months, are naturally perturbed over the fact that these goods must pass the Customs before June 30 in order to escape the surtax. It is to be hoped that if the Government can at all do so, it will further extend the time for importing goods ordered prior to April 16. To cancel orders to avoid paying the surtax would be like jumping from the frying-pan into the fire, for it must be remembered that many of the importers have already sold goods for which import orders were taken some time ago.

It is worthy of note that incidentally the Canadian manufacturers, who were complaining against the competition of German goods, have secured indirectly the increased protection which directly the Government refused to grant them.

AN ECONOMICAL ASSIGNEE.

It is very seldom that an estate pays such a substantial per cent. as the Spring estate in Rossland, B.C., has done.

The assignment was made to Sheriff Robinson on May 14, 1902, with liabilities of $9,741.96. In spite of the quietness prevailing in all lines of business since then, Mr. Robinson has very recently succeeded in making a distribution which paid 92c. on the dollar.

This establishes a new record in British Columbia, and says much for the ability of Mr. Robinson in the performance of his duties and his excellent management of this special estate.

THE TURPENTINE SITUATION.

At this time last week the opinion was freely expressed that the turpentine market had steadied lower, that the drop from 65 to 49½c. at Savannah had covered the probable decline. But the week has shown these views to have been erroneous, for prices have continued to drop, until now 47½c. is the ruling quotation at the primary market, and the reports indicate a weak tone at that figure.

An interesting, and possibly effective, phase of the situation is the work done by the U. S. Forestry Department in reforesting the vast pine areas of the Southern States, which have been despoiled by wasteful turpentine gathering. In parts of South Carolina the turpentine industry that everyone thought was on its last legs, is looming up again. In Texas new areas are being opened up. The consequence of the high prices prevailing has been a large increase of interest in the industry and probably a remarkable expansion of the output for the season.

Meanwhile, prices have been locally reduced to 77c., a reduction of 15c., and are likely to come down still further in the course of the next few days.

THE BARR COLONY.

PERHAPS never in the history of the West has there been a more epoch-marking week than the one just closed. Four train loads of the Barr colonists passed through the city on their way to their destination on the Saskatchewan, and as we write are under canvass at the little town of Saskatoon, on the Prince Albert branch of the C.P.R. that first became known to fame during the Rebellion of 1885. Equal numbers of immigrants have arrived in one day before; in fact, there have been days in the history of the West when double that number arrived and departed, but this was the first extensive organized movement to bring to the West a desirable class of settlers from the British Isles. The proposed colony has been talked of and written about for weeks, and Winnipegers were on the qui vive to size the colonists up. They have come and gone, but the end is not yet; in fact, we are hardly well at the beginning.

It has been said over and over again that the success of this colony would depend entirely on the class of settlers who were brought out, and here and now it may be said that physically and intellectually, the Barr colonists rank A No. 1 in the history of Western immigration. Strong, vigorous, eager, were the words suggested by a first sight of them. A very large percentage of them were the class that Canada and the West wants. Young farmers, and farmers and their wives and families. Another per centage were young men not accustomed to farm work, but willing to go among farmers and learn, and the remaining proportion (and there were more of them than there should have been) had very vague ideas as to what they wanted to do, and even by the time they reached Winnipeg were moving into grumbling alley. A very searching inquiry left no doubt that the steamer accommodation had been very bad indeed, but the very large majority expressed themselves as highly pleased with the train journey. As to the colony scheme all old Westerners are dubious. The land on which these people are to settle is just 157 miles from a railroad, and not only will they have to be transported over that long and toilsome journey, but everything they need for 18 months, at least, will have to be taken in the same way, with the exception of some lumber which can be floated down the Saskatchewan river. The colony reserve is about 60 miles long and 40 wide, and these people are to be allowed to take up land in any portion of it they fancy. Two thousand settlers sounds big, but it will be a handful in a section of country like that. All their stores and houses have to be built this summer, and the majority know absolutely nothing about undertaking work of any kind in a new country. The builder who is an adept at his trade in England may easily prove a failure when the nearest point at which he can buy a nail or get a tool is 70 miles away. The English farmer, with the best of intentions, may make grievious blunders in the totally unfamiliar conditions by which he will be surrounded. Everyone in the West feels that this colony, to have the best possible chance of success, should have been settled on a line of railway and, still better, in the immediate neighborhood of Canadian farmers familiar with the country, or some of the new American settlers, who are already accustomed to farming under similar conditions. Mr. Barr has made the statement to the press that he does not want his colony contaminated with Americans, but unless all signs fail, there will come a time when the same colonists will be more than glad of a little admixture of American and Canadian ingenuity to help them over the hard places. Of course, the Immigration Department have made, and are making, almost superhuman efforts to assist these people, and should the colony fail it will be through no fault of theirs, but it is quite certain that if it does not fail it will be because of Government instruction and help and in spite of singularly unfavorable conditions.

The large percentage of the colonists will not fail, because they are clear grit, but if the colony succeeds as a colony, it will not be thanks to its founder, but to the perseverance of the individual settler and the fostering care of the Immigration Department. That there will be a percentage of failures there is no doubt; there has never been any very large undertaking without them, and when, in the West, we read that a Manchester dressmaker has come out to do dairy farming in Saskatchewan, it does not require a prophet to tell what the end will be. Practically in the same class is the younger son of the county family, who, having stated to the Immigration Department his desire to learn farming was sent to a farm not 60 miles from Winnipeg, where pure-bred stock was kept, and left on the second day because, as he expressed it, with many adjectives, he had not come from the Old Country to be valet to a bull.

The actual vagueness of many of the people who come out, not only as to conditions, but as to the bare geography of the country, can only be grasped by talking to them. One woman asked, "Is Winnipeg in Canada or the United States?" Another remarked, on getting off the train, "Don't see many Yankees about," and on being questioned, said, "I thought they were all Yankees at Winnipeg." After all that has been said and written about Canada such absolute ignorance on the part of ordinarily intelligent people is simply appalling. It gives those who have to deal with them a feeling of utter helplessness.

That these people should succeed as a colony or as individuals is a matter of supreme importance, because it spells success or failure in the inducing of other immigrants of desirable class to come. A good deal is said about the Rev. Barr having promised these people too much, and he may have done so, but when you find people who have reached mature age putting a wholly erroneous construction on the most plain and simple statement of facts in the Government pamphlets you cannot help wondering whether those who complain of being misled may not have misled themselves. There will be more to be said about this movement as time goes on.

GREAT BRITAIN'S COAL SUPPLY.

According to an English expert, the supply of coal yet remaining to be mined in the United Kingdom amounts to 80,684,000,000 tons, which, at the present rate of mining, would last 370 years. The same authority gives the total output of the world in 1900 as 767,636,204 tons, of which Great Britain produced 229,000,000 tons, or 30 per cent., and the United States, 245,000,000 tons, leaving a balance of about 35 per cent. for the rest of the world.

OLD EMPLOYES IN HORSE NAIL MAKING.

The Canada Horse Nail Co. of Montreal have among their employes in their forging department, where the first process (the forging of the blanks) in the manufacture of the old reliable "C" brand horse nails is conducted, eight workmen who have been in their employ for 25 years and over; of this number two have been over 35 years, three over 30 years, and three over 25 years, with the Company or their predecessors in the same business. To put it in another way, these eight workmen have rendered equal to the services of one man for over 235 years! In other departments long service is also characteristic of the company's employes.

This feature speaks volumes for the good relations existing between employer and employes, and serves also to explain in some degree why the "C" brand horse nails have maintained the high standard of excellence for so many years, in the opinion of the hardware trade and those who use them.

Markets and Market Notes

QUEBEC MARKETS.

Montreal, April 23, 1903.

HARDWARE.

THERE has been a satisfactory volume of business during the week, though the volume is naturally less than it was last week, as the first rush, consequent upon the reduction in freight, which went into effect on April 15, has been satisfied. As a result, the bulk of the large orders have been disposed of, and new orders now coming to hand are mainly of a sorting character. There have been several changes in various sundry lines. Wooden clothes-pins are 10c. per box higher. Jenkins' "Genuine," and also "Canadian" valves are 10 per cent. higher. There has been a rise also in all small malleable fittings of 10 to 20 per cent. New Irwin augur bits are now 33 1-3 off the list. Snider shot cartridges are 5 per cent. higher, and sporting and blasting powder are 7½ to 10 per cent. higher. It is too early yet to judge the exact effect of the tariff changes upon German importations, but there can be no doubt that they will be seriously affected. In fact, sellers are already asking an advance of 10 per cent on these goods in the case of all new orders.

Shovels are scarce. Reference has been made previously to the difficulty of securing deliveries of wire nails, but this temporary shortage will soon be overcome immediately the water is let into the canal, and the manufacturers get their full plant in operation.

CANT HOOKS. Trade has been inactive and prices are unchanged, as follows: No. 12, $10; No. 8, $11.50; No. 7a, $16; No. 6a, $14.50; No. 5a, $11.50.

AGRICULTURAL WRENCHES.—Prices are firm and the movement moderate. We quote: No. 6, $9; No. 8, $10; No. 10, $12; No. 12, $14; No. 15, $24; No. 18, $30; No. 21, $36. Discount 70 per cent.

LAWN MOWERS. Business is limited to the execution of old contracts. Deliveries are still somewhat backward. We quote as follows: 10½-in. wheels x 12 in. cutter, $7.50; by 14-inch cutter, $8.00; by 16-inch do, $8.50; by 18 inch do, $9.00; by 20-inch do, $10.00. Star,' 9-inch wheel by 12-inch cutter, $5.50; by 14-inch do, $5.75; by 16 inch do, $6. Daisy, 8-inch wheel by 12-inch cutter, $4.90; by 14-inch do, $5.10; by 16-inch do, $5.30. Philadelphia pattern, 7½-inch wheel by 10-inch cutter, $6; by 12-inch do, $6.50; by 14-inch do, $7; by 16 inch do, $7.50. Grass boxes are quoted as follows: 12-inch, $2.25; 14-inch, $2.25; 16-inch, $2.50; 18-inch, $2.50; 20-inch, $2.75. The discount on all the above is 50 per cent. off.

BARB WIRE. There is no change to mention. The price is $2.80 per 100 lb. f.o.b. Montreal, and $2.67½ f.o.b. Cleveland. Carlots of 15 tons are quoted f.o.b. Cleveland at $2.45.

GALVANIZED WIRE.—Quiet and unchanged. We quote: No. 5, $3.70; No. 6, 7 and 8, $3.15; No. 9, $2.55; No. 10, $3.20; No. 11, $3.25; No. 12, $2.65; No. 13, $2.75; No. 14, $3.75. In carlots, f.o.b. Cleveland: No. 5, $2.20; Nos. 6, 7, 8 and 9, $2.15; No 10, $2.20; No. 11, $2.25; No. 12, $2 30; No. 13, $2.40; No. 14, $2.50. In less than carlots, 12½c. per 100 lb. extra is charged.

SMOOTH STEEL WIRE.—Continues much the same. We quote as follows: Bright and annealed, $2.50 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton, and St. John. Net extras per 100 lb. are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE STEEL WIRE. There is a seasonable movement in this. The discount is 25 per cent., with the following extras: 1 and 2 lb. hanks, 25c. per 100 lb.; ½ lb. hanks, 37½c. and ¼ lb. hanks, 50c.

BRASS AND COPPER WIRE.—Unchanged at 60 per cent. discount.

PRESSED SPIKES.—Orders are of fair proportions. Discounts are as before 20 per cent. f.o.b. Montreal, Toronto, Hamilton, London, St. John and Halifax.

FENCE STAPLES. There is no new feature to report. We quote as follows: $3 per 100 lb. keg for galvanized staples and $2.80 for bright, with 25c. extra for 25 and 50-lb. packages.

CUT NAILS. Business is quiet and prices unchanged at $2.50 per keg.

WIRE NAILS.—There is a good seasonable trade in wire nails which are going out well. Once the water is let into the canal, deliveries will be better. Carlots are quoted at $2.40 and small lots at $2.45 per keg f.o.b. Gananoque, Montreal, London, Hamilton, Toronto, Brantford, Windsor, Ont., and St. John.

HORSE NAILS. These, though not seasonable, are going out to a considerable extent. We quote: "M" brand, "Oval" and "New City" heads, 55 per cent.; "Countersunk" heads, prices quoted on application. "C" brand, 40, 10 and 7½ per cent. off; "Monarch," 60 per cent. and "Peerless," 50 per cent.

HORSESHOES. There is a very good inquiry for the off season. We quote: Iron shoes, light and medium pattern, No. 2 and larger, $3.40; No. 1 and smaller, $3.65; snow pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.55; No. 1 and smaller, $3.80; featherweight, all sizes, 0 to 4, $5.10; toe weight, all sizes, 1 to 4, $6.35. Shoes, more than one size in a keg, 10c. per keg extra f.o.b. Montreal only.

RIVETS AND BURRS.—Trade is of the usual character. The discounts are unchanged. Quotations are as follows: Best iron rivets, section carriage and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS AND NUTS. These remain steady, with the discounts as follows: Norway carriage bolts, 55 per cent.; common, 50 and 10 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 and 10 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50, 5 and 10 per cent. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼c. per lb. off list; hexagon nuts, 3⅞c. per lb. off list. To all retailers an extra discount of ½c. per lb. is allowed.

SCREWS.—Without special feature. The prices are unchanged: Round head bright, 82½ per cent.; flat head bright, 87½ per cent.; brass, round head, 75 per cent.; brass, flat head, 80 per cent.

CORDAGE.—Sisal rope is ¼c. higher, at 11¼c. Otherwise prices are unchanged. We quote: Pure manila, 14c.; British pure manila, 11½c.; sisal, 11¼c.; double lathyarn, 10½c.; single lathyarn, 10c.

BUILDING PAPER.—There is a good movement. We quote: Tarred felt, $1.75 per 100 lb.; 2-ply, ready-roofing, 90c per roll; 3-ply, $1.15 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 55c. per roll; tarred fibre, 60c. per roll, O K and I X L, 65c. per roll; heavy straw and sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—Firm at the recent rise of $1.12½ per 100 square feet.

FIREBRICKS.—Business continues of fair proportions at previous price, viz.: $16 to $22 per 1,000 for English and $17 to $22 for Scotch.

CEMENT. The market is unsettled as a consequence of the tariff changes, but there is no quotable change in prices. Under the new surtax, however, German cement will cost 16 2-3c. per cask more to lay down here. Many importers also have large quantities ordered in individual casks, as much as 10,000 casks, which no matter how anxious they might be they cannot get forwarded in time to escape the surtax, as ocean space for such a large quantity of material is unobtainable. We quote as follows: Canadian cement, $1.90 to $2.25; German, $2.25 to $2.40; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl. ex-store, and American, $2.20 to $2.40 ex-cars.

SHOT. There is quite a lot of scattered orders coming in. Our quotations are still as follows: Ordinary drop shot, A.A.A. to dust, $6.50 per 100 lb.; chilled Nos. 1 to 10, $7 per 100 lb.; buck and seal, $7.50 per 100 lb.; ball $8 per 100 lb. Trade discount, 15 per cent. f.o.b.

METALS.

There has been nothing in the way of striking developments in metals during the week apart from the discussion which has arisen as to the possible effect of the new surtax on German importations. Cables from England on bar iron have been quiet in tone. Tinplates, on the other hand, are reported 1½d. off, the decline being attributed to the situation of ingot tin. The movement of heavy material has materially decreased in volume this week, as the first rush due to the reduction in railway rates on April 15 is over.

BAR IRON.- This line is firm. We quote as follows: Merchants' bar, $2; horseshoe iron, $2.25; forged iron, $2.30.

BLACK SHEETS.—There is a fair movement. We quote: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50; 8 to 20 gauge, $2.50.

GALVANIZED IRON.—In fair request. We quote as follows: 28 Queen's Head, $4.50; Apollo, 10¾-oz., $4.30; Fleur de Lis, $4.15; Comet, $4.10; "Bell" brand, $4.05. For less than caselots 25c. extra is charged.

LEAD PIPE.—There is quite a good inquiry for lead pipe. The basis is unchanged at 8c. for composition and waste and 7c. for ordinary, with discount of 30 per cent.

IRON PIPE.—Trade continues active and galvanized, especially, meets a good inquiry. Prices are: Standard pipe per 100 ft., in lengths under 19 ft.: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85; ¾, $3.65; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.20; 2-in., 416.85. Extra heavy pipe, plain ends, are quoted per 100 ft. as follows: Black, ½, $4.20; ¾, $5.25; 1-in., $7.55; 1¼, 410.55; 1½, $12.75; 2-in., $17.60. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings on extra heavy 5 per cent. net is added. Trade discount, 5 to 7½ per cent.

TINPLATES.—Cables on tinplates note a decline of 1½d. per box. Locally, charcoal is $5 to $5.25 and cokes, $4.25 to $4.50.

SOIL PIPE AND FITTINGS.—The movement is hardly as active as it was. We quote the discounts as follows: Light soil pipe, 3 to 6-inch, 50 per cent.; medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8 inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.; extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—Continues firm at $33.50 to $34.50 ex-store, Montreal.

INGOT COPPER.—Holds firm as last reported at $15.50 to $15.75 per 100 lb.

INGOT TIN.—In fair inquiry with the prices unchanged at $33 to $33.25 per 100 lb.

PIG LEAD.—Prices show no quotable change, ranging from $3.50 to $3.75 as to quantity.

STEEL.—Continues stiff in its tendency. Quotations are as follows: Mild, $2.05; sleighshoe, $2.10 to $2.20; tire, $2.15 to $2.25; spring, $2.85 to $3; reeled machinery, $2.75 to $3; toecalk, $2.60 to

OPEN HEARTH STEEL

$2.75 ; machinery (iron finish), $2.10 ; cold steel, $2.05 ; square harrow, $2.15.

TOOL STEEL.—There is nothing new to report, and our quotations are still as follows : Black Diamond, 8 to 9c.; Sanderson's, 8 to 9c., according to the grade ; Jessop's, 13c.; Leonard's, 7½c ; Jonas & Colver's, 10 to 20c.; "Air Hardening," 50 to 65c. per lb.

CANADA PLATES.—Prices continue steady with a fair business doing. We quote : 52s, $2.60 to $2.70 ; 60s, $2.70 to $2.80 ; 75s, $2.80 to $2.85 ; full polished, $3.75 and galvanized, $4.25 to $4.35 ; galvanized, 60s, $4.15 to $4.55.

TERNE PLATES.—Quiet and unchanged at $7.75.

COIL CHAIN.—While less active than it was, still supplies a fair movement this week. Quotations are as follows : No. 6, 11½c.; No. 5, 10 to 10½c.; No. 4, 9 to 9½c.; No. 3, 8 to 8½c.; ¼-in., 6½ to 7c. per lb.; 5-16, $5 to $5.20; 5-16 exact, $5.25 ; ⅜, $4.25; 7-16, $4 ; ½, $3.95 to $4.05, 9-16, $3.85 to $3.95; ⅝, $3.65 to $3.75; ¾, $5 to $5.20; ⅞, $3.30 ; 1-in.,$3.15 to $3.25. In carlots an allowance of 10c. is made.

SOLDER.—Continues stiff at 20c. for bar and 19c. for wire.

ZINC SPELTER.—Unchanged at $6.25 to $6.50.

SHEET ZINC.—Prices have a firm tendency, ranging from $6.75 to $7.

SCRAP METALS

There is little to report in the case of scrap material. We quote: Heavy copper and wire, 10c. per lb.; light copper, 9c.; heavy red brass, 10c.; heavy yellow, 8½c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2½ to 2¾c.; iron, No. 1 wrought, $17 to $17.50 ; No. 2, $7.50 per ton ; machinery scrap, $17.50 to $18 ; stove plate, $13 ; malleable and steel, $6 ; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6¼ to 6¾c. per lb.

HIDES.

There is little activity in these and the prices continue as they were : No. 1 hides, 8c.; No. 2, 7c.; No. 3, 6c. Calfskins, 9 to 11c.; lambskins, 75c.

RAW FURS.

There has been little doing in these, and no change is noted. We quote :

ONTARIO MARKETS.

Toronto April 24, 1903.

HARDWARE.

A BUOYANT feeling prevails. Orders from all over Ontario are coming in generously, while the rapid expansion in the Northwest is evidenced by the daily receipt of many letter and telegraph orders from "beyond the Superior." Trade with British Columbia shows an improvement, too. Towns dependent on the mining industries seem to be in better shape, and retailers are showing more confidence in their purchases. Much study is being given this week to the effect of the tariff on the hardware trade. Most attention is being paid to the surtax on German goods. Some of the wholesale dealers expect to be unable to get deliveries of some of the German purchases by June, deliveries generally being made early in the fall. Skates are particularly referred to. The duty on this line is now 35 per cent., so the new duty would make it about 46 per cent. Some of the jobbers are already sending out notifications of advances from 7 to 9 per cent. in many lines of German cutlery and tools. The cement trade is also materially affected. Large orders for cement have been placed, but deliveries cannot likely be made in time to escape the increased duty. As the duty will be advanced from 12½c. per cwt., or about 43¾c. per barrel, to about 58c. per barrel, it will be seen that the conditions are not pleasant for the larger importers of German cement. The market for manufactured goods, apart from tariff influences, is decidedly firm. Many factories are still behind their orders, from one cause or another. "Snider" shot cartridges are now $21 per 1,000, an advance having been necessitated by the higher cost of shot and copper. Wheelbarrows are 10 per cent. higher. Green wire cloth is steady since the advance noted last week, making the price $1.50 per 100 ft. Sisal rope and lathyarn are ¼c. higher.

BARB WIRE.—Orders continue to come in well. Prices firm. The base price is quoted as follows : $2.55 from Cleveland and 10c. less in carlots. From stock, Toronto, $2.80.

GALVANIZED WIRE.—Business is keeping up well. Prices are steady, and are as follows : Nos. 6, 7 and 8, $3.15 to $3.35 per 100 lb. ; No. 9, $2.50 ; No. 10, $3.20 to $3.40 ; No. 11, $3.25 to $3.45 ; No. 12, $2.65 ; No. 13, $2.75 ; No. 14, $3.75 to $3.95 ; No. 15, $4.30 ; No. 16, $4.55. Nos. 6 to 9 base from Cleveland are quoted at $2.27½ in less than carlots.

SMOOTH STEEL WIRE.—There is a good demand for oiled and annealed. Tinning is fairly active. Base price is $2.50 per 100 lb. Oiling 10c.; coppering 60c.; and tinning, $2 per 100 lb. extra. Shipping points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

COIL SPRING WIRE.—A nice sorting trade is doing with prices steady. Quotations are as follows : No. 9, $2.75 ; No. 11, $3.40 ; No. 12, $2.95. Freight up to 25c. per 100 lb. allowed on 500 lb. or over. Carlots of 15 tons, 5c. less, with freight up to 20c. allowed.

WIRE NAILS.—The spot demand exceeds supply, though all mills are reported to be working to the limit. Prices are firm. Our quotations are as follows : Carlots, $2.[illegible] and small lots, $2.45 per keg f.o.b. Gananoque, Montreal, London, Hamilton, Toronto, Brantford, Windsor, Ont., and St. John.

CUT NAILS.—An active trade is doing. Prices are steady at $2.50 per keg for small lots.

HORSE NAILS.—There is a fair demand. Prices are unchanged, except for "Monarch," which bears an extra 10c. off. We quote : "C" brand, oval head, 40 and 10 and 7½ per cent. ; on "Monarch," 60 and 10 per cent. and "Countersunk" head, 60 per cent. ; on "Peerless," 45 and 7½ per cent.

HORSESHOES.—A fair trade is doing. Prices are steady. We quote: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45 ; snow shoes, $3.70 ; light steel shoes, $3.55 ; featherweight (all sizes), $4.95 ; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70 ; snow shoes, $4 ; light steel shoes, $3.80 ; featherweight (all sizes), $4.95.

SCREWS.—The big consumption continues and manufacturers have difficulty in satisfying the demands of their customers. Prices are unchanged. We quote: Flat head bright, 87½ per cent. discount ; round head bright, 82½ per cent.; flat head brass, 80 per cent.; round head brass, 75 per cent.; round head bronze, 70 per cent.; flat head bronze, 75 per cent.

RIVETS AND BURRS.—The demand keeps exceedingly brisk. Prices are maintained. We quote : Iron rivets, 60 and 10 per cent. discount ; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent

BOLTS AND NUTS.—Manufacturers are unable to get ahead of their orders and jobbers are out of some lines. Prices are

firm. Our quotations are now as follows: Carriage bolts, common ($1 list), 50 and 10 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3 list), 55 and 10 per cent.; machine bolts, all sizes, 50, 5 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.

BINDER TWINE.—The demand is fairly active. Prices are steady at unchanged figures. We quote: 660 ft., 13c.; 600 ft., 12c.; 550 ft., 11¼c.; 500 ft., 10½c.

CORDAGE. — Lathyarn and sisal rope are ¼c. dearer. Other prices are unchanged. We quote: Pure manila, 14c.; British pure manila, 11½c.; sisal, 10¼c.; double lathyarn, 10¾c.; single lathyarn, 10¼c.

SPADES AND SHOVELS.—Factories are still behind with their orders, but it looks as if the trade would yet get full deliveries before the end of the season. Discount is 45 per cent. and the list price has been reduced $3 per dozen for Old's goods, $2 for Gray's and $1 for Burns'.

HARVEST TOOLS.—The demand is keeping up better than was anticipated, particularly for forks. Discount is steady at 60 per cent.

LAWN MOWERS. Makers state that they are handicapped by difficulty in getting malleable fittings and so their output has not been up to the demand. We quote: Woodyatt, 12-in., $7.50; 14-in., $8; 16-in., $8.50; 18-in., $9; 20-in., $10; Star, 12-in., $5.50; 14-in., $5.75; 16-in., $6; Daisy, 12-in., $4.90; 14-in., $5.10; 16-in., $5.30; Ontario, 12-in., $14.25; 14-in., $15.80; 16-in., $16.80; 18-in., $18.90; 20-in., $20.50; Philadelphia, 12-in., $6.50; 14-in., $7; 16-in., $7.50. Discount, 40 and 10 to 50 per cent.

BUILDING PAPER.—A fair trade is reported. Prices are steady. We quote as follows: Tarred felt, $1.75 per 100 lb.; 2-ply ready roofing, 90c. per roll; 3-ply, $1.15 per roll; carpet felt, $2.25 per 100-lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre 50c. per roll; tarred fibre, 60c. per roll, O K and I X L, 65c. per roll; heavy straw and sheathing, $30 per ton; slaters' felt, 60c. per roll.

RANGE BOILERS.—The demand keeps up nicely. Prices are steady. We now quote: 18 and 30 gal., $5.50; 35 gal., $6.50; 40 gal., $7.50; 52 gal., $12.50; 63 gal., $19; 82 gal., $23; 100 gal., $31 and 120 gal., $37.

SCREEN DOORS.—The demand has started earlier than was anticipated, but is, of course, not yet brisk. Prices are firm as follows: Screen doors, common, two or three panel, walnut stained, 4-in. style, $6.80; stained, yellow or green, $7; in natural colors, oil finish, $8.15; 3-inch style, 20c. per dozen less.

CEMENT.—Some extremely large orders for German cement have been placed by local jobbers, and the latter are now disturbed by the increase in the duty, amounting to about 14c. per barrel, which they fear will fall directly upon themselves, unless cement prices are advanced late in the summer. There is a fairly good trade doing. Prices are steady. We quote: Canadian Portland, $2.40 to $2.50; German, $2.30 to $2.60 and hydraulic, $1.50.

METALS

An excellent demand continues, both for spot deliveries and for futures. Manufacturers in all parts of the country are running full time and many overtime, and are calling for more metals of all kinds even than last year. The market is steady in all lines except tin and copper. Tin has fluctuated greatly at outside markets, and, though the past week has shown an advance in London and New York, an easy feeling is manifest here. Copper seems to be weak everywhere. There is no doubt that prices have been advanced by manipulation and have attained an altogether fictitious value, and the tendency of the past few days has been towards a lower level on all markets. Pig iron is easy in Pittsburg and New York, but the tone of the Canadian market has been strengthened by the new tariff and its provisions for a duty of $7 per ton on steel rails and for a surtax on German goods. There is no doubt that the Canadian iron and steel interests have been affected by the heavy importation of German iron rails, structural steel, etc., so any move likely to limit such importations is likely to strengthen the market. One pig iron authority says that an advance in that metal may ensue. Other lines are unchanged.

PIG IRON.—A stronger tone is manifested by Canadian producers of pig iron, though an easy feeling is shown in the United States, and lower prices have been quoted for English iron on the Atlantic seaboard. The consumptive demand in this country continues as heavy as ever, but buyers are not yet inclined to buy very far into the future. Locally, No. 2 is quoted at $22.50 to $22.75; No. 2 Summerlee, $25 on track, Toronto.

BAR IRON.—The market is firm, with a good demand. The base price is $2.05. For extras, cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft., by special agreement, according to length and size.

BLACK SHEETS.—There is an excellent trade doing. We quote: Common, $3.15 for 28 gauge and dead flat; $3.50 for 26 gauge.

CANADA PLATES.—The market is steady. The demand is fair for the season. We quote: All dull, $2.90 to $3; half-polished, $2.85 to $3.10, and all bright, $3.75 to $3.85.

GALVANIZED SHEETS.—Prices are firm. A good demand is reported with prices firm as follows: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 24 gauge; Bell brand, $4.30 for 28 gauge; Gordon Crown, $4.50 for 28 gauge.

TIN.—There is a fair demand for small lots. Prices are weak but unchanged at $33 to $33.25.

TIN PLATES.—There is a good strong demand, both from stock and for import. Prices are well maintained. We quote: Charcoals, $4.75 to $5, and cokes, $4.25 to $4.50 per box.

COPPER.—The market shows a decided weakness on all markets. In London there has been a decline of £1 15s. per ton in the week. In New York there has been a reduction of ¼ to ½c., but prices on this market are unchanged. We quote: Ingot copper, $15, and sheet copper, $21 to $22 per 100 lb.

BRASS.—The market is active, with prices steady. Discount is 10 per cent.

STEEL BOILER PLATES.—The demand keeps large with prices firm. We quote: $1.96 f.o.b. Toronto.

TOOL STEEL.—Prices continue firm, with an active demand. Our quotations

are as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 11c.; Jonas & Colver's, 10 to 20c.; ditto, "Air Hardening," 70c. per lb.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's "Special," 15 to 20c.

MACHINERY STEEL.—A better inquiry is reported. Prices are steady at $2 to $2.05 f.o.b. Toronto.

LEAD.—A fair demand is reported, with a steady market. Quotations are as follows: $3.50 per 100 lb. for pig lead, and $3.75 for bar lead.

IRON PIPE.—Prices are fair, with a good trade doing. Quotations are: Per 100 ft.: Black pipe, ¼ in., $3.25; ⅜ in., $2.40; ½ in., $2.65; ½ in., $2.85; ¾-in., $3.65; 1 in., $5.25; 1¼-in., $7.35; 1½-in., $8.95; 2 in., $12.55; 2½ in., $21; 3 in., $25; 3½-in., $32; 4-in., $38.

ZINC SPELTER.—A large movement is recorded. Prices are steady. We quote 6¼ to 6½c.

ZINC SHEETS.—A fair trade doing at unchanged prices. We quote the base price as follows: Cask lots, $6.75 to $7, and part casks, $7 to $7.25.

SOLDER.—The market is active. Prices are unchanged. Guaranteed half-and half is quoted at 18 to 19c., and wiping 17 to 18c.

OLD MATERIAL.

Copper and brass are ½c. higher. Other lines are unchanged. Deliveries are liberal, but the demand readily absorbs all offerings. We quote: Heavy copper and wire, 12½c. per lb.; light copper, 10c. per lb.; heavy red brass, 10½c. per lb.; heavy yellow brass, 9c. per lb.; light brass, 6c.; lead, 2½c.; scrap zinc, 3c.; iron, No. 1 wrought, $14 per net ton; No. 2 wrought, $5; machinery cast scrap, $16; stove plate, $11; malleable and steel, $7; old rubbers, 6½c. per lb. and country mixed rags, 50c. per 100 lb.

SEEDS.

Although the seed season is nearing its close the market is still very active. There is a good demand in all lines. Alsike is a little weaker this week, being quoted 25c. per bushel lower. We quote: Red clover, ex warehouse here, $6.50 to $8 per bushel; alsike, ex warehouse here, $5 to $8.25 per bushel; timothy, ex warehouse here, $2 to $2.75 per bushel.

Every business transaction is weighed by one standard.

Will it Pay?

If you handle ***oil of any kind*** and are considering the purchase of a

BOWSER
Self-Measuring
OIL TANK

Let us ask you a few questions:

Is it worth 10 cents a Day to handle your oil without waste?

Is it worth 10 cents a Day to sell your oil without loss of time and labor?

Is it worth 10 cents a Day to have no leaky, dirty measures and funnels to handle?

Is it worth 10 cents a Day to keep your oil room neat and clean?

We might propound a hundred questions equally as pertinent. If any one of these is worth 10 cents a day, is not the combination of the many worth more than the cost of a **Bowser Self-Measuring Oil Tank**, which will give you all these advantages?

Let us give you full particulars. **Ask for Catalogue "A."**

S. F. BOWSER & CO., Factory FORT WAYNE, IND.

HIDES, SKINS AND WOOL.

This market shows no change since last week. The calfskin market remains strong and the wool and hide markets weak. There is no change in the quotations.

HIDES.—No. 1 green, 7½c.; No. 2 green, 6½c. per lb.; No. 1 green, steers, 8c.; No. 2 green, steers, 7c. per lb.; cured, per lb., 7⅞ to 8¼c.

CALF SKINS.—Veal skins, No. 1, 6 to 14 lb. inclusive, 10c.; No. 2, 8c.; No. 1,

15 to 20 lb. inclusive, 9c.; No. 2, 7c. Deacons (dairies), each, 60 to 70c.; sheep skins, 90 to $1.10.

WOOL. Unwashed wool, per lb., 8 to 9c.; fleece wool, 15 to 16c.; pulled wools, super., per lb., 15c.; extra, 18c.

TALLOW. Tallow is very scarce. We quote 6 to 6½c. per lb.

NOVA SCOTIA MARKETS.

Halifax, April 20, 1903.

THE general conditions relating to the hardware trade still continue good, and a considerable volume of business was done during the last week. In all seasonable lines trade was beyond the average. While some firms report business quiet, others report it only fair, while still others report it as above stated. This is accounted for by the fact that the hardware business in Halifax is peculiar. In the first place, every wholesaler is also a retailer, to a greater or less extent. Then, again, the old established hardware firms make a specialty of certain lines—the trade in which they have held for years. New firms may start up, but they never get the hold on the trade in these special lines that is held by the longer-established firms. This compels the newer firms to branch off into new lines, such as woodenware, tinware, and general kitchen furnishings, down to pots, kettles and pans, usually bought of the stove dealers. Others take up general sporting goods, guns, ammunition, fishing gear, etc., usually handled by the drug and fancy goods stores. Others take up the bicycle trade, or any other line than can in any way be made useful in the hardware line. This, as would be expected, makes the general report of any week or season vary according to the special line handled.

* * *

Reports from all parts of the territory covered by Halifax travellers continue to be most encouraging, and a good season's business is anticipated. There has been some bad weather, but the spring is opening up well, and in many sections building operations are well under way, and may now be continued without much interuption. The demand for builders' materials still continues good. Prices remain firm. All lead products have advanced. There has been, and will continue to be, considerable demand for plumbers' supplies, which are largely affected by advances in this article.

* * *

Turpentine remains firm. Linseed oil is now quoted for raw 65c. in barrels and 70c. in smaller quantities; boiled, at 68 and 73c.

* * *

James Hillis, of the Richmond Foundry, Halifax, and H. S. Cardwell, of Burrell-Johnson Co., Yarmouth, were the Nova Scotia representatives to the Maritime Stove Founders' meeting at St. John last week. Mr. Hillis was elected president of the association. The secretary is also a Nova Scotian, F. H. Wilson, of Yarmouth.

* * *

Various opinions are expressed here among the hardware men as to the effect of the German surtax with reference to hardware. The general opinion seems to be that it will eventually be of great advantage to the great steel works, both at Sydney and at Sault Ste. Marie. There are at present imported considerable quantities of cutlery, lines of shelf hardware and tools from Germany. The trade in these will be diminished, if not entirely cut off, and will go to Great Britain and the United States, probably the greater amount going to the former on account of the rebate duty under the preferential tariff.

* * *

The steamers City of St. John and Pharsalia, which arrived during the last ten days, brought large supplies of glass, zinc, cement and other lines usually imported from the other side at this season of the year.

Our Metallic Ceilings and Walls

Are an ideal finish for all kinds of buildings, because they combine both beauty and utility.

We make an almost countless assortment of artistic designs—he plates fitting accurately, the joins imperceptible and the pattern continuous in perfect precision throughout.

The sanitary superiority, fireproof protection, handsome effect and moderate cost appeal to all progressive people.

You can scarcely afford not to handle these goods

The Metallic Roofing Co., Limited

TORONTO MONTREAL WINNIPEG

HALIFAX HARDWARE CONTRACT.

Evidently there is trouble in store for some person in connection with the purchase of hardware supplies for Halifax. Black Bros. & Co. sent to a recent meeting of the council the following letter:

GENTLEMEN: This contract was awarded to us for the current year, and we are led to believe from information received that goods in it have been purchased from other parties in the same line of business. We also note that we are not getting anything like the quantity of hardware outside the tender that we have in former years. From information received we believe that orders have been given to other firms in the city. This we do not think fair, as the prices in the tender are extremely low, and we certainly think that all hardware the city wants should be purchased from us at as good prices as others will give.

We will always be very glad to quote prices fo any extra goods, and if it is found that our prices are not so low as others we will be content to let the order go by us, but we think in fairness we should have a chance to tender for the business.

Will you kindly bring this matter to the attention of the council? Yours truly,

BLACK BROS. & CO.

The council have taken the matter up quite seriously and the following resolution, moved by Ald. MacIlreith, has been adopted:

Resolved, That the Clerk of Works do furnish answers to the following questions for the information of the Council:

1. Has it been the practice in the past to buy all hardware for the Works and Water Department from the firm having the contract?

2. If goods commonly classed as hardware are purchased from firms other than the regular contractors, are quotations sought from different dealers?

3. If quotations were obtained, were the goods purchased from the dealer quoting the lowest price?

4. If no quotations were obtained, was price asked from dealer from whom goods were purchased?

5. If not, was price fixed in order for goods?

6. Were any goods, enumerated in contract, purchased elsewhere than from contractor?

7. If so, why?

8. Who fills in name of person to receive order?

9. Under whose directions is it filled in?

10. Who certifies as to the correctnees of prices charged where no quotations are asked for, and is such official familiar with the market prices of such goods?

OTTAWA HARDWARE NOTES.

Messrs. Hawley and Richard, formerly with McDougall & Cuzner, are opening up hardware on Sussex street. They are both thoroughly experienced, and, with a good connection, should have abundance of trade.

C. Mulhall, who has been with Butterworth & Co. for some years, has accepted a travelling position with Kemp Mfg. Co., of Toronto. His territory will be in the vicinity of Ottawa.

INDUSTRIAL GOSSIP

THE activity in lumbering is even more marked this year than in past seasons. Reports from all sections of Eastern Canada speak of high wages being paid at saw mills, new mills starting, old ones working overtime or being enlarged.

The Canada Carving Co. has started to manufacture carved woodenware at Toronto Junction.

Fire did about $10,000 damage to the stock of Fraser, Johnston & Co., saddlery hardware manufacturers, Hamilton, last week.

The C.P.R. have confirmed the report that they will build an independent line from Winnipeg to St. Paul, Minn., about 450 miles.

Bowlen Bros., Cardigan Bridge, are opening a branch store at Souris, P.E.I., where they will carry a full line of agricultural implements, oils, hardware supplies, etc.

The several collieries of the Nova Scotia Steel & Coal Co. at Sydney mines are now giving a daily output of 1,500 tons. By the middle of summer the output will be double what it was last summer.

Randolph & Baker, St. John, N.B., have started the construction of a third draw-kiln, which will give them a daily output of about 450 barrels of lime and employment to about 10 more men.

The construction of the works for the Colonial Cement Co., Wiarton, Ont., are being rapidly constructed. The main building will be 300 x 150 ft., the powerhouse 50 x 120 ft. and the engine room 45 x 90 ft.

NEW COMPANIES INCORPORATED.

The Lenz & Leiser Co., Limited, dry goods dealers, Victoria ; capital, $150,000.

The British Columbia Creosoting Works, Limited, Vancouver ; capital, $50,000 ; to manufacture paint, to paint with creosote, charter and buy steamers and other privileges.

Browne & Wells, Limited, general agents, Toronto ; capital, $50,000 ; directors, G. D. Gus. Browne, J. V. Wells, E. B. Ryckman, C. W. Kerr and A. T. Kirkpatrick, Toronto.

The Electro Manganese Co., St. John, N.B.; directors, B. E. Kingman, F. C. Sayles, R. W. Sayles, H. McLaughlin and Matthew Lodge; capital, $1,500,000, with power to increase to $10,000,000 ; to engage in the mining, smelting and refining of wad and bog manganese, wad and bog iron and other ores, and manufacture them into ferro-manganese, spergeleison iron and other ferros by electric reduction.

SHIPBUILDING ACTIVITY.

Shipbuilding in the vicinity of Parrsboro is fairly brisk just now. Between Parrsboro and Spencer's Island there are seven schooners, one steamer and one barge on the stocks, says The Halifax Chronicle. At Parrsboro there are two large three-masters, one steamer and one large barge ; at Port Greville three large three-masters and one two-master, at Spencer's Island one two-master and a large tug. A large three-master is to be put on at the latter place and another at Port Greville. The barge is for the Cumberland Coal and Railway Co, and is about 1,100 tons.

STEPS TO WIND UP A PAINT FIRM.

Proceedings are being taken to wind up the Hollywood Paint Company, of Hamilton, of which Seneca Jones is president. This company was incorporated in May, 1901, with a capital of $100,000, but assigned for the benefit of creditors on April 21, 1903. The Norton Manufacturing Company, of Hamilton, of which W. C. Breckenridge is manager, creditors to the extent of $1,044, have filed the petition asking for winding-up proceedings.

MR. MACPHERSON'S PROMOTION.

Mr. Alexander MacPherson, manager of the Toronto branch of the Canadian Rubber Co., has been promoted to a more important position in the company's service, with headquarters in Montreal. He leaves for Montreal about May 1, but he will frequently make business trips to Toronto and the west.

CATALOGUES, BOOKLETS, ETC.

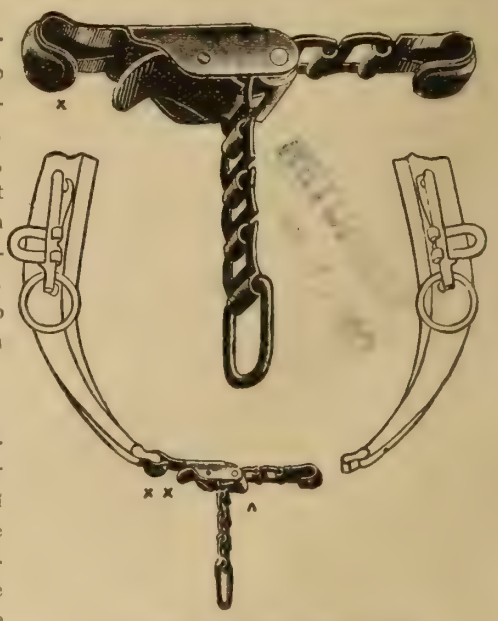
AN ARTISTIC CATALOGUE.

The Toronto Plate Glass Importing Co. have issued their catalogue for this year. It is a large book, with a heavy paper cover bound in cloth. The back and the front of the cover have the same design, which, although plain and simple, presents quite a striking appearance. The cover is a deep red color, and is relieved with the word "Glass" in large black lettering across both the front and back. The paper used in the catalogue is exceptionally good, and the designs of the different kinds of glass show up exceedingly well.

On the second page is the company's address to the trade, which is very appropriate. The index on the third page is very handy. The best cuts, from an artistic point of view and which do great credit to the artist and engraver, are to be found on pages 52, 101, 112 and 113. Those are but a few of the many in the book which show very excellent work. The one on page 101 will specially attract the attention of lovers of art. The price lists are arranged in a very neat and handy form. Every merchant in the trade should see this catalogue, for a true estimation of it cannot be formed until it has been carefully looked over.

DODSON'S PATENT HAME CHAINS

H. S. Howland, Sons & Co., Limited, Toronto, are now selling to the Canadian trade "Roy Dodson's Patent Hame Chains," manufactured by The Empire Machine and Metal Stamping Co., Limited, Toronto. The features of these hame chains are their tensile and wearing strength and the remarkable speed with which they can be fastened up. The directions for using are simple. One has merely to hook end X into hame loop, close down with hammer shown at XX, unbuckle at Λ, hook into right hame and pull up same as leather strap, put finger in ring, pull up tight.



Roy Dodson's Patent Hame Chain.

PERSONAL MENTION.

Ed. Hawke has removed from Winnipeg to Moose Jaw, where he will act as agent for "Plymouth" binder twine.

N. A. Gladding, vice-president and secretary of E. C. Atkins & Co., saw and saw tool manufacturers, Indianapolis, Indiana, has been appointed as one of the commissioners from Indiana to the Louisiana Purchase Exposition and World's Fair to be held in St. Louis in 1904.

VIEWS OF HARDWAREMEN ON THE SURTAX.

TO hardwaremen, especially importers of German goods, no part of the Finance Minister's budget speech was more interesting or aroused more comment than the surtax imposed on German goods. The effect of this on the heavier goods is expected to be serious; on the smaller class of hardware, however, there is little fear of any great damage to the trade.

Large importers of German goods naturally regret the action of both the Canadian and German Governments in discriminating against each other's goods, and look toward a settlement of the question doing away with both the extra tariffs. Said one of these gentlemen, who knows the German trade intimately: "I do not believe that the tariff war will last long. The German Government, I feel quite sure, would prefer to make tariff discriminations against English rather than against Canadian goods. The feeling in Germany is that whatever the colonies may do, it is to Great Britain, the centre of the Empire, that they must look for the satisfactory adjustment of the tariffs; and the German Government will examine into the imports and exports between the colonies and Germany and between Great Britain and Germany, and decide to strike at the fountain head. For instance, had the Government, in the first place, placed the surtax on English goods instead of on Canadian, there would be less probability of either Australia, New Zealand, or any of the other colonies giving preferential treatment to British goods, for the very good reason that it would not be accepted by the English Government. The colonies have protective tariffs and can raise them; England being as yet devoted to free trade is not in as good a position to put up a tariff fight."

Regarding the effect on the Canadian German trade, one of the best-known Canadian importers of German goods has the following to say: "There will be very little immediate effect on the shelf hardware and cutlery trade as a consequence of the surtax, because the price of German goods of this kind is now so far below that of other foreign nations competing on this market that the small advance of 10 per cent. on the cost (that is, one-third more than the 30 per cent. now imposed), would make but little difference. The price, even with the added cost, would not be higher than other imported goods of the kind. For the present trade is rather dull, on account of the uncertainty that exists as to prices. We are receiving inquiries day after day as to what the new cost of different articles will be. The principal competitors of Germany on this market are, of course, Great Britain and the United States. In tools and other shelf hardware the Americans are the most important competitors—the English manufacturers supply almost nothing in those lines, so the tariff will not help in that direction. The Americans, however, will, without doubt, push their tool trade here, where they already do a large business. It must not be forgotten, though, that German tools are imported in large quantities to the United States, in spite of the high tariff. To keep their Canadian trade it is possible that German manufacturers will still further reduce prices, and I would not be surprised to see the American or English manufacturers, finding little competition on the Canadian market, advance their prices on some lines.

"In the matter of cutlery the average German goods are all the way from 25 to 50 per cent. cheaper than the Sheffield article of the same quality and finish, and notwithstanding the preferential or the surtax, I cannot see how there will be any material interference with that trade.

"Another point is that these German brands of different classes of shelf hardware have become well known on this market, having been sold here for years, and in my experience I have found that it takes much more than a certain added cost to make people give up a favorite brand for another. Carpenters, blacksmiths, machinists, and all other trades know their tools well, and they don't like to try experiments with different brands to those they have been using and with which they were satisfied.

"As to heavy hardware, iron, steel, chain, vises, and such articles, the effect of the surtax, I believe, will be serious to importers of the German makes. An extra cost of 10 per cent. in these goods is an important item, and it is bound to affect sales on this market.

"In short, it might be said that on all goods where much material and little labor is involved, the consequences of the surtax on German goods will be serious, and on goods where much labor and little material is involved, the effects of it will be almost nil, the price of labor in Germany being much lower than in Great Britain or America."

The generally expressed wish among all importers and jobbers in these lines is to the effect that the two Governments would manage to get together on this question and do away with the discriminating tariffs. The trade in Germany, which has been rather slack for a couple of years, was improving rapidly, and at present business conditions in that country were of the best. This should make them all the more willing to make satisfactory terms with Canada.

SAWING CONTEST CHAMPION.

E. C. Atkins & Co., saw and tool manufacturers, Indianapolis, Indiana, have received a cable advice from New Zealand that the championship in the sawing contest held on Easter Monday, was won by the party using the Atkins saw. Full details will be given later.

METALLIC ROOFING CO.'S WINNIPEG AGENTS.

In our Winnipeg correspondence of "Hardware and Metal," of April 11, it was stated that Clare & Brodgett, of that city, were representatives of The Metallic Roofing Co., of Canada, Limited. In a letter just received from the latter company they say: "Please note that this is incorrect, as we have no connection whatever with that firm. Our goods are handled in Winnipeg by Thomas Black, 131 Bannatyne ave.; also by Merrick, Anderson & Co., and The J. H. Ashdown Hardware Co., all of whom carry them in stock."

CONDENSED OR "WANT" ADVERTISEMENTS.

Advertisements under this heading, 2c. a word each insertion; cash in advance. Letters, figures, and abbreviations each count as one word in estimating cost.

TRADE IN COUNTRIES OTHER THAN OUR OWN.

A BRITISH VIEW OF COPPER.

THE LONDON STATIST of April 11, just received by mail, has the following to say on the copper situation:

"The market, both for copper and for copper shares, has distinctly changed in tendency the last week or two, and it would look as if the metal, after a long series of advances in price, had reached an apex, remained steady thereat for a few days, and that then at that apex point, being a very high price, buyers have refrained as much as possible from purchasing metal, and holders of shares are less assured than they lately were as to the future. It looks as if there were much larger stocks available in consumers' hands than hitherto has been imagined, and if such be the case it will enable consumers of copper to hold aloof from coming into the market at an extravagantly high level of price. Be this as it may, copper, which had advanced to very near £7 per ton, has this week dropped back to below £6. There has also been demoralization in New York Amalgamated Copper shares, having recently touched under 61, as against 71⅜, the highest price of last month (March 12).

"A metal broker, in his circular, stated a few days ago: 'Copper fell 20s. per ton in sympathy with the weaker market for copper shares.' Stock market reports simultaneously gave as the reason for the fall in copper shares that the metal had declined in price. The assertion that copper fell because of weakness of the share market reads like the tale of the tail wagging the dog. But may there not be a hidden meaning in the metal broker's reference to the share market? Speculators in the share market frequently buy metal with a view to influencing the price of shares. Have such speculators been operating in the metal market of late more extensively than has been suspected hitherto? It is a very old device, when there is a bull movement in shares, to affect the price of the metal by giving orders to buy copper for future delivery; then, when the rise in the price of the metal causes a sympathetic rise in the price of the shares, the profit can be taken on the shares, and, perhaps, also on selling the metal bought to influence the price of the shares. In case of a 'bull' movement in shares being checked, and operators seeing nothing more to go for on the 'bull' tack, they will give orders to sell copper that they may have bought to influence a rise in prices."

LARGER LAKE SUPERIOR OUTPUT.

As bearing on the situation on the metal the following figures of production of copper in the Lake Superior district for the calendar year 1902, just compiled by the Michigan authorities, will be of interest:

Mine	1902.	1901.	1900.
Calumet and Hecla	81,848,739	82,519,676	77,761,388
Quincy	18,988,491	20,540,720	14,116,551
Tamarack	15,961,528	18,000,852	19,182,502
Osceola	13,416,396	13 783,487	12,566,471
Wolverine	6,473,181	4,946,126	4,789 82.9
Baltic	6,285,819	2,641,432	1,735,060

The total production of copper in this country last year is estimated at about 700,000,000 lb. It is claimed by some members of the trade that, while the Lake Superior output, owing to the commencement of operations by new mines, is increasing, that in some other districts it is falling off.

A WEAK TIN MARKET.

The London pig tin market was weak on realizing sales, the quantity of spot metal placed during the day on the London Metal Exchange being particularly large. Prices on spot eased off 7s. 6d. at the opening, and further declined after noon, closing 15s. below the last figures of Monday. Futures were especially weak, declining £1 10s. In the New York market business was slack and the feeling was depressed. Spot declined to 29.75c. asked, 29.62½c. bid, and closed with a weak tone.—N.Y. Journal of Commerce, April 22.

BRITISH PIG IRON MARKET.

On the Glasgow Exchange this week the market for pig iron warrants has been moderately active, but the tendency has been towards lower rates. There is nothing in the condition of trade to depress values unless it is some alteration in American affairs. It is the opinion of some authorities that it will really be an advantage to the British iron trade when the American demand for our pig iron ceases entirely, but warrants are put up or down as the American demand appears likely to continue or cease. On Monday Scotch warrants were unchanged at 55s. 6d., and on the following day they declined to 54s. 8d. Yesterday the market was fairly steady at 54s. 6d. The market closed this morning at 55s. 3d., a decline of 1s. per ton since last Friday. There was no market this afternoon, nor will there be until Tuesday. At Middlesbrough the withdrawal of American support has weakened the market, and prices have fallen nearly 2s. per ton this week. Buyers are naturally holding off until the situation is clearer, and business is therefore stagnant. No. 3 Cleveland is nominally 50s. 3d. sellers. Iron and Steel Trades' Journal, April 11.

CUT AND WIRE NAILS IN PITTSBURG

There is a good, steady demand for cut nails, and we are advised that prices are being firmly held. In some cases shipments are not made as promptly as desired, owing to the scarcity of steel, but there is now less trouble from this cause than for some time. For April delivery we quote: Steel cut nails, $2.15, base, in carloads and $2.20 in less than carloads; iron cut nails, $2.25, base, in carloads and $2.30 in less than carloads, plus freight in Tube Rate Book to point of destination, 60 days, less 2 per cent. off in ten days.

Demand for wire nails is good and the market is strong in every way. Some of the mills are behind in shipments, due to the continued scarcity of steel, which interferes with the output to some extent. Old contracts, together with new orders being placed, will give the mills full work for some time to come. No advance is now expected in prices, which are regarded as being at a conservative point. The tone of the market is firm. We quote: Wire nails, $2 in carloads to jobbers, $2.05 in carloads to retailers and $2.15 in small lots f.o.b. Pittsburg, 60 days, or 2 per cent. discount for cash in ten days; for galvanizing nails, 75c. per keg is charged and for tinning nails $1.50 per keg extra.—Iron Age, April 16.

IRON SITUATION IN THE STATES.

Surface indications are adverse in the foundry iron markets of the country, and there is a weaker feeling. Sales are largely confined to spot lots and to early delivery, only little being done for the second half. It must be noted, however, that the volume of these transactions is large, considering the circumstances. The cardinal fact remains that the consumption continues on a very large scale, and that our increasing production will be compensated for to a considerable extent by the cutting off of imports.

Our prices for domestic iron now have reached a figure where it is unprofitable

to import foreign iron for distribution in small lots, or to ship larger blocks any distance into the interior. It is likely, too, that American furnacemen will in future meet foreign prices, whatever they may be, on large transactions in coast markets. How far European makers will go to retain their temporary outlet here remains to be seen.—Iron Age, April 16.

BRITISH TINPLATE MARKET.

Since the Birmingham quarterly meeting the market has been very firm. The inquiry is maintained, and a fair proportion of business has resulted at full prices for delivery over the next three or four months. The standard size has been sold at 12s. 1½d. and 12s. 3d. per box f.o.b. Wales, and 12s. 6d., 12s. 7½d., and 12s. 9d. per box f.o.b. Liverpool; and a steady sale is reported in 100 lb., 95 lb., 90 lb. and 85 lb. substances at the usual differences. Manufacturers' quotations are: Bessemer cokes, I C 11 by 20, 112 sheets, 108 lb., 12s. 3d. and 12s. 4½d. per box; Siemens-Martin steel, 12s. 1½d. and 12s. 6d. per box f.o.b. Wales.—Iron and Coal Trades' Review, April 10.

A NEW EUROPEAN GAS BURNER.

What may prove to be an important development in artificial lighting in the form of a self-luminous (i.e., not incandescent) gas burner, has been patented recently by G. Belin, of Brussels, says The Ironmonger of London. The principle involved is that the light emitted by a self-luminous burner depends on the temperature to which the glowing particles of carbon are raised; so that, if the temperature is increased, the luminosity for a given hourly consumption is raised. With the object of so increasing the temperature, the inventor has arranged a burner in which a non-luminous or atmospheric flame plays upon a luminous flame, part of the gas burnt being thus used solely as a source of heat. In appearance the burner is much the same as the duplex acetylene jets with which most people are now familiar, but centrally disposed between the curved arms there stands one upright jet. All three are joined together at the base to a common inlet aperture. Either the single central arm or the two curved side arms are fitted with air bulbs, so as to produce Bunsen flames; while either the two side arms are provided with pinholes which yield two streams of gas, splaying each other (acetylene fashion) out into a flat flame, or the central arm is connected with a flat-flame burner of the usual description. Thus two non-luminous flames lick the sides of the single luminous flame, or the non-luminous flame is, so to say, inside the luminous flame. Various modifications in the construction are possible; the central tube may carry an Argand burner upon which the two Bunsen flames impinge, or the Bunsen may be given an annular shape with a luminous ring burner arranged inside. The device is claimed to be available for the combustion of coal gas, oil gas or acetylene; but it is specially intended for oil gas. There is every probability that the burner should develop a higher candle power than any type of luminous burner consuming a gas of equal latent luminosity at the same rate when the jet or jets which burn the gas non-atmospherically are alone considered; but it would be interesting to have conclusive evidence that the duty of the new burner is higher than that of any other type when the whole of the gas passed by it is allowed for.

PLUMBERS WITH BARR COLONISTS

The differences of the masters and journeyman plumbers of Winnipeg have assumed an interesting phase recently, says The Telegram. The journeymen are now quietly but persistently trying to get two non-union shops in the city to join their ranks in their demand for an increase of from 40 to 50c. per hour.

On the other hand, the arrival of a dozen or more plumbers in the party of the Barr colonists last week has strengthened the master plumbers' side of the contest. These immigrant plumbers, it is understood, have been persuaded to remain in the city by good inducements for the near future.

Both sides are explicit and apparently determined to push their issue to the farthest extent. The limit allowed the employers by the journeymen in their demand is July 1, but it is entirely probable that some agreement will be reached before this date.

Dear Sirs,—

I must congratulate you
fore on the splendid spring
number which you have just is-
sued & which should be in the
hands of every live & progressive
Hardware merchant in the
Dominion of Canada. I thank
you for the good report of Hard-
ware Convention & trust that the
next one will be a greater success.
The enclosed will speak for my
appreciation of your paper & I
wish you every success —
Yours truly Edwin R. Rogers

SALPETRE FROM AIR

United States Consul-General Richard Guenther, writing from Frankfort, March 3, 1903, says that Professor Muthmann, of the Polytechnical Academy at Munich, in a recent lecture before the Chemists' Association of his city, stated he had demonstrated that saltpetre can be produced from air by electricity at less than one-fourth its present cost. It has for some time been known to scientists, the professor continued, that nitric acid can be formed by passing high electric currents through moist air between two platinum poles, and suitable apparatus is all that is now needed for the manufacture of nitrates on a large scale.

PAINT, OIL AND BRUSH TRADES

A PAINT MAN'S VIEW OF THE PAINT TRADE.

WALTER H. COTTINGHAM, general manager of The Sherwin Williams Company, left Montreal on Sunday for Boston, Mass., after paying his usual visit to the Canadian branch of the business. Mr. Cottingham speaks enthusiastically of the business in Canada, not only their own, but the general trade of the country. Although in the United States, with its immense field for operations, The Sherwin-Williams Company's business has expanded rapidly, and is still branching out here and there over the entire country, it is just as successful in Canada, in proportion to the population and field for trade. The new factories to be built in Montreal, of which mention has already been made in this paper, will, according to Mr. Cottingham, be among the most modern in point of equipment of any paint plant in the world. Electricity is to be used throughout in the factories. It is an evidence of the actual necessity for enlarging the Canadian plant that the lease on the present premises has still some years to run, and it is not convenient to move out at this time. But it must be done.

The growing trade of the Canadian Northwest was a subject for much comment by Mr. Cottingham. He thought it a good sign that the new settlers there should take the best goods—paints among other things—that were to be had. Although their own trade in the Northwest is supplied, to a great extent, from the Minneapolis branch, yet the warehouse in Winnipeg was doing a thriving business in the new country, and much was expected of it.

The export trade is now engaging the attention of this company. "You know," said Mr. Cottingham, in explanation, "our motto is to cover the earth."

In pushing this export trade Canadians are taking prominent places. Mr. Fallis, who formerly represented the company in Western Ontario, goes to London, Eng., shortly to open an office. The Sherwin-Williams paints have already received fair recognition on the English market, where ready-mixed paints have not been brought to anything like the high standard that characterizes them here; and with a permanent office and warehouse in England there will be practically no limit to the trade. From the London office, Mr. Fallis will superintend the European business also. France and Germany, the largest markets, both collect stiff duties on paints, but in spite of this the Sherwin-Williams people have steadily forced their way into a good trade. Another Canadian, Mr. Donaldson, who represented the firm in the Maritime Provinces, has been touring Australia, New Zealand, India, the Philippines, and China in the interests of "S. W. P." His headquarters are in Sydney, Australia. In Australia he competes with all the world's paints, and does well. The Australians are buyers of the best. India is a market for the cheapest paints, and China, also, is not a gold mine for the exporter of paints. The South-American representative of Sherwin-Williams is a third good Canuck—Mr. Tucker, who is covering the Southern markets, and covering them well.

Canada and the United States are the only countries in which Sherwin-Williams manufacture their paint, although they do not promise that these two will remain the only manufacturing countries.

During his conversation with the "Hardware and Metal" man, Mr. Cottingham paid a high tribute to this paper. It was one of the brightest trade papers he knew of, and should be one of the most helpful to the retail paint and hardware merchant.

PAINT AND OIL MARKETS.

MONTREAL.

THERE has been a sensible decrease in the volume of business in paints and oils during the week, as the cold, unseasonable weather has interfered with outside operations to a considerable extent. The larger orders also for spring shipment have been filled, and new business that is doing is more of a sorting-up character. There has been a decline of 1c. in turpentine, and for forward delivery in May it is claimed that offers of materially lower prices have been made. Linseed oil is cabled quite firm. There is a fair inquiry for ground white lead, and dry colors are also in fair request.

GROUND WHITE LEAD.—Best brands, Government standard, \$5.25 to \$5.50; No. 1, \$4.52½ to \$5.12½; No. 2, \$4.65 to \$4.75; No. 3, \$4.27½ to \$4.37½; No. 4, \$3.90 to \$4., all f.o.b. Montreal. Terms, four months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—\$5 in casks, and in kegs, \$5.25.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c.; No. 1, zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No. 2, 6c.

PUTTY.—We quote: Bulk, in barrels, \$1.60; bulk, in 100-lb. packages, \$1.85; bladders, in barrels, \$1.90; bladders, in 100 or 200-lb. kegs, \$2.05; 25-lb. tins or irons, \$2; 12½-lb. tins, \$2.30. f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax. Three per cent. discount for cash in 30 days.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, \$4.50; in 100-lb. kegs, \$4.75; in less quantities, \$5.75 per 100 lb. No. 1 red lead, casks, \$4.25; kegs, \$4.50 and smaller quantities, \$5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, \$5.25; smalls, \$5.75 per 100 lb.

LINSEED OIL.—Raw, 1 to 4 barrels, 59c.; boiled, 62c.; raw, 5 to 9 barrels, 58c.; boiled, 61c. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gallon advance.

TURPENTINE.—Single barrels, 90c.; 2 to 4 barrels, 89c. Terms, net cash in 30 days.

BENZINE.—25 to 26c.

SHELLAC VARNISH.—Pure white, \$2.35 to \$2.45; orange, \$2.25 to \$2.35.

MIXED PAINTS.—\$1.20 to \$1.40 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PURE CANADIAN PARIS GREEN.—Petroleum barrels, 16¼c.; per lb.; arsenic kegs, 16½c.; 50 and 100-lb. drums, 17c.; 25-lb. drums, 17½c.; 1-lb. packages, 18c.; ½-lb. packages, 20c.; 1-lb. tins, 19c.; ½-lb. tins, 21c.

PURE ENGLISH PARIS GREEN.—Petroleum barrels, 14½c.; arsenic kegs, 14½c.; 50 and 100-lb. drums, 15c.; 25-lb. drums, 15½c.; 1-lb. paper boxes, 16c.; 1-lb. tins, 17c.

TORONTO.

Trade has improved materially during the past few days, after two weeks' of quietness. The demand is of a general sorting nature and all districts are sending in orders freely. In the staple the demand is affected somewhat by price conditions. Linseed oil business has fallen off. Turpentine orders are still of the hand-to-mouth nature, buyers looking for further reductions, though the price has been reduced to 76c. for single barrels, Montreal, Ottawa, Toronto, Hamilton, London and Guelph, and 78c. to outside points. Paris green is quiet, as spring delivery orders have all been shipped and repeat orders have not yet started to come in. Prices are still being cut. White lead is quiet and is being sold at exceedingly close margins by some of the jobbing houses. Other prices are steady. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, \$5.10 to \$5.25. No. 1, \$4.62½ to

"ARK BRAND"

IS INVALUABLE FOR IRON WORK OF ALL KINDS

because it is not affected by expansion and contraction, and under all circumstances and conditions will greatly outlast all other paints.

This is but one of the individual qualities possessed exclusively by "Ark Brand" Paint that go to make it the most profitable paint for dealers to carry.

Let us tell you more about "Ark Brand" Paints, and the inducements we offer to dealers and in the meantime think over this letter.

AMELIASBURG, DEC. 29

To THE FRANCIS-FROST CO., Limited,
TORONTO.

GENTLEMEN:—I have sold your "Ark Brand" Paint for several years and beg to say that I am pleased with the results. I find that my customers after using your "Ark Brand" Paints once, ask for them again and will not have other makes. I find your mixed paints true to name, good colors and good wearing paint.

Yours,
JOHN SPRAGUE.

PUTTY.—Bladders, in barrels, $2.10; bladders, in 100-lb. kegs, $2.25; bulk in barrels, $1.80; bulk, less than barrels, and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.75.

PARIS GREEN.—Petroleum bbls., 13 to 15½c. per lb.; arsenic kegs, 13½ to 15½c.; 50 and 100-lb. drums, 14 to 16c.; 25-lb. drums, 14½ to 16½c.; 1-lb. packages 15½ to 17c.; 2-lb. packages, 17 to 18c.; 1-lb. tins, 16 to 18c.; ½-lb. tins, 17 to 19c.

PLASTER PARIS.—New Brunswick, $2 per barrel.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls. and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gallon; No. 1, $1.10 per gallon.

BARN PAINTS.—65 to 70c. per gallon.

CASTOR OIL.—English, in cases, 8 to 9c. per lb.; and 9 to 10c. for single tins.

LINSEED OIL.—Raw, 1 to 2 bbls., 61c.; boiled, 64c.; 3 to 5 barrels, raw, 60c.; boiled, 63c.; 6 to 9 barrels, raw, 58c.; boiled, 61c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 barrels and over of linseed oil sold only f.o.b., Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 76c.; 2 to 3 bbls., 77c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

WINDOW GLASS.

MONTREAL.

There is a fair business doing in window glass, and prices are firmly held all round. Quotations are as follows: First break, 50 ft., $2; second, $2.10 for 50 ft., first break, 100 ft., $3.80; second break, $4; third break, $4.50; fourth break, $4.75.

TORONTO.

There is a fairly good sorting trade. Hardware retailers are keeping up their requirements until import orders arrive. These are expected about the end of May or the beginning of June. Our quotations are as follows: Star, under 26 in., $3.80; 26 to 40 in., $4; 41 to 50 in., $4.50; 51 to 60 in., $4.75; 61 to 70 in., $5; 71 to 80 in., $5.50. Toronto, Hamilton and London. Terms, four months, or 3 per cent., 30 days.

PAINT AND OIL NOTES.

Kingston painters are still on strike.

Winnipeg painters are asking 30c. per hour, the new wage to begin May 1.

Montreal painters propose to form a class for technical instruction during May.

The Canada Hardware Co., Montreal, have received a carload of "Jewel" mixed paints and a large shipment of bamboo fishpoles.

The Francis Frost Co., Limited, report a particularly heavy demand for "Ark" brand mixed paints.

TURPENTINE AND ITS SUBSTITUTES

Turpentine, by far the most useful solvent and dilutent used in paint and oil-varnish making, plays another important role, besides that of a solvent—namely, that of acting as a varnish, says Oils, Colors and Drysalteries. If glass be brushed over with turpentine and allowed to "dry," a transparent varnish-like coating remains showing that a liquid has not merely dried or evaporated; a portion of the fluid has evaporated and the remainder has absorbed oxygen from the air and formed thereby a solid resinous product. This has always to be remembered in substituting turpentine, wholly or partly, for other liquids, such as petroleum ether. When the latter is used, no resinous material is left behind on drying—no binding effect is produced on the other ingredients of the paint. Turpentine weighs on the average 8 lb. 10 oz. to the gallon. The addition of adulterants generally either lowers or raises this weight, although the skilful admixtures of two other ingredients, one being lighter and the other heavier, may be made, which leaves the mixture of the three of the same specific gravity as pure turps itself. Most adulterants in use, however, lower the specific gravity, so that a turpentine weighing appreciably less than about 8 lb. to the gallon is to be strongly suspected.

American turpentine is better adapted for paint-mixing than the other varieties in the market. Russian turpentine is cheaper. Its intolerable odor formerly greatly militated against its more general adoption. Recently, however, this defect has, to a large extent, been overcome by improvements in manufacture. Another characteristic of the Russian turpentine is its rapid oxidizability, which, in some cases, is rather an advantage, but for ordinary paint the reverse.

The "turpentine substitutes" in the market, sold under a variety of fancy names, generally consist of benzoline or rosin spirit, mixed frequently with real turpentine, and also with heavier distillates from petroleum refining. The petroleum spirit of gravity 690, they are, of course, less inflammable and a trifle less solvent in their use, and, consequently, substitutes containing them are, on the whole, greatly preferable to those consisting of the lighter liquids. A good average specific gravity in these petroleum spirit mixtures is 725 to 750. Too light a spirit should be avoided.

It may be mentioned here that much of the cheap paint in the market, especially during the recent times of high prices of both linseed oil and turpentine, about which complaints were frequently made regarding the drying up dull and lustreless, contained an undue proportion of such turpentine substitutes as petroleum spirit and rosin spirit.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS AND COMPROMISES.

An offer has been made for the assets of the carriage-making business of Gustave Doucette, Ste. Angele de Laval, Que.

Mrs. P. Cloutier, general merchant, St. Eugene, Que., has assigned.

N. Sukloeff, general merchant, Brechin, Ont., has assigned to A. M. Gunn.

F. A. Labelle has been appointed curator for Geo. Reid, general merchant, Gracefield, Que.

A. K. Hudson, general merchant, Hebertville, Que., has compromised at 10c. on the dollar.

Leader & Parsons, general merchants, Quyon, Que., are offering to compromise at 42½c. on the dollar, cash.

Wald. J. Gosselin, merchant, Gloucester, Ont., has assigned to Wm. A. Cole, and a meeting of the creditors was held on April 20.

INCORPORATIONS AND CHANGES.

N. Hay, hardware merchant, Ottawa, is retiring from business.

Menard & Bouchard, Montreal, have been registered as builders.

Karstedt & Co., tinware, Georgetown, Ont., are giving up business.

Frank Bristow, plumber, Rossland, B. C., has removed to Edmonton.

The Huron Navigation Co., Limited, Toronto, have obtained a charter.

Leda Frigon & Cie, general merchants, St. Tite, Que., have been registered.

S. Bourgeois & Co., general merchants, St. Hyacinthe, Que., have been registered.

The British Columbia Creosoting Works, Limited, Vancouver, B.C., has been incorporated.

The style of H. Wilson, agricultural implement merchant, Cobden, Ont., is now H. & W. Wilson.

The style of J. E. Ryan & Co., hardware merchants, Pembroke, Ont., is now Mackie & Ryan.

The Omineca and Peace River Mining Co., Limited, Vancouver, B.C., has been incorporated.

The Hartney Farmers' Elevator Co., Limited, Hartney, Man., has been incorporated.

James Newman, general merchant, Cherry Valley, Ont., is succeeded by John H. Jones.

Wilson & Arnold, agricultural implement merchants, Moose Jaw, N.W.T., have been succeeded by Wilson & Son.

The New Brunswick Wire Fence Company, Limited, Moncton, N.B., is applying for letters patent, increasing the capital of the company to $40,000.

SALES MADE AND PENDING.

H. D. Brown, general meechant, Saskatoon, is negotiating to sell out.

H. A. Day, general merchant, Lacombe, N.W.T., has sold out to D. M. Horn.

The assets of the general business of E. Laferriere, St. Julienne, Que., are sold.

About "C" Horse Nails.

We ask your consideration of the following reasons for our making the claim that the "C" brand horse-nails made by our company since 1865 is the best for you to buy.

First:—The material of which they are made. It is the best obtainable—Swedish charcoal steel nail rods—made especially for our work, and imported direct by us from Sweden. We unhesitatingly affirm that no better material is used by any manufacturer of horse-nails in the world for this purpose.

Second:—The process of manufacture. We forge the nails to the desired pattern from the nail rods while they are hot, and, therefore, in a malleable condition. Our process thoroughly hammers and consolidates the nails, making them tough and enduring: no "cold process" will do this as satisfactorily. Our methods for rolling, pointing and finishing the nails differ from those used elsewhere in Canada, and we are satisfied, with much better results.

Third:—When the nails are finished, they are subject to a careful examination and sorting by hand, so as to prevent a single imperfect nail being found in a box bearing our "C" brand.

Fourth:—We guarantee that every box of horse nails bearing our name and trade mark (the letter "C") is perfect and ready for immediate use. They may be returned at our expense if found otherwise.

Any dealer who wishes to permanently secure the best farrier trade, can only do so by selling the best horse-nails: The "C" brand will be found the best, and therefore the most economical. They are the standard nails of Canada, and have been thoroughly tested by thousands of farriers from the Atlantic to the Pacific for the past thirty-eight years.

We ask those who wish to favour us with their orders, through any wholesale hardware merchant, to be particular and specify for the "C" brand, made by the

Canada Horse Nail Co.

MONTREAL.

C. R. Russell, general merchant, Prince Albert, N.W.T., has sold out to Thos. Noble.

PARTNERSHIPS FORMED AND DISSOLVED.

A. Blondin & Co., plumbers, St. Hyacinthe, Que., have dissolved.

James Curtis, sewing machine merchant, Georgetown, Ont., is out of business.

Frank Ford, furniture dealer, Blenheim, Ont., has admitted E. Huffman into partnership.

Bower, Ellacott & Co., machinists, of Ottawa, have dissolved; J. & L. Ellacott continue.

Beverley & Maloney, blacksmiths, of Rossland, B.C., have dissolved; I. W. Beverley continues.

J. G. Hutch, agricultural implement merchant, Lumsden, Man., has admitted John Hewitson.

SALES MADE AND PENDING.

J. A. Wilson, blacksmith, Innisfail, has sold out to McCallum & Thorne.

The Chatham Binder Twine Co., Limited, Chatham, Ont., is advertising the factory and plant for sale.

W. L. Martin, lumber merchant, of Wapella, N.W.T., is reported to have sold out to K. Nixon.

Alex. Stewart, tinsmith, Glen Robertson, Ont., has sold out to Victor Jackson.

Thompson Bros., general merchants, Brechin, Ont., have dissolved partnership.

K. B. Forbes, general merchant, Richibucto, N.B., has been succeeded by W. E. Forbes.

DEATHS.

P. Martel, general merchant, Lorette, Que., is dead.

F. A. Phillips, general merchant, Bristol, N.B., is dead.

Keeping up the Assortment.

The fellow in the picture is in the employ of one of those merchants who are **wide awake** to the fact that to meet the demands for **ALABASTINE** which come at this season of the year, he must have an assortment of all shades in stock.

CUSTOMERS for ALABASTINE, or anything else for that matter, who have to go elsewhere to get what they want, may be lost altogether. At any rate, the opportunity is given the other dealer to explain how people can **always get** everything they call for at **his** store, etc.

ALABASTINE is the goods that are in demand. It has stood the test of time, and people know it is all right. It is made in Canada, by Canadian labor and from rock taken out of Canadian mines. Is your assortment complete?

For sale by Wholesale Hardware and Paint Dealers. Manufactured by

HEATING AND PLUMBING

VALUE OF ORGANIZATION.

IN these days of organization, trusts and combines, one feels as though the saying "As free as the air we breathe," is a saying of the past, for we have even combines on "compressed air," while in some cases, trusts or organizations are not gotten together in the best interests of the Poor Public. Such is not true of the association of the master plumbers and heaters. At the inception of this association some seven years ago it was determined that the chief aim would be the elevation of the plumber—both master and journeyman—in his profession. That this is being brought to a successful issue is evidenced in the fact that from time to time when conventions are held most of the time is devoted to the reading and discussion of papers written by some of the best experts on scientific sanitation, heating and ventilation. That this interchange of thought is of very great benefit to the public must go without saying.

It is very rarely one hears of scamp work being done by a master plumber in these days. In looking over the proceedings of the recent convention held in the City of London of the Ontario association one is struck by the work done.

The president's address is full of very interesting and profitable matter. It abounds in good advice, practical suggestions, and with a patriotic sentiment. One of the statements made by the president should be carefully considered by every master plumber in the province. I sing his own words: "Passing as we are through the fiercest days of competition, it behooves us to consider the best means of thorough organization for the purpose of shattering the astounding competition that exists among ourselves. This has been, and is being, carried to such an extent that the situation is truly an alarming one.

"Our calling stands more in need today of laws to modify competition than of anything else. It is injurious to ourselves, to our manufacturers and jobbing houses." And he could have added, to our customers. There is no one feature that tends to the turning out of unsanitary or scamp plumbing like over keen competition. Of course this does not apply to honest rivalry. This is always healthy and good and should not be interfered with. But this reckless endeavor to outbid each other should be discouraged.

No master plumber can live up to the aims and objects laid down by the association without turning out his work in a manner very beneficial to the health of all. It is wise to urge thorough organization, and to create a feeling of confidence one in the other.

OUR NEW PLUMBING EDITOR.

It should be of interest to the plumbing and heating fraternity to learn that Mr. W. H. Meredith, who has been so long connected with the trade, has assumed charge of the plumbing and heating department of "Hardware and Metal." Mr. Meredith has always taken a very deep interest in the master plumbers' associations, and his voice has been heard at more than one convention of

MR. W. H. MEREDITH.

both the national and provincial associations. His confreres honored him time and again by electing him to office, he having held the position of treasurer, also of president, of the "National," and is at present the National vice-president for Ontario. He also took an active part in the formation of the Ontario provincial association and was elected to the office of secretary at its inception. It is needless to say that Mr. Meredith is an enthusiastic advocate of thorough organization.

We trust that this department of "Hardware and Metal" will be of increasing interest to our numerous readers, and that the trade may be greatly benefitted thereby.

Mr. Meredith will be glad at all times to receive the hearty co-operation of his fellow-craftsmen. In the past he used his voice and time to further the interest of the associations, and now he will use his pen.

AN OPEN LETTER TO THE TRADE.

In reference to the announcement in another column of this issue of "Hardware and Metal" stating that I had assumed charge of the plumbing and heating department of that paper, I may say it is with considerable diffidence that I take up the duties connected with so large a subject, and it is only with the hope that my fellow-craftsmen will assist me in this undertaking, that I do so. I will endeavor at all times to advance the welfare of the trade, and shall be pleased to receive papers of value and all items of interest to the profession. It should be of great benefit for the trade to reach each other through these columns. All such articles will have due prominence. It should not be necessary for me to say that the success of the associations connected with our trade lies very near my heart. I simply point to my record during my connection therewith, which has been almost since their inception. While I must view all matters from an impartial standpoint, nothing will be done by me that shall in any way deter the unity or success of the craft. I am an ardent advocate of unity, and I believe the more closely the trade can be brought together, the better it will be. It was with considerable pleasure I noted the great success of the recent convention at London, and very much regretted my inability to be present. Ontario's association is officered by a fine lot of men, and should have the best support of the entire craft. It will be my privilege of addressing you from time to time, and I ask for your hearty support and sympathy in this new undertaking.

W. H. MEREDITH.

A PROUD TREASURER.

Treasurer Wilson of the Ontario Association of Master Plumbers and Heaters is a proud man, and justly so. His report presented at the recent convention shows the finances of that association to be in a good healthy condition. There is nothing like having the wherewithal to successfully carry on the affairs of any undertaking.

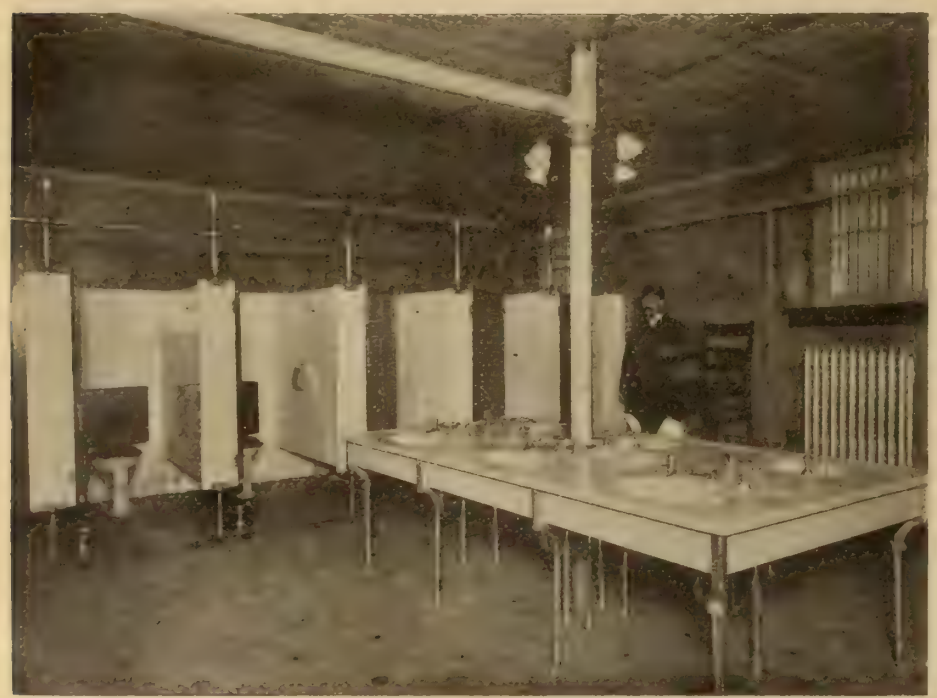
AUER LIGHT CO., 1682 NOTRE DAME ST., MONTREAL.

AN ATTRACTIVE LAVATORY.

ONE of the oldest firms in the city of Toronto in the plumbing and heating line is The John Ritchie Plumbing and Heating Co., Limited, of 64 Adelaide street east. This concern was established many years ago by the late John Ritchie, and since his decease it has been formed into a joint stock company, with J. H. Wilson as president. This firm have done some of the best work in their line, amongst others, they point with pride to the lavatory fitted up for the Grand Union Hotel, corner of Front and Simcoe streets. This lavatory is fitted with what is said to be the largest one piece basin slab in Canada. It is 8 ft. 4 in. x 4 ft. 6 in., and is of pink Tennessee marble. It has six basins, 15 x 19, is supported on ten recess apron legs, and has a marble apron all around it. It stands in the centre of the floor with the vent pipe rising out of the centre of the slab. It is fitted with nickel-plated waste, vent and water pipes, all exposed. Each basin is supplied with hot and cold water from the latest improved taps. This slab is without a flaw and is considered the finest piece of work of its kind in America. There is also a battery of five urinals, with marble backs, sides and divisions, standing 5 ft. high. They are supplied with automatic flushing tanks and nickel-plated trimmings. There is also a row of water closets of the latest design; the stalls are of marble. The whole combination making a very attractive lavatory. This firm are at present installing lavatories in the Confederation Life Building, which will equal, if not surpass, the above.



A section of the Lavatory in the Grand Union Hotel, Toronto, and the large marble slab.

A DISCUSSION ON HEATING AND VENTILATION.

At a recent meeting of the New York Railway Club an interesting discussion according to Iron Age, took place upon the subject of heating railway shops and other one-storey buildings of the same nature. While such buildings are very simple in construction, they are not so simple as might appear in regard to the problem of effectively and efficiently distributing heat and air. On account of the large amount of roof, wall and window surface, the loss of heat is very great; and also because of this and the relatively great height of the building considered as a single room, there is a tendency toward unequal distribution of the heat, the warm air rising to the roof and the cold air flowing to the floor, where it renders the workmen uncomfortable. It is extremely important, then, not only that a sufficient quantity of heat should be delivered to the building, but also that it should be delivered where it will do the most good.

If an attempt is made to supply the heat directly by means of steam or hot water coils the best results are not obtained. The vicinity of the coils is apt to be uncomfortably hot from the heat radiated directly therefrom, while places at a distance are disagreeably cold. The heat transmitted to the air of the room by contact and convection from the coils is largely lost, since the hot air rises vertically and imparts its warmth to the roof and skylights. It is also to be objected to this system of heating that it makes no provision whatever for ventilation, the extended system of steam or water pipes is subject to damage by freezing during the coldest weather, and steam pipes have been shown to be frequently the cause of fire where they came in direct contact with wood or other inflammable materials.

Due principally to the reasons which have been given above, the direct system of heating for work of this character is falling into disfavor, and is being superseded by the fan or hot blast system. The distribution of the air by means of pipes should be so carried out that the lower part of the room is kept at a comfortable temperature, while at the same time no disagreeable drafts are produced. It has been found that by properly proportioning and directing the delivery flues most satisfactory results can be secured.

THE NEGATIVE POLE OF A BATTERY

A piece of old blue print paper can be used to determine the positive and negative poles of an electric wire. All that is necessary is to moisten the paper and apply it to the terminals of which it is desired to determine the polarity. In a few seconds it will be bleached in the vicinity of the negative terminal.—Electrical Review (London).

A NEW FIRM.

That the belief that Toronto has bright prospects before it is growing is evidenced in the fact that so many of our neighbors to the south of us are locating here. One of the latest is R. H. Lear, who is opening up a plumbing and heating business, and will locate at present at 20 Maitland street. Mr. Lear has for the past 20 years resided in Chicago, most of which time he carried on a successful business on 13rd street. He is an old Toronto boy, having learnt his trade here. He is erecting an apartment house on Maitland street, similar to those found in the south side of Chicago, which will be fitted with the latest fixtures. Mr. Lear is a believer in associations and has identified himself with the Toronto Association.

ELECTRIC BULBS.

According to "Diamant," the number of electric bulbs required for lighting purposes throughout the world is from 30,000,000 to 35,000,000, the value of which amounts to 87,500,000. Of the above named number the United States manufacturers supply 20,000,000, or nearly two-thirds of the number annually required. The above largely explains the

...ence of the lamp and chimney industries, which, if not actually decreased, has not kept pace with population and modern progress. The same may be said of glass globes, shades, and general glassware for illuminating purposes. The electric bulb has largely taken the place of the lamp and chimney, the gas shade and globe, and for gas lighting, the mica chimney is largely displacing the glass chimney.

THE "ARK" LAMP.

The new catalogue, showing the large line of "Ark" lamps, globes and accessories made and carried by Johnson and Phillips, of Old Charlton, Kent, England, is very replete, and should be of great value to the trade. The catalogue contains a range of very artistic designs subjoined to it, and quite a few testimonials from some of the first firms of England and elsewhere, whose factories, offices and places of business this firm have fitted up, speaking in the highest terms of the satisfaction in using their "Ark" lamps.

OPENING AN UP-TOWN SHOW-ROOM

The Mechanics' Supply Co. intend opening up an upper town branch or showroom, at Nos. 101 103 St. John street, Quebec, where they will carry a full line of samples of their various specialties in the plumbing, heating and electrical trades. They intend making this showroom second to none in Canada, and will have a full line of "Standard" enameled ware on exhibit, also the Toronto steel-clad baths and Twyford's solid porcelain lavatories, for all of which they are the selling agents in Quebec City.

They will also have a fine exhibit of "Safford" hot water and steam radiators, as well as the celebrated boiler, the "Daisy," the agency of which they have had for some 12 years past.

On the second floor a large display will be made of electric light fixtures, also of mantels, grates, tiles, etc.

MEN OF ABILITY IN DEMAND.

The demand for first-class men in all walks of life is greater than ever before, and never were the opportunities "at the top" so numerous or so inviting as today. By first-class men we mean not merely brilliant men, but those who possess real ability, united with good judgment, thoroughness and the faculty of leadership—men of character and purpose. Youth is no longer a bar to the higher places in the business or professional world. The young man who, in a subordinate position, displays ability, zeal and energy, recommends himself for advancement irrespective of the number of his years. Those in charge of large interests are constantly on the lookout for young men of this stamp and, when found, are ready to put them into responsible positions of power and profit. It was announced the other day that the general managership of the great Metropolitan Street Railway system of New York City, involving the supervision of 160 miles of road and 14,000 men, had been conferred upon a young man of 28. In eight years the young man in question, without "pull," other than his own industry and ability, had gone through the various degrees of clerk, gripman, motorman, conductor, inspector, car starter, assistant superintendent, assistant manager and general manager of one of the most important street railway systems in the world. Hard work and ability, united with zeal and thoroughness of knowledge of his business, formed the equipment for success in this, as in countless other cases throughout the country. Thoroughness is one of the qualities most essential to advancement. The young man who means to succeed must take pains to acquire information of every kind bearing upon his calling, and to retain it when gained. He must also know how and when to use it to the best advantage. It is the lack of this quality that keeps so many men plodding along in the lower walks of life, with the constant mortification of seeing their more progressive and ambitious juniors passing over their heads.

BUILDING PERMITS ISSUED.

TORONTO.

Geo. Harrington, a pair semi-detached residences, north side Simpson avenue, near Howland road; cost $3,000.

J. P. Beatty, three residences, one detached and one pair, at 28, 30 and 32 Saunders avenue, to cost $4,500.

W. J. Hewitt, a two-storey and attic brick dwelling, on Langley avenue, to cost $2,000.

W. J. McCrae, a pair of semi-detached dwellings on the east side of Montrose avenue, near Arthur street; builder, Chas. Bulley; cost $3,000.

E. Rogers & Co., one-storey office building on the south side of Queen street, near Dufferin street, to cost $600.

W. A. Murray & Co., Limited, a three-storey brick addition to store, corner Victoria and Colborne streets, to cost $10,000; architect, J. W. Siddall.

Jas. Thompson, a two-storey brick residence on Breadalbane avenue, to cost $3,000.

Andrew Gillies, a detached residence on the east side of Huron street, north of Bernard avenue, to cost $3,500; architect, H. R. Harper.

OTTAWA.

Mrs. L. Braden, brick-veneered dwelling, Somerset street, $2,400.

Addition to dwelling, corner of Nepean and Metcalfe, $5,000.

Patrick Cassidy, brick-veneered dwelling, Wilbrod street, $1,800.

C. M. Carnochan, brick veneered dwelling, Lisgar street, $1,800.

Mrs. W. Ashfield, brick-veneered dwelling, Lisgar street, $1,800.

W. H. A. Fraser, brick dwelling, Theodore street, $13,000.

Theodore St. Germain, brick-veneered dwelling, Cartier street, $3,000.

BUILDING NOTES.

Williams Bros., grocers, Notre Dame street west, Winnipeg, have prepared plans for a three-storey business block.

Crowe & Wilson have the contract for an addition to the Prior block on Hastings street, Vancouver, which will be occupied by Wood, Vallance & Leggett. Prior & Co. will probably build a warehouse for themselves on Pender street, Vancouver.

A contract for another addition to the Deering plant at Hamilton has been let to M. A. Pigott, the price being about $250,000. The new buildings will increase the capacity of the forge shop, the grey iron foundry and the wood-working shop. Further additions are expected of an equally large nature.

PLUMBING AND HEATING NOTES.

More boats have been repaired and fitted out in Kingston, Ont., this spring than in many previous years. This has furnished considerable additional work for the plumbers, steam-fitters, etc. The early formation of ice last fall caused many extra boats to tie up in Kingston.

J. W. Evans, of New Glasgow, N.S., has opened up a tinware and plumbing store in Mrs. Robt. Willis' building, lately occupied by R. S. Faulkner, Westville, N. S. Considerable improvements were made. Carpenter work, paint and the electric lights have brightened the store's appearance effectively.

ST. JOHN PLUMBERS' OFFICERS.

The Journeymen Plumbers and Steamfitters of St. John, N.B., have elected the following officers:

President—John Buckley.
Financial-Secretary—John Kane.
Recording-Secretary—F. Condon.
Treasurer—Jeremiah Buckley.
Trustees—Thos. Collins, James Johnston, John O'Brien.

PENITENTIARY BINDER TWINE.

The announcement has been made that the price of binder twine manufactured at the Kingston Penitentiary for the season will be as follows: Pure manilla, 650 ft., 11½c.; pure manila, 600 ft., 10¾c.; Kingston special, 525 ft., 9½c.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

Window and Interior Displays

Timely Hints and Suggestions.

A TENDENCY is gradually becoming prominent in the merchant to not be satisfied with merely having a good arrangement in his store interior and windows, but he feels the necessity also of some decorations entirely apart from the stock itself. For this purpose nothing pays so well as the use of palms.

Elegans Tree.

These have been called artificial palms, but they are in reality the native palm, which have been treated chemically so that they will not fade. They are preserved plants that will retain their appearance for any length of time without care or water, and are not affected by heat, cold, gas, steam or any atmospheric influence. They can be washed without injury, and can thus be kept free from dust.

In stores that handle groceries or hardware their use is particularly great, as the displays to be obtained by the arrangement of the goods themselves is limited. A few of these plants placed at intervals through the store will give an air of cleanliness and brightness that cannot be obtained in any other way. In window, as backgrounds or along the sides, an attractiveness is given that detracts in no way from the practical part of the display. Dealers who have once used them find them invaluable both on account of their appearance and durability.

The cost, too, is a mere trifle, and brings them within the reach of every merchant even in quantities of a half dozen or more. The Chamærops, in height from 30 to 54 inches, with from 4 to 12 leaves, cost only (wholesale) from about $9.60 per dozen to $42 per dozen. These prices are for the potted plant; unpotted they cost from $7.20 to $34 per dozen. The cost of the Elegans tree, which is 8 feet high and has 12 leaves, is only $10.70 for each plant. For the convenience of dealers who wish small lots in assorted sizes, a crate of three 5-leaf, two large 5-leaf, two 6-leaf and two 7-leaf Chamæro

Sago Plant.

palms can be bought for $12. The Sago plant, 2 feet high, with from 3 to 5 leaves, costs from $18 to $36 per dozen, or unpotted from $14.40 to $26.40 per dozen.

The pots provided are moss-filled and are in keeping with the general appearance of the plant itself, but for long distances the unpotted plant is preferable in ordering, as pots are easy to obtain, and dried leaves make a very good substitute for moss in filling the top of the pot. Arrificial cut flowers have their place also in interior decorations, and vines that can be bought in any length are now on the market. Enquiries have recently come to us asking where these plants can be obtained, a fact which shows the favor they are receiving in the minds of many dealers.

Chamærop.

The cuts given with this article are kindly loaned by Nerlich & Co.]

GRAIN SHIPMENTS VIA ST. JOHN, N.B.

It has been the hope of the C. P. R. that the grain shipments from this port during the present year will reach the 5,000,000 bushel mark, and thus exceed any previous year. At present this does not seem probable, although the shipments have been good.

At the end of January the total deliveries from the elevator aggregated 1,828,169 bushels of all kinds of grain, and there were in the elevator and on the track 468,703 bushels more, making a total of 2,297,172 bushels handled up till the end of January.

During the month of February grain was delivered on 20 days, and these shipments amounted to 904,962 bushels, and there are now in the elevator 463,105 bushels. Thus the total shipments to date amount to 2,733,431 bushels, which, with the quantity now in the elevator, gives a grain total of 3,202,134 bushels handled this year to date.

Last year the whole grain shipments were only 2,144,937 bushels, so that this season's shipments have already exceeded those of last season by 1,057,191 bushels.

In 1899-1900 the grain handled amounted to 4,596,589 bushels, and this exceeds the present year by 1,394,455 bushels.

It is possible that during the six or seven remaining weeks of the winter port season the grain may come along with a rush and make the shipments exceed any previous year, but this is rather doubtful.—Sun, St. John, N.B.

A NEW STEAMSHIP SERVICE.

The first steamer of the Rochelle-Montreal service left Rochelle, France, on April 15 for Montreal, bringing a general cargo of wines and other spring imports.

This will be a monthly service between France and Canada, the sailings being on the 15th of each month from Rochelle and Montreal alternately. The steamships belonging to the line are cold-storage vessels, and well equipped for the [illegible] traffic.

To the French Chambre de Commerce of Montreal belongs much of the credit for having inaugurated this service in place of the defunct Franco-Canadian line.

AFTER THE SHUTTERS ARE UP.

"FOR gracious sakes, what was that I hit my shins against, coming through the parlor in the dark?"

"Oh, I guess that was the easy chair, Hiram."

"Well, if that's the easy chair, I don't want to run up against the hard one!"—Yonkers Statesman.

Bockus—Did Ajax ever treat you?

Tantalus—No, but he came so near it yesterday that I nearly fainted.

Bockus—How was that?

Tantalus—We were up against Hector's bar and he says, "Say, Tanty, old man, what'll we have—rain or snow?"—New York Sun.

* * *

From Judge:

"Will your employer be in after dinner?" inquired the visitor of the office boy.

"Nope," was the laconic reply.

"What makes you think so?" was the next query

"'Coz," replied the boy, as he prepared to dodge, "that's what he went out after."

* * *

Get up in the morning early and bright;
See that the goods are displayed all right;
See that the clerks are neat and polite,
With everything, everywhere, perfectly right.
Then advertise.
—Schulze, in The Business World.

* * *

"Why don't you call at this town?" said a principal to his traveller.

"I am told there are no customers there," said the traveller.

"I should like you to call and find out," said the principal. But the traveller never went. A year later the principal said to the traveller—

"I am sending McLean to that town."

"Why?" asked the traveller.

"We have had some inquiries from there," said the principal.

"But, sir, with great respect, that town is on my ground."

"Yes," said the principal, "but you did not go when I asked you to call there."

And so McLean got the business, and the other fellow—the victim of habit—had a black mark up against his name.

And the black mark grew and grew, just like the cloud which at first was no bigger than a man's hand.

And so McLean, whose mind remained in a fluid state, and was ever ready to receive fresh impressions, gradually annexed town after town from his colleague, who was the victim of habit.

Finally, McLean captured the complete journey of the unfortunate victim of habit.

Then the principal said to the victim of habit—

"I want you to take the home journey, and you can sleep in your own house every night, but you must report to me twice a week where you have been and upon whom you have called."

The victim said—

"I regret, sir, that my self-respect prevents my doing the journey you ask, for I have already represented you for many years, not as a local traveller, but with the full responsibility of a full-fledged traveller."

The principal said—

"I am very sorry that we must part. Good-bye."

And the victim of habit is now trailing about on half-heels and frayed trousers, with a dirty collar, and his shirt-cuffs trimmed to the quick.—Hardwareman.

Apollo galvanized iron is all alike; if not, send back to your jobber at our expense—we shall hear of it.

VOL XV. MONTREAL AND TORONTO, MAY 2, 1903. NO. 18.

Analyzing The Dominion Budget

BY ZED.

THE Budget debate is now well under way, and while many speakers are on the list who intend to mingle in the fray, the speech of the Minister of Finance has, of course, removed all curiosity as to changes in the tariff, which had been rising to a high pitch for a couple of weeks previous thereto, while the reply of the leader of the Opposition has, of course, set the pitch for the chorus of his supporters.

* * *

In the limit of one article it would be impossible to deal with anything like satisfactory fullness with two such speeches as those we have mentioned, to say nothing of the heavy artillery of Sir Richard Cartwright, the skirmishing of that prince of light-armed combatants the Hon. J. Israel Tarte, and the serious discourse of the member for North Norfolk, Mr. Charlton, so we shall confine ourselves chiefly to the utterances of Mr. Fielding, reserving for a future occasion the remarks of the gentlemen who have been succeeding him.

* * *

Mr. Fielding's speech contains a large number of intetesting statistics, inserted, as he tells us, not to demonstrate the prosperity of the country, which is apparent to all, but because the Budget speech is a "sort of financial library" for future reference. And yet we can hardly dismiss this subject of prosperity so lightly as to speak of it as "apparent to all," true as that undoubtedly is; the pleasure of contemplating and analysing it is too great, and the pleasure of reading the figures which prove it, too.

* * *

Whether the present pleasant state of affairs is attributable to the National Policy, now come to harvest; to the Fielding Tariff, of 1897, which displaced the National Policy; to a succession of abundant crops; to the fact that our immense natural resources are at last coming to the attention of the capitalists the world over, with their consequent advantages, or to a combination of some or all of these, we leave it to the politicians to argue; the fact remains that prosperous we are as few peoples on this earth, and for that we are thankful.

* * *

In 1867 Canada was an accomplished fact—on paper. Four provinces experimentally strung together by an Imperial Act of Parliament, jealous and distrustful almost to the point of disruption, with no broad national aspirations beyond vague and doubtful hopes, with no proper channels of inter-communication, with a population sparse and poor; such was Canada at its birth. To-day, what a contrast. A nation, the individual provinces of which exceed in size and resources many a European kingdom; a people proud of their common country; highways by rail and by water connecting districts the most remote; employment more plentiful than the laborers required, and, in place of hopes, certainties of future greatness.

* * *

In 1868 the deposits of the people in the chartered banks were $33,317,879; in 1902, $344,949,901; the discounts of the banks $51,966,120 and $318,690,611 respectively; the total exports and imports $131,027,532 and $423,910,441 respectively. Coming to the figures of the year that is closed, by which, of course, we mean the financial year ending June 30, 1902, we find ourselves opulent beyond the record of any other year.

* * *

The total income stands at the sum of $58,050,790, an increase of over five and one half millions on the preceding year, and showing the very large surplus of more than seven and a quarter millions of money, the largest, omitting that of 1899-1900, in the history of the country. This surplus may be called the politicians surplus, for, while it is no doubt correct as between revenue and ordinary expenditure, the fact remains that in spite of this large receipt we actually spent, including moneys paid out on what is called capital and special accounts, almost $64,000,000, and, deducting from this the amount put away for sinking fund to pay off debt, there was an actual net increase to our national debt of over three and a quarter millions. Of course we cannot blame Mr. Fielding for this method of bookkeeping, which, while justifiable in some ways, is yet, on the whole, misleading to the general public, for it has been the same from the beginning, and to make the necessary comparisons he is bound to follow it; but in the national stock-taking it is well to keep ourselves free from over-fine distinctions, and to endeavor to strike an exact balance. It is no doubt true that by the liberal expenditures we are increasing our national assets, but one cannot make a perfect analogy between the affairs of a business, which some day is bound to be wound up, when assets are converted and debts paid, and the affairs of a nation which, so to speak, lives on for ever, and where liquidation never takes place. It is less misleading then to regard the moneys spent on such things as canals and railways as a simple expenditure, for which we no doubt get value in increased facilities of transport and travel, but which is an expenditure none the less for which we have no convertible asset to show.

* * *

The fact is the amount of our debt is bound to increase in every, or almost

every year, for a long time to come, for the country is young; a country, as has well been said, "of magnificent distances" with all the attendant outlay that implies; a country in which the natural resources must be developed, and all this means money, money, money. And so it happens that only two or three times since confederation has there been an actual surplus of revenue over all expenditure. While, however, the debt may go on increasing in actual amount, it may well be that it is actually decreasing so far as the amount per head of the population is concerned, and this has actually been the case for the last seven years, so that we have nothing to fear on this head, and may go on making necessary improvements with equanimity, since population is now coming to us more rapidly than ever before, and the per capita debt is likely in consequence still further to diminish.

* * *

Great as is the prosperity of the financial year ended last June, it promises to be far eclipsed in the current year, in which the Finance Minister confidently expects the revenue to reach the magnificent sum of $65 [illegible] with an "ordinary surplus of $13,350,000 (ordinary in the method of computation as above described though most unique in amount), and a surplus over all in reduction of the debt of $5,650,000.

* * *

And now passing from the general to the particular, let us see what changes the Budget discloses in the strictly trade matters of the country. It is a matter of very general knowledge that for months past the Government has been bombarded from all sides by deputations, letters and petitions, asking for increased protection, and protesting against increased protection; asking for bonuses and subsidies, and anathematizing bonuses and subsidies; many of the various requests and counter-claims have already been noted in these columns. The Budget is the lifting of the veil, the final act which shows just how effective have been the arguments pro and con, the discloser of the result of "our serious consideration." Hence it is that on the day of this great annual announcement are seen in the galleries many an anxious face, faces which grow darker or brighter as the speech draws on; faces grown familiar to the members; faces soon to disappear from Ottawa "for a season."

* * *

Probably the most interesting announcement of tariff change to the public at large was that of the surtax on German goods, an increase of one-third of the duty on dutiable goods coming in from that country, as a retaliation for the treatment received by Canada at her hands. The length of this article will not permit of a history of the case, but when we consider that we purchased last year from Germany more than ten million dollars' worth of goods, while selling to her scarcely more than a ninth of that in return, it does seem odd that the land of the Kaiser should have driven us into our present course. Where this change is of special interest to certain branches of manufacture appears from a consideration of the various articles which we import most largely from the Fatherland. We quite admit that inasmuch as the increase applies only to goods imported from Germany it is by no means equivalent to an increase to that extent on all similar classes of goods from whatever foreign source, but while it is no doubt true that the effect will be in a large part to transfer the trade from Germany to other countries producing similar lines of goods, it is equally certain that it takes time to create new channels of trade, that the new will not completely equal the old in extent, at least for many years to come, and that meantime Canadian industries will have an added protection of considerable amount for a length of time to come.

* * *

Our makers of beet sugar it is true failed in their effort to get an increased protection (we may say here since we do not propose to refer later to this industry in connection with the Budget, that all machinery and structural iron, etc., required for the building of a beet root sugar factory, is put upon the free list for another year), but we imported last year from Germany no less than $3,655,570 worth of sugar, molasses, and kindred products. The increase on the import duties on these articles cannot fail to benefit our local industry to a very considerable extent, and may give to it that reasonable additional assistance which its promoters assert is necessary to its existence. There are four of these factories in existence, and, if it was found that with this slight assistance they could be worked to advantage, is it not quite possible that a further change in the tariff at some future date might secure to this industry permanency in the benefit?

* * *

In the same way we can extend the argument to the woollen industry. Here again, no direct increase has been made in the protection afforded to this industry but last year we imported from Germany well on to a million dollars of woollens, and the surtax in consequence is bound to help the woollen men. In iron and steel, and manufactures of these, we imported in the same connection, $1,134,511, and, here again, our local manufacturers in this line are bound to benefit during the readjustment which the change is bound to bring about.

Mr. Fielding's Budget at first looks as if not very much had been done to meet the views of the manufacturers, but a close study of it, shows that more has been accomplished than would appear at first blush. So much then for the surtax. Let us turn our attention for a little while to those industries which succeeded in getting at least a portion of their demands granted by the Government; and first, as to steel. Fortunate indeed is the country that can establish a successful iron and steel industry, for this is basic. And probably iron and steel become in turn the raw material for more manufactures than do any other products.

* * *

Entering, as we undoubtedly are, on an era of railway building on an immense scale, it would be of vast benefit to Canada if we could place upon a successful financial basis the production of steel rails. Feeling this the Government has made a conditional change in the tariff in this connection. Somewhat in doubt as to the possibilities of steel rail production here, a doubt aroused mainly by the inability of the Soo mills to fill the Government orders during the past year, and recognizing the fact that to increase the duty on the importation of steel rails would be only to swell our already large revenues unless Canadian manufacturers could supply the local demand, the new enactment provides that a duty of $7 per ton shall be imposed so soon as the Government in Council is satisfied that steel rails of the best quality, suitable for the use of Canadian railways, are being manufactured in Canada, from steel made in Canada, in sufficient quantity to meet the ordinary requirements of the market. It is confidently alleged that the condition will be fully met in a few months' time, partly by the Soo, partly by Sydney, and that in future the Canadian market will be held by the home-made goods.

* * *

And just here it is not out of place once more to emphasize the complexity of business interests, and how difficult it is to aid one particular branch of industry without in some way interfering with

HAMILTON, ONT.

another. Say, for the purposes of the argument, that 60-lb. rails will be used in the new constructions. This means 105 tons to the mile, and if the price at present obtaining is raised to the full amount of the duty imposed, and we do not see why it will not be, this means an increased cost in railway construction of nearly $750 a mile. And so it is that we find Western members, whose constituents are simply crying out for railway facilities, shaking their heads somewhat, and stating that on general principles they object to any enactment which tends to increase the cost of railway construction. Now, there is in everything a last straw which breaks the camel's back. Suppose that the increased cost of rails should be that last straw in a scheme for building a branch line into some far away part of our Northwest. The railway is not built; settlers who would have gone in to the new territory refrain from doing so, and the few already there, the pioneers so to speak, throw up their holdings and return to the United States. What does that all mean? That a market which might have been a valuable consumer for iron and steel other than rails, has been lost. But iron and steel other than rails are made by the same companies as those producing the rails, and so, while making a profit on rails bought for other sections, which, perchance, can afford the extra cost, they lose the profits of a market which might have been theirs had cheap rails, imported if you will, been obtained. It is, indeed, a mixed question, and the writer frequently envies those gentlemen who can see only the one side of it, who are so perfectly convinced of the correctness of their own views, and so amused at the absolute fallacy of the arguments of the other fellow. We have already mentioned the indirect advantage which will no doubt accrue to this great industry from the surtax on German goods, and so may now pass on to new fields.

* * *

The lead men (and we wish it thoroughly understood that in the application of these various adjectives we describe not the personal qualities, as in the case of a "straw" man, but the industries in which they are interested) were very bitterly disappointed at their failure to secure the protection for which they had asked. Here, again, the matter was not easy sailing. The lead mines of British Columbia are immensely rich, and absolutely shut out from the markets of the United States by the high tariff of that country, while our markets are open to the Yankee lead. On the other hand, this is an article used by every family in Canada in some shape or other, and the consumer still has his advocates and champions. From Mr. Fielding's remarks we think this matter is perhaps not yet definitely settled, as he hinted very strongly that something by way of "bounty" might yet be given this session. When we come to the question of binder twine, we find that the deputations in this line have met with some success. The stock in these companies is very largely held by the farmers themselves, and, human like the rest of us, these gentlemen look with equanimity on a little "help" given to this particular industry, while strongly opposed to increased protection on other outputs. The case is, however, not exactly on a line with many others, but may be said to stand by itself. Since their acquisition of the Philippines the Americans have placed an export duty on Manilla hemp from those islands of ⅝c. per lb., but on all of it imported into the United States a rebate equal to the amount of the duty is given to the American importer. As up to this time twine has been on the Canadian free list, this means that the American manufacturer can make all such twine as that for which he uses the Manilla hemp at a cost of ⅝c. per lb. cheaper than can his Canadian rival, and, while no specific statement as to the change to be made was announced in the Budget, the Minister of Finance promised before the session was over to introduce legislation removing the inequality.

* * *

With regard to marine, two important changes have been made. In the first place, owing to legislation passed last session with a view to meeting the trick of taking a foreign vessel to Newfoundland, registering her there and then bringing her into Canada as a British ship free of duty, we have at present the old duty on foreign ships and with it a license fee, the latter being the method chosen to meet the case mentioned. As it was never the intention to have both, the duty is now entirely repealed, and the license fee alone retained. In the second place, as an experiment which is to be tried for two years, all dues and tolls are to be removed from our canals,

THE SHERWIN-WILLIAMS SIX BIG VARNISH SPECIALTIES

are six big sellers that will enable any merchant anywhere to control the varnish trade of his territory.

They're six big varnishes that appeal particularly to the painter—that fit into his every-day work—that never go wrong and always satisfy. The line is made up as follows:

KOPAL — For general use — outside and inside. A good, honest varnish at a popular price.

MAR-NOT — A durable floor varnish. Has a tough elastic wear-resisting surface.

Excello — A varnish for the home. Can be rubbed and polished. Pale tin color; can be used on the finest woods

DRY-O-NITE — The master painters' drier. It mixes perfectly with linseed oil without curdling or separating.

DURABLE SPAR — For marine use and all outside work that must withstand severest exposure.

SHELLACINE — A liquid wood sealer for first coating on interior wood work. (Floors excepted). A trade winner

There are no other varnishes in the market to-day so well advertised for the dealer. We are advertising them direct through the mail to every painter and contractor and builder in Canada, both as a line collectively, and individually. We are pushing them with all the strength of our organization because they are so uniformly good that once introduced they make their own way.

We should like to demonstrate to you the good selling qualities of the line, and if you'll write us to-day for prices and information we will give you the full details of our plan by return mail.

which are to be "free as the ocean." It was claimed by the Marine Deputation, which was recently in Ottawa urging this action, that it would very greatly promote Canadian mercantile marine. We hope so, and we shall see.

* * *

Another change promised by Mr. Fielding, though not actually incorporated as yet in the tariff, is in connection with the importation of certain articles used by manufacturers. Provision there already is in the Customs that certain articles may be admitted free, but strange to say, it has been held that this does not give to the Governor in Council the power to lower the duty in these articles. It must be abolition or nothing. Now it may well happen that the Government would be quite inclined to reduce the import duty on a certain article used by a manufacturer, feeling that it was out of the question to admit it duty free, and yet the present state of the law is such that a deadlock would result. Mr. Fielding promises that legislation will be introduced giving power to remit in part as well as in the whole, and some changes will then take place which will be very much welcomed by some of our manufacturers.

* * *

To summarize then, we see that while there has been no increase in customs all along the line, neither has there been reduction or even a complete stand-still. Through the surtax on German goods certain industries, notably sugar, iron and woollens, will surely benefit to some extent; binder twine will be aided to remove the present unfair inequalities; steel rails will be handsomely protected if proper conditions be created; free machinery is continued to aid the beet sugar manufacturing; assistance by way of bonus is hinted at in connection with the lead industry. It is the cry of the unwary for an advance "all along the line" that is injuring the case of those industries which might very properly be aided. We well know that in the case of many Canadian trades there is the greatest prosperity, and no need whatever for increased protection, while it is equally apparent that in certain others assistance is very much needed. Mr. Fielding, alluding to the rapidly increasing importance of the West, sounds a note of warning to all moderate men—and these we hope and think are after all in the majority—when he says, "These Western people, producing articles that depend for their value upon the open markets of the world would chafe under a system of high protective duties, and would unquestionably organize against it. Is it not better to meet these people in a spirit of compromise, and ask them to join us in a moderate tariff, rather than, by the adoption of a high tariff policy, array them against the manufacturing interests of the East? I say it would be in the interests of the manufacturers themselves to take account of these things." There is surely food for thought in these words. The average Canadian is neither high protectionist nor absolute free trader, but a man who takes account of existing conditions, and refusing to worship any fetish, demands such laws as will insure a reasonable amount of prosperity to all classes, without making the one tributary to the other. No true and broad minded man wishes to see this a nation of shepherds, and no true patriot asks to make the tillers of the soil pay tribute to the manufacturing classes. We must find our position between the two extremes if we would have this nation reach its true stature as a united people; if we would have the East and the West not East and West but Canada, and the scribe who, dipping his pen in the gall of bitterness, espouses the one extreme or the other, reviling those who disagree with him, should find no place in the columns of our press. He is no benefit to this young country, and must rank, if sincere, as a nonentity; if insincere, as a demagogue.

* * *

Leaving trade matters and coming to administration of the general affairs of the country, it would take altogether too much space to enter into a lengthy discussion, but we may say that on one head argument is unnecessary, and that is, the excellent administration of the Post Office Department by Sir William Mulock, which, in the last fiscal year, shows a deficit of only $105,000, even when including the cost of service in the Yukon and Atlin Districts, which, of course, in the days of the heavy deficits, were not administered. While this journal is strictly non-political, it thinks it only fair to give credit where credit is due, and having a keen appreciation for "good business," it congratulates Sir William and the country on this splendid showing.

TESTED AND TRUE.

Iver Johnson Revolvers

Gustav Persch, of San Antonio, Texas, says:

"I have tested your revolvers and found them true to the sight and workmanship. I shot at a silver dime at 30 feet and hit it seven out of ten times. Your revolvers stand ahead of other makes every time. I recommend it to all."

Iver Johnson's Arms & Cycle Works,

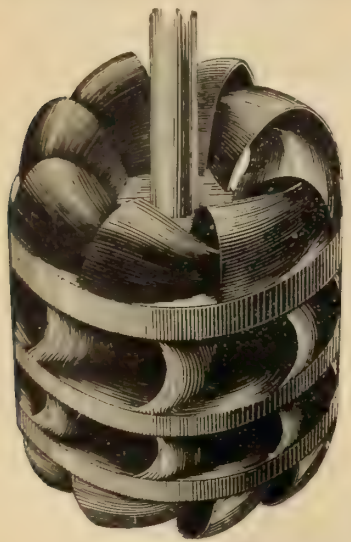
MACHINERY

THE ADVENT OF THE TURBINE.

THESE are the days of the passing of the picturesque, of the sacrifice, oft times, of scenic attractiveness at the shrine of practical utility. The old mill, with its ponderous scumcoated bucket wheel cajoled into an unwilling revolution by a cataract of shimmering whiteness, is fast becoming a relic of less strenuous times. Even our own Niagara, that all the world comes to view, is being slowly, but surely, harnessed to the



The Turbine—Showing the buckets or flanges.

car of man's service, and it may be that in some future day the rockface that is now hidden behind the impenetrable veil of the Canadian Fall will be exposed to the unsanctified gaze of our progeny.

Even at the present moment, a "flume" is being wormed out of the solid granite, whose lower end will be behind the Horse Shoe, and the moment when the last foot of rock is cut, and the tunnel opened under the great cataract, will be one never to be forgotten by those workmen to whom the task shall fall.

All this digging and cutting and tunnelling is to provide a new channel for the descending water, so that it may operate turbines that seem mere pigmies, yet whose power is in no way commensurate with their apparent diminutiveness.

The evolution of the turbine wheel is a science in itself, and one in which practical mechanical economy has been the immediate result of the inventive thought expended on it.

The principle ruling all water wheels is the interposition of a resistance to a flow of water, in overcoming which resistance the fall causes work to be done. In the turbine form, the water is confined in a flume or tube, and the wheel is placed at as low a level as possible. Theoretically, the turbine itself is really a screw whose whole body is within the descending water column. The weight of water above rotates the flanges of the screw. The action is really the converse of that of the propeller of a steamship.

One of the chief difficulties encountered in earlier forms of the turbine was the excessive end-thrust of the pivot on which the revolving wheel was supported. Sir Isambau Brunel, to whom, rightly or wrongly, is accredited the invention of the turbine, did not succeed in overcoming this, although he reduced it considerably in his later wheels. The wheel is entirely submerged, thus avoiding the danger of overheating.

Horizontal turbines were next invented, but the difficulty of end-thrust was still there, if, indeed, it were not increased.

Then came the conclusion of the whole matter, in which the flanges of the screw were divided by a central equatorial diaphragm, each side diverting the water towards the ends of the screw or drum, thus doing away with end-thrust altogether. A wheel in which this simple but effective method of overcoming the difficulty has been carried to perfection, is illustrated herewith, the cut having been supplied to us through the courtesy of J. C. Wilson & Co., Glenora.

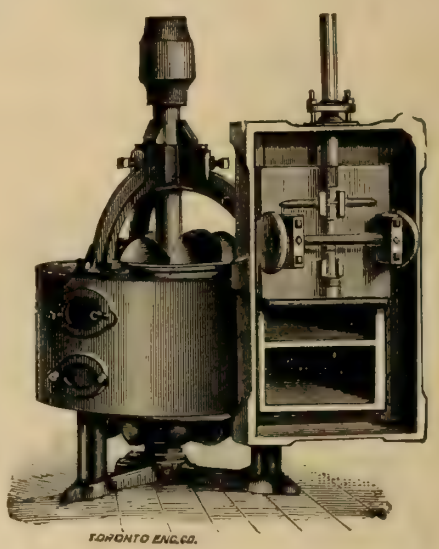
The above cut shows the general form of the buckets or flanges, the peculiar curves of which are modelled in accordance with certain important scientific principles it is not necessary to name here.

The object of the makers of this wheel, which has found favor all over Canada, has been to obtain the maximum of power from a given head of water, and, what is of quite as much importance, to model a wheel that should get rid of the water used as rapidly as possible. In no form of turbine has this dual object been attained to such a degree as in the "Little Giant."

To give some idea of the efficiency of this turbine, and applying the well known law that "the power of water is its weight multiplied by the distance through which it falls," we will suppose a stream of water to have a head of 20 feet, and to have an average flowing volume of 1,300 cubic feet per minute. Theoretically, the power obtained by a perfect turbine ought to be 37.33 horse. That actually delivered at the spindle by an 18 in. wheel of the Wilson pattern, using 1,219 cubic feet per minute, is 36.9 h.-p.

A neat little handbook on "Waterpower," containing some valuable tables for calculating the various data required when a turbine is installed, is issued gratis by the firm.

Another point of vital importance in the effective working of a turbine is that the tube conveying the water to the turbine, and from it, should be absolutely air and watertight. The usual manner of erecting a turbine plant is to make full use of the head of water, by allowing the water level of the wheelpit to cover the turbine itself. This is indicated in the accompanying sketch.



The Turbine—Installed.

Once a turbine is installed, it will supply constant power at a very economical rate, and wherever sufficient head exists to render its working a practical possibility, the water-turbine cannot be too strongly recommended. As to the cost for up-keep, etc., it may be said that at Glenora, Ont., a machine shop and foundry are furnished with ample power by a "Little Giant" turbine, 6 in. in diameter, making 2,200 revolutions per minute under 175 ft. head of water, and

...s wheel has run for 14 years without any repairs and is apparently as tight as the day it was set.

The development of natural resources is a question that neither the farmer, the mechanic nor the hardwareman can afford to overlook, and the latter, in particular, should keep posted on these matters, as he is well able to handle the supplies and fittings that are always a necessary adjunct to mechanical expansion.

Hardwaremen generally are beginning to recognize that the man who knows nothing besides the price of nails and screws and ironmongery in general is not likely to turn the world upside down. A little knowledge is a dangerous thing, but ignorance is still worse, and the hardwareman of the provinces should strive to know something of everything, and everything of something.

NEW LOCOMOTIVE COMPANY.

The British Americas' Locomotive Works, Limited, have been incorporated in Ontario with a share capital of $1,000,000; with head office in Toronto, and with the following provisional directors: Harold E. Collins and Arthur T. Legg, London, Eng.; James R. Davidson, Cincinnati, Ohio; Ernest W. France, Bournemouth, Eng.; Thos F. Heacock, Toronto. The objects of the company are given in their charter, as follows: "To carry on the business of a mechanical engineer and manufacturer and dealer in locomotives, 'vehicle-locomotives,' automobiles, launches, motors, and mechanically propelled cars, omnibusses, cabs, lorries, drays and vehicles of every kind and description and of motive power of all kinds, and, in connection with such business, to carry persons and property of all kinds, and, for the said purposes, to acquire the Canadian business, patent rights, inventions and franchises of American Automobile Company, a company incorporated under the laws of Maine, U.S., or any other corporation, firm or persons."

INSTALLED BRICK-MAKING PLANT.

The business expansion of Canada generally, and of Ontario in particular, is finding the Toronto firms work up to their full capacity. The Bracebridge Brick Making Co. will commence operations in a few days, and it is evident they mean to be in the van of the prosperity procession, for their equipment is of the most modern and improved design. The Bracebridge Co. have left the whole of the machinery outfit in the hands of The Bradley, Levy and Weston Machinery Co., Limited, of Toronto, with the result that an engine, boiler, "Quaker" brick machine and sundry accessories are now being installed.

This is a sample of the contracts, which are mostly for complete plants, being received every day or so by the above firm. They handle the latest forms of modern mechanical appliances, and are crowded to the limit with orders.

A NEW RUDDER MOTOR

E. A. McLachlan, 355a Chiswick Road, London, Eng., is the inventor of a petrol rudder motor, which can be attached to the sternpost of any small boat in the place of the ordinary rudder.

It is then used both to propel and steer the craft. The motor is of 1½ h.-p. size, neat and compact in design. The apparatus consists of motor, rudder and propeller gear, all on one frame, an oil tank, carburettor, coil and battery being carried in a metal case in the body of the boat, the total weight being under 60 lb.

MACHINERY AND ELECTRICAL NOTES.

A NEW manufacturing concern, under the name of The Robert Bell Engine and Thresher Company, and backed by a list of directors, including J. C. Greig and several other local business men has been established in Seaforth, Ont., with a capital of $200,000 and a goodly number of orders to commence with.

A boiler in Pettit Bros.' mill, Comber, Ont., exploded on Thursday, last week.

London, Ont., council are putting in conduits for the new hydraulic pumps which are to be installed shortly.

The Midland, Ont., electric power house is now being constructed and will be ready for the machinery in a few weeks.

J. E. Keenan and T. A. Pickard, of The Strathy Wire Fence Co., Limited, Toronto, are on a trip to Chicago to buy machinery.

A 125-h.-p. fire box boiler and one 100-h.-p. horizontal engine have been installed in the plant of the Toronto Fire Brick Co., Mimico, by H. W. Petrie, Toronto.

The company organized to extend the Guelph, Ont., Street Railway through Arthur, Elora, Fergus, to Owen Sound, include nearly 50 of Guelph's best business men.

It is announced that The Port Huron Engine and Thresher Co., Port Huron, Mich., have received an order for 1,500 portable sawmills, for shipment to Winnipeg and other points in the Canadian West.

Montreal electric workers are asking the Montreal Street Railway and electric light companies for a change in their agreement, which would mean an increase in the men's wages and a more explicit recognition of their union.

North Vancouver, B.C. is to have a new electric light plant, and the council have under consideration the utilization of some of the mountain cascades to generate power. Turbines again, mark you.

The Henderson Roller Bearings Co., Toronto, have added to their plant a 21 in. by 8 ft. Crosby and a 15 in. by 6 ft. London screw-cutting engine lathe. These machines were purchased from H. W. Petrie, Toronto.

W. L. McNabb, of Stouffville, who visited Toronto some days ago, purchased a No. 1 Jewel automatic engine and a 10 h.-p. vertical boiler for his plant. This outfit was furnished by H. W. Petrie, Toronto.

Large orders from the United States for machinery used in the manufacture of full briquettes, so common in Germany and Belgium, have been placed with a syndicate, whose headquarters are at at Ernfield, near Cologne, Germany.

An entire wood working plant has been purchased by Wm. Taylor, of Brockville. This machinery consists of a 4½ h. p. gasoline engine, planers, mortisers, tenoning machines, saw tables and accessories. This plant was furnished by H. W. Petrie, Toronto.

The United States capitalists who propose to establish ferro-manganese works in New Brunswick are asking from the Government the use of the immense power at Grand Falls, on the St. John river, and would erect a big plant. They figure they would pay at the outset $700 a day in freights and wages.

The Montreal Light, Heat and Power Co., which, by the purchase of The Lachine Rapids Hydraulic and Land Company, Limited, and its affiliated companies, has full control of all the gas, electric light and power companies operating in Montreal, has issued $3,414,000 bonds at 5 per cent., to pay for the purchase of the companies referred to.

G. A. Crosby & Co., of Ontario, Limited, are turning out a line of splendid patent automatic can-making machinery, presses, dies and sheet metal working appliances. One of their latest machines is capable of making 30,000 round cans of one size in ten hours, with solder all on the outside of the can. The Crosby Co. also make a specialty of lathes and milling machines.

The new locomotive and machine company's works at Longue Pointe, near Montreal, are rapidly progressing, and it is expected that by midsummer they will be employing 700 men, to be quickly increased to 1,000, and be finishing off locomotives at the rate of two per week. A large portion of the machinery is already on the ground, and it is estimated that by August $500,000 worth of the most modern machinery will have been installed.

MACHINE SHOP CHANGES HANDS.

The machine bicycle repair shop conducted on King street, Brockville, Ont., for the past four years by Harry W. Going, has been disposed of to Ernest Smith, of The James Smart Company. Mr. Going had built up a very lucrative business. From a small beginning he gradually improved the plant until the machinery now embraces the best in the line to be found in Brockville. As an evidence of this his patronage has extended to many points in Eastern Ontario and Quebec. The plant as it stands is well equipped for turning out nearly all kinds of work in the mechanical line.

Mr. Going's successor is a practical machinist, who, for 16 years has been on the staff of The James Smart Company, the greater part of this time engaging his attention as foreman of the machine shop. His experience ought to stand him well in his new venture.

On Saturday last he resigned his position with The Smart Co., but will not take possession of Mr. Going's establishment until May 1. Mr. Going will likely remain in Brockville, though his plans for the future have not yet been decided. He will take a long holiday before settling down to work again.

DEPARTMENT OF ADVERTISING SUGGESTION AND CRITICISM

Edited by
W. Arthur Lydiatt,
TORONTO.

NOTE.—Herein are discussed the principles and practice of advertising. Subscribers are invited to send Mr. Lydiatt specimens of their newspaper and other advertising, for the purpose of review in this department. Address care of Department of Advertising, HARDWARE AND METAL.

Don't wait until you publish an especially good advertisement before you send me your ads for review in this department. Don't be afraid of a little honest criticism. I will only try to point out the faults—if such there be—that you may have ideas for the improvement of your ads. You don't have to follow my advice or act on my suggestions.

I simply want you to send me specimens of your advertising matter—just what you are using now, or what you have been using. I'll tell you of every way in which I see it might be improved. I will call attention to the good points—mention the weak points.

If you spend money for advertising it is surely advisable to see to it that you get your money's worth. And if you tell me just how you are spending it—show me what kind of advertising matter you use—perhaps I'll be able to give you some suggestions which will help you make your advertising more profitable. It's worth trying, anyway. THE EDITOR.

GIVING THE DETAILS.

THAT giving explanatory details regarding articles advertised is profitable, is well illustrated by the following extract from a speech recently delivered by a prominent Chicago advertising agent:

"A young man who knew the value of giving specific details in advertisements was writing ads. for a grocery store. One day the proprietor came to him and told him he had bought about a ton of prunes at a low price; that they had arrived and were covered with white 'bloom,' because they had dried out and the sugar in them showed on the surface.

"The young fellow asked how prunes in that condition were manipulated to make them fresh and glossy in appearance, and he was told that sometimes they were dipped in a weak mixture of molasses and water by those who understand how such things may be done.

"He at once used a half-page in the local paper to announce that his firm had received a large invoice of prunes that were absolutely in their natural condition. They had not been soaked in molasses and water to make them look nice, but were dry and perfect, and being so, the buyer would get more actual fruit for his money than he could if he bought them after they had been renovated. These prunes were all of the kind that could be bought, and only five pounds would be sold to a customer.

"He told the absolute truth about those prunes, and used a lot of space telling how prunes were cured and packed, and where they came from. In those days no prunes were grown in the United States, and the story he told was as interesting as he could make it. The result was as might be expected. Those prunes attracted attention from people who had never before patronized that store, and were sold out immediately. And, what is more, the people came back to get more of them, and really thought they were better than the fresh glossy ones that had been sold to them by other stores.

"One point in the ad. was minute directions how to cook prunes so as to make them plump and round when put on the table. In this case the advertising man studied up his subject from the grower to the cook, and it is probable his receipt for cooking was the most convincing part of the ad."

To follow the foregoing with advice to be brief may seem to some to contradict the "give details" argument. But the "details" can be made brief, and to the point—can't they?

To give every ad. the careful thought it ought to have—to eliminate all superfluous words, shunning the "gushy" style of advertising—should be the aim of every retailer who writes his own ads.

Cut your story down to a talk which will require but a few minutes of the reader's time. If you want to advertise several articles and the "details" of each little talk happen to be comparatively lengthy, confine yourself to as few articles as possible, and prune your arguments till every sentence—yes, every word—is made to count.

Merely "hot-air" inflation isn't the thing. Every line ought to be interesting—out of the ordinary—and at the same time as full of business as an egg is full of meat. Keep the reader well reined up to the subject under discussion.

The advertisement which appeals best, speaks in frank, unequivocal words about reliable goods; in fact, presents in the briefest and most interesting way many logical arguments for the purchase of the goods in question. This kind of advertising will pay well for the little extra attention it requires.

Study the selling points of each article you are going to advertise. Reason it out something like this: "What is there about this article that ought to make it sell?" "Why would people buy this ——— ?" "In what way is it better than any other ——— on the market?" and so on. The answers to such questions, arranged in local sequence and told in concise, explanatory and convincing arguments will make good advertisements.

ADVERTISING WITH BLOTTERS.

A popular form of advertising, one that is largely used and with a value peculiarly its own, is the blotter. It is used especially where not much is to be said, and is intended more to keep the name of the user in constant prominence before the public than for any direct results it might obtain.

To accomplish anything, blotter advertising should have the same attention as any other form of advertising. The most effective method is to make up a list of customers or prospective customers and distribute them a new blotter every month, or at stated intervals. The text should be short—somewhat general in nature—yet as interesting as the writer can make it.

The blotter offers a good medium for the use of "catchy" sayings—humorous cuts—and "smart" advertising, so much appreciated by many of the smaller advertisers. It is best to confine the text, or subject matter, to one article or idea. Drive home one point at a time.

In distributing, send one or more of the blotters by mail to every person on your list; or, if delivered, put them in envelopes and addresses as though sent by mail. In this way there will be no "waste circulation."

There are two kinds of blotting paper; that enamelled or coated on one side, and the plain blotting surface on both sides. If you use a fine cut, or wish to have any kind of a color effect, the enamelled stock is preferable.

If the text is brief, and large, plain type is used, the plain blotting paper will be best, as many bookkeepers have an aversion to blotters that will blot on only one side. It is desirable to use good stock in either case.

Put Money into Dodge Wood Split Pulleys and Derive Immense Dividends.

A little money invested in a stock of Dodge Wood Split Pulleys will pay big dividends.

No great investment is required, for, with the interchangeable system of bushings, a small stock suffices for large demands.

Modern manufacturing plants use the Dodge Wood Split Pulley in preference to iron pulleys, and, by carrying a stock of Dodge Wood Split Pulleys, you can make money out of every manufacturing plant in your section.

Do a little advertising work among them—we'll assist you in it, prepare your copy, etc.

The Dodge Mfg. Co. of Toronto, Limited

TORONTO.

THE NEW LONDON ROLLING MILLS.

THE development of the Canadian iron and steel industry during the past year or two has been so general that practically every firm interested in the production of iron goods has felt the impetus of expansion.

The London, Ont., Rolling Mills Company, Limited, is a fair case in point. This firm started in a very small way, yet has so steadily grown that to-day their new works will give employment to 200 men.

The raw material used by the firm is scrap iron, notably spikes, bolts and fish plates. The building, a view of which is shown herewith, covers about an acre, and is a busy scene when all its machinery is in motion and its full staff engaged.

The process of refining begins on the west side where three large furnaces are situated. The rough material is thrown into these bushelling furnaces, as they are called, and heated not quite to the melting point, but till it becomes thoroughly malleable. Before this has become accomplished most of the rust and dirt melts and passes off in the form of slag, leaving the purified metal behind. When this metal has been heated to the proper condition, it is removed and subjected to a process of rolling.

The masses of iron are too large to be handled by one man, even when cool, and a special arrangement is adopted to facilitate work. Large tongs are suspended by chains from pulleys, which run along elevated tracks from the furnaces to the rollers, so that when seized in the tongs and taken from the furnace the weight comes on the pulley and it becomes an easy matter to push it from place to place.

The first step in milling the red hot iron consists in passing it through a "squeezer," where it is reduced to the form of a compact cylinder about 20 in. in length and 6 or 7 in. in diameter. In this form it is removed by another elevator track and passed through a set of large "muck rolls," so-called, because the iron, when it reaches them is still comparatively rough and dirty. The rolls work on much the same principle as a clothes wringer, but have grooves of different sizes cut in them, and it is through these grooves that the iron is forced. Three rollers are placed together, so that the iron, after being passed between the upper ones, can be passed back between the lower, and that is exactly what is done. The work requires two men, one standing on each side. As the bar passes through to one of these men he seizes it in a pair of pincers and sends it back, and thus it is kept passing from one side to the other, each time becoming longer and thinner as it is forced through smaller holes, until from its original form it has changed to a ribbon about 1 in. wide and 25 ft. long. In this form it is laid aside to cool.

The work is only about half over, however, when this stage is reached. The same process of heating and rolling has to be gone over again, but with the difference that most of the impurities have been removed before the finishing process. The sheet iron that has come from the first rollers, after being thoroughly cooled, is passed through a cutting machine and chopped up into bars of from 18 to 30 in. in length, and these bars are made up in the form of "boxes." Each box consists of four pieces of sheet iron wired firmly together, the interior filled with scraps that are already pure enough to require only the one heating.

New Works of The London Rolling Mills Co., Limited.

The boxes, when prepared, are passed through another set of furnaces where the last of the impurities passes off. The process is the same as the first one, only that in this case a different set of rollers is used and the operation is a much longer one. From side to side the iron is snatched, a glowing, writhing serpent of fire, that gradually increases in length until it has become a mere thread about 5-16 of an inch in diameter and sometimes as much as 40 or 50 ft. long. These bars, when reduced to the required size, are straightened out on the cooling bed, and when completely cool are passed through another pair of shears and cut up into lengths of from 12 to 25 ft., which are loaded on flat cars ready for shipment.

The cut shown includes portraits of President John White and Manager Chas. H. White, whose energy and industry have made this firm such a success.

TRADING STAMPS IN QUEBEC

THE Legislature of the Province of Quebec has given power to the municipalities to deal with the trading stamp question in the way they think best. The bill reads:

1. The municipal council of cities, towns and villages may pass by-laws for prohibiting the giving, selling, distributing or receiving of trading stamps, coupons, or other similar devices, and for prohibiting the giving or selling the same or dealing therewith by any person, firm or corporation engaged in trade or business; and, by every such by-law, may provide that any person infringing the same shall be liable to a fine not exceeding twenty dollars, and imprisonment not exceeding three months in default of payment.

2. No such by-law shall, however, apply to any merchant or manufacturer who places in or upon packages of goods or delivers to the purchaser of goods sold or manufactured, tickets or coupons to be redeemed by such merchant or manufacturer, either in money or merchandise.

3. This Act shall come into force on the day of its sanction.

Under this law any municipality may pass a by-law prohibiting the use of trading stamps, though it will be noticed that manufacturers who give premiums or presents for a certain number of wrappers, say, used on their goods, or coupons with packages of goods, are not included in the bill. It is the regular trading stamps the law aims at—and hits. The retail associations objecting to the trading stamp system may now obtain relief from their own city or town councils. In Montreal, where the greatest agitation against the stamps took place, the council has already shown a willingness to pass such a by-law if they were given the power, and no doubt in the near future they will be asked to do so.

Meanwhile the trading stamp people are preparing to fight. The Traders' Advertising Co., operating in Montreal, Quebec and Valleyfield, which gives "cash receipts," does not believe the city councils will pass a by-law. In the event of their doing so, this company makes a curious announcement. It says: "Should they do so, we will at once take advantage of paragraph 2 of the bill, and with as many of the merchants as are willing to join us, form a mammoth trust, with unlimited capital, having stores in every locality, including all lines, and where we are not represented stores will be opened for the accommodation of the public, and filled books of cash receipts will be accepted as $5 cash on any purchase of that amount or over at any of the stores."

This may be taken seriously or not, as the reader sees fit. At all events, the Montreal grocers have not carried on their campaign against trading stamps for so long without insisting, now that the city council has power to legislate against them, that it does so.

THE WHEAT MARKET.

The extensive speculation on the Chicago wheat market, by Armour & Co., during the last two weeks is playing havoc with the legitimate wheat trade of that city.

It is rumored that Armour intends to attempt corners in May and June wheat, but it hardly seems likely that he will carry out such a scheme in a year when the wheat crop promises to be so good. However, if such is his intention something should certainly be done by the Chicago Board of Trade to prevent such a scheme being carried out.

Chicago has surely had enough experience in such matters to recognize the harm that will be done the wheat trade, not only in that city but also all over the country, by such a line of procedure. The real value of wheat will be altogether lost sight of, and the price will fluctuate on a fictitious basis. Already some harm has been done to dealers in Chicago and in other cities.

Canada has also felt the bad effect. The market here during the past fortnight has been exceedingly unsettled, and consequently the dealers are waiting impatiently to see what is going to be done in the matter.

THE DISASTER AT FRANK.

THE mass of debris that tumbled from Turtle Mountain a few days ago, covering the village of Frank and surrounding country for over two miles square to a depth of 100 feet or more, crushing out the lives of nearly 100 people, appals one.

Catastrophies can more often than not be traced to human negligence, but the cataclysm at Frank was another of those great acts of Nature, whereby parts of the face of the earth are transformed, valleys filled, and mountains and hills levelled. Nature is always at work; most of the time quietly and without ostentation, but occasionally her power is manifested in a manner which makes man feel even more helpless in her hands than a midget would be between his own thumb and forefinger.

Although we can do nothing to withstand Nature in her angry moods, we can do a great deal by turning our sympathy into practical channels to aid our fellow beings, who are suffering from her caprices.

When the disaster at Frank became known heartfelt sympathy went out to the bereaved and suffering people from every part of Canada, while the Dominion, the Provincial and Territorial Governments immediately set forces to work for the prompt alleviation of their distress.

On occasions like these the thousands of miles that separate one part of the Dominion from the other become as spans, distant towns and cities become neighbors, and in the spirit of brotherhood which is born of such occasions, are forgotten all things that divide us into sects, creeds and races.

Canada's Position and the British Grain Tax

THE decision of the British Government to repeal the import duties on grain and flour is scarcely less interesting to Canadians than was their imposition a year ago. It is true that Ministers of the Crown do not as a rule give any intimation prior to the bringing down of a budget as to what their intention may be in regard to proposed tariff changes. It is equally true that they do not in speeches or in replies to memorials of petitioners express views antagonistic to those of the latter. About two weeks before he delivered his budget speech the British Chancellor of the Exchequer was waited upon by the Parliamentary Committee of the Co-operative Congress, protesting against the duties on grain, sugar and tea, and asking for a "free breakfast table."

In his reply the Chancellor of the Exchequer said that one objection taken especially to the corn tax was that it was a protective tax. He would remind them, however, with regard to that tax, that it remained on at the very heyday of free trade, and if it was protective in a sense it had enabled the free-traders of the past to regard the smallness of the protection as something not worth counting, and that was the position now.

Had the Chancellor stated in plain terms that he was against making any change in the tax he could scarcely have spoken more plainly than he did. But the tax has evidently proved unpopular in Great Britain, and has no doubt been a factor in bringing about the defeat of Government candidates in bye-elections of the past year. It is evident, therefore, that in repealing the duty the Government was bent on securing its own safety.

When the duty of three pence per cwt. on grain and five pence per cwt. on flour was imposed by the British Government in April of last year, it was, naturally, not looked upon with favor in Canada. As far as grain was concerned, it was not expected to work much injury, but in regard to flour, the exporters in this country were quite perturbed, realizing as they did that the tax on flour meant relatively 3½c. higher protection on a barrel of flour than on the quantity of wheat necessary to produce a barrel of flour.

What the effect of the British tariff on our year's export trade to Great Britain will be, cannot, of course, be positively stated, in view of the fact that the fiscal year has not yet closed and that the figures are not, therefore, accessible. The figures for the eight months are, however, to hand, and judging from these the predictions of a year ago have not been altogether unrealized. On wheat the tariff has not, evidently, adversely affected our export trade with Great Britain, for we sent 17,934,101 bush. against 11,816,962 bush. during the corresponding eight months of 1902. In flour, on the other hand, there has been a slight decrease, there being 417,715 bbls. during the eight months ending February, 1902, and 412,480 bbls. during the same period in the present fiscal year. We know from the English milling journals that the duty on flour has been a help to the milling industry of Great Britain.

In one respect, the situation is now much the same as it was before the British tariff of last year went into force, but in another it is not the same. When the British Government put grain and flour on the dutiable list, there were a great many in Canada who believed that, indirectly at least, it would tend to help along the movement for preferential trade between Great Britain and Canada. In other words, that possibly, now a duty had been placed on grain and flour, it would be much easier to induce the British Government to exempt Canada and other British colonies from its operation than it would have been to have induced it to put a tax on foreign imports of grain and flour for the benefit of the colonies. There were many in Great Britain who believed the same thing. Canada, it was felt, in Great Britain as well as here, was deserving of some such consideration, in view of her voluntary and unsolicited preference of 33⅓ per cent. of the duty which she has since 1898 given to British products.

To them the action of the British Chancellor of the Exchequer comes as a severe disappointment. But that is not all. It is by no means improbable that it will add to the stock of arguments and increase the forces of those who are opposed to a continuance of the preference on British products.

The Opposition in Parliament has on more than one occasion expressed its disapproval of the preference unless the products of Canada were in turn accorded a preference in the British market.

It is true that the Government when introducing the preferential tariff, in 1897, declared that it was actuated by no desire of courting or receiving reciprocal considerations from the Home Government, but it is scarcely necessary to read between the lines of the last budget speech of the Canadian Minister of Finance in order to draw the conclusion that the Government is scarcely as decided on this point as it was.

Mr. Fielding has told us himself that the Government has been seeking to secure from the Imperial Government reciprocal treatment for Canadian products in the British market, and that in order to secure this privilege it was prepared to grant a still further reduction on British products; but further on in his speech occurred these significant remarks: "But if, putting aside other considerations, the British Government and people do not show any appreciation of the value of the preference, then so far as the British people are concerned they cannot complain if we should see fit to modify or change the preferential tariff."

At the colonial conference Mr. Chamberlain said that the Canadian preference, while of value as a mark of the good will of Canada and much to be appreciated for that reason, was not of much material value, and that before the question of the Mother Country granting a preference could be entertained at all it would have to be by the granting of some substantial additional preference on the part of Canada.

As we have already pointed out, the Canadian Government was prepared to grant a further increase in the preference for reciprocal consideration of Canadian

products in the British market, but now comes the budget speech of the new Chancellor of the Exchequer, repealing the tax on grain and flour. And with it vanishes the hope of any reciprocal arrangement with the Mother Country.

While this is disappointing, it can scarcely affect the welfare of Canada. It is not upon the aids or hindrances of the Mother Country, or any other country for that matter, that the prosperity of Canada depends. It altogether depends upon the manner in which we manage our own affairs; upon the energy and skill we exercise and practice in the development of our rich and unlimited resources.

We, not Great Britain, not the United States, are the architects of our national structure. This fact was impressed upon us over 12 years ago, when the McKinley tariff went into force in the United States, and the realization that we cannot expect any preferential treatment in the British market should further impress the fact upon us and stimulate us to the task of developing our resources and minding our own business. If, in the pursuance of this policy, it is better for us to continue the preference on British goods, let us do it. If not, then we have the remedy in our own hands. But we must remember that Great Britain is also minding her business.

A NEW INDUSTRY.

A rumor is current to the effect that a number of American capitalists have formed a company to establish a plant at Shawenegan Falls, Que., for the production of ferro-manganese on a large scale.

Manufacturers of steel are large users of ferro-manganese as an alloy to increase the hardness and density of steel, and the United States as well as the Canadian market will be catered to. The plant is to be installed immediately, though the company have arranged for temporary premises so that they may begin to manufacture in July.

The quality of the ferro-manganese will be of the highest, being electrically treated by a lately-invented process. Rock ore has been hitherto used, but the experiments with bog ore under this new treatment have resulted in a very fine quality of ferro-manganese. This is the commencement of a new industry in Canada which may develop into large proportions. The new company is said to have plenty of capital at the back of it, and having completed experiments at Niagara, decided to make their permanent home in Canada.

WAITING FOR THE BILL.

THE promises given by the Finance Minister indicate that the binder twine manufacturers will be allowed $6.82 per short ton of their raw material, the Manila hemp from the Philippines. This puts them on the same basis as the American manufacturer, as far as the raw material is concerned, though they are still under the disadvantage of having no duty on the manufactured article in Canada, against a duty of 45 per cent. in the United States. The manufacturers asked for a duty of 12½ per cent., which was refused them.

However, they have gained a good deal in having the conditions of buying the raw material improved. It is to be hoped, though, that the Bill granting our manufacturers the $6.82 per ton will be brought in soon, and that it be made to date back to cover the manufacturing operations during the past 10 months. Binder twine commenced to be manufactured for this year on September 1, 1902, and the factories will be going until about the middle of July. If the Bill does not date back there will be little or no benefit accruing to the manufacturers this year.

ROLLING MILLS TO CONSOLIDATE.

It was reported that the Montreal Rolling Mills and the Pillow-Hersey Manufacturing Co. were obout to consolidate, Mrs. J. H. Pillow having sold out her interests in the latter company to a gentleman largely interested in the Montreal Rolling Mills. The latter part is not contradicted, but we are informed that no amalgamation has taken place as yet, and negotiations toward that end have not proceeded beyond the initial stage. As to what will be done in the future no information is obtainable now.

The two companies in question make about the same class of goods, and it may be considered advisable in the future to combine them under one management. A statement was made by one of the prominent figures in the Montreal Rolling Mills Co. that the two concerns for the present would continue business as they are now doing, whatever may happen in the future.

SPORTING GOODS.

In next week's issue of HARDWARE AND METAL particular attention will be given to the sporting goods business. During recent years the interest taken by hardware retailers in this line has greatly increased, and more attention is paid to them to-day than ever before.

Sporting goods are, generally speaking, classed among the luxuries of life, and their sale varies according to the prosperity of the country. The good times prevailing in Canada have been manifested by a remarkable expansion in the sale of practically all lines of sporting goods.

As sporting goods trade responds to shrewd pushing, hardwaremen should at this season of the year pay particular attention to it. For this reason it is desired to make the pages in next week's issue as valuable and interesting to our readers as possible, so we would appreciate any suggestions or information likely to add to the value of the issue.

"COME FOR A SPIN WITH ME, MAUD."

Up with the first light of the sun, on with your sweater and away with me for a spin along the quiet country road—the hum of your wheel keeping time with the sweet rythm of bird song and rustling leaf. Out beneath the overhanging elms with their dark green foliage, dew-glistening in the slanting rays of a new day, floating past the daisy-dotted roadside sward, smoothly gliding on our silent steeds. Ah, fill your lungs with that clover-scented air. This is summer, this is a Canadian summer morning on a bicycle. A Canadian summer morning is enjoyable even in bed; to walk in it is delicious, but to glide swiftly, silently, smoothly along some quiet path is to condense into a few minutes a panorama of sensations so keenly delightful that they must be felt to be appreciated; being felt, they cannot be expressed in words.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, May 1, 1903.

HARDWARE.

THERE has been a fair volume of business in general hardware during the week, despite the fact that many orders have been held back awaiting the opening of the canal on Friday. This event, therefore, has affected the trade in two important particulars, as it always does each spring. It has interfered with deliveries from makers whose works are mostly situated along the canal bank, and has delayed shipments to country points. But, in addition to these interruptions, both jobbers and makers complain of backward deliveries from the United States. One leading manufacturer remarked that in many cases they had raw material on the way that they could not find any trace of owing to the generally congested condition of railway traffic, while a jobber asserted that he had been trying for the past three or four days to get some trace of several carloads of goods that had been shipped to him over a week ago from the States. This will give some idea of the difficulty the trade is experiencing in filling orders at present, and now on top of it all come the labor troubles on the wharf, which will seriously delay the forwarding of English and other European importations by the early steamers. There have been few changes in any of the leading staples during the week, but, in some specialties there have been trifling alterations.

CANT HOOKS.—Trade quiet and values as last quoted: No. 12, $10; No. 8, $11.50; No. 7a, $16; No. 6a, $14.50; No. 5a, $11.50.

AGRICULTURAL WRENCHES.—Values are as last noted with a quiet trade. We quote: No. 6, $9; No. 8, $10; No. 10, $12; No. 12, $14; No. 15, $24; No. 18, $30; No. 21, $36. Discount 70 per cent.

LAWN MOWERS.—Delayed deliveries are still the feature in these. We quote as follows: 10½-in. wheel x 12-in. cutter, $7.50; by 14-inch cutter, $8.00; by 16-inch do, $8.50; by 18-inch do, $9.00; by 20-inch do, $10.00. Star, 9-inch wheel by 12-inch cutter, $5.50; by 14-inch do, $5.75; by 16-inch do, $6. Daisy, 8-inch wheel by 12-inch cutter, $4.90; by 14-inch do, $5.10; by 16-inch do, $5.30. Philadelphia pattern, 7½-inch wheel by 10-inch cutter, $6; by 12-inch do, $6.50; by 14 inch do, $7; by 16-inch do, $7.50. Grass boxes are quoted as follows: 12 inch, $2.25; 14-inch, $2.25; 16-inch, $2.50; 18-inch, $2.50; 20-inch, $2.75. The discount on all the above is 50 per cent. off.

BARBED WIRE.—This material is going forward as fast as deliveries can be secured. We quote $2.80 per 100 lb. f.o.b. Montreal, and $2.67½ f.o.b. Cleveland. Carlots of 15 tons are quoted f.o.b. Cleveland at $2.45.

GALVANIZED WIRE.—There is a lot of this material awaiting the opening of the canal. We quote: No. 5, $3.70; No. 6, 7 and 8, $3.15; No. 9, $2.55; No. 10, $3.20; No. 11, $3.25; No. 12, $2.65; No. 13, $2.75; No. 14, $3.75. In carlots, f.o.b. Cleveland: No. 5, $2.20; Nos. 6, 7, 8 and 9, $2.15; No 10, $2.20; No. 11, $2.25; No. 12, $2.30; No. 13, $2.40; No. 14, $2.50. In less than carlots, 12½c. per 100 lb. extra is charged.

SMOOTH STEEL WIRE.—Fair inquiry for staple sizes of oiled and annealed. We quote as follows: Bright and annealed, $2.50 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE STEEL WIRE.—Discount is 25 per cent., with the following extras: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c. and ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—Remains much the same with discount 60 per cent.

PRESSED SPIKES.—There is a fair lot of these moving. Discounts are as before, 20 per cent. f.o.b. Montreal, Toronto, Hamilton, London, St. John and Halifax.

FENCE STAPLES.—Moving quietly. We quote: $3 per 100-lb. keg for galvanized staples and $2.80 for bright, with 25c. extra for 25 and 50 lb. packages.

CUT NAILS.—Supplies of cut nails are moderate as a rule with jobbers, some sizes, especially 3-in., being very scarce, but it is expected that stocks will be better assorted after May 1, as deliveries from the mills will be more regular. Prices remain $2.50 per keg.

WIRE NAILS.—Stocks of these also are not as well assorted as they might be with jobbers, but by the end of the week it is expected that this will be remedied. Carlots are quoted at $2.40 and small lots at $2.45 per keg f.o.b. Gananoque, Montreal, London, Hamilton, Toronto, Brantford, Windsor, Ont., and St. John.

HORSE NAILS.—Much as they were reported last week. We quote: "M" brand, "Oval" and "New City" heads, 55 per cent.; "Countersunk" heads, prices quoted on application. "C" brand, 40, 10 and 7½ per cent. off; "Monarch," 60 per cent. and "Peerless," 50 per cent.

HORSESHOES.—There is a quiet business passing. We quote as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.40; No. 1 and smaller, $3.65; snow pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.55; No. 1 and smaller, $3.80; featherweight, all sizes, 0 to 4, $5.10; toe weight, all sizes, 1 to 4, $6.35. Shoes, more than one size in a keg, 10c. per keg extra f.o.b. Montreal only.

RIVETS AND BURRS.—There is a fair trade doing. We quote as follows: Best iron rivets, section carriage and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS AND NUTS.—Some sizes of nuts are very scarce, in fact, are not to be had at present. We quote as follows: Norway carriage bolts, 55 per cent.; common, 50 and 10 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 and 10 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50, 5 and 10 per cent. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3½c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ½c. per lb. is allowed.

SCREWS.—The movement is fair, and orders are backward in many cases owing to difficulty of getting delivery from makers. We quote: Round head bright, 82½ per cent.; flat head bright, 87½ per cent.; brass, round head, 75 per cent.; brass, flat head, 80 per cent.

SHOVELS.—These continue scarce, and factories do not seem to be able to fill orders.

CORDAGE.—No further change is to note this week. We quote: Pure manila, 14c.; British pure manila, 11½c.; sisal, 11¼c.; double lathyarn, 10½c.; single lathyarn, 10c.

BUILDING PAPER.—This material is moving out quite freely. We quote as follows: Tarred felt, $1.75 per 100 lb.; 2-ply, ready-roofing, 90c. per roll; 3-ply, $1.15 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 55c. per roll; tarred fibre, 60c. per roll, O K and I X L, 65c. per roll; heavy straw and sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN WIRE CLOTH.—In fair request and steady at $1.12½ per 100 square feet.

FIREBRICKS.—The troubles on the wharf have delayed business in these. Prices remain at $16 to $22 per 1,000 for English and $17 to $22 for Scotch.

CEMENT.—There has been no quotable change in prices, but a lot of material, amounting possibly from 5,000 to 6,000 casks, is tied up on the docks owing to the strike, and this has interfered with business. We quote as follows: Canadian cement, $1.90 to $2.25; German, $2.25 to $2.40; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl. ex-store, and American, $2.20 to $2.40 ex-cars.

SHOT.—There is a good inquiry for shot. We quote: Ordinary drop shot, A.A.A. to dust, $6.50 per 100 lb.; chilled Nos. 1 to 10, $7 per 100 lb.; buck and seal, $7.50 per 100 lb.; ball, $8 per 100 lb. Trade discount, 15 per cent. f.o.b. Montreal, Toronto, Hamilton, London, St. John, N.B., and Halifax.

METALS

In heavy material and metals generally, as in lighter hardware, a leading feature is the difficulty experienced in procuring delivery of goods already ordered,

Canada Iron Furnace Co.

MIDLAND, ONT. Limited

owing to the fact that makers and large handlers are unable to keep up with their business. This is particularly the case in certain lines of small round iron, flats and bands, which are scarce with jobbers because they cannot get delivery. In the case of bar iron also it is understood that some makers finding it practically impossible to catch up with some urgent orders were obliged to place orders in England, so that, judging from this condition of affairs, prices are hardly likely to drop on an oversold market. Advices from England on Canada plates were easier this week. The labor troubles on the wharf have tied up a lot of this class of goods, large shipments of Canada and tinplates and galvanized iron being on board the first steamers, and prices all round have a steady tendency.

BAR IRON.—Makers are rushed with orders for this material and jobbers cannot get delivery as regularly as they wish. We quote: Merchants' bar, $2; horseshoe iron, $2.25; forged iron, $2.30.

BLACK SHEETS.—In good request and buyers find it difficult to obtain some sizes. We quote: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50; 8 to 20 gauge, $2.50.

GALVANIZED IRON.—Stocks lack assortment here and unless the strike is settled on the wharf many shipments will be seriously delayed. We quote: 28 Queen's Head, $4.50; Apollo, $10\frac{3}{4}$ oz., $4.30; Fleur de Lis, $4.15; Comet, $4.10; "Bell" brand, $4.05. For less than case lots, 25c. extra is charged.

LEAD PIPE.—In fair request. We quote 8c. for composition and waste and 7c. for ordinary, with discount of 30 per cent.

IRON PIPE.—There is a good trade doing and prices are firm. We quote as follows: Standard pipe per 100 ft., in lengths under 19 ft.: Black, $\frac{1}{4}$, $2.40; $\frac{3}{8}$, $2.65; $\frac{1}{2}$, $2.85, $\frac{3}{4}$, $3.65; 1-in., $5.20; $1\frac{1}{4}$, $7.35; $1\frac{1}{2}$, $8.95; 2-in., $12.55. Galvanized, $\frac{1}{4}$, $3.20; $\frac{3}{8}$, $3.45; $\frac{1}{2}$, $3.85; $\frac{3}{4}$, $5; 1-in., $7.20; $1\frac{1}{4}$, $10.05; $1\frac{1}{2}$, $12.20; 2-in., 416.85. Extra heavy pipe, plain ends, are quoted per 100 ft. as follows: Black, $\frac{1}{2}$, $4.20; $\frac{3}{4}$, $5.25; 1-in., $7.55; $1\frac{1}{4}$, 410.55; $1\frac{1}{2}$, $12.75; 2-in., $17.60. Galvanized, $\frac{1}{2}$, $5.20; $\frac{3}{4}$, $6.65; 1-in., $9.55; $1\frac{1}{4}$, $13.25; $1\frac{1}{2}$, $16; 2-in., $21.90. For threads and couplings on extra heavy 5 per cent. net is added. Trade discount, 5 to $7\frac{1}{2}$ per cent.

TINPLATES.—There is no change in prices and demand is fairly active. We quote: Charcoal, $5 to $5.25 and cokes, $4.25 to $4.50.

SOIL PIPE AND FITTINGS.—Discounts are unchanged as follows: Light soil pipe, 3 to 6-inch, 50 per cent.; medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.; extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—Continues strong in tone.

INGOT COPPER.—Rules firm at $15.50 to $15.75 per 100 lb.

INGOT TIN.—There is a fair inquiry with the range $33 to $33.25 per 100 lb.

PIG LEAD.—There has been some business in this and prices are steady at $3.50 to $3.75.

STEEL.—Fully maintains its firm tendency. Quotations follow: Mild, $2.05; sleighshoe, $2.10 to $2.20; tire, $2.15 to $2.25; spring, $2.85 to $3; reeled ma-

NOVA SCOTIA STEEL & COAL CO., Limited

NEW GLASGOW, N.S.

Manufacturers of

Ferrona Pig Iron

And SIEMENS MARTIN

OPEN HEARTH STEEL

linery, $2.75 to $3; toecalk, $2.60 to $2.75; machinery (iron finish), $2.10; mild steel, $2.05; square harrow, $2.15.

TOOL STEEL.—Firm in tone. We quote: Black Diamond, 8 to 9c.; Sanderson's, 8 to 9c., according to the grade; Jessop's, 13c.; Leonard's, 7½c; Jonas & Colver's, 10 to 20c.; "Air Hardening," 50 to 65c. per lb.

CANADA PLATES.—Cables have noted an easier feeling in England, but the fact has not affected spot prices. We quote: 52s, $2.60 to $2.70; 60s, $2.70 to $2.80; 75s, $2.80 to $2.85; full polished, $3.75 and galvanized, $4.25 to $4.35; galvanized, 60s, $4.45 to $4.55.

TERNE PLATES.—Rule unchanged at $7.75.

COIL CHAIN.—Supplies nothing special in the way of business. We quote: No. 6, 11½c.; No. 5, 10 to 10½c.; No. 4, 9 to 9½c.; No. 3, 8 to 8½c.; ¼-in., 6½ to 7c. per lb.; 5-16, $5 to $5.20; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4; ½, $3.95 to $4.05, 9-16, $3.85 to $3.95; ⅝, $3.65 to $3.75; ¾, $5 to $5.20; ⅞, $3.30; 1-in., $3.15 to $3.25. In carlots an allowance of 10c. is made.

SOLDER.—Prices are unaltered at 20c. for bar and 19c. for wire.

ZINC SPELTER.—Continues quiet at $6.25 to $6.50.

SHEET ZINC.—The tone remains firm at $6.75 to $7.

SCRAP METALS

Prices are steady but business is not very active. We quote: Heavy copper and wire, 10c. per lb.; light copper, 9c.; heavy red brass, 10c.; heavy yellow, 8½c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2½ to 2¾c.; iron, No. 1 wrought, $17 to $17.50; No. 2, $7.50 per ton; machinery scrap, $17.50 to $18; stove plate, $13; malleable and steel, $6; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6¼ to 6¾c. per lb.

HIDES.

A quiet trade is to note in these. We quote as follows: No. 1 hides, 8c.; No. 2, 7c.; No. 3, 6c. Calfskins, 9 to 11c.; lambskins, 75c.

RAW FURS.

Remain unchanged with little business doing. We quote:

ONTARIO MARKETS.

Toronto, May 1, 1903.

HARDWARE.

TRADE all over Ontario continues good in a sorting way, which would indicate that retailers are doing a business fully up to expectations. There seems to be, however, little inclination on the part of either retailers or jobbers to load up, although there is temptation in the conditions which have resulted in such slow deliveries of many lines by manufacturers. Among the lines which are hard to get at the moment are hinges, spades and shovels, poultry netting, wheelbarrows, malleable castings and many lines into which castings enter in process of manufacture. There is a shortage of lawn mowers in the United States as well as in Canada. This seems also to be true of wire nails, cut nails, plain galvanized and barb wire. The market generally, is firm, the feature being an all round advance on German goods. The jobbers are inclined to ask the advance, which will average about 10 per cent. at once. Among the lines affected are German locks, cutlery, carpenters' tools, bells, coat and hat hooks, poultry netting, shears, chains, graniteware, tinware, wire goods, can openers, oyster knives, lemon squeezers, meat cutters and cleavers, butter and cheese triers, thermometers, compasses, key rings, cork screws, curling tongs, tracing wheels, pencils, pliers, pincers, vises, wrenches, clippers, curry combs, ammunition, guns, revolvers, faucets, lanterns, lamp goods, skates and brushes. The competition of Canadian, American and British goods of the same line may prevent the full advance at once on the German goods, but the disposition of jobbers is to take as much of the advance as possible at once. There are no other changes to record, but some jobbers are giving their customers the tip that wire nails are likely to go up early in June, if not in May. A slight reduction has been made in Boeckh's bamboo brooms.

BARB WIRE.—Jobbers' stocks are running close, and as a strong demand continues, prices are steady. Base price is quoted as follows: $2.55 from Cleveland and 10c. less in carlots. From stock, Toronto, $2.80.

GALVANIZED WIRE.—There is an excellent demand and prices are firm, as follows: Nos. 6, 7 and 8, $3.15 to $3.35 per 100 lb.; No. 9, $2.50; No. 10, $3.20 to $3.40; No. 11, $3.25 to $3.45; No. 12, $2.65; No. 13, $2.75; No. 14, $3.75 to $3.95; No. 15, $4.30; No. 16, $4.55. Nos. 6 to 9 base from Cleveland are quoted at $2.27½ in less than carlots.

SMOOTH STEEL WIRE.—The demand for all lines continues satisfactory, with prices firm. The base price is $2.50 per 100 lb. Oiling 10c.; coppering 60c.; and tinning, $2 per 100 lb. extra. Shipping points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

COIL SPRING WIRE.—The demand for this line shows it to be increasing in favor. Prices are steady, and our quotations are as follows: No. 9, $2.75; No. 11, $3.40; No. 12, $2.95. Freight up to 25c. per 100 lb. allowed on 500 lb. or over. Carlots of 15 tons, 5c. less, with freight up to 20c. allowed.

WIRE NAILS.—Mills are reported to be catching up with orders, but there is a feeling that if the demand continues as it has been an advance is inevitable. The prices are firm. Quotations are as follows: Carlots, $2.40 and small lots, $2.45 per keg f.o.b. Gananoque, Montreal, London, Hamilton, Toronto, Brantford, Windsor, Ont., and St. John.

CUT NAILS.—The supply of this line, too, seems none too large, as a fairly steady business continues. Prices are steady at $2.50 per keg.

HORSE NAILS.—The demand is slightly better. Prices are unchanged. We quote as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "Monarch," 60 and 10 per cent. and "Countersunk" head, 60 per cent.; on "Peerless," 45 and 7½ per cent.

HORSE SHOES.—A quiet trade is doing. Prices are steady. We quote: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—Manufacturers have not yet caught up with the demand. Prices are firm. Our quotations are as follows: Flat head bright, 87½ per cent. discount; round head bright, 82½ per cent.; flat head brass, 80 per cent.; round head brass, 75 per cent.; round head bronze, 70 per cent.; flat head bronze, 75 per cent.

RIVETS AND BURRS.—The demand keeps strong and jobbers are unable to keep some sizes in stock or to get prompt deliveries from the mills. Our quotations are now: Iron rivets, 60 and 10 per cent. discount; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.

BOLTS AND NUTS.—A general activity is recorded, with shortage in many sizes. We quote: Carriage bolts, common ($1 list), 50 and 10 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron ($3 list), 55 and 10 per cent.; machine bolts, all sizes, 50, 5 and 10 per cent.; coach

screws, cone points, 66 2-3 and 10 per cent.

BINDER TWINE.—The demand is well up to the average and a steady market is reported. We quote: 650 ft., 13c.; 600 ft., 12c.; 550 ft., 11¼c.; 500 ft., 10½c.

CORDAGE.—An advance of ¼c. is noted in all lines except pure manila. A good trade is doing. We quote: Pure manila, 14c.; British pure manila, 11¾c.; sisal, 11½c.; double lathyarn, 11c.; single lath yarn, 10½c.

SPADES AND SHOVELS.—Some jobbers have had fairly good deliveries of shovels, but there is still a big shortage. Discount is 45 per cent. and the list price has been reduced $3 per dozen for Old's goods, $2 for Gray's and $1 for Burns'.

HARVEST TOOLS. A fairly good business is still doing with the discount steady at 60 per cent.

LAWN MOWERS.—The shortage is still recorded, but it seems that if retailers are patient they will, as a rule, have their orders filled in time for their trade. The prices are steady. Quotations are as follows: Woodyatt, 12 in., $7.50; 14 in., $8; 16-in., $8.50; 18 in., $9; 20-in., $10; Star, 12-in., $5.50; 14-in., $5.75; 16-in., $6; Daisy, 12-in., $4.90; 14-in., $5.10; 16-in., $5.30; Ontario, 12-in., $14.25; 14-in., $15.80; 16-in., $16.80; 18-in., $18.90; 20-in., $20.50; Philadelphia, 12-in., $6.50; 14-in., $7; 16 in., $7.50. Discount, 40 and 10 to 50 per cent.

BUILDING PAPER.—An improvement is noted in the demand. Prices are steady. Quotations are: Tarred felt, $1.75 per 100 lb.; 2-ply ready roofing, 90c. per roll; 3-ply, $1.15 per roll; carpet felt, $2.25 per 100-lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre 50c. per roll; tarred fibre, 60c. per roll, O K and I X L, 65c. per roll; heavy straw and sheathing, $30 per ton; slaters' felt, 60c. per roll.

RANGE BOILERS.—Business is less active. The prices are steady. We now quote: 18 and 30 gal., $5.50; 35 gal., $6.50; 40 gal., $7.50; 52 gal., $12.50; 63 gal., $19; 82 gal., $23; 100 gal., $31 and 120 gal., $37.

SCREEN DOORS.—The warm days early in the week have increased attention to this line. Prices are steady. Quotations are as follows: Screen doors, common, two or three panel, walnut stained, 4-in. style, $6.80; stained, yellow or green, $7; in natural colors, oil finish, $8.15; 3-inch style, 20c. per dozen less.

GREEN WIRE CLOTH.—The price continues stiff at the 10c. advance of last week, which made the quotation $1.50.

CEMENT.—Prices are stiff, and as the demand is fully up to the supply, an advance is prophesied. We quote as follows: Canadian Portland, $2.40 to $2.50; German, $2.30 to $2.60, and hydraulic, $1.50.

METALS.

The local market is practically unchanged, despite numerous fluctuations in London and New York. The pig iron market, which is being watched keenly by large buyers, shows a general expectancy of lower prices in the United States by the last half of the year. As a consequence, buying is confined largely to current requirements, which are, however, large, and prices are for the moment well maintained. The steel market continues firm, both for future and present delivery. The difficulty here is to get stocks. Copper quotations show a reduction of £1 7s. in London for the week, but this is largely speculative and the local market is not affected. Tin is about £1 higher in London, but now shows a downward tendency. Pig lead is easier in both London and the United States. Antimony and spelter are both higher in New York. The demand keeps up nicely for practically all lines.

PIG IRON.—The demand continues excellent for present delivery, showing a big consumption, but prices are not firm enough to induce much buying ahead. We quote: No. 2 at $22.50 to $22.75; No. 2 Summerlee, $25 on track, Toronto.

BAR IRON.—The demand is still active and a decidedly firm tone for spot business is shown. The base price is $2.05. For extras, cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft., by special agreement, according to length and size.

BLACK SHEETS.—There is a good trade doing. Prices are unchanged. We quote: Common, $3.15 for 28 gauge and dead flat, $3.50 for 26 gauge.

CANADA PLATES.—A better demand is noted with prices steady. We quote: All dull, $2.90 to $3; half polished, $2.85 to $3.10 and all-bright, $3.75 to $3.85.

GALVANIZED SHEETS.—Prices are unchanged. The demand is excellent. We quote: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 24 gauge; Bell brand, $4.30 for 28 gauge; Gordon Crown, $4.50 for 28 gauge.

TIN.—There is not much doing and the prices are unchanged throughout. Prices are weak at $33 to $33.25.

TINPLATES.—Prices continue to strengthen, yet there is no change. A good trade is doing. We quote: Charcoals, $4.75 to $5 and cokes, $4.25 to $4.50 per box.

COPPER.—Another decline of over £1 is noted in London, but the local market has not been affected. A good business is being done in sheets. We quote: Ingot copper, $15, and sheet copper, $21 to $22 per 100 lb.

BRASS.—The market is active, with prices steady. Discount is 10 per cent.

STEEL BOILER PLATES.—Prices continue firm. A big demand has been recorded this spring. We quote $1.96 f.o.b. Toronto.

TOOL STEEL.—The demand continues excellent. Prices are firm. Quotations are as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 10 to 20c.; ditto, "Air Hardening," 70c. per lb.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's "Special," 15 to 20c.

MACHINERY STEEL.—The demand is particularly active. Prices are steady at $2 to $2.05 f.o.b. Toronto.

LEAD.—A much better demand is reported. Prices are unchanged. We quote as follows: $3.50 per 100 lb. for pig lead and $3.75 for bar lead.

IRON PIPE.—Prices are fair, with a good trade doing. Quotations are: Per 100 ft.: Black pipe, ⅛-in., $3.25; ¼-in., $2.40; ⅜ in., $2.65; ½ in., $2.85; ¾ in., $3.65; 1-in., $5.25; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; 2½ in., $21; 3 in., $25; 3½ in., $32; 4 in., $38.

ZINC SPELTER.—There is a good demand and stocks are light. Prices are steady at 6¼ to 6½c. per lb.

May be purchased from all Prominent Hardware Merchants.

Walter Grose, Selling Agent, Montreal. Dominion Works, Port Hope, Canada.

ZINC SHEETS.—Quite a large business is being done. We quote the base price as follows: Cask lots, $6.75 to $7 and part casks, $7 to $7.25.

SOLDER.—The market is active. Prices are unchanged. Guaranteed half-and half is quoted at 18 to 19c., and wiping 17 to 18c.

OLD MATERIAL.

Copper has fallen to 12c. per lb. Zinc is ½c. higher. The general demand is fair, but the supply is somewhat limited. We quote as follows: Heavy copper and wire, 12c. per lb., light copper, 10c. per lb., heavy red brass, 10½c. per lb.; heavy yellow brass, 9c. per lb.; light brass, 6c.; lead, 2½c.; scrap zinc, 3½c.; iron, No. 1 wrought, $14 per net ton; No. 2 wrought, $5; machinery cast scrap, $16; stove plate, $11; malleable and steel, $7; old rubbers, 6½c. per lb. and country mixed rags, 50c. per 100 lb.

SEEDS.

Although the seed season is drawing to a close there is still a very good market, and it is expected that it will continue to be good right up to the close. Jobbing orders are still coming in, and although they are not as large as they were earlier in the season, are arriving in greater numbers. Red clover is quoted this week at $6 to $7.80 per bushel, a drop of from 30 to 50c. Timothy is quoted ex-ware house here at from $2 to $2.75 and alsike from $4.80 to $8 per bushel, a fall of from 20 to 25c.

HIDES, SKINS AND WOOL.

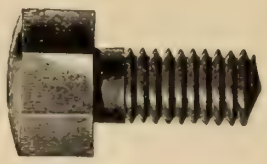
There is some change in this market since our last issue. Prices for calf-skins have come down in Chicago, and although the prices on the Toronto market have not changed, still, this has the effect of weakening the market. The wool and hide markets are slightly stronger than last week. The tallow market has weakened, the price having come down ¼c. per lb.; this is also caused by a weakening of the Chicago market.

HIDES.—No. 1 green, 7½c.; No. 2 green, 6½c. per lb.; No. 1 green, steers, 8c.; No. 2 green, steers, 7c. per lb.; cured, per lb., 7¾ to 8¼c.

CALF SKINS.—Veal skins, No. 1, 6 to 14 lb. inclusive, 10c.; No. 2, 8c.; No. 1, 15 to 20 lb. inclusive, 9c.; No. 2, 7c. Deacons (dairies), each, 60 to 70c.; sheep-skins, 40c. to $1.10.

WOOL.—Unwashed wool, per lb., 8 to 9c; fleece wool, 15 to 16c.; pulled wools, super., per lb., 15c.; extra, 18c.

TALLOW.—Tallow is very scarce. We quote 5¾ to 6c. per lb.



THE JOHN MORROW MACHINE SCREW COMPANY, Limited

WILL IT PAY?

Every business transaction is weighed by one standard.

Will it Pay?

If you handle ***oil of any kind*** and are considering the purchase of a

BOWSER

Self-Measuring

OIL TANK

Let us ask you a few questions:

Is it worth 10 cents a Day to handle your oil without waste?

Is it worth 10 cents a Day to sell your oil without loss of time and labor?

Is it worth 10 cents a Day to have no leaky, dirty measures and funnels to handle?

Is it worth 10 cents a Day to keep your oil room neat and clean?

We might propound a hundred questions equally as pertinent. If any one of these is worth 10 cents a day, is not the combination of the many worth more than the cost of a **Bowser Self-Measuring Oil Tank**, which will give you all these advantages?

Let us give you full particulars. Ask for Catalogue "A."

S. F. BOWSER & CO., Factory FORT WAYNE, IND.

MANITOBA MARKETS.

Winnipeg, April 27, 1903.

MARKET is active and there have been some few changes of price for the week, and more are in anticipation. Green wire cloth advances 10c. and is now quoted at $1.50. Turpentine has declined 3c. per gallon. Paints are firmer, and an advance is anticipated. Before the week is out a new list will be given the trade for axe handles, hay fork handles and similar goods, and the list will show an advance in sympathy with the advance in the American market. Tools are also advancing, although lists have not yet been changed.

NOVA SCOTIA MARKETS.

Halifax, April 28, 1903.

THE various wholesale hardware houses continue to do a good, average business, especially in the seasonable lines. The business, so far this year, has been above the average, and the prospects are bright for a continuance of the same throughout the balance of the year. Conditions are favorable all over the Maritime Provinces, and good orders are being placed with the expectation of a good summer's business. With general trade conditions reported good all over the Dominion, a buoyant feeling prevails and many people are building, rebuilding, or doing extensive repairs, which, under less hopeful conditions, would be put off until another season, or later. Money is being made in the country and is being expended freely.

* * *

If the amount of building operations in progress is any sign of a country's prosperity—and a good many people consider it one of the best signs—then Nova Scotia is very prosperous. Last year there was a heavy demand for all kinds of builders' materials, and this season's business, so far, in this line, has been quite as good with every prospect of continuance. Not for many years in the city has there been such a rush of building and remodelling so early in the season. On quite a number of buildings inside work has been carried on night and day for weeks. Similar activity is reported from other of the principal towns of the province. All lines of builders' materials are firm, with generally distributed advances.

* * *

Having tools and various farming implements have lately had a good sale, which still continues. These are all quoted at an advance on last season's prices. The last of the outfitting of the Bank fishermen, which has been quite heavy for the last few weeks, was done last week when some 75 of them were in port to get the last odds-and-ends of gear before departing for their season's work on the Banks. Each vessel, and there are 180 alone from the county of Lunenburg, fits out for the year at an expense of about $750 to $800, about one-half of which amount falls to the hardware line.

* * *

The trade was largely engaged last week in making up and shipping orders of glass and cement, the spring supply of which came by the s.s. Pharsalia.

* * *

There has been no change during the week in turpentine or linseed oil, both now in heavy demand.

R. C. H.

PERSONAL MENTION.

Mr. A. M. St. Arnaud, manager of The Canada Hardware Company, Limited, Montreal, is leaving on a tour through the various manufacturing sections of the United States. He will be absent from the city about eight or ten days.

Mr. Thomas Fortye, manager of The Peterborough Lock Co., Peterborough, Ont., was in Toronto last week. He reports business particularly brisk.

INDUSTRIAL GOSSIP

THE stock in the Manitoba Cement Co., Winnipeg, is selling well, and it is hoped the construction of the works will be finished in time to start operations before the close of the summer.

Rapid progress is being made in the erection of the cement factory for the Colonial Cement Co., Limited, Wiarton, Ont. The company hopes to be making cement before Christmas.

A feature of the building boom in Winnipeg is the remarkable demand at the moment for warehouse sites. As many as eight firms in Eastern Canada are reported to be looking for suitable property on or about Market, Princess, King or Arthur streets.

The Von Echa Company, incorporated in West Virginia, have been authorized to do business in Ontario as contractors for the construction of railways, buildings and general structural work. S. R. Ickes, Woodstock, Ont., represents the company.

The International Asbestos Co., incorporated in New York, have been authorized to do business in Ontario. This company proposes to mine, mill, develop and reduce ores of various kinds. H. S. Predmore, of Actonilite, Hastings Co., represents the company in Ontario.

The Empire Wall Paper Co., incorporated in New York, have been authorized to manufacture and sell wall paper and similar products in Ontario, having their headquarters in Toronto. Herbert C. Jarvis, of Toronto, represents the company.

Messrs. Gillies, Carleton Place, and Allen McLellan, Ottawa, are considering a proposal to locate cement works near Kingston.

MORE ELEVATORS FOR PORT ARTHUR.

D. D. Mann, of McKenzie & Mann, has announced that the Canadian Northern Railway will double its elevator capacity at Port Arthur during the coming season. The new buildings will be two in number, one a working and the other a storage elevator. Both will be fireproof and will have a total capacity of three and a half million bushels. As the Canadian Northern freight service from interior points to Port Arthur is now complete, this additional elevator capacity at that terminus should help to reduce to a large measure the grain blockade so usual in the fall between Manitoba points and the Great Lakes.

NEW COMPANIES INCORPORATED.

The Connell Anthracite Mining Co., Limited; headquarters at Toronto; directors, F. V. Clisdell, G. L. Gowlland, R. W. Eyre, J. W. Curry, R. E. Clisdell; capital $50,000.

The Chelsea Land & Building Co., Limited, to do real estate business, including the erection of buildings, bridges and other permanent improvements upon their property; directors, Col. W. R. Gartshore, John and George White, Joseph Dudley, R. W. Wilson and R. T. Wilson; head office London, Ont.; capital $75,000.

J. W. Curry, R. W. Eyre, C. Davidson, E. Wheeler, F. W. Nettleton, Toronto, under the style of Gowlland, Limited, to manufacture, acquire, sell and deal in all kinds of machinery, instruments, apparatus, devices and appliances, electrical or otherwise. The company will take over the business and patents of G. L. Gowlland and will have a capital of $200,000.

The Durham Mfg. Co., Limited, to buy, sell and manufacture cream separators and dairy appliances; directors, E. R. Broomall, W. A. Bradshaw, W. J. Parks, N. Somerville and E. Lackie; headquarters, Durham, Ont.; capital $50,000.

The Dundonald Mining Company, Limited, capitalized at $250,000, is incorporated.

The British Columbia Power and Manufacturing Company, Limited, Vancouver, is incorporated to carry on an iron foundry business.

The Trites-Wood Company, Limited, Victoria, is incorporated with a capital of $250,000 to carry on a general mercantile business.

The Berry Furnace Co., Ottawa; capital, $20,000; directors, Austin Berry, T. F. Sullivan, F. B. Wilson, Andrew Wilson and James D. McCann; to manufacture and sell furnaces, stoves, ranges, machinery and castings of all kinds.

The North Shore Copper and Smelting Co., Limited, Toronto; capital, $250,000; directors, A. T. E. Hamer, G. P. Crittsinger, B. C. Crittsinger, J. M. Brinker and W. C. Edwards.

The Canadian Fog Signal Co., Limited, Toronto; capital, $100,000; directors, J. P. Northey, F. S. Mearns, T. E. Northey, J. R. Bell, Toronto; to manufacture fog signals and similar apparatus.

McCLARY'S MARITIME TRAVELLERS IN CONVENTION.

SINCE the opening of the St. John, N.B., branch of The McClary Manufacturing Co. two years ago, their business has extended from the small trade to very large proportions, so much so that it warranted the purchase of a large building on Prince William street, which was further enlarged 60 per cent. last year in order to accommodate the increasing business.

No convention of the travellers or clerks had been held previous to the dates arranged of April 8 and 9, when all gathered together for day and evening sessions to consult with one another on different matters for the benefit of the business. These conferences have been found to do admirable service in the education of the clerks in bringing out the ideas of those who are thoroughly versed in special lines. This conference was particularly educational on account of the vast amount of information imparted to those attending the meetings.

At the close of the convention a supper was given to the travellers, clerks and friends in the Union Club, St. John, where an excellent supper was served by the caterers. The jolly party who sat around the handsomely decorated round table will all remember the pleasant evening spent with the McClary travellers and clerks.

It will be especially remembered by the handsome Russia leather menu cards lined with embossed raw silk, which will be a lasting souvenir of the occasion. The cover of the menu card was printed in gold and with a motto for all McClary's travellers, namely, "Hang On." The menu consisted of a tasty list of viands as follows :

Mock Turtle.
Olives.

Scalloped Oysters.
No Shell Game, for they are cooked by a Famous Army Range.

Entrees :
Creamed Sweetbreads.
Sherry Sauce and Mushrooms.
Live Broiled Lobster, French Dressing.
I'm also a Traveller and a good "hanger-on."

FILLET VEAL.

Vegetables.

Wine Jellies. Frozen Pudding.

Celery.

Cheese Balls. Cafe Noir.
Fruit. Nuts and Raisins.

The menu cards were made to represent a traveller's pocket order book, and a complete order book of similar pattern was furnished to each of the travellers on this occasion.

Suitable speeches and songs made the remainder of the evening pass very pleasantly, in which good advice, sociability and fun predominated, the following gentlemen taking part : John McAvity, H. M. Stanbury, J. J. Barry, C. B. Allan, F. Barr, Col. Markham, Allan Schofield, D. Geo. Clark and H. H. Beer. During the evening John J. Foot, the manager, briefly reviewed the good results of such conferences, and thanked the travellers and staff for the able manner in which they had assisted in making the business such a success, and alluded to his having opened this branch two years ago merely as an experiment and which is now a permanency.

A telegram was also read from headquarters at London, Ont., wishing the party a pleasant time and the good wishes of the headquarters for the continued prosperity of the Maritime Provinces and the business of this branch. Mr. Foot also intimated that conferences and social gatherings would be held annually.

LONDON BOARD OF TRADE.

THE annual meeting of the London Board of Trade was held on Friday night, C. B. Hunt, the retiring president, in the chair.

Many matters of importance to the Forest City were discussed, such as the proposed new belt line, fire protection and fire insurance, communication with western mining towns with a view to opening up trade. A resolution was passed favoring the removal of the duty on soft coal. At the suggestion of a communication from the Vancouver board a resolution was passed asking the Dominion Government to make every effort to secure the same preferential treatment from the South African colonies as may be accorded to the Mother Country.

Other items of business received attention, and it was determined that co-operation with outside boards would always be taken, where the interests of the country generally could be advanced.

J. A. Nelles, for 23 years Secretary of the London Board of Trade.

Officers for the ensuing year were elected as follows :

President—J. R. Minnhinick.
Vice-President—J. A. Carrick.
Secretary-Treasurer—J. A. Nelles.
Auditor—John Bowman.
Council—John Bowman, S. Sterling, W. M. Gartshore, James Mattinson, John McClary, F. G. Rumball, P. W. D. Broderick, A. B. Greer, J. W. Little, J. M. Dillon, G. D. O'Grady and W. J. Reid.
Board of Arbitration—W. C. Allen, Raymond Blandford, C. H. Hyman, S. St. L. McIntosh, John Pringle, C. B Hunt, G. B. Gerrard, A. O. Graydon, C. W. Leonard, John McClary, D. S. Perrin and A. H. Beddome.
Board of Examiners—I. J. A. Hunt, John Sutherland and W. C. Benson.
Western Fair Representatives—John Bowman, J. W. Little, A. B. Greer, Jas. Mattinson, W. J. Reid and Isaac Waterman.

The new president and vice-president were appointed delegates to the Congress of Chambers of Commerce to be held in Montreal, August 17 to 21. W. H. L.

TRADE IN COUNTRIES OTHER THAN OUR OWN.

SITUATION IN IRON AND STEEL

GENERALLY speaking, and taking the country as a whole, the markets for foundry pig iron have been quiet. A certain tonnage is being placed for early and prompt delivery, and cases of actual scarcity are not unknown. But little is being done for the second half, although the foundries are known to have made considerable contracts for castings for the third quarter, for which they have not covered as yet.

German furnace interests meet fresh inquiries either with indifference or refuse to quote for early delivery. English sellers seem more eager, and as illustrating the position we may note that Middlesbrough pig is being offered as low as 56s. 6d., c.i.f., in cargo lots, which would make the cost to import duty paid a shade over $17.75.

Basic pig has been offered at prices equivalent to $17, Birmingham, or $18, Virginia furnaces, without leading to business. Bessemer pig is being offered in Pittsburg as low as $19.50 at Valley furnace, for the second half.

Another period of scarcity has developed in the steel market, due primarily to the enormous demand for finished goods. The wire trade, particularly, is under enormous pressure, and while jobbers have been pretty well taken care of themselves, the manufacturing industries which purchase drawn wire are complaining a good deal of delays in deliveries. The demand for steel is so urgent that one of the large rail mills in the Central West has been switched over to billets. On the other hand, a modern mill in the Youngstown district is to close down for two months before long. In the east some additional steel capacity has become available recently, but the requirements seem so large that further importations are necessary. German billets are difficult to secure for early delivery, the majority of the works being filled up for some time to come. Recent prices are 85s., shipping port, and some business has been done. Importers note that the demand is not only from tidewater markets, but that inquiries are being received from the west also.—Iron Age.

GALVANIZED SHEETS IN GREAT BRITAIN.

A moderate inquiry has been experienced all around, but merchants in close touch with the continent report that inquiries from that quarter are disappointing. There are a few second hand sellers at below the quoted rates, but, generally speaking, the market remains steady, with prices much the same as those last reported: 24 gauge corrugated qualities are quoted at from £11 10s. to £11 15s., f.o.b. Liverpool.—Ironmonger, April 17.

BINDER TWINE IN THE STATES

During the past two weeks the eastern market has undergone some changes. The price on sisal and standard twine has been advanced ½c. per lb. by some manufacturers. Some concerns are only accepting orders for small lots, having about sold their entire product up to June 1, while others are not accepting any new business. Demand is active, while the amount of twine is limited, especially sisal and standard. Very few of the priceless orders taken before April 1, and guaranteed against International Harvester Co.'s prices, have been cancelled. The quantity of available twine is somewhat reduced, as some eastern mills are under contract to make twine for the combined companies in the West. The impression prevails to a considerable extent that a scarcity of twine may result from an unusually early harvest.—Iron Age, April 25.

TINPLATES IN ENGLAND.

The holidays have, of course, greatly interfered with business during the past week. Prices, however, are well maintained, and the market shows little, if any, change. Bessemer coke tins are selling at 12s. 1½d. and 12s. 3d. per box of I C 14 by 20 full weights, f. o. b. Wales, and 12s. 6d., 12s. 7½d., and 12s. 9d. per box, f.o.b. Liverpool. Manufacturers' quotations are unchanged, namely: Bessemer cokes, I C 14 by 20, 112 sheets, 108 lb., 12s. 3d. and 12s. 4½d. per box; Siemens-Martin steel, 12s. 4½d. and 12s. 6d. per box, f.o.b. Wales.—Iron and Coal Trades' Review, April 17.

STATE OF TRADE IN SHEFFIELD

Business has scarcely been resumed after the holiday stoppage, and consequently there is little to be said on the subject of the trade outlook. This year's Easter probably establishes a record in the steel trade for the length of the holiday stoppage, which, in the case of quite a number of leading works—not merely those which do Government business—extends from April 9 until April 20, a minority restarting on Wednesday or Thursday of this week. It appears that there were so few orders and inquiries on hand last week that managers, rather than run their engines and machinery for the sake of a meagre supply of work, resolved upon the more economical policy of a lengthy stoppage. That such a step was possible at this period of the year proves that the local steel trade must be seriously depressed, as undoubtedly is the case. The new quarter opened in the most disappointing manner, but it is yet to be seen whether orders ready to be given out have been withheld until after the holidays. At present there are no indications of a revival, although manufacturers take hope from the reports of improvement in the engineering and boilermaking trades, and the expanding tendency of the export returns, for it is felt that Sheffield must benefit by increased activity in other large centres of the metal industries. The Sheffield workpeople are experiencing a very bad year, the average earnings having undergone a continuous shrinkage for at least two months, followed now by a week's complete idleness. Full employment for any considerable proportion of working men is not considered to be likely this year, as the war-material department expect to be short of work so long as they are depending upon the Home Government.—Ironmonger, London.

BRITISH PIG IRON MARKET

The pig iron market has a somewhat weaker tone, for although the cases in which prices have quotably changed are comparatively few, the position all round is hardly as strong as it was a fortnight ago. In the Cleveland district the change is, perhaps, more pronounced than in other centres, makers having reduced their prices for foundry iron in sympathy with the reduction in the quotations for warrants, and, generally, they have this week asked about 50s. per ton for early f.o.b. deliveries of No. 3. Hematite iron has not been affected to the same extent by the fall in warrants, and East Coast mixed numbers are quoted at 58s., which is still, however, a relatively low price, as compared with that for Cleveland iron, or with West Coast hematite, mixed numbers of which are 61s. 9d. Little actual change in the position is reported from Lancashire, although the market is somewhat quieter, and in South Staffordshire makers now have orders of some weight on their books. In Scotland the Glasgow market has been less active, and on Wednesday the "bears" depressed Cleveland warrants, which alone were dealt in, to 49s. 8½d. cash. Scotch warrants were quoted at 54s. 9d. We append our usual table of stocks:

Public stores stocks in tons—

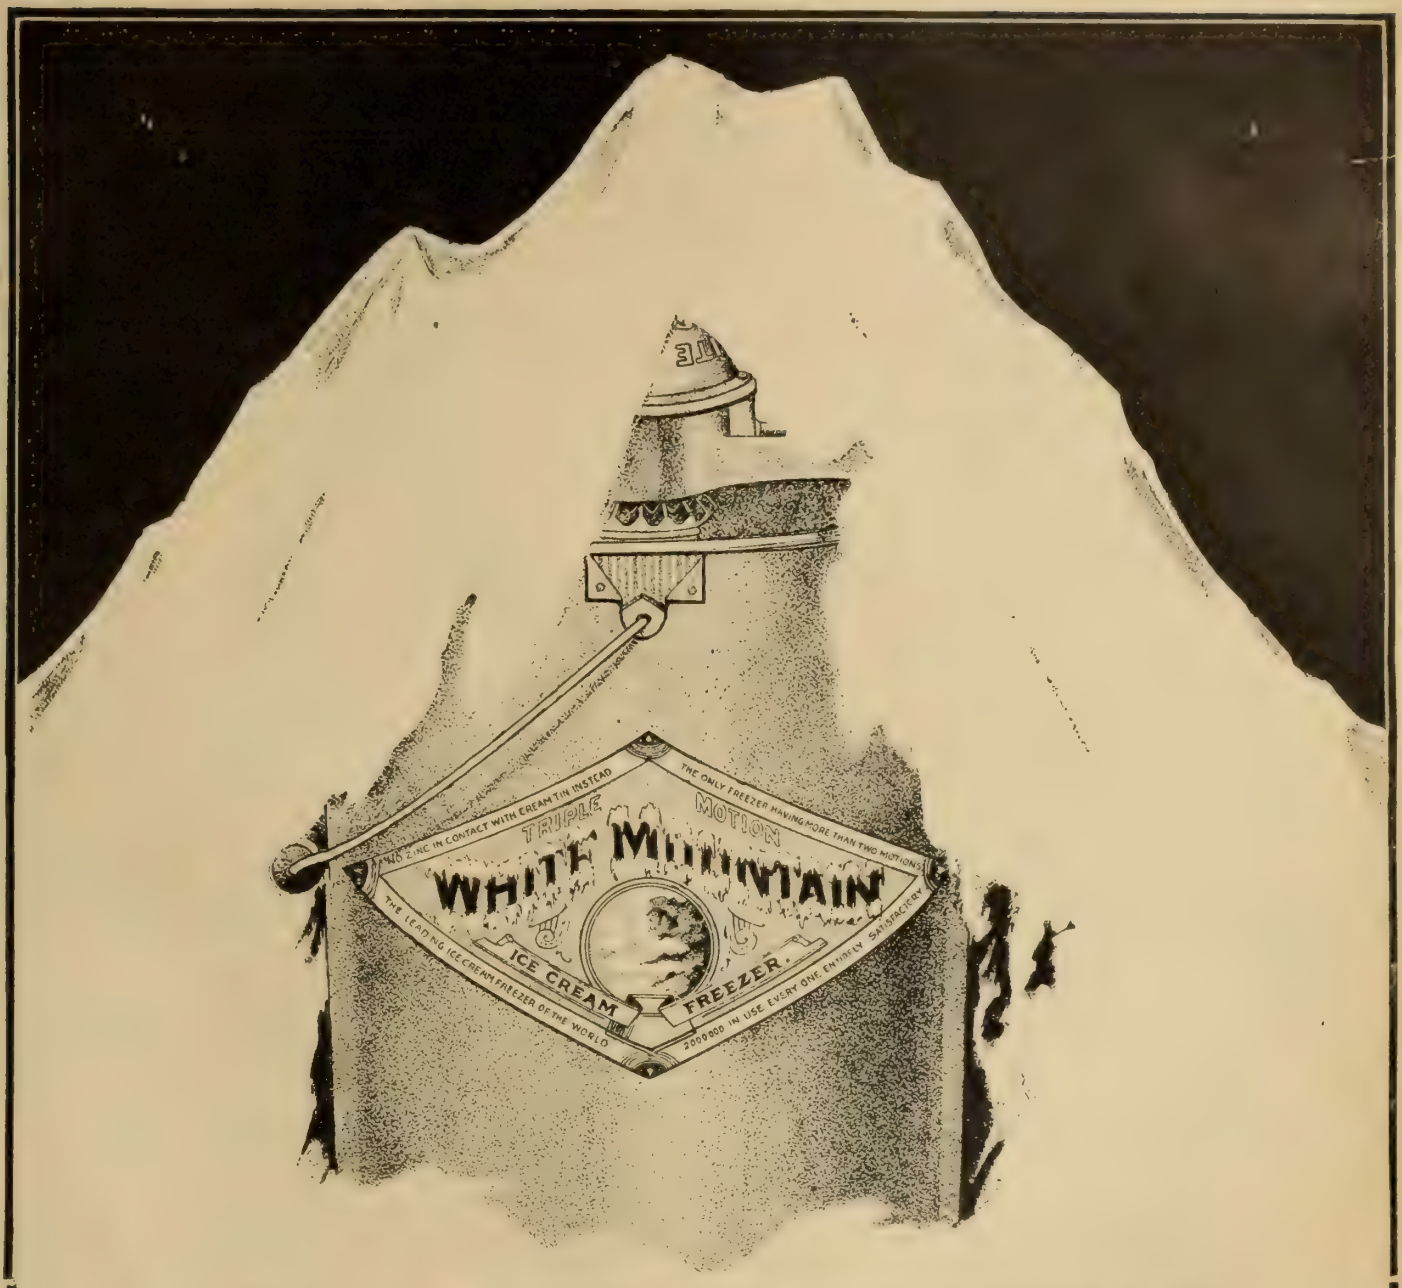
	April 16, 1903.	April 17, 1902.	Increase or Decrease.
Connal's at Glasgow	19,000	53,200	—34,200
Connal's at Middlesbrough	131,400	140,000	— 8,600
Connals at Middlesbrough, hematite	1,300	300	X 1 000
West Coast hematite	25,100	17,500	X 7,600
N.E.R. Stores Middlesbrough		360	— 360
Totals	176,800	211,360	34,560 · Net decrease.

—Iron and Coal Trades' Review, April 17.

CUT AND WIRE NAILS IN THE STATES

Manufacturers report a good, steady demand for cut nails, and are shipping their product as fast as made. There is still some trouble in getting steel promptly, and this delays shipments to some extent. Prices are firm but without change, and we quote: Steel cut nails, $2.15, base, in carloads and $2.20 in less than carloads; iron cut nails, $2.25, base, in carloads and $2.30 in less than carloads, plus freight in Tube Rate Book to point of destination, 60 days, less 2 per cent. off in 10 days.

The situation in the wire nail trade is very satisfactory, the mills having plenty of orders, and specifications on old contracts placed prior to the advance in prices are coming in very freely. There is some delay in getting prompt deliveries of wire nails, owing to the crowded condition of the mills and the scarcity of steel. The car situation is now satisfactory, and there is very little trouble from this source. The tone of the market is firm, and we quote: Wire nails, $2 in carloads to jobbers; $2.05 in carloads to retailers and $2.15 in small lots, f.o.b., Pittsburg, 60 days, or 2 per cent. discount for cash in 10 days; for galvanizing nails, 75c. per keg is charged and for tinning nails, $1.50 per keg extra.—Iron Age, April 25.



A MOUNTAIN OF ICE CREAM IS ANNUALLY MADE IN THE

White Mountain Freezer

Thousands of people who eat it say that it is the best cream, and suggest the "White Mountain" as the most complete and satisfactory ice cream freezer made. This popularity makes "White Mountain" Freezers easy and profitable to sell. The dealer who tries to sell any other is badly handicapped, for the dealer who sells the "White Mountain" gets the business. If you haven't a full knowledge of the "White Mountain" proposition, it is to your interest to investigate it now.

WE ARE SOLE AGENTS FOR THE DOMINION OF CANADA.

PAINT, OIL AND BRUSH TRADES

PAINT AND OIL MARKETS.

MONTREAL.

THE past week, owing to the warm, fine weather, has shown a distinct improvement in the volume of business for all lines in this department of trade, while the opening of the canal on Friday will release a lot of goods that have been held back on that account. In fact, makers here this week have been as busy as they could be satisfying the demand from Western as well as local jobbers, who were insistent upon early delivery. The turpentine market is down low already for present stocks, but as the low priced importations have not yet reached here, business at this week's reduction, noted below, represents a loss to the seller. It is expected also that a further decline will be witnessed by the end of next week unless there is a decided change in the interval in prevailing conditions.

GROUND WHITE LEAD.—Best brands, Government standard, $5.25 to $5.50; No. 1, $4.52½ to $5.12½; No. 2, $4.65 to $4.75; No. 3, $4.27½ to $4.37½; No. 4, $3.90 to $4., all f.o.b. Montreal. Terms, four months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$5 in casks, and in kegs, $5.25.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c.; No. 1, zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No. 2, 6c.

PUTTY.—We quote: Bulk, in barrels, $1.60; bulk, in 100-lb. packages, $1.85; bladders, in barrels, $1.90; bladders, in 100 or 200-lb. kegs, $2.05; 25-lb. tins or irons, $2; 12½-lb. tins, $2.30. f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax. Three per cent. discount for cash in 30 days.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50 and smaller quantities, $5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 1 to 4 barrels, 59c.; boiled, 62c.; raw, 5 to 9 barrels, 58c.; boiled, 61c. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gallon advance.

TURPENTINE.—Single barrels, 85c.; 2 to 4 barrels, 84c. Terms, net cash in 30 days.

BENZINE.—25 to 26c.

SHELLAC VARNISH.—Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS.—$1.20 to $1.40 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PURE CANADIAN PARIS GREEN.—Petroleum barrels, 16¼c.; per lb.; arsenic kegs, 16½c.; 50 and 100-lb. drums, 17c.; 25-lb. drums, 17½c.; 1-lb. packages, 18c.; ½-lb. packages, 20c.; 1-lb. tins, 19c.; ½-lb. tins, 21c.

PURE ENGLISH PARIS GREEN.—Petroleum barrels, 14½c.; arsenic kegs, 14½c.; 50 and 100-lb. drums, 15c.; 25-lb. drums, 15½c.; 1 lb. paper boxes, 16c.; 1-lb. tins, 17c.

TORONTO.

A good sorting business is reported, but a study of the business done has shown that the labor troubles are having an effect on the sales of all lines. This has already resulted in larger sales of prepared paints, to which reference is made in another column. The business in staples is comparatively light and is generally unsatisfactory. White lead and paris green are being sold at exceedingly close figures. Linseed oil is on a sounder basis, but is quiet at the moment. Turpentine sales are light. Prices throughout are unchanged. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, $5.10 to $5.25, No. 1, $4.62½ to $4.87½; No. 2, $4.25 to $4.50; No. 3, $3.87½ to $4.12½; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. packages; genuine dry white lead, in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $4.75 to $5; ditto, in kegs of 100 lb., $5.25 to $5.50; No. 1, in casks of 560 lb., $4 to $4.25; ditto, in kegs of 100 lb., $4.25 to $4.50.

LITHARGE.—Genuine, 6 to 6½c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6 to $6.25.

SHINGLE STAIN.—In five-gallon lots, 60 to 85c. per gallon.

PARIS WHITE.—90c. to $1 per 100 lb.

WHITING.—65c. per 100 lb; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35 to 37c.; in less than cases, 40 to 42c per lb.

LIQUID SHELLAC.—Pure orange, in bbls., $2.30 to $2.40; white, $2.35 to $2.45 per gallon; in less quantities, 10c. extra.

GLUES.—Broken sheet, in 200-lb. bbls., 8 to 8½c. per lb.; cabinet glue, in bbls., 11½ to 12c.; emery glue, in bbls., 17c.; bookbinders', ground, 10½c.; finest American, white, 19c.; No. 1 American white, 15c. per lb.

PUTTY.—Bladders, in barrels, $2.10; bladders, in 100-lb. kegs, $2.25; bulk in barrels, $1.80; bulk, less than barrels, and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.75.

PARIS GREEN.—Petroleum bbls., 13 to 15½c. per lb.; arsenic kegs, 13½ to 15½c.; 50 and 100-lb. drums, 14 to 16c.; 25-lb. drums, 14½ to 16½c.; 1-lb. packages 15½ to 17c.; 2-lb. packages, 17 to 18c.; 1-lb. tins, 16 to 18c.; ½-lb. tins, 17 to 19c.

PLASTER PARIS.—New Brunswick, $2 per barrel.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls. and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gallon; No. 1, $1.10 per gallon.

BARN PAINTS.—65 to 70c. per gallon.

CASTOR OIL.—English, in cases, 8 to 9c. per lb.; and 9 to 10c. for single tins.

LINSEED OIL.—Raw, 1 to 2 bbls., 61c.; boiled, 64c.; 3 to 5 barrels, raw, 60c.; boiled, 63c.; 6 to 9 barrels, raw, 58c.; boiled, 61c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 barrels and over of linseed oil sold only f.o.b., Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 77c.; 2 to 3 bbls., 78c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

WINDOW GLASS.

MONTREAL.

There is a good movement in glass and the prices continue unchanged: First break, 50 ft., $2; second, $2.10 for 50 ft.; first break, 100 ft., $3.80; second break, $4; third break, $4.50; fourth break, $4.75.

TORONTO.

Import orders are now being taken into stock by some jobbers. Prices are firm, with a good demand recorded. Quotations are as follows: Star, under 26 in., $3.80; 26 to 40 in., $4; 41 to 50 in., $4.50; 51 to 60 in., $4.75; 61 to 70 in., $5; 71 to 80 in., $5.50. Toronto, Hamilton and London. Terms, four months, or 3 per cent., 30 days.

DRYING AND LASTING QUALITIES OF OILS.

A paper on "Paints" was read before a recent meeting of the American Chemical Society of New York, by Mr. Houston Lowe, of Dayton, Ohio, illustrated by samples of painted strips or panels, showing the durability of oil alone and mixed with various pigments, says The

Don't Put Your Foot in it

by offering an inferior line of paint to your customers. Although your temporary profits may be a bit larger, the loss of your customers' confidence will in the long run prove most costly. Sell the

"Ark Brand" Paints

and have every customer an advertiser for your superior line. **"ARK BRAND" PAINTS** are honest paints; they will not peel, crack or chalk; they cover a larger space, last longer, and in the aggregate are the most profitable paints for your customers to use and for you to sell.

Write to-day for information concerning **"ARK BRAND" PAINTS**, and why they constitute the most profitable line to carry.

JOHN LUCAS & CO.

Paint, Varnish and Color Manufacturers.

NEW YORK *PHILADELPHIA* CHICAGO

DRY COLORS—The Lucas line is [illegible]
Originators of the famous [illegible]

Trade Oil and Drug Review. Mr. Lowe said he was sure that the slower drying oil in paint was the more durable, and that he was averse to the use of boiled oil in any but varnish paints. Pigments are used not only for color, but also to prevent of the application and retention on the surfaces painted of more oil; also for the mechanical protection which the pigment furnishes to the oil. Two strips were shown on which the same measured volume of oil and mixed paint were applied successively, and dried until it had all been applied. It required 24 coats of the oil alone and 10 coats of the paint to get the equal volumes on the strips. Pigments are classified as inert and as combining with the oil (saponification); oxide of iron and silica being typical of the former, while all the lead pigments are of the latter character. Of the lead pigments red lead makes the most insoluble soap. Mr. Lowe said that one important difficulty in getting good results with paint was the "personal equation" of the painter. To such an extent is this so that a poor paint applied by a sensible and competent painter will give better service than a good paint applied by a careless operator.

These papers caused a lengthy discussion, in which the porosity of films of linseed oil was maintained by some members and denied by others.

THE PAINT TRADE AND THE UNIONS

There has been a widespread spirit of restlessness manifested during the present season by all workmen employed in the building trades, especially in the larger cities. Strikes and threats of strikes have been of everyday occurrence.

In some cases the wage question was paramount, and, as a rule, the advances asked for have been given. In other cases the cause of trouble has been an attempt by the unions to establish the right to dictate to the employers. The absurd length to which this attempt has been carried is well illustrated in St. John, N.B., where a body of painters struck because their employer would not discharge an apprentice who had become 21 years of age. The union rules are, it seems, that no apprentice must be 21 years old and the men struck to force the employer to alter this rule of his employes.

The result of all this striking and of the increased prices charged by master painters to make up for the higher wages has undoubtedly had its effect on the amount of painting done and the quantity of paint used.

Recognizing this development, paint dealers have devoted especial attention to the sale of ready mixed paints. It is better, they argue, to sell prepared paints to householders and induce them to use it themselves than to lose the business altogether because the householder decides not to have his house or verandah painted because of the high prices painters are charging for their work.

ADULTERATED TURPENTINE.

Editor "Hardware and Metal": In the interest of the trade who handle spirits of turpentine, perhaps you will be willing to say that a few days ago a sample of turpentine was sent to me in a sealed package, representing that it had been taken from a 10-gallon package in the presence of two or three witnesses. The package had been received from a Toronto house properly sealed with ordinary matter, such as plaster paris. As the price named was considerably less than the price at which turpentine was being sold by the regular dealers, I thought it wise to have it analyzed, and submitted it to Thomas Heys & Son. Their report will be found below, and I merely wish to call attention to the fact that they indicate that 27 per cent. corresponds to petroleum and 6 per cent. of a resinous matter, leaving about 67 per cent. of pure turpentine.

E. FIELDING.

Toronto, April 30, 1903.

Specific gravity of sample as received....	.845
Distilate at 105 to 150° C.....27.00 p. c.	Sp. Gr. .798
Distilate at 150 to 180° C.....67.00 p. c.	Sp. Gr. .856
Resinous matte:..... 6.00 p. c.	
100.00 p.c.	

The distilate of 27 p. c. at 105 to 150° corresponds to petroleum and possibly a little rosin spirit.

Yours truly.

(Signed) THOMAS HEYS & SON.

PAINT AND OIL NOTES.

About 10,000 casks of kerosene oil, gasoline and naptha were destroyed by fire at The Dominion Iron and Steel Company's warehouse, George's River, N. S.

The discovery of oil in Southeast Kootenay is arousing widespread attention. Claims have been staked by prospectors from Ontario and various parts of the United States, as well as by residents of the district.

SMALLER FLAX AREAS.

"Considerable interest is being manifested in the prospective flax area in the Northwest this year," says The Duluth Commercial Record, "and while little is or can be known that will warrant exact figuring, it is quite generally assumed that a large increase is possible. Several reasons are advanced for expecting a decrease, the principal one being that farmers prefer wheat at 70c. or barley at 40 to 45c., than flax at around a dollar. Other reasons are that continued flax growing has exhausted the soil for that purpose, and the general spread of the so called flax blight has made it an uncertain crop at best. Taking North Dakota as a whole, it looks reasonable to expect a flax area not much under 2,000,000 acres. But the fact should not be overlooked that, with an area of not over 1,500,000 acres, it will be possible to raise a crop as large as was raised last year. Under any conditions that can now be foreseen Minnesota should have 700,000 to 800,000 acres and South Dakota about half of that. A total area, including Iowa and the Southwest, of 3,250,000 acres or upward would seem assured a decrease of about 500,000 acres from last year."

The World's Standard.

When we say that BRANDRAM'S B.B. GENUINE WHITE LEAD is the best in the world it may sound like an extravagant statement, but we are ready to stand behind our assertions and can produce proof positive.

This being the only white lead used in "ANCHOR" LIQUID PAINT what is the natural inference?

We leave you to draw your own conclusion, then think what the agency means.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

YOUNG & MORRISON, general merchants, Thamesford, Ont., have assigned to C. B. Armstrong, and there will be a meeting of the creditors on May 1.

Henry Gould, grocer, London, Ont., has closed up.

Thomas O'Leary, general merchant, of Thurso, Que., has compromised.

L. J. Bourget, general merchant, of Lauzon, Que., has assigned to V. E. Paradis.

A meeting of the creditors of the Sunlight Gas Co., Limited, Montreal, will be held on May 8.

M. Boisvert, sporting goods merchant, Shawenegan Falls, Que., has assigned to Kent & Turcotte.

Fred. C. Dezouche has been appointed curator to Thomas Mosseau, general merchant, Campbell's Bay, Que.

W. Simard, general merchant, St. Paul's Bay, Que., is offering to compromise at 30c. on the dallar cash.

Gagnon & Caron have been appointed curators for N. Gagnon & Fils, casket manufacturers, St. Celestin, Que.

An adjourned meeting of the creditors of the National Box Co., Limited, Wiarton, Ont., will be held on May 4.

The Hollywood Paint Co., Limited, Hamilton, has assigned to C. S. Scott, Hamilton, and has applied for a winding up order.

Miron & Lalonde, general merchants, of Russell, Ont., have assigned to Wm. A. Cole, and a meeting of the creditors will be held on May 7.

George H. Karstedt, tinsmith, Georgetown, Ont., has assigned to C. B. Armstrong, and a meeting of the creditors will be held on May 4.

INCORPORATIONS AND CHANGES.

Jourdain & Brien, painters, Montreal, have been registered,

T. Deschambault & Co., painters, Montreal, have been registered.

The Winnipeg Stone Co., Winnipeg, have been incorporated.

The Canadian Fog Signal Co., Limited, Toronto, have been chartered.

The W. A. Dunn Lumber Co., Limited, Toronto, have been chartered.

A. Knowles, general merchant, Wapella, Ont., is no longer in business.

The United Typewriter Co., Limited, of Montreal, have been registered.

W. T. Farrell, sawmiller, Vancouver, B.C. has leased his mill to B. Flater.

The Durham Mfg. Co., Limited, Durham, Ont., have obtained a charter.

The Taplin Anderson Co., Limited, Novar, Ont., have been chartered.

The Imperial Granite Co., Limited, Toronto, have obtained a charter.

The Martin Stanley Piano Co., Limited, Toronto, have obtained a charter.

The Goderich Organ Co., Limited, Goderich, Ont., have obtained a charter.

The Connell Anthracite Mining Co., Limited, Toronto, have been chartered.

The Chelsea Land & Building Co., Limited, London, Ont., have been chartered.

Letson & Burpee, machinery manufacturers, Vancouver, have been incorporated.

Philvert Ferdinand, tinsmith, Buckingham, Que., has been succeeded by A. Cote.

Coffin & Grandjean, electric plating makers, Sutton, Que., have been registered.

The North Shore Copper & Smelting Co., Limited, Toronto, have obtained a charter.

The British American Locomotive Works, Limited, Toronto, Ont., have been chartered.

The Trites-Wood Co., Limited, general merchants, of Fernie, B.C., has been incorporated.

The Sault Ste. Marie Coal & Wood Co., Limited, Sault Ste. Marie, Ont., have obtained a charter.

S. Walsh, agricultural implement merchant, Arthur, Ont., has been succeeded by Moore & Hamilton.

Gerber, Francis & Henry, agricultural implement merchants, of Chatham, Ont., have been succeeded by King & Gerber.

The Berry Furnace Co., Limited, Ottawa, have been incorporated.

Letters patent have been issued increasing the capital stock of The Canadian Rand Drill Co., Sherbrooke, Que., to $150,000.

SALES MADE AND PENDING.

William Nesbitt, general merchant, of Wellwood, has sold out to Wm. Walker.

M. N. Olsen, general merchant, Morningside, has sold out to Mathias & Walker.

S. B. Todd, carriage maker, Uxbridge, Ont., is advertising his business for sale.

W. A. Barons, general merchant, Gladstone, Ont., has sold out to Victor Jackson.

The assets of the general business of Geo. B. Reid, Glacefield, Que., are to be sold.

Alfred Brewer, carriage maker, Cowansville, Que., is offering his business for sale.

A. Stewart, blacksmith, Blackfalds, has sold out.

W. J. Avery, wagonmaker, Medicine Hat, N.W.T., is advertising his business for sale.

Thomas McKee, general merchant, of Mapleton, Ont., has sold out to W. A. Barons.

William Carter, general merchant, of Minto, has sold out to R. W. Frank & Company.

The general stock of A. C. McDonald & Co., Carman, Man., is advertised for sale by tender.

Freeman Bros., general merchants, of Freeman, Ont., have sold out to Thompson & Lorrimer.

Henry Maurer, blacksmith and carriage maker, Hanover, Ont., has sold out to N. A. Bentinger.

The assets of the general business of Mrs. P. Cloutier, St. Eugene, Que., were sold on April 27.

Martin Anderson, general merchant, of Slocan Junction, B.C., is advertising his business for sale.

A. R. Fanning, grain and hardware merchant, Newdale, Ont., has sold his business to George Clark.

The Sheppard Hardware Co., Toronto, have sold out to N. Prichard, and will take possession on June 1.

PARTNERSHIPS FORMED AND DISSOLVED.

Lepoirer & Co., painters, Montreal, have dissolved, and there will be a new registration.

Noble & Philon, general merchants, of Prince Albert, have dissolved; J. W. Philon continues.

J. Waterson & Co., general merchants, Montreal, have dissolved, and there will be a new registration.

FIRES.

R. J. Husband, painter, Rat Portage, Ont., has been burned out.

T. Underwood, builder, Calgary, N.W.T., has sustained a loss by fire.

The Swan River Lumber Co., Fisher's Siding, Man., had their sawmill burned.

The Kootenay River Lumber Co., Nelson, B.C., sustained a loss by fire; insured.

BOOK NOTICE.

Kutner's Commercial German. By Arnold Kutner, High School of Commerce, New York City. Cloth, 12mo, 404 pages. Price, $1.00. American Book Company, New York, Cincinnati and Chicago.

This book is adapted for use in commercial schools and in commercial courses of high schools, and is the first to introduce American students to a foreign language by means of its commercial vocabulary. Part I contains the elements of commercial German. Each of the sixteen lessons includes a reading lesson, special vocabulary, exercises on grammar and questions. Following these are thirty-one brief grammatical tables of the principal parts of speech, with references to the reading lessons which illustrate them. Part II is intended to widen the commercial vocabulary by means of reading selections dealing with German business customs and institutions. It is also devoted to the study of commercial correspondence, business forms, documents, newspaper articles and advertisements. A vocabulary and a list of strong, mixed and irregular verbs complete the book, which will no doubt be most acceptable to teachers of German in commercial courses.

Keeping up the Assortment.

The fellow in the picture is in the employ of one of those merchants who are **wide awake** to the fact that to meet th demands for **ALABASTINE** which come at this season of the year, he must have an assortment of all shades in stock.

CUSTOMERS for ALABASTINE, or anything else for that matter, who have to go elsewhere to get what they want may be lost altogether. At any rate, the opportunity is given the other dealer to explain how people can **always get** everything they call for at **his** store, etc.

ALABASTINE is the goods that are in demand. It has stood the test of time, and people know it is all right. It is made in Canada, by Canadian labor and from rock taken out of Canadian mines. Is your assortment complete?

HEATING AND PLUMBING

LACK OF CONFIDENCE AN OBSTACLE.

IN these days of keen and sometimes unwise competition, it is difficult to create a feeling of confidence amongst business men engaged in the same line of trade. The old fashioned golden rule of "Do unto others as you would wish to be done by," seems to have given place to the more up to date idea of what may be called the Steel Rule, "Do the other fellow or he will do you." Any legitimate effort to offset this condition of affairs should be encouraged, and, following out the idea that man is a social animal, it would seem that the more men can be brought together in social intercourse, the better it will be.

There is no better way of doing this than to meet each other around the festive board. If ever a man is at his best, that is the occasion. Following out this line of argument it has been one of the main features of the National Master Plumbers' Association to bring the crafts men together in this manner.

Of the many occasions of a social nature, none have been more successful than the recent banquet of the Toronto association, which was held at McConkey's. It was gotten up on very short notice and the expense was borne entirely by the association, no assistance being asked from any outside source. One could not but be struck with the feeling of independence which prevailed. There is nothing like genuine independence to bring out true manhood. The guests of the evening must have felt that they were guests in the best sense of the word. While Toronto may have created a precedent in local banquets, it is said that London holds that honor in convention banquets. All who had the privilege of attending either or both of these banquets, must admit that they were among the most successful held. There is no doubt, now that the fact has been established that these banquets can be held without outside assistance, that future functions of this nature will be carried out on that line. It is worth considering.

WATER PIPES FOR EXPORT.

Thomas Piggott & Co., Limited, of Birmingham, England, have just obtained an order to supply about seven and a half miles of lap-welded steel pipes for the water supply of the Kolar gold fields, India, an exchange. These pipes are in 15-ft. lengths, and are constructed from a single plate of mild steel, rolled into cylindrical form and lapwelded by a patented system. Piggott & Co. were the first to introduce this type of conduit, which is in large demand abroad, especially in cases where the cost of freight for cast iron mains is prohibitive. A further saving in transport is also effected, when these light pipes are exported, by varying the diameter of the pipe line, and nesting the different sizes together for shipment.

WROUGHT STEEL REGISTERS AND VENTILATORS.

HART A. COOLEY CO.'S wrought steel registers and ventilators are lightweight and unbreakable. All sizes have a uniform depth—open, 2 5-16 in.; closed, 1 1-2 in.—measured under face plate, which, with border, is black japanned. The operating slide is made of very heavy gauge steel and is especially strong to insure against breakage and

sharp edges. They derive great supporting strength from the arched form of fret work, as well as from strengthening braces underneath, the latter being set guaranteeing a free and positive operation for all time.

Face plates are made from thin metal, with finely rounded fret work, free from cutely riveted to register box.

Face plates are sold separate from register boxes for side wall and ceiling use only.

Border frames are provided with lugs for centering and holding in floor openings, and also with means for holding register box securely in place. H. S. Howland, Sons & Co., Limited, 37-39 Front street west, Toronto, have these registers and ventilators in stock.

ANOTHER VERSION.

Dr. J. R. Kaye, when lecturing on "Plumbing in Relation to the Public Health," before an audience of English plumbers, gave the following parody on Longfellow's "Psalm of Life:"

Tell me not in scornful numbers
Sanitation is a dream;
Woe be to the man who slumbers,
Thinking plumbers what they seem.

Pipes are leaky, gas injurious,
If the grave is not our goal;
All past fittings are but spurious,
Carefully replumb the whole.

Baths, traps and closets all remind us
Sanitation is sublime,
Defective working of the plumber
Henceforth shall be held a crime.

A GOOD SOFT SOLDER.

In answer to an inquiry, C.H.F. writes to The Metal Worker saying: A good soft solder is composed of 50 parts bismuth, 25 parts tin and 25 parts lead. This mixture melts at 200 deg. Far. Another good solder is composed of 50 parts bismuth, 30 parts lead and 20 parts tin. This will melt at 190 deg. Far. The solder that I use in soldering Britannia metal and block tin pipes is composed of 2 parts of tin and 1 part of lead. I do not know the melting point of this mixture, but I do know that it melts in the blow pipe flame at many degrees lower temperature than either tin or Britannia metal, and it is nearly of the same color. Care must be taken in mixing these solders to keep them well stirred when pouring into molds. Care should also be taken that metal which melts at a higher temperature be melted first and then allowed to cool to the melting temperature of the next metal to be added, and so on. Articles to be soldered with these solders should be joined with a blow pipe to get the best results, but if a copper is used it must be drawn out to a long, thin point. For a flux use powdered rosin or sweet oil.

MUCH LARGER PREMISES.

The Eureka Mineral Wool Co., who recently removed from Bay street to 71 York street, are greatly pleased with their new premises. They occupy the ground floor and basement, which gives them about five times the floor space they formerly occupied. This firm makes a specialty of pipe and boiler covering, engine packing, roofing and insulating papers, and under the capable management of James M. Sinclair, is making itself a factor in business in these lines.

FARMER'S PAINT

The farmer wants a paint for his barn, he doesn't want to pay a big price, he can't afford it. Sell him

SHOULD THE WATER BE METRED?

ONE of the problems that is difficult of solution in all large cities, is how best to prevent the waste of water. Toronto is no exception to the general rule. When it is taken into consideration the number of gallons that is supplied per head, there is not much ground to question the statement that the waste is a very large percentage. In all cities where power has to be created to produce and supply the pressure it is a serious proposition and a question that requires more than a passing thought.

Toronto has pretty well demonstrated to a certainty just how much water can be pumped with a given quantity of coal; there seems very little to expect in the reduction of cost along that line. In fact, there would appear to be an uncertainty just whether the cost of supply would not increase. Our unpleasant experience from the shortage and the high cost of coal is too recent to need recalling, and only goes to show really how serious the subject is. Instead of the percentage growing less as the city grows, it would appear to be greater the larger the city.

The water commissioners of New York have reported that that city loses $1,500,000 a year through, they claim, defective taps. They further state that if leaking mains were considered, the amount would be greatly increased. They arrived at their conclusions by dividing the city into districts and metreing the flow from the mains into those districts. While it is impossible to arrive at a positive certainty just how much the waste really is, their conclusions would be fairly accurate.

This subject has engaged the attention of the committee of the Council of the City of Toronto having that matter in charge a great many times, and does not seem to be any nearer settlement. Different solutions have been suggested. Going on the lay that the waste is from defective taps, it has been thought wise to have all taps attached to the city's water supply tested by the city authorities. While this may to a certain extent lessen the waste it is far from a complete cure. The tap may be perfect when first attached, but no inspection could guarantee the life of a tap. It greatly depends on the usage it gets.

If the city could supply ordinary common sense to the users, they would be in a better condition to look for a saving along that line. How many times when the taps are being shut off do the users imagine that they have to turn the handle just so long as their own strength holds out, forgetting that they are simply turning the water off, and the moment the water stops, that moment they should stop turning.

It would be a good idea for the city to take the plumbers into their confidence and use them as missionaries in educating the people just how to use the plumbing fixtures. The trouble is that everybody seems to be under the impression that it is in the plumbers' interest that the lives of taps should be of short duration. This is an erroneous idea, for what little profit that might accrue to him in installing another tap is more than offset by the number of times he has to make an attempt to repair the former one put on. There is a great field for improvement just along the line of getting help from the plumber. If the plumber could be got to a position where he would refuse to attempt to repair taps that are long past that stage, and insist on putting on new ones, a considerable portion of the difficulty would be overcome. How many times when a plumber goes to a house to repair leaks he finds that to repair is only a temporary job, but the owner insists on "just one more trial."

While a great portion of the waste comes from leaking fixtures, another source is in winter to let the water run to keep it from freezing, and, in the summer time, let it run to keep it cool. The latter prevails in high buildings, where, as the water has to go a long distance, it partakes of the temperature of the rooms.

Assistant City Engineer Fellowes is in favor of metreing the entire city, but to do this would entail an expenditure of over $764,000. He believes this would do away with the evil. While this may be so, the cost seems too great to effect the cure. The cost of pumping the water supply is in the neighborhood of $100,000, and the interest and sinking fund would amount to more than the loss by waste.

Like other great evils, this question will have to be dealt with along the line of education. The users will have to be educated to such a high moral plane that they will realize that it would be just as right for them to go down to the City Hall and help themselves to the funds in the treasury as to wilfully waste the water.

M.

TORONTO ASSOCIATION

A meeting of the Toronto association took place in their rooms, 18 Victoria street, on Monday evening last. Nothing of importance was transacted. The delegates to the recent convention made a verbal report. President Mansell promised that the printed report would be ready shortly. As the association is locating in new quarters the secretary was instructed to convey to Secretary Day, of the Employers' Association, the association's appreciation of his courtesy in placing the room so often at their disposal. The association adjourned to meet on Wednesday, May 6, when officers and committees will be elected.

The THOS. DAVIDSON MFG. CO., Limited, MONTREAL, P. Q.

CARPENTERS' STRIKE IN MONTREAL

The carpenters' strike in Montreal resulted in the stopping of building operations on many of the largest structures now being erected in the city, among them the Board of Trade building, Liverpool and London and Globe building and the Guardian Fire and Life Assurance Company's building, and the retail trade in builders' hardware and carpenters' requirements has in consequence suffered. In wholesale circles no effect of the strike is felt as yet, but should it continue, orders are expected to drop off.

The demands of the strikers are for a wage of 22½c. per hour, and a working day of nine hours. They were offered 20c. per hour, but almost unanimously refused it. A number of the carpenters are still working, and some of the employers have signed the new scale of wages, but with the great majority the question is still at a standstill. The allied trades, such as the painters and decorators, plasterers, etc., have not been called out, but in the event of a continuance of the strike, they may be. The painters already get 22½c. per hour. Should these allied unions strike in sympathy with the carpenters, one of the most serious labor struggles of the time is likely to result.

MADE TO USE.

The Imperial Granite Co., Limited, 74 York street, Toronto, are manufacturing a stationary granite laundry wash tray under a new process of cement and stone. These trays are made of a composition of the best grade of cement and crushed granite, in the proportion of three parts of stone to one part of cement. This makes a perfectly smooth finish on the inside and is of a non absorbent nature. Being moulded all in one piece they have an advantage of those made of natural stone, having no seams to expand or contract by the action of hot or cold water. W. S. Jackson, the general manager of the company, claims this tray is the equal of anything on the market. Write him for fuller particulars.

PROVINCIAL COMMITTEE MEETS.

President Mansell, of the Ontario Provincial Association, had his Sub-Executive Committee together to arrange the minutes of the recent convention for the printer and to consider what action should be taken to carry out the suggestions made at the convention.

BUILDING NOTES.

McQueen & Bissett are erecting a warehouse at Deloraine, Man.

The Colonial Elevator Co., have decided to build an elevator at Deloraine, Man.

The Bain Wagon Co., Brantford, Ont., will spend $10,000 in enlarging its blacksmithing and ironworking departments.

A building boom is on at Orillia, Ont. Black & Clark have five brick residences under construction; the Long Mfg. Co. will add a brick building to their works; Messrs. George McDonald, Dan. McKinley, Wm. Hulsman, E. J. Wallace and T. B. Mitchell are among those erecting new residences.

There will be 200 new elevators erected this year along C. P. R. and C. N. R. points. C. C. Castle, warehouse commissioner, Winnipeg, is daily receiving applications for new sites, and, if lumber can be secured for all these the largest number of new elevators ever erected in one year will be put up. A number of the American firms are talking of building saw mills, so as to cut their own lumber.

The activity in building operations at Sault Ste. Marie, Ont., continues this summer. McPhail & McCarthy are building a brick house for Mrs. Frenylen and a mission for the West End Baptist Church; Dr. Dando is building a $3,500 residence; C. F. Farwell will build an $8,000 residence; Architect Simpson, Toronto, is preparing detail plans for additions to the Methodist church. Several other buildings are projected.

ANOTHER ON THE PLUMBER.

The Executive Committee of the American Federation of Labor at a meeting held recently in the City of Toronto, handed out their decision in the much vexed question between the electric workers and the plumbers over conduit work, which holds that the work properly falls within the scope of the electrical workers and should be done by them.

PLUMBING AND HEATING NOTES

Mahoney Bros., of Guelph, have secured the contract for the plumbing work in connection with the new public library of their city.

London, Ont., master plumbers have agreed to an advance of 7c. per hour in the wages of the journeymen. Negotiations have been under way for a month or so, and both sides have conceded something.

J. T. Matthews & Co., Toronto, will open a plumbing business in Smith's Falls, Ont., within the next few days, says The Rideau Record, of that town. Their shop will be on the corner of Market and William streets, opposite the market.

F. N. Cullen has opened a large general plumbing supply establishment at 79 King street east, Toronto. He is carrying a full range of plumbers' sanitary enamel ware, made by the J. M. Kohler, Sons Co., of Sheboygan, Wisconsin. Mr. Cullen's long connection with the supply trade should ensure him a fair share of business.

Purdy, Mansell Co., of 46 Adelaide street west, Toronto, have secured the contract for the plumbing and heating work in the new bank building being erected by the Ontario Bank in Peterborough. They have also closed a very large contract for installing the fire extinguishing system in the addition to the Deering Harvester Co.'s building, Hamilton. It will require a large gang of men for months to carry the latter job to completion.

McKinley & Northwood, of Ottawa, report trade to be in a flourishing condition. This firm have closed contracts for the following work: Plumbing and heating in the Bank of British North America building on Sparks street; addition to Darcy Scott's residence on Chapel street; new building for the Citizen Publishing Co. on Sparks street; residence for Dr. Minnes on Metcalfe street; the plumbing, heating and galvanized iron work in new building for the J. F. Castle Co., Queen street, and on the new block for Dr. Graham on Rideau street.

Window and Interior Displays

Timely Hints and Suggestions.

SOME inquiries have been received concerning the cost of store fronts, and, in answer to these inquiries, the following sketch and description supplied to a grocer by request will be found of great value to hardware merchants who intend building or improving their front.

The store is built on a corner and has the show window open on the side to the depth of the window. The store has a 26 ft. frontage, and the following description was given as being about the most suitable design. The height of the ceiling may be dropped a foot and also the height of the large front sheets of glass:

The length of the glass front is 24 ft. 6 in., allowing from the total 26 ft. frontage 1 ft. for brick wall at the closed side and 6 in. for the projection of the wall beyond the show window on the other side. The height of the ceiling and show windows will be best at about 13 ft.

The measurements of the front are: Front glasses, 8½ ft. long and 8 ft. high, ornamental (or plain) glass above, about 3 ft.; height of window from sidewalk, 20 in.; height of doorway from sidewalk, 3 in.; depth of window, 5½ ft.; width of doorway, 7½ ft.; width of door, 4 ft.; height of door, 8 ft., glass in door, 3 ft. from bottom of door and 5½ x 3 ft. in size.

The size of the sheet of glass in the doorway will then be about 5 ft. 9¼ in. x 8 ft.

Two transoms appear above the door, both opening inwards and downwards.

The corners of the glass should not be large wooden partitions, but the small, neat brass connections now almost universally used.

The 3-in. ledge at the bottom of the front extends along the entire front. The ledge immediately at the bottom of the glass should be made wide enough, and with the proper slant to have the proprietor's name and business in gilt letters on a black background behind glass and in an oak frame.

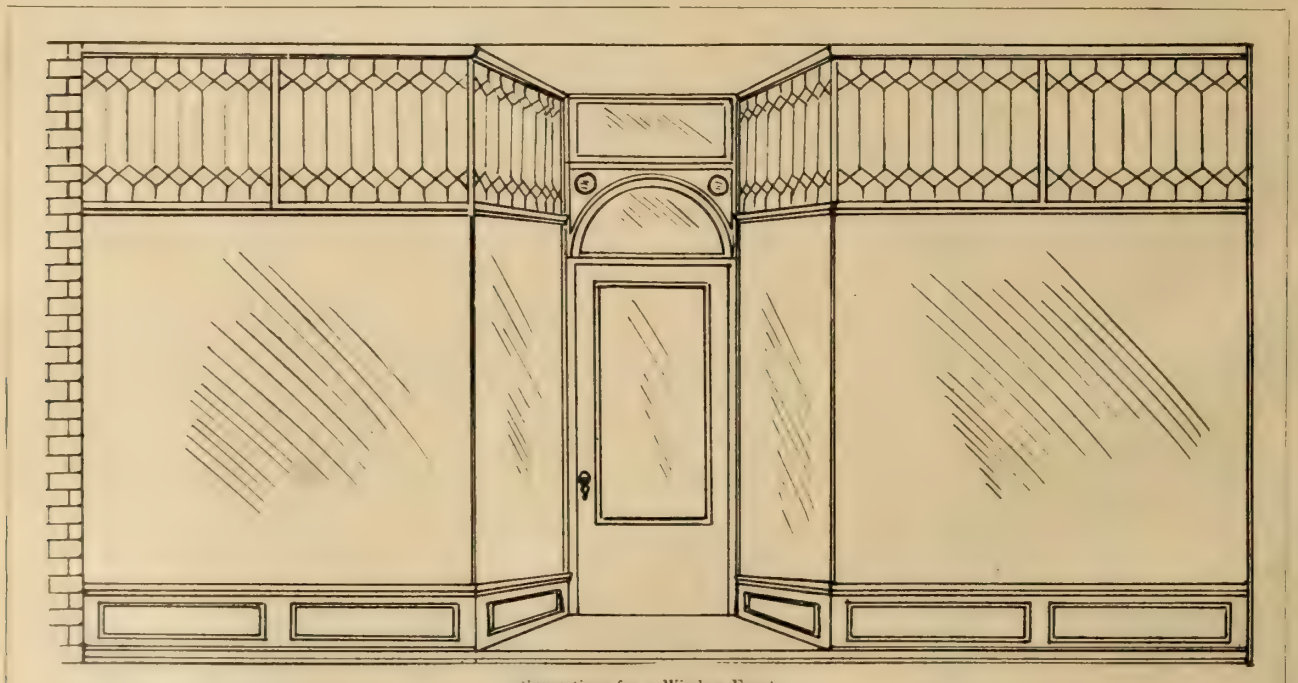
Just here, let us say, the wooden trimming should all be in oak, or at least in an oak color.

The margin between the ornamental glass and ceiling should be only 4 in. wide, never more than 6, as a deeper margin prevents the light reflecting from the ceiling of the interior and deprives the store of much of its light.

The cost of the entire glass front would not be more than $225. Of course, in ornamental glass, there is scarcely any limit to the price, but with this pattern the cost is very little more than for plain glass.

The brass rods connecting the sheets of glass cost about $1.25 per foot.

A future number will contain specific instructions as to the construction in detail of a show window.



Suggestions for a Window Front.

AN INCUBATOR IN ACTION.

In the store window of W. H. Thorne & Co., hardware dealers, St. John, N.B., they had an Easter exhibit which attracted a great deal of attention. It was an incubator from which chickens were being hatched, and the whole process was clearly shown. The apparatus was from The Cypher Incubator Co., of Buffalo, N.Y.

On St. Patrick's Day eggs were put in the incubator, and a few weeks later little fluffy yellow balls began to appear. The shells cracked and motherless, machine made chickens stared at the world. They are healthy little creatures, too, and show no hesitation about making their way in life.

From the incubator the chickens are placed in a brooder, an apparatus in which the temperature is graduated so that by easy stages the delicate creatures are brought to the ordinary degree.

INQUIRIES ABOUT CANADIAN GOODS.

THE following were among the recent inquiries relating to Canadian trade received at the Canadian Government office in London :

1. A Huddersfield firm asks for names of Canadian exporters of weaving, spinning and twisting bobbins.

2. A London firm of export and import commission merchants having an agent in the Dominion calling on wholesale houses, is prepared to execute indents for Canadian firms, charging a small fixed commission for the service.

3. Inquiry is made for the names of firms at Montreal, Toronto, Halifax, St. John and Hamilton, willing to take up the agency for bottled ale and stout.

4. A West of England firm ask to be placed in touch with importers of Labrador pickled salmon in either London, Liverpool, Bristol or elsewhere.

5. Inquiry is made of a firm of furniture makers and upholsterers for the names of parties able to supply dimension timber.

6. The names of sugar refiners in Canada are asked for by an exporter in British Guiana.

7. A Liverpool firm asks for addresses of Canadian millers engaged in the preparation of all kinds of maize products.

8. Inquiry has been made respecting the suitability of Canadian hemlock for railway ties, and the supplies of this timber available.

9. A North of England firm wishing to buy Canadian sheep skins (raw) asks to be referred to shippers or receivers of same.

10. The proprietors of a belting preservative wish to hear from a party in Canada willing to take up their wholesale agency for the Dominion.

11. A Glasgow importer asks to be placed in touch with asbestos mine owners and operators in Canada.

Among inquiries received by the Canadian Section of the Imperial Institute were the following :

1. A London house asks to be placed in touch with reliable Canadian butter packers who are prepared to ship supplies direct to South Africa.

2. A firm of timber merchants desires the addresses of Canadian manufacturers of chair materials.

3. A firm of manufacturers of leather travelling bags, trunks, harness and other lines, wish to get into communication with an influential Canadian house prepared to act as their representatives.

4. A London house seeks large supplies of spoolwood and wishes to hear from Canadian shippers of same.

5. A manufacturer of worsted and woollens wishes to be placed in correspondence with Canadian wholesale importers of textiles.

[The names of the firms making the above inquiries can be obtained on application to the Editor of HARDWARE AND METAL.]

VANCOUVER FREIGHTS TO EUROPE

Vancouver has now been classed as a regular port of call for all the mammoth freight steamships operated jointly to this coast from Liverpool, Glasgow and Antwerp by the Ocean Steamship Company and the China Mutual Steam Navigation Company. These two companies are to all practical purposes one, says The Vancouver Province.

The inclusion of Vancouver as a port of call for the steamships of these companies was brought about by the increasing trade of the port and the consequent prominence it has assumed as an importing and exporting centre.

Included among the fleet of steamships operated by the Ocean and China Mutual Companies are some of the greatest cargo carriers operating on the Pacific, and the next two vessels to reach this port from Liverpool via the Suez Canal and Oriental ports will beat the tonnage record of this port. The first steamer, due about April 28, will have a freight-carrying capacity of 14,000 tons.

FOREST CITY GOSSIP.

London, April 29, 1903.

Office of " Hardware and Metal."

TRADE has very materially improved since the beginning of this month, and notwithstanding the prognostications of rough weather during the month, outdoor work has commenced, and builders are now busily at it with sleeves turned up. It is pleasing to tell of continuous activity all along the line ; both retail and wholesale hardwaremen are above the average in the volume done to date this year. Very good orders are being placed amongst the wire and nail factories here from jobbing houses over the country, as well as from the local hardware jobbers.

* * *

Glass is in good demand, and London is receiving an increased share of stained and memorial window glass orders from various points in Canada. One large firm here issues a handsome catalogue, containing 340 cuts, illustrating fancy art glass. Retail stores are now exhibiting lawn mowers, rubber hose, garden rakes, spades, hoes, and the many other requisites for the lawn and gardens.

* * *

Fishing tackle is being shown to tempt the purchasing power of the sportsmen, and the bicycle is out and around in every direction, the roads now having become available for wheeling ; and the bicycle dealers and repair men are reaping their share of the business connected therewith.

* * *

The following persons have been granted patents in Canada : W. A. McDougall, London, device for displaying lace curtains ; Frank Curtis, jr., Ingersoll, screw-making machine ; Wm. Kingsland, London, ratchet-operated electric switch ; C. E. Long, London, sliding-bolt fastenings. Messrs. McDougall and Curtis have also secured United States patents on their inventions.

* * *

The new McClary buildings will not be completed for another month, and it was stated yesterday that the machinery for the new plant will not be in place for probably three months. This is longer than was at first expected.

* * *

William Murdy, of The Globe Casket Company, was presented with a purse of gold by his fellow employes in the hardware department of the works. The presentation was accompanied with a kindly-worded address. Mr. Murdy is going to the Northwest.

* * *

For 30 hours London was in a serious predicament owing to the breakage in the main from the waterworks to the city. Every factory was more or less affected, and business men were much alarmed. The damage is now fully repaired, but manufacturers are urging precautionary measures against similar mishaps.

Kemp Manufacturing Co., - Toronto

TWO WAYS.

There are two ways to get away from competition. One is to make a cheaper article and undersell the other fellow; and the other is to make a better article than the other fellow does or can. The public is not slow to recognize genuine merit, and has always been willing to reward the man who can serve it best. Boeckh's Brushes and Brooms and Cane's Newmarket Woodenware, manufactured by United Factories, Limited, Head Office, Toronto, fully meet the second way, as they are unquestionably the best articles in their respective lines that can be procured and at prices no higher than poor makes. Ours is the better of the

TWO WAYS.

HARDWARE AND METAL

VOL. XV. MONTREAL AND TORONTO, MAY 9, 1903. NO. 19.

THE TELEPHONE QUESTION BEFORE PARLIAMENT

BY ZED.

House of Commons,
Ottawa, May 2, 1903.

WHILE the budget still holds the stage on the floor of the House, it by no means follows that everything else in the way of parliamentary activity is meantime suspended, nor is such the case. Much excellent work is being done in the various standing and sub-committees, where, after all, the chief part of the really effectual labor is put in, the House being reserved, to a large extent, for spectacular displays, for announcements of policy on the one side or the other, and for the discussion of the financial items when the House resolves itself into Committee of the Whole.

* * *

By far the most interesting matter to all those engaged in business is the proposed legislation with regard to telephones, as embodied in Bills Nos. 2 and 5, both standing in the name of W. F. Maclean, M.P. The latter is a one clause Act, in amendment to the Railway Act, which proposes to enact that "Every company which grants any facilities to any incorporated telephone company or person shall grant equal facilities on equal terms and conditions to any incorporated telephone company or person which demands such facilities."

As already fully explained in the columns of the daily press this is an attempt to avoid the monopoly created by the agreement made by The Bell Telephone Company with the C.P.R. and other roads by which no telephones but those of the Bell Company will be admitted to the places of business of the railway company. At first sight this would appear to be a very simple matter, but like all such legislation there are many points which certainly give food for thought.

* * *

The Bill, with Bill No. 2, has been referred by the Railway Committee to a special sub-committee, which held its first meeting on April 28, and at the sitting many arguments were introduced which are worth consideration. For instance, suppose this Bill became law, and that a dozen independent companies installed 'phones in a railway station of moderate size, slimly manned, who, ask the opponents of the Bill, will look after all these various instruments? "You can drive a horse to the water, but you can't make him drink," and while Parliament can enact the proposed measure, it most certainly would be powerless to enforce prompt, or for that matter any, attendance on the 'phones of those companies not acceptable to the railways.

Again, even if the railways had no wish whatever to discriminate against any company, it is claimed that it would seriously interfere with the management of an office, if a large number of instruments were installed. At present the agent has a 'phone on his desk, to which he can attend with little or no inconvenience, but he could not very well have half a dozen there, and if they had to be placed in other parts of the office, he would continually be forced to jump up and leave his work. Railwaying is already sufficiently demanding on its servants, and to still further increase the duties, might quite conceivably increase the number of accidents which overwork and distraction already cause in too great number. It may be said, let the railway employ more hands—but who would pay for them? Not the railway, surely, deriving no benefit whatever from the new arrangement, and if not the railway, then, once more—who?

So much for the argument advanced by the opponents of the Bill. In answer to this it is urged that the present creates a monopoly so great as to be almost complete. What business man would be willing to contract for his telephone service with a company which is shut out of all communication with the railways? And as no man would willingly deal with two companies, that means he would be forced to deal with the favored company, or, in other words, extinction for the new comer, and a continuance of the monopoly to the old line. The fact is that this whole thing comes to the point not so much of municipal ownership, as to State ownership, with the organization and economy which that means.

Whether Canada is at present ready to add this service, now a great commercial necessity, to the Post Office service, is a point which we shall not attempt to argue now, but we feel sure that a very large majority would, for the time at least, reply in the negative.

* * *

Coming now to the much more lengthy and elaborate Bill, we will consider its various more important clauses with some detail, nor do we apologize for dwelling thus at length on this telephone legislation, knowing that a telephone is no longer a luxury, but a necessity, to almost every business man in Canada, a statement sustained by the fact that The Bell Company alone claims to have between 50,000 and 60,000 subscribers.

We may state generally, that the main objects sought by the promoters of the Bill are: (1) To secure to the various municipalities complete control of their streets; (2) To regulate and control the rates, preventing not only excessive charges, but discrimination; (3) To force the traffic of one company over the lines of another as a forwarder on terms

as to division of receipts to be agreed upon; (4) To provide for temporary or [illegible] appropriation of telephone lines by the Government, and (5) To force companies to supply service to those demanding instruments, under certain conditions as to distance of applicant from existing lines.

* * *

So far as the municipalities are concerned, while they seem to agree pretty generally with the terms of the Bill, their most earnest fight is being put up to regain their lost control of the highways within their limits. The counsel for the companies argue that the municipalities are creations of the Provincial Government (undoubtedly true), and that, therefore, the promoters of the Bill are before the wrong tribunal. They say, further, so far, at least, as The Bell Telephone Company is concerned, that though incorporated under a Dominion Act, they have taken the precaution to get the right from the Ontario House to use the various streets they require, and that in this way they are within their rights, where the Dominion Parliament would be powerless to interfere. Be this as it may, and possibly at some future date the Privy Council will have to settle the question, the fact remains that the telephone companies have, to a large extent, been themselves to blame for the present agitation by the high-handed way in which they have set up their poles in the various towns and cities throughout Canada. The placing of an unsightly pole in front of either residence or place of business in which the occupant has taken a pride is in itself an unpleasant necessity, but when this is done, as it frequently is, with complete disregard to the surrounding appearance, where it might, in other words, have been equally well placed in a less conspicuous spot, public indignation is aroused, and sooner or later public indignation must be settled with. The vexatious cutting of the branches of beautiful shade trees is a yet more annoying feature of telephone operation in many places, and for all these indiscretions and petty tyrannies of their minor servants, the telephone companies are now paying the penalty in the hard fight which is upon them.

Clause 5 of the Act, which provides that no company shall have the right to run wires through a municipality without its consent, would seem in any case (we mean leaving out of the point of law as to the right of the Dominion Government to legislate as to the use of streets in municipalities) to require modification.

What, if some petty municipality refused without rhyme or reason to allow a telephone long distance line to be run through its boundaries? Would the public at large have to be deprived of this great utility because of such action? Even if the municipalities are to be given back their ancient rights, it must be with conditions attached as to the rights of the general public which will render impossible such a disaster as that just supposed.

* * *

With the second object as above given there will, we believe, be general sympathy. The Bill proposes to allow companies to fix their own tolls, but the tariff is not to go into force until approved by the Governor-in-Council, and absolutely no discrimination in favor of any person is to be permitted. We know how hard and long a fight our American cousins had to abolish that discrimination in railway rates given by roads to certain favored individuals and localities, discriminations which meant ruin to those against whom they were framed. While the present case is not so great in magnitude, it is on all-fours in point of reasoning, and the Bill does well to provide against the possibility of such a wrong. The argument of the companies on this point that the clause is unfair, because an unwarrantable interference with trade, because in dealing with large users special contracts should be permitted on the "wholesale" principle, and last (Oh heart-wounded philanthropists), because it takes away the right of giving free 'phones to charitable institutions, strikes one as lamentably, almost laughably, weak. No one asks that special rates shall not be allowed to large users, at least no reasonable person would, but let all users of the same amount of service, so to speak, pay exactly the same amount. Let the firm requiring 12 'phones pay for them exactly what another firm requiring a dozen pays, and so on, class by class. As for an unwarrantable interference with trade, what is an unwarrantable interference? Is it an unwarrantable interference with the tobacco trade for the Government to prohibit the sale of cigarettes, as it is going to do? To impose a license for the privilege of selling whiskey? To lay an import duty or an excise duty on this, that, or the other? The rights and convenience of the public must be the touchstone, and the greatest good of the greatest number the rule, by which to determine this rather mixed question. As for the right to give service free to charities, we believe the promoters of the Bill might be induced, if sufficiently pressed, to amend the section in this respect, and leave this great boon to the otherwise sorrowing corporations.

* * *

The third object in view, compulsory traffic of one line over another, is much better met by the companies. They point out their obligations to their particular customers, liable to interference by the cutting in of the customers of other companies, that their lines are already, in many cases, fully loaded, and so unable to bear the extra traffic extra trade would entail, a trade insufficient to make the necessary increased outlay for more accommodation profitable, that their plant and property would be at the mercy of employes of other companies over which they would have no control or discipline, that the satisfactory transmission of a message requires perfect instruments at both ends, and perfect connections and wires between, for part of which only could one company make assurance through its own work and management.

Suppose, say they, that a small rural telephone company, ten miles long, badly equipped and badly managed, makes compulsory connection with one of the old and perfectly managed concerns for the transmission of a long-distance message to Toronto, 90 miles further on. The message turns out to be a failure, the man in Toronto unable to hear sufficiently well owing to the defective instrument of the smaller company—result, no pay collected, loss of time and revenue, 90 per cent. of which would fall on the large company through whose fault no trouble whatever had occurred.

Truly, regulation of rates seems feasible, but compulsory connection is by no means a clear case. The arguments of the company advanced the other day may, it is true, be met at a later sitting, but meantime the majority of the members of the committee seem to have serious doubts as to the workability of this part of the Act.

* * *

As for the expropriation clauses, that would be fair if the Government took over the whole line of any given company, paying its market value as a going concern. But while the Bill itself is silent at present on this point, there are many from the municipalities who are pressing for an amendment giving to each of them the right of expropriating that part of the line of any company operated within their jurisdiction. This would, in many cases, be taking from the companies the meat and leaving them the bone, and would be pretty sure, moreover,

WIRE NAILS
TACKS
WIRE

Prompt Shipment

The ONTARIO TACK CO.
Limited
HAMILTON, ONT.

to lead in the end to the direst of confusion. Let the Government expropriate when the proper time comes, but give to the municipalities sparingly, not only in the interests of the general public, but in their own.

The city of Glasgow is ever in the mouths of these enthusiastic gentlemen who advocate so strenuously a system of municipal management, but they say nothing of the hundreds of failures which heavily weigh down the other beam of the scale. Private management, properly controlled and supervised by the Government, will "hold the fort" until we are a good deal nearer the millennium than at present.

And, lastly, a very few words as to the clause which, if enacted, will force companies to supply service to those seeking it, where the distance from a line already part of the general service of the village or town is limited to a certain number of feet (the Bill is left blank as to the number, for the consideration of the committee). To this the companies put some pertinent inquiries. What is a company to do if it has no capital with which to make the necessary extension? What, if the line is already fully loaded? What, if rates have been fixed which would mean that the new service would be an actual loss? But these arguments are more apparent than real. Companies are not, as a usual thing, either so short of power or money as to be in the positions suggested by interrogatories one and two, and the rate question could be fixed by some clause in the tariff providing for just such cases as these, leaving the amount, in case of difference, to be fixed by arbitration, or, even, say, by the county judge.

Not to have some such clause as this leaves a man going into business for the first time, or even one in an established business, who has not hitherto had a telephone, liable to discrimination far more disastrous than merely a slightly larger toll than some business rival is paying—for it leaves him actually deprived of the very service itself.

From all this one may say, in conclusion, that there seems to be a good deal still to do before the Bill will be ready to report to the General Committee on Railways, Canals and Telegraph Lines whose offspring the sub-committee is.

OPENING OF VOOGT BROS'. STORE.

VOOGT BROS. held the opening ceremonies of their large departmental store in Sydney, N.S., on April 22, 23 and 24. The Sydney Post says that it has very few superiors in Canada. The Post representative describes the building as follows:

"The basement is filled with the finest and largest display of crockery, glass and enamelled ware ever seen in Cape Breton. These goods are all imported from England and France, and nothing superior to them can be found anywhere. Here also is the engine room, containing two huge engines and the condensing tank for the hydraulic machine.

The first floor is divided into five departments, shipping room, groceries, gents' furnishings, ladies' department and boots and shoes department. The ladies' department is a fairyland of beautiful creations in silks, millinery, etc., while the other departments, each under the management of a competent person, are filled with everything that one could desire.

The second floor is devoted to gents' ready-to-wear, hats, caps, carpets, rugs, ladies' ready-made and ladies' millinery show-rooms. Here also is the refreshment room, which, particularly during show days, commands a large share of patronage.

On the third floor everything in the line of house furniture and furnishings are displayed. This department is a huge furniture store in itself, and is filled with a well selected stock of house furniture, rugs, wall paper, etc.

The fourth floor is used as a store-room for surplus stock, which is conveyed there by a huge freight elevator, to which communication can be had only from the rear of the store.

All the floors are connected by telephone, rendering communication from any part of the huge store to another a matter of no difficulty whatever; while the passenger elevator, which is running constantly, makes it not only easy but pleasant to go from one floor to another.

MONEY-MAKING PAINT

There's no use in handling paint unless you can make money out of it—unless it's the kind that can build up a wide, substantial business—unless it's backed by the right sort of selling organization.

Any merchant anywhere can make money out of the paint business with ***The Sherwin-Williams Paint*** backed by ***The Sherwin-Williams Methods.***

Because **S W P.** quality brings business and holds it.

Because ***The Sherwin-Williams Methods*** are more progressive, more systematic, better order-getting than others.

Because the paint and the methods are backed by the largest selling organization in the world—an organization that makes it possible for us to help our dealers go after each individual order—no matter how large or how small.

If you want to handle the best paint made and do more and better paint advertising than any of your competitors, if you want to make money out of paint, write to-day for the B-13 booklet—it gives in detail our proposition.

A Sporting Goods Window

THE majority of hardware stores now carry a line of sporting goods, but very seldom is a whole window devoted to their display. Usually, goods of this class are simply crowded in with some shelf hardware, which assists in the sale of neither to any appreciable extent. However, a whole window can be arranged with nothing but the needs of the athlete or sport, and a very neat display results.

It is not necessary at this time to impress a merchant with the fact that a window, to be a good salesman, must be as far as possible a unit, as it were; that is, the articles used in the display should be along one line, so that a confusion of ideas will not spring up in the observer's mind. Now that the sporting season is with us in full blast, no better timed window can be shown than the one containing the goods necessary for that season, and so seasonable is such a display, that a whole window is none too much (nor even two windows) to be devoted exclusively to that line. Such a display is not difficult if the proprietor or a clerk will devote a little time to thinking out a scheme, and various designs are serviceable.

The one in the illustration is full of ideas, which can be pressed into service in any plan, or, indeed, the entire window, is effective. The floor and back of the window are covered with some cheap colored material, stretched tight. Dark red is the best color, and no folds or draping should be allowed, as such accessories, although suitable for a dry goods exhibit, are very much out of place for sporting goods, and, indeed, are of very little use in any display of articles so utilitarian as hardware. Two lacrosse sticks are first placed in position as for the draw in a game. Over these three cricket bats are fastened together at the top. Baseball bats are then arranged in the front, with two crossed tennis rackets in the middle, and a pyramid of tennis balls. At the back, around the ends of the cricket bats, half circles of different kinds of balls are arranged, increasing in size, from the smallest to footballs. Along the sides, pyramids of baseballs and lacrosse balls are set symmetrically, and the display is completed by placing at intervals baseball masks and gloves.

The variations possible using this groundwork are only determined by the size of the window. The pyramids and the rows of balls at the back can be increased in number, as also can the mitts and other paraphernalia of the baseball player. Croquet mallets can be arranged in the same manner as the cricket bats, and many other articles worked in. In fact, a very good window is one of baseball necessaries alone. The bats can be stacked or arranged in symmetrical figures with judicious arrangement of gloves, mitts, balls, chest protectors, masks, shoes, umpire indicators, etc. In all these displays great care should be observed that the articles are not crowded. Much clear space serves to bring each article into prominence, and the general good effect is greatly enhanced. Another window can be devoted solely to tennis requisites—rackets, balls, nets, racket cases and presses, markers, etc.; and still another to cricket goods—bats, wickets, bat bags, nets, balls, leg guards, guantlets, batting gloves, etc. The same plan can be adopted in football and lacrosse, and even croquet, with mixtures of the various lines, according to the season. Such displays can be continued at intervals all summer and fall in at least one window, and the merchant will be well repaid for the little trouble incurred.

SPORTING GOODS

A Seasonable Line for Hardware Merchants

THE RETAILER AND THE MAIL ORDER HOUSE

DURING the past few years the demand for sporting goods has grown so materially throughout the country that hardwaremen have recognized it as a line worthy of particular attention. It must be admitted that this line was sadly neglected by the trade, with the inevitable result that buyers turned to other quarters for their supplies.

A feature of the present situation—the business done by catalogue or mail order houses—is the result of this indifference in the past. Mail order houses have grown to considerable proportions and have built up a connection with clubs in all sections of the country. Catalogues are sent out every season to these clubs, giving stock quotations and offering a discount to clubs. Their advertising is directed to reach the consumers, but they express themselves as ready to supply "the trade," which term seems to include any person who conducts a retail business. While ready to supply the retailer, they offer no particular inducements, but are, in fact, desirous of selling to clubs direct, as much as possible, thus admitting that they are really keen competitors of the local retailers. Now, the question arises, how is this competition to be most successfully met?

A few weeks ago the secretary of a club in Eastern Ontario went to a retailer in his town, asking the latter to secure a cricket bat for him. This was done; the retailer getting the bat from a mail-order house. The retailer was given 10 per cent. rebate from stock prices. A few days later the secretary received a catalogue from the mail-order house, which included a cut of the bat he had bought, also stock prices, and the information that a "discount of 10 per cent." was offered to clubs. Naturally, the secretary asked the retailer for the discount. How his name was secured by the mail order house was a mystery to the retailer, but the incident was sufficient to teach the latter that he should have other sources of supply in order to compete with the mail-order firm. The cricket club secretary maintains that in future he will buy direct from the catalogue house, unless the local dealer can meet the prices quoted.

What remedy is open to the retailer? Simply to study the sources of supply and to get his stock from the legitimate wholesale house, from whom he can, in fact, buy almost as cheaply as does the mail order house. So, as the latter gets a big margin of profit on many lines, there is no reason whatever for retailers, who have studied the matter, to allow an order to get from their town to the city catalogue or mail-order houses.

The sporting goods wholesale houses, who sell to the catalogue firms as well as to the local retailers, are progressive and up to date, and will be able to supply any line which the retailer may ask, and will be able to quote prices considerably lower than those sent out by the catalogue houses.

Hardwaremen who handle sporting goods should, if they do not deem it wise to carry a full stock of various lines, get catalogues from all the wholesale houses; should study them, so as to be ready to refer to them in case of inquiry, and should advertise the line once in a while, expressing a readiness to get any article in the line at shortest notice. There may be weeks, or even months, when some goods are never asked for, but, if one knows where to get anything asked for, it should not be a difficult matter to persuade a local customer to wait until they are secured. Hardwaremen who do not sell sporting goods, would do well to consider the matter, remembering that there is a particularly good margin on them; that the line responds well to good display, and that the amount of business done in it during a season is large enough to make it worthy of much attention.

If hardware retailers would give the same attention; devote the same powers of shrewd calculation, and the same energy and enterprise to sporting goods that they now give to other lines, they would have little reason to fear the encroachments of the catalogue or mail order houses, and they could depend on building up a trade that in the years to come will steadily grow in value and magnitude.

On the other hand, if hardwaremen do not give due attention to this line, it is inevitable that the local clubs will sooner or later get their supplies from the mail

MAC.

READY FOR VICTORIA DAY.

Throughout Canada May 24th has so long been recognized as the first public holiday of the summer time, that it was almost unnecessary for the Dominion Government to pass an Act, making it a legal holiday, to be known as Victoria Day, in honor of Queen Victoria. But the Act was passed, and so there is every reason to expect that the day will be remembered in the same loyal manner of former years. The enthusiasm will not probably manifest itself till the day following the 24th being Sunday when, as can be seen by a study of the papers, clubs all over the country are preparing to have important games on that date. It is probable, too, that there will be a good demand for flags, fireworks, etc., so it is up to the hardwaremen to have a good stock of sporting goods for this trade, and to push them in the usual methods.

OUTFITTING A CAMPING PARTY.

"It's sound doctrine all right to state that it pays to push the sale of sporting goods to clubs," remarked a retailer a few days ago to the writer. "But where I have made most money out of the line has been in getting after the individual buyer.

"For instance, I am now making my plans to get a big slice of the business in fitting out camping parties. You would be astonished at the money our people spend in that way.

"I go on the principle that I should try to sell to every party going camping a tent, a hammock, supplies for boat or canoe, such as paddles, oars or oar locks, etc., a few flags, a supply of fishing tackle and ammunition, a hatchet, some nails and twine, a lantern, a can opener, and a score of small articles. Some campers have these goods, but many buy almost a complete outfit every season.

"The list of goods I have given you doesn't sound very expensive, but when you start out to supply a real fisherman with tackle, you have a customer worth pleasing. It is the same with ammunition. A good sport will burn up a lot of shot and powder in a season, and he generally gets the worth of his money in game or enjoyment. It's just as well to have a few corkscrews in stock, too, I may add.

"If there are women or children in the party, it is worth while trying to push the sale of an oil stove, or even a small portable wood stove. A few cheap balls and bats are generally wanted, too. Altogether, the business makes a profitable line when trade slackens off in the summer months."

SOME OPINIONS OF PRACTICAL MEN.

Is the hardware store the proper place for the sale of sporting goods? "Hardware and Metal" has taken the position that it is, and, during the past few days, its arguments have been strongly endorsed by practical men who have had wide experience in the trade.

It is true, that in some towns the trade is divided between the hardwareman, the bookseller, the dry goods merchant, and even, in some cases, the grocer, but it is clear that the hardwaremen may win the bulk of the business if they get after it in the proper manner.

A few days ago, while the writer was in Perth, Ont., the subject was brought up in conversation with Geo. S. James, of James & Reid, hardware dealers, of that town. This firm have for many years carried sporting goods. "We have found the line a good one in every way," said Mr. James. "We have considered the line as part of our regular stock and have made a point of either having in stock, or being ready to get, anything that was wanted. In fishing tackle we made a particular effort to work up interest in our stock by offering a first-class rod and line to the fisherman who caught the largest bass with tackle bought in our store. In every way we have sought to interest the townspeople in our stock of sporting goods, and have been more than satisfied with the results."

On Wednesday, this week, the matter was suggested to Mr. Westwood, of C. H. Westwood & Co., fishing tackle dealers, Toronto. "As far as fishing tackle is concerned," said he, "I fully believe that the hardwareman has the advantage if he pays proper attention to the business. To-day every class of merchant sells tackle, but the bulk of it is sold by hardwaremen. It largely depends on whether the retailer has ever become sufficiently interested in fishing to know how to appreciate good tackle. The merchant who carries a good assortment, not too large, but well assorted, so that a fisherman can get exactly what he wants, is the dealer who is going to get the business, no matter who has handled the line in his town in the past."

T. A. Russill, of the Russill Hardware Co., Toronto, in talking over the matter with a representative of "Hardware and Metal" last week also took a decided stand. "In handling sporting goods," said he, "the hardwareman is not going out of his sphere. In the towns and smaller cities every hardwareman should pay considerable attention to this line of goods. We find it pays very well. In the sporting seasons we push the line in our advertising, in window display, and also, by arrangement in the store, and we find we have good returns.

"We pay special attention to guns and rifles, keeping a clerk whose particular duty is to look after that department. Angling goods are also a specialty.

"I have read the articles on this subject in 'Hardware and Metal,'" concluded Mr. Russill, "and there is no doubt that hardwaremen are the proper dealers to handle sporting goods."

The hardwareman who does not handle sporting goods should consider these opinions—the verdict of three men who have made a success of their business.

NEW ACTION FOR "IDEAL" RIFLES.

The J. Stevens Arms & Tool Co., Chicopee Falls, Mass., have for two years been working on a new drop-forged, sliding breech-block action to supplant the old-style action that has been used on their "Ideal" rifles for many years, and have perfected what they believe to be the best, simplest, and most durable action yet brought out by them. It has been passed on by their rifle expert, H. M. Pope. Its strength permits using the modern heavy charges, and its ease of manipulation is a conspicuous feature.

The popular lever action is retained, but greatly improved, with sliding breech-block. The dropping of the lever leaves a free inspection of the barrel from the breech, permitting loading quickly. Bringing back the lever raises and carries forward the strong breech-block with a rocking motion, which prevents any possibility of buckling the shell, thus properly seating the cartridge in the chamber and finally securely locking the action ready to be discharged.

Standard length of barrel for rim-fire cartridges, 24 in., weight 7 lb.; for centre-fire cartridges, 26 in., weight 7½ lb., and made in all the standard calibres. All "Ideal" rifles, Nos. 44½ to 54, will be fitted with this new style frame and action. They will continue the manufacture of the No. 44's with the old-style action, but in 22, 25 and 32 rim-fire and 25-20 and 32-20 centre-fire calibres only.

REVIVAL OF CROQUET.

Many people think croquet is a modern game, yet, although in some respects it is new, it is little more than an old one revived. It used to be played by the ancient Gauls so universally that the greater portion of the promenades adjoining large towns consisted each of a long alley, the mall the name of the game being "jeu de mail." The later French received it from their ancestors, the Gauls, and it was introduced into England under Charles II. at the time of the restoration, after his sojourn in France. The long avenue in front of Buckingham Palace, called the "Mall," or "Mail," derived its name from this game, which was played there. The residents of Boston a century ago gave the same name to the side avenues of their famous common. Very few of the present residents are aware that Beacon street and Park street malls derive their title from the game of croquet.

One prime feature of croquet is that it is an outdoor sport, in which ladies and gentlemen, boys and girls may alike engage. Hitherto, while men and boys have had their healthful means of recreation in the open air, the women and girls have been restricted to the less exhilarating sports of indoor life; or, if they ventured out, all the participation in the healthful outdoor amusement and exercise they could indulge in was the tame and unsatisfactory position of mere lookers on.

In Canada the revival of croquet has been warmly received by all classes, and offering, as it does, an amusement admirably adapted to Canadian home life and climatic conditions, it will undoubtedly remain as our greatest family pastime in the "outdoor" season.

AUTOMOBILE CLUB ORGANIZED.

The Toronto Automobile Club was organized last week. The objects are to encourage automobiling in Canada, assist the good roads movement, and make regulations against fast driving among the members. The following committee was appointed to draw up by-laws and nominate officers:—Dr. Doolittle, J. C. Eaton, C. Gurney, T. A. Russell, W. A. Kemp, W. F. Turnbull, F. McMahon and W. Hyslop. A resolution was passed, recommending that steps be taken to form a Dominion association with other clubs. Dr. Doolittle presided, and T. A. Russell acted as secretary. Prior to the meeting the members of the new organization had a run around the city. About 25 carriages were out, J. C. Eaton being leader.

TWO GOOD LINES OF POWDER.

H. S. Howland, Sons & Co., Limited, Toronto, are sole agents for Canada of the American "Rifle Cartridge" and "Dead Shot" powders, unsurpassed by any similar grades. This is a remarkably popular brand for general field and trap shooting. "Dead Shot" powder, F.G., F.F.G., and F.F.F.G. is sold in 1-lb. tins and in 25 lb. metal kegs; "Rifle Cartridge" powder, sizes 3 and 4 in 6¼ and 25 lb. kegs.

CATALOGUES OF SPORTING GOODS HOUSES.

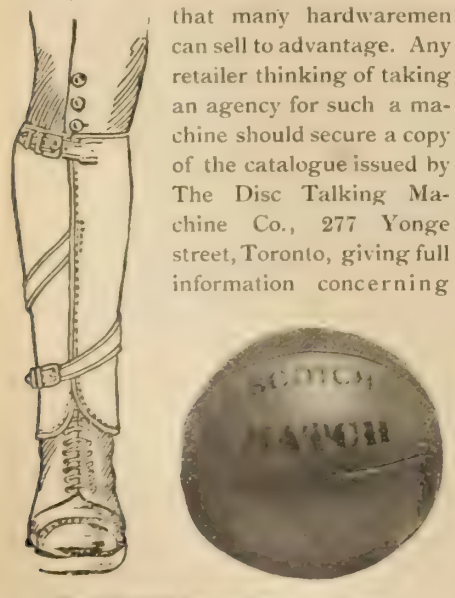
AS suggested in another column, every hardware dealer should make a point of securing the catalogues of the various sporting goods houses, whether they handle the lines referred to or not, for the reason that such goods are frequently asked for and can often be sold from catalogue when a stock is not carried. HARDWARE AND METAL would appreciate the courtesy if retailers in writing for such catalogues would mention this paper.

MARINE HARDWARE.

Hardwaremen everywhere are looking for opportunities to widen the scope of their business. For this reason the catalogue issued by John Leckie, Limited, 76 Wellington street east, Toronto, should be secured and studied by the trade. This firm is recognized as one of the strongest and most reliable houses of its line in Canada. They handle marine hardware of all kinds, oiled clothing, flags, tents, horse and wagon covers, nets, fishermen's supplies, all of which lines could be sold to best advantage by the hardware trade. This firm desire to establish a connection in every town, and would readily send to readers of HARDWARE AND METAL a copy of their catalogue and any information they may desire before taking up these lines more extensively.

THE DISC TALKING MACHINE.

The use of the talking machines is surely, steadily increasing, until to-day it is a line that many hardwaremen can sell to advantage. Any retailer thinking of taking an agency for such a machine should secure a copy of the catalogue issued by The Disc Talking Machine Co., 277 Yonge street, Toronto, giving full information concerning



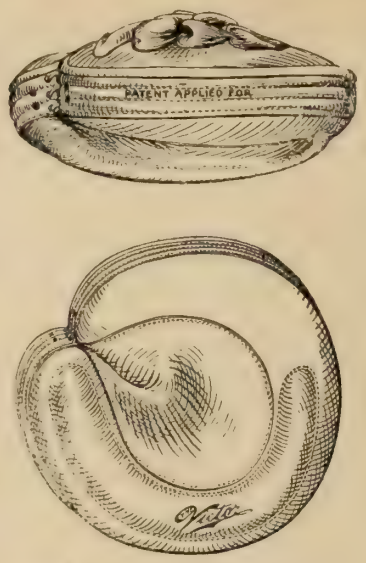
The Julian Sale Leather Goods Co., Limited

the Disc machine and supplies for same.

The Marlin Fire Arms Co., New Haven, Conn., are sending to the trade a folder describing their new grade "B" repeating shot gun which, they state, is made for the man who wants sterling worth without excessive ornamentation or elaboration and the consequent cost. It is not as elaborate in style as the grades "C" and "D," but much nicer in finish than grade "A." Further particulars will be sent upon inquiry.

"VICTOR" SPORTING GOODS.

The Fancy Goods Co. of Canada, Limited, Toronto, have ready for the trade their "Sporting and Athletic Goods Annual," which includes illustrated description of their "Victor" basball, tennis, basket ball, lacrosse, cricket and football supplies, the "Victor" exercises, boxing



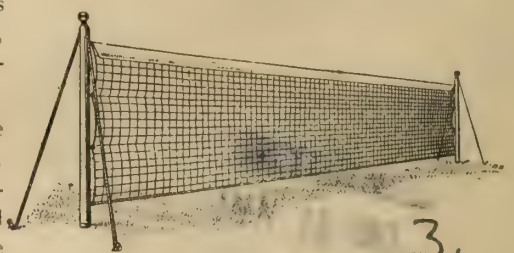
The Fancy Goods Co. of Canada, Limited.

gloves, punching bags, lawn bowls, fencing foils, hammocks, as well as the full line of flags, air guns, tents, celebration goods such as lanterns, horns, candles, etc., croquet sets, garden sets, children's wheeling goods.

This company are making a bid for the trade of the best, the most particular, class of sporting goods buyers. Last season their "Victor" official league ball was used exclusively by several of the Canadian leagues. This season they are making a feature of the "Victor" catching mitts, into which they are introducing a new principle, which is calculated to effect a decided improvement. Instead of reinforcing the top of the mitt by cowhide attached underneath the cover by rivets, which so frequently tear away, rendering the mitt useless, they reinforce the top of the mitt with three strong bands of cane attached to the outside of the mitt. The result is to keep the mitt sound and in proper shape without making it liable to pull apart. The two illustrations given give an excellent idea of the new mitt. As the mitt is padded with the best quality of hair felt, it is guaranteed not to gather up in balls or lumps, exposing the vitals or wrist after a few weeks' usage. It is made throughout of the finest green broncho horsehide, specially selected, specially reinforced palm, double seam, heavy roll heel, and, in every way, made equal to the best gloves on the market. As the "Victor" sporting goods are made in Canada by the best workmen procurable, and from the best material, it is not surprising that they have won popular approval, and as The Fancy Goods Co. of Canada, Limited, do their business entirely through the retailer, this firm have a good argument to present to the trade for support. A copy of their catalogue will be sent on application to any of the trade.

JULIAN SALE'S SPORTING GOODS.

The Julian Sale Leather Goods Co., Limited, Toronto, confine their attention in sporting goods to footballs, boxing gloves, striking bags, riding leggings, basket balls, tennis racket covers, fencing gloves, wrist supporters or bands, shin guards, supports, dog collars, razor sets and strops, leather-covered flasks, drinking cups and glasses. Yet what they do make is manufactured in a thorough manner, the best material and workmanship being put into them. The firm are at the moment paying especial attention to riding leggings and to footballs, which are in particular demand now. Hardwaremen who have not received a copy of the excellently illustrated sporting goods catalogue issued by this firm should get one before the spring football is over, and while the demand for other lines is good.



Nerlich & Co.

Mention was made in these columns a few weeks ago of the fact that Nerlich & Co., Toronto, had issued their spring and summer goods catalogue, including full information regarding their "Crown" sporting goods. If you have not received one of these catalogues write for one.

MACHINERY

MOTIVE POWER ON THE FARM.

THE farmer who, in these days of labor-saving devices will yet cling to the old methods whereby a live blood has for generations been wrested from the virgin soil; whose attitude towards the modern policy of replacing hand labor by power, is summed up in the ancient couplet,

When Adam delved and Eve span
Who was then the gentleman?

who looks upon the scientific evolution of modern agriculture as the devout sons of Scotia were wont to regard the introduction "o' the unsanctified box o' whustles intil the Kirk:" that man is out of the reckoning, and his pessimistic plaint is of none effect.

Every farmer knows the vital importance of a good and constant water supply, and, perhaps, the easiest line along which the specific education of the provincial agriculturist has proceeded, is that of the mechanical means for securing immunity from drought. This is, undoubtedly, the special sphere of the wind-engines. The ancient Egyptian method of raising water from the Nile by means of the "shadoof"—a balanced pole swinging on a pivot, one end of which carried a bucket that could be dipped into the river and then levered

up and emptied into the irrigating channel, is still followed in eastern countries. Even in France and Belgium, it is no uncommon sight to see the time-honored well surmounted by a counter-balanced swing pole, and, in our own enlightened Dominion, the "old oaken bucket" is not infrequently lowered to the cool depths by a hooked stall, which would be far more useful as a fence rail.

The chain pump generally demands, in dry weather at least, an expenditure of kinetic energy calculated to satisfy the most advanced graduate of a physical culture class, and it is just as easy to walk half a mile for water as to wind it 30 feet on the rungs of a recalcitrant chain ladder.

The best solution of the water supply problem is a wind-engine outfit. Of course, the devotees of "puff-engines" and water wheels will throw scorn at such an assertion, and will hurl their weighty trade arguments at wind-engines in general, just as Don Quixote made good showing in his dramatic thrusts at the vitals of the four-armed monsters, and with a similar result.

Comparisons are odious, and it is not for us to draw parallels between the various adaptations of motive power, but to assist in the assignment of each to its proper place. That is why one is constrained to say, "Let the wind raise the water, if you want to raise the wind."

Coming, then, to the specific features of wind-engines, it is well to look out for those that are least complicated in their construction, easiest to erect, most substantial in material, and of the highest efficiency in power. Cost is a matter which must be relegated to a fifth place, as subordinate to the points named. There are several firms in England, the United States and Canada, who make wind-engines, and good, effective engines, too.

Some makers stop short, however, at the wind-engine itself, while others take care of the making of towers, gears and accessories. Among the latter class should be placed The Ontario Wind Engine and Pump Co., of Toronto, by whom the cuts used to illustrate this article have been supplied. Whilst the greater number of wind engines are used for pumping, the company have been successful in their installations throughout the Dominion, in England, Africa, and Australia, of wind-engines for other purposes.

The chief drawback to the wind-engine is the fact that it needs little attention, for the farmer usually considers that a windmill needing so little care can get along very well with none at all. Hence the squeak which in airmotology is synonymous with "oil up." Wind engines will run for a long time without any attention, but they will run much longer, and work much better if oiled occasionally.

Those who have installed a wind-engine to drive a grinding or chopping plant, or have applied the power of the wind to other farm work, have every reason to be satisfied with the investment.

Certainly the power is intermittent, in some sense, and the periods of its most effective operation are uncertain, thanks to the caprice of the weather clerk. But the wet and stormy weather, when outside farm work is impossible, is generally the opportunity for the wind-engine to work overtime, so that it is really an ill-wind that blows nobody good. No instance has come to our notice of a farmer regretting the installing of an Airmotor, for whatever disadvantages the wind engine has, it is, after all, the only motor that costs nothing after being set up.

An important feature in the Airmotor tower is the simple device for tightening

Method of Tightening Stay-rods.

the stays. This will be readily understood by a glance at the cut herewith.

In some parts of the Dominion, particularly Eastern Ontario, the galvanized arms and towers of the Airmotor, crated ready for immediate delivery, form a familiar part of the hardwareman's stock, and wherever the trade has been handled by the local dealer, the results have been satisfactory. Tradesmen are advised to write for fuller details than can be given in this article, to The Ontario Wind-Engine and Pump Co., Toronto. The cuts we reproduce explain themselves, and are taken from the catalogue of the company.

B.

SHERBROOKE MAY LOSE THEM.

The Jenckes Company, Sherbrooke, Que., are seriously considering a change of location, the question having been discussed at a recent meeting of the directors. Major I. Wood and S. W. Jenckes have visited Niagara, Galt, Toronto, and other places with a view to finding the most suitable locality.

They reported at the meeting that great inducements had been held out to them in the places they had visited. The busi-

THE FAIRBANKS COMPANY

MONTREAL WINNIPEG VANCOUVER

of the Lockes Machine Shops has, during the past few years, increased to such an extent as to render immediate expansion an absolute necessity.

The company now employ 150 men, and the pay roll will be increased by 150 or more when the business has been enlarged.

It was decided at the meeting to apply to Parliament for power to increase their capital to $1,000,000.

A WELL-EQUIPPED BICYCLE PLANT

THERE may still be found in splendid isolation a few of those morbid misanthropes who believe not in the advancement of Canada, but they belong to that school of philosophy whose graduates are never happy unless they are miserable, and to whose way of thinking the universe itself is all wrong. Practical object lessons are reducing the number of these commercial parasites, however, and no better or more effective afternoon's education could be prescribed for such as are still in the darkness of ignorance than a run through the shops of The Canada Cycle and Motor Co. at Toronto Junction. A visit to these splendidly-equipped works is responsible for many musings. It gets one thinking, and convinces one beyond doubt that some folks, at least, believe in bicycles. The shops are not a heterogeneous collection of mysterious machinery, but are arranged in so methodical a manner that not only can the casual observer trace the gradual construction of a machine from the metal bars and tubes to the finished article, but he needs but a word or two of explanation to enable him to understand everything he sees.

The automatic machinery is particularly interesting. Here one finds the capacious maw of an insatiable steel-eater swallowing, inch by inch, a thick bar of steel, and turning out finished hubs at the rate of about one per minute. The hub is first trimmed on the end, then the machine makes a turn, a new tool is brought into line, and another shaving is taken off, and so on, until the last motion cuts off the finished hub and commences the operation on another.

It would be impossible to describe in detail the several machines, including everything known to the cycle-builder's art. Cones, spokes, heads, ferrules, all are made by machinery which, if not absolutely automatic, is sufficiently so to reduce the labor of the attendant to a minimum.

The factory has the most up-to-date cycle-building plant in the Dominion, and yet it takes The Canada Cycle and Motor Co. all their time to fill the orders received daily. Straws show the way the wind blows, and so do smokestacks, for a terrific gust dismantled the company's chimney the other day. They didn't seem to mind this however, for work was not suspended, but an allowance of sundry emphatic remarks was granted to the engineer whose boiler fire draught had so unceremoniously struck not for higher wages, but higher exit.

THE TRAIL SMELTER.

The miners of Slocan will no longer be dependent entirely upon the United States as a market for their ore. The foundations for the construction of a slime treatment plant at the Trail, B.C. smelter were laid a few days ago, and the work of installing the plant will be pushed forward as speedily as possible. The silver slimes resulting from the electrolytic treatment of lead, formerly shipped to the United States, will be treated at Trail for the extraction of gold, silver, arsenic, antimony and other "impurities." The pure silver thus recovered will be sent to China and Japan, the gold will go to Seattle and San Francisco, copper sulphate will find a ready sale in the Territories for washing seeds, and antimonial salts will be shipped east for use in the manufacture of babbit and other alloys. The value of the material that will eventually be handled by the Trail smelters is estimated at about $12,000 per day.

A COMPARISON.

The census preliminary report of street railways within the United States, for the year ended June 30, 1902, contains some significant figures. The growth of the trolley system has been phenomenal, and the length of line operated up to the date named was 22,589 miles.

The most noticeable feature of the report, however, is not inspiring; the number of persons killed was 1,216, and the list of injured reached the enormous total of 47,128. One cannot but revert to the report recently published of steam railroads in Great Britain, where, notwithstanding the higher rate of speed, the greater congestion of traffic, and the lack of American trusts and other much vaunted luxuries of the New World, affairs were so well blundered through as to show a clean fatality sheet. Not a single fatal accident occurred in England during the period mentioned.

MACHINERY NOTES.

The Stevenson Boiler Works, Petrolea, Ont., are quite busy at present.

It is reported that a malleable iron workshop will be started in Tavistock, Ont.

The Canadian General Electric Co. are supplying a 10 H. P. motor to The Fader Screwless Knob Co., of Orillia, Ont.

The Ontario Wind Engine and Pump Co. are building a complete 30-ft. engine, tower and pump for a South-African customer.

The Deering Division of The International Harvester Co. have supplied 14 carloads of implements to Wm. Grant & Co., Charlestown.

Machinery for the oil well in Formosa, Ont., has arrived at Mildmay depot, and it is expected that oil will be reached in about three weeks.

The demands of the iron moulders employed by H. & R. Ives, Montreal, for an increase to $2.75 and recognition of their union have been granted by the firm.

An artesian well is being sunk at Listowel, Ont., large enough to admit an 8 in. casing. The engineer in charge of the work is W. G. Paton, of Wingham.

The Sydney, N.S., mines of The Nova Scotia Steel Co. are to be lighted by electricity, the power being derived from two vertical engines of 600 H.P. supplied by The Robb Engineering Co., of Amherst.

The Reddick Sash, Door and Blind Factory, Trenton, Ont., was burned on May 5. The building and machinery were a total loss. The loss amounts to about $4,000, and the insurance is small.

The Anchor Wire Fence Co., Moncton, N.B., have moved their quarters to the foot of King street, and they are also making a number of improvements in the way of putting in new machinery.

The Canadian Locomotive Works, Kingston, Ont., employ 500 men, and they have in hand contracts to keep them busy until January, 1905. Five hundred more men are to be engaged as soon as possible, so that five or six locomotives can be completed every week.

A company backed by John A. Kenny and Martin Failing, of Buffalo, N.Y., and G. H. Pettit and W. M. German, of Welland, has been incorporated with a view to installing electric lines in Canada with the Miller electric-block signalling system.

A boiler exploded in the hoop works of Pettit Bros., Comber, Ont., last Monday, slightly injuring Herb. Manley, a lad 14 years of age. The engine room was completely wrecked, but the mill escaped injury.

On Monday last a presentation was made to Donald M. Fraser, af a gold watch and chain, by The Truro, N.S., Foundry and Machine Co., in recognition of his valued services extending over a period of 38 years. Mr. Fraser, better known as "Deacon," is retiring on account of failing health.

The Portland Rolling Mills, of St. John, N.B., are enlarging their premises, having taken over a vacant property of four acres belonging to the Sayre estate. It is more than probable that car works will be set up on the new plot, as this branch of industry seems to find favor with a majority of the directors. The mills will not enter the steel rail industry, as it is believed the Dominion and Algoma companies will be well able to supply the Canadian demand, and the plant would be too expensive.

A large car factory is proposed for Owen Sound, Ont., and Wm. Robinson, late of The Costa Rican Transport Railway, is its sponsor. Philadelphia capitalists will be mainly interested, and the proposition is to commence immediately on the beginning of steel rail manufacture at the Soo, an establishment for turning out narrow-gauge railroad cars, the proposed line for which will extend from Meaford to Laing's Royal Park. The company will ask for a street railway franchise for 20 years, a free site, but no bonus.

The Swan River Lumber Company's sawmill at Fisher's Siding, near Dauphin, Man., which had just been equipped with new machinery, was burned down a few days ago. The probable loss is $12,000, but is fairly well covered by insurance. Mr. Osborne, manager of the company, says that rebuilding will be commenced at once.

The Goold, Shapley & Muir Co. received a cable on Monday from London, Eng., to the effect that their windmill took first prize at an international competition held under the auspices of the Royal Agricultural Society. There were 22 entries.

Hardly a week passes but some new plant is set up in the district of North Ontario, once believed to be a wilderness. North Bay has grown phenomenally, and Sturgeon Falls bids fair to become a thriving and considerable town. Last week a carload of machinery of the most improved design was sent out from the shops of Bradley, Levy & Weston, of Toronto, for Sturgeon Falls. When it is set up on the premises of Joseph Trottier & Son, it will take the form of one of the best planing-mill equipments in Ontario.

MACHINE AND METAL STAMPING COMPANY LTD.
TORONTO
EMPIRE
CANADA

METAL STAMPING OF ALL KINDS.

Do your castings cause you trouble?

Send us your samples and number required, and we will quote you prices for same

Stamped in Relief.

Our stampings are STRONGER, LIGHTER and CHEAPER than castings.

Don't say it can't be done.

Leave that to us.

Compare our stampings with your castings.

We leave the rest to you.

DEPARTMENT OF ADVERTISING SUGGESTION AND CRITICISM

Edited by **W. Arthur Lydiatt,** TORONTO.

NOTE.—Herein are discussed the principles and practice of advertising. Subscribers are invited to send Mr. Lydiatt specimens of their newspaper and other advertising, for the purpose of review in this department. Address care of Department of Advertising, HARDWARE AND METAL.

Don't wait until you publish an especially good advertisement before you send me your ads for review in this department. Don't be afraid of a little honest criticism. I will only try to point out the faults—if such there be—that you may have ideas for the improvement of your ads. You don't have to follow my advice or act on my suggestions.

I simply want you to send me specimens of your advertising matter—just what you are using now, or what you have been using. I'll tell you of every way in which I see it might be improved. I will call attention to the good points—mention the weak points.

If you spend money for advertising it is surely advisable to see to it that you get your money's worth. And if you tell me just how you are spending it—show me what kind of advertising matter you use—perhaps I'll be able to give you some suggestions which will help you make your advertising more profitable. It's worth trying, anyway. THE EDITOR.

IT is the purpose of advertising to sell goods, and, properly directed, it invariably accomplishes its purpose.

"To sell," according to Webster, means "to transfer property or the exclusive right of possession to another for an equivalent in money."

In order to "sell," then, an advertisement should offer "the exclusive right of possession" of certain goods "for an equivalent in money."

If the "money equivalent" is not mentioned, why should we expect the advertisement to "sell" the goods advertised? Selling is simply a matter of give and take. The merchant in his advertisement practically says: "You give me so much, and I'll give you such and such goods."

Why advertise anything if you don't want to mention the price? If you want to exchange your goods for money, it would seem to be desirable to mention the amount, that people might reason whether or not they could make a fair exchange?

There is an indisposition on the part of many retailers to give prices in print, on the plea that competitors will then know what is going to be done and will act accordingly. But this argument will not stand much of an attack. Your competitors know pretty well what you are doing—they have just as easy ways of finding out what prices you are going to charge—and I know of few men who adhere to that principle who are making any money out of it.

On the other hand I know of many merchants who have experienced a decided improvement in the measure of results from their advertising after breaking away from this "give-no-prices" rule.

People, when they read an advertisement, generally like to know what a thing is going to cost them before they think seriously of getting it. More people are attracted by prices than by mere word argument. In isolated cases it may not make any material difference whether a merchant quotes prices or not, but, in the majority of instances, the lack of prices simply kills the effectiveness of the ad.

I am reproducing this week the front page of a quarterly store paper, published by an enterprising Niagara Falls' firm. 15,000 of these are printed and distributed every three months, and the advertisers think it pays them well.

I can't see, though, why people should be interested in seeing pictures of door knobs, pliers, saws, bird cages, dinner pails, and such commonplace things, if their appearance has no other significance than they have in this paper. The cuts are good ones; the descriptive matter is well written and fully explanatory in nearly every instance, but very little of it is "news."

The one thing that would make this store paper most effective is "prices," and I would like to hear Messrs. Oliver's reasons for not including them in this "catalogue."

Fifteen thousand such papers, carefully distributed, certainly ought to bring some returns. But when staple articles, such as are here advertised, are closely priced, and these prices made known, wouldn't it seem that 15,000 bargain lists, such as this might then become, would bring greatly increased returns.

OLIVER NEWS

AN ILLUSTRATED QUARTERLY, DEVOTED TO HARDWARE, HOUSEFURNISHING AND SEASONABLE GOODS, FOR THE BUILDER, CONTRACTOR, MECHANIC AND HOUSEKEEPER.

ISSUED THE 15TH DAY OF APRIL, JULY, SEPTEMBER AND NOVEMBER.

F. W. OLIVER CO. 251 SECOND ST., NIAGARA FALLS, N.Y.

Vol. 5 APRIL 15, 1903 No. 1

WITH this issue of the OLIVER NEWS begins our fifth year illustrating seasonable goods. It has been our steadfast endeavor to keep the OLIVER NEWS timely and up to date. Owing to our very large and constantly increasing stock, it is impossible to give you but a faint idea of the various lines we carry. A visit to our store will convince you that we are leaders in our line, and that our prices are surprisingly low. We fully appreciate the patronage which has been bestowed upon us heretofore, and are going to try and deserve a continuance of it in the future, and will do our part towards earning it.

F. W. OLIVER CO., 251 Second St., Niagara Falls, N. Y.

THE "IMPERIAL" HIGH-WHEEL LAWN MOWER

If you are using a lawn mower that pushes hard make a change for we are selling the Imperial which we guarantee to be the easiest running lawn mower now on the market. There is not a lawn mower made that is equally well adapted for cutting all kinds of lawn and grass. If you have a small lawn, and want something cheaper get a Jr. Ideal. They are the cheapest mower made for the money.

REFRIGERATORS

WILKE REFRIGERATOR.

OAK EXTERIOR

COMPLETELY LINED WITH ½ INCH PLATE GLASS.

Entirely lined with either white glazed tile or half inch plate glass. All the interior metal parts and supports are constructed so that they may be easily removed for cleanliness thus giving the full access to every inch of the interior. We guarantee a saving of 25 per cent. over any ordinary refrigerator in the consumption of ice. They are lined with mineral wool, ensuring a perfect insulation. They are cleaned as easily as plate glass or a China dish. In buying a Wilke Refrigerator you are assured of absolute purity, durability, security. The luxury of cold, cleanliness, and the satisfaction of knowing that you are in possession of the best refrigerator that money can buy.

CARPET SWEEPERS

Bissell's latest improved "Cyco" Bearing Carpet Sweeper leads all other makes. It will brighten and preserve your carpets. Will protect your curtains, draperies and furniture from an unnecessary accumulation of dust. Will save you time, labor and health. A very useful wedding present.

"SANITARY" WATER STILL

Water, as drawn from the tap at this season of the year is not fit to drink, unless it has gone through the process of distillation. This Still provides a simple, inexpensive, yet effective way of supplying families with distilled water for drinking and culinary purposes. The Still is in use by the United States Government, and received the highest award at the Paris Exposition.

JEWEL GASOLINE STOVES

Are the result of years of study and forethought. They are simple, safe reliable, durable and up to date. No smoke, no odor. They burn right from the start with a clean steady, *intense, blue flame*. Explosions are impossible. The simplest and most economical Gasoline Stove on the market.

Received a gold medal, the Highest Award, at the Pan-American Exposition.

ALABASTINE

Always ready for use by mixing cold water. The only durable wall coating for plain tinting, stippling and relief molding. Easily applied by anyone. Better than whitewash or kalsomine. Contains no glue, making it impossible for it to flake, scale and rub off on the clothing. Alabastine is a durable stone base cement wall coating, to be applied to any solid surface such as plaster, wood, canvas, etc. It hardens with age, and is lasting as the surface to which it is applied.

"THE Best There Is In Paint."

H. W. Johns' ASBESTOS Liquid Paint

SEND FOR SAMPLES, SUGGESTIONS, ETC.

H. W. JOHNS MANUFACTURING CO.,

100 WILLIAM STREET, NEW YORK.

Improve the looks of your house by giving it one or more coats of H. W. Johns' Liquid Paint, composed exclusively of the best and finest materials. Second to none in richness and permanency of color, beauty of finish, durability, uniformity and all characteristics which are requisite to form a perfect ornamental protective covering. Will cover more surface than any other mixed paint made.

CANADIAN AND FOREIGN SELLING TERMS.

THE fact that year after year competition grows keener in manufacturing, jobbing and retailing circles has been responsible for many changes in the methods of buying, handling and selling goods. Such changes have made themselves apparent in all lines of business, in groceries, dry goods, hardware and others, and more changes are doubtless to come.

From the manufacturer to the retailer all the world is continually endeavoring to improve his conditions of buying and selling. The seller must give the best possible terms to his customers if he is to hold his trade, and in many cases the limit has about been reached. Since profits have dwindled to the small margin that now represents them, the natural sequence is that sellers should come to some agreement by which they could dispose of their goods at a reasonable profit without fear of competitors underselling them or giving better terms to their customers, terms by which their competitors might secure a larger share of the passing trade, but which would be so disadvantageous to themselves that they could not continue to do business under them.

For these reasons, retail, wholesale and manufacturing associations sprang into being, and such associations have accomplished much in preserving healthy conditions of trade. The grocery associations decided to make cash in 30 days the basis of their selling; the clothing manufacturers are just now doing the same; other lines of trade are conducted on the same basis. One of the very few which have remained under the old selling terms, which extended credit in many cases to four months, has been hardware.

This applies not to the American or English jobbing trade, but only to the Canadian. The wholesalers of Canada have frequently discussed the advisability of adopting more reasonable selling terms, but though it is apparently an almost unanimous opinion that something of the kind must be done, in view of the reductions in profits and the terms under which they must make their own purchases, nothing as yet has been decided upon. For a long time cash in 30 days have been the terms on which American hardware jobbers have sold their goods. In the matter of English heavy hardware the terms are even more close, the Canadian importer having to pay cash on receipt of documents. For instance, should his English goods arrive here on Friday, then on Monday he must forward the money for them. Yet he sells these same goods at two, three and often four months' credit, a condition of affairs which is obviously a great disadvantage.

One Canadian house, or, to speak more correctly, the Canadian branch of an American firm, sells at 30 days' credit, and they have found payments are as prompt in proportion as they were under the old terms. As yet, few other Canadian hardware concerns have followed this example. The question of selling at 30 days is continually being brought up amongst wholesale hardwaremen, and it is at present under deliberation. Indications now are that this change in the selling terms will be made.

A COMPREHENSIVE TAXATION BILL

THE Act Respecting Municipal Taxation, which was before the Ontario Legislature on Tuesday for its second reading, promises to create a new epoch in the history of taxation in the Province of Ontario. Amendments by the score have from time to time been before the Legislature of that province, but this bill, introduced by the Premier, is a Government measure, and is a heroic attempt to deal with the whole question of taxation.

To business men the most interesting question of taxation is that relating to the tax on business. As explained by the Premier, any person engaged in carrying on any trade, manufacture, financial or commercial business shall be assessed for the amount of the annual value of the land occupied. The tax is to be 7 per cent. of the actual value of the property. The object of this tax is, of course, to avoid the anomalies of the personal and income tax, and thus allow the merchant to escape taxation on any part of his stock on the plea that it is not paid for.

Another prominent feature of the bill is that incomes up to $1,000 are to be exempt from taxation. Heretofore, the limit was $700.

Section 15 provides for a house tax, which is a decidedly new feature in taxation in Ontario. The bill in this respect provides that every dwelling shall be taxed against its occupant or occupants in addition to the ordinary municipal tax for which the owner of the property is taxed. The tax, however, will not apply to the occupant of any dwelling assessed for less than $3,500. On corporations there is to be a special tax, the idea evidently being to compel large concerns to pay a more equitable share of the taxes than they have in the past.

The personal tax is to be abolished altogether, and as it has been a source of a great deal of unfairness and irritation no one is likely to regret its departure.

When the bill was submitted on Tuesday, several members of the House suggested that its final adoption be left over until next session, in order that its provisions might be thoroughly digested by the different interests concerned. No doubt Mr. Ross is anxious to push the bill through as rapidly as possible, but it seems to us that the suggestion is a good one, as a measure so comprehensive should be carefully considered before it finally becomes law.

EFFECTS OF THE MONTREAL STRIKE ON BUSINESS.

SERIOUS results have followed upon the strike of the 'longshoremen and teamsters in Montreal, the effects of which have reached beyond that city to business houses in western cities and towns.

The strike of the 'longshoremen alone did not directly cause great inconvenience to any except the shippers, and the unloading of cargoes proceeded with a greater degree of regularity and celerity than might have been expected. But when the teamsters also struck, deliveries to the warehouses and from them to the railway stations came almost to a standstill, and the trade of Montreal received a severe set-back.

Except in the case of the lighter goods and small packages, the wholesale houses were dependent upon the forwarding companies, and when these failed them they were unable either to bring up their goods from the docks or to make deliveries. Nor were business houses in the west in a better position, the Canadian Pacific Railway and Grand Trunk Railway teamsters being out on strike with the others. Those engaged in the iron and hardware trade, however, inform us that they are now able to handle shipments regularly, as their goods are coming from the wharves without interruption.

Indirectly the strike has also placed some Montreal business houses at a disadvantage. When the militia were called out several employers had to allow a number of their men to leave their work, and many employers lost one or two men for a time. To their credit be it said that until the situation became such as to warrant the belief that the strike would be prolonged for some time, not a single complaint was heard. When day after day passed, however, and no signs of an agreement appeared, the arrival of regular soldiers to take the place of the militia men was anxiously looked forward to by employers.

Since the 'longshoremen are striking, not for higher wages or better working conditions, but merely to have the shipping men recognize their union, a union which insists that the incompetent working man shall receive the same wages as the competent and that none but members of that union shall be employed, and since "sympathy" with the 'longshoremen (and an absolute lack of it with their own employers) was the sole cause of the teamsters' strike, the business men of the city are almost to a man on the side of the shipping men and forwarding companies. This is shown by various resolutions in favor of the employers passed by commercial bodies in Montreal, among them the Council of the Board of Trade. This body called a special meeting for the purpose of discussing the strike situation, and their resolutions were as follows:

Whereas, the serious difficulty presently existing between the shipping trade and the 'longshoremen, unless settled at an early date, bids fair to work irreparable injury to the shipping trade of the port of Montreal, if, indeed, it does not ruin it completely, and

Whereas, it would appear from the information already made public with reference to the dispute that the strike of the 'longshoremen is not so much the result of dissatisfaction with existing conditions on the part of the men, as of the intervention of foreign professional agitators, whose aims are antagonistic to the best interests of this city and country, and

Whereas, the 'Longshoremen's Union is affiliated with and under the control of a foreign organization, which latter is interfering in an unwarrantable manner with the freedom of labor, therefore

Resolved, That the Council of the Montreal Board of Trade is of opinion that while working men may be warranted in combining to protect their mutual interests, such combinations should be purely local in composition, and should be so organized as to be amenable to civil law, and

Further Resolved, That the Council expresses its sympathy with the shipping interests in their struggle to maintain a free and open labor market in this port, believing that the peculiar conditions of our navigation, and the future of the St. Lawrence route, upon which the welfare of the Dominion of Canada so much depend, demand that no obstacle be placed in the way of the port securing free labor, and considers that merchants and citizens generally should heartily support the shipping trade in the position they have taken in the present dispute.

Meanwhile, those who have goods on the wharves have been not a little fearful as to their safety. One importer states that he managed to insure his goods against fire; another that he was unable to obtain insurance on them, the latter being the case with most others.

Another feature of the case is the action taken by a steamship agency in Montreal, which cabled the head office in England not to accept any more freight for the port of Montreal, but to send the ships out in ballast, and take on grain here for their return trips.

It is believed by all Montreal business men that the trade which is now being lost to that port will not for a long time, if ever, return. They have not forgotten the experience of Quebec.

MR. SCHWAB IS RE-ELECTED.

IT is gratifying in more particulars than one to learn of the re-election of Mr. Chas. M. Schwab, as president of the United States Steel Corporation. His long enforced idleness on account of ill-health gave currency to rumors that he would not be re-elected. As it was known that a number of those who were opposed to his re-election were actively engaged promoting the interests of other candidates, it looked extremely probable that the rumors would be verified when it came to the annual election of officers. On Mr. Schwab's return from his trip to the Mediterrean, his health very much improved, the opposition to his election lost strength, and when the meeting of the Board of Directors was held on the 5th inst., there appears to have been no difficulty in securing his re-election.

Had Mr. Schwab not been re-elected it might have been taken as a pretty good indication that his health had become permanently impaired. Although only just turned 40 years of age, his career has indeed been a brilliant one, but with good health at his command no one doubts but that his future would be still brighter and that his extraordinary ability would be brought into further play. His election, therefore, is gratifying in a double sense.

Although president of a foreign corporation Canadians cannot be altogether uninterested in Mr. Schwab's future, for several millions of his great wealth have been invested in Canadian mining industries, particularly in nickel properties near Sudbury.

PARIS GREEN ONE CENT LOWER

Just as we go to press we are notified of a reduction of 1c. per lb. in paris green on the Montreal market. This makes the price of 1-lb. packages 17c. instead of 18c.

INDUSTRIAL GOSSIP

THE Ontario Wind-Engine and Pump Company, Limited, Toronto, have been authorized to increase their capital from $100,000 to $250,000.

The Mount Rose Paper Co., Limited, of Toronto, has been authorized to increase its capital from $100,000 to $125,000.

The Guelph, Ont., Carpet Mills Company, Limited, Guelph, have been empowered to increase their capital from $40,000 to $200,000.

The sawmills of The Perley Lumber Co., Calumet, Que., will commence operations very soon.

Mr. McRae, partner in The Victoria Foundry, Lachute, Que., is about to retire. Arthur McOuat, who has been with the firm of Goldie & McCulloch, of Galt, Ont., has returned to Lachute, and will assist in the business.

W. I. Huston and Aaron Wenger, of Ayton, and George Calder, of Holstein, are associated with a movement to erect a binder twine factory at Ayton.

The strike in The Frost & Wood Co., Limited, implement works at Smith's Falls, Ont., which was supposed to have been settled, is now in a worse shape than ever. The strike has reached a critical stage and the company will not give in. It is rumored in Smith's Falls that The Deering Co. may buy out the works.

The Moosomin, Man., Telephone and Light Co. has 109 telephones installed in the town. It will shortly extend its long-distance system to Fleming, nine miles east; to Valley, 12 miles south, and to St. Andrea, 15 miles southwest. It also has under consideration the building of a line to Welwyn and Rocanville on the Kirkella branch of the C.P.R.

NEW COMPANIES INCORPORATED.

The St. Mary's Portland Cement Co., Limited, St. Mary's, Ont.; capital, $600,000; directors: A. Kent, J. J. Crabbe, George Reedy, J. J. Main, T. H. Hamilton, T. Bryce, N. W. Tovell, J. H. Hallett, James Curry, Toronto; R. R. Hall, Peterboro', and H. B. Harrison, Owen Sound; purpose, to manufacture and handle cement, clay, stone and bricks.

The Pratt Manufacturing Co., Limited, Toronto; capital, $40,0000; directors: E. W. Pratt, J. C. Wilgar, H. P. L. Hillman, R. H. Cuthbert, F. A. Mulholland, Toronto; purpose, to manufacture and sell woollen and cotton goods.

The Wortman & Ward Co., Limited, of London, Ont.; capital, $150,000; directors: W. H. Wortman, Wm. Scarlett, Wm. Richmond, F. H. Stoneman and Annabel Wortman, London; purpose, to carry on a general manufacturing and foundry business, carrying on the business of The Wortman & Ward Manufacturing Co., Limited, which was started in 1896.

The Featherbone Novelty Manufacturing Co., Limited, Toronto; capital, $150,000; purpose, to continue the business of The Canada Featherbone Co., Toronto.

The National Manufacturing Co., Limited, Pembroke, Ont.; capital, $200,000; directors: T. D., Alex., George W., Gideon and William Delahey, all of Pembroke; purpose, to manufacture and sell scales, grinding machines, stoves, cream separators, and to carry on a general foundry, iron and wood manufacturing business.

The J. B. McManus Co., Limited, Memramcook, N.B.; capital, $50,000; purpose, to carry on a general mercantile, contracting and manufacturing business; directors: J. B., Laura, Harold J., and Annie McManus, of Memramcook, N. B., and C. B. McManus, of Newcastle, N.B.

The Robertson Trites Co., Limited, St. John, N.B.; capital, $21,000; directors: F. G. Trites, Percy B. Lyon, Leland S. Huestis and James McKillop, of St. John, N.B., and Robertson Gass, of Hamilton, N.B.

The Princess Gold Mining Co., Limited, St. John, N.B.; capital, $1,250,000; purpose, to mine and deal in gold and silver; directors: Arthur I. Trueman, William Pugsley, Wm. H. White and W. A. Erwing, of St. John, and James Robertson, of Millerton, N.B.

The New Brunswick Woollen Mills Co., Limited, Golden Grove, N.B.; capital, $15,000; purpose, to acquire the manufacturing business of Alex. Willis & Sons, Golden Grove; directors: Samuel W. McMackin, G. A. Kimball, Manzer E. Grass and John H. Kimball, St. John, N.B.

FOREST CITY GOSSIP.

LONDON, May 6, 1903.
Office of HARDWARE AND METAL.
365 Richmond St.

A CONTINUATION of active business can be seen around both wholesale and retail warehouses this week. Orders from far and near are being received from travellers and by letter. A proportion of these orders are for goods wanted immediately and are being shipped by express. Wholesale houses have not yet advanced their ranges of German-made goods on account of the new surtax duties.

There is a feeling amongst some of the hardware importers that Germany will not continue present Canadian tariff conditions very long; that surtax duties will get but little time to swell customs receipts, and that there would be little advantage in advancing prices of German goods now in stock. Nearly all lines of shovels, spades, wire-fencing and netting, also iron bars are slow of delivery. This market is firm in all lines.

* * *

Wanted! four first-class plumbers; wages, 30c. per hour; steady work. That's the way F. C. Hunt puts it. Plumbers are all busy in London.

* * *

Smallman & Ingram are putting in a splendid new elevator in the front part of their store. The present elevator is to be removed. The new elevator will run from the basement to the fourth floor, whereas the one now in use runs only to the second floor. The improvement will be a marked one, and will give ready access to the upper floors of this rapidly growing establishment.

A number of interesting changes are taking place in connection with the office staff at the McClary headquarters in this city. Wm. Wyatt is leaving to accept a position as bookkeeper with his father, Ald. Wyatt. Walter Scranton is leaving to take a position in an out-of-town office of the company, and E. Lawson goes next week to Toronto to take a place in the company's offices there. W. E. Weston, who has been in the Hamilton offices, where he was taken ill, is returning to London.

* * *

The Forest City merchants are already looking forward to a visit of the delegates to the fifth triennial meeting of the Chambers of Commerce of the Empire. The visitors are expected to reach London about the middle of September in the course of their tour following the convention to be held in Montreal in August next.

* * *

The bankrupt stocks of Young & Morrison, of Thamesford, and Miss Byrne, of Stratford, were sold by Auctioneer Jones, of London, at 70c. and 60c. on the dollar, respectively, to Mr. Broderick, of this city.

* * *

Gas and oil stoves, and refrigerators are two articles about which there is a singular and extraordinary competition in this city. Almost every hardware window has an exhibit of them, and Wyatt & Sons, of Market square, show a range of fourteen different sorts of refrigerators, at even lower prices than last year.

* * *

Mr. Woods, of the Hobbs' Manufacturing Co., reports good business in the glass works, and very satisfactory orders for stained glass for dwelling houses and public buildings.

* * *

W. A. Mann, of the Stevens Manufacturing Co., reports remarkably good business. This firm is engaged in the manufacture of brass goods and all plumbers' supplies, and the outlook is bright for a big season.

* * *

The London Brass Company are quite busy making steamfitters' and plumbers' supplies; they say that already the season has done well, and prospects are good.

THE NEW "PREMIER" REVOLVER.

The Harrington & Richardson Arms Co., Worcester, Mass., are in position to supply their Premier revolver, both 22 and 32 calibre, with 6-inch barrel. The longest barrel they could formerly supply was 5 inches in length, but owing to the demand for 6-inch barrels for target purposes, they decided to add this extra length to their line. This firm can also supply their hammerless revolver, 32 calibre with 6-inch barrel, from the present time.

Knowledge acquired at school and college is not well seasoned until the possessor of it has had years of experience in practical life.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, May 8, 1903.

HARDWARE.

THE opening of the canals on Friday last and the renewing of the transport service for the season 1903 by water to the different western and eastern points has enabled wholesale hardware merchants in moving considerable goods during the past week, therefore they have been very busy filling and shipping orders that were held back to go by way of water, but, on the other hand, they have been hampered to a great extent in getting goods delivered to them from the wharf, which a great many of them were waiting upon to complete orders with, owing to the strike of the many teamsters, which went into force at noon on Monday last, and the prospects are that a speedy settlement of the same will be arrived at, as some of the master carters have already given in to their demands. The volume of new business coming forward has not been large, but, on the whole, it is considered very satisfactory for the season. The general tone of the market has been steady, consequently there are no important changes in values to note.

CANT HOOKS.—The demand has been limited and prices are unchanged. We quote as follows: No. 12, $10; No. 8, $11.50; No. 7a, $16; No. 6a, $14.50; No. 5a, $11.50.

AGRICULTURAL WRENCHES.—Trade in these continues quiet at steady values. We quote: No. 6, $9; No. 8, $10; No. 10, $12; No. 12, $14; No. 15, $24; No. 18, $30; No. 21, $36. Discount 70 per cent.

LAWN MOWERS.—There is no change and deliveries are still behindhand. We quote as follows: 10½-in. wheel x 12-in. cutter, $7.50; by 14-inch cutter, $8.00; by 16-inch do, $8.50; by 18-inch do, $9.00; by 20-inch do, $10.00. Star, 9-inch wheel by 12-inch cutter, $5.50; by 14-inch do, $5.75; by 16-inch do, $6. Daisy, 8-inch wheel by 12-inch cutter, $4.90; by 14-inch do, $5.10; by 16-inch do, $5.30. Philadelphia pattern, 7½-inch wheel by 10-inch cutter, $6; by 12-inch do, $6.50; by 14-inch do, $7; by 16-inch do, $7.50. Grass boxes are quoted as follows: 12-inch, $2.25; 14-inch, $2.25; 16-inch, $2.50; 18-inch, $2.50; 20-inch, $2.75. The discount on all the above is 50 per cent. off.

BARBED WIRE.—The movement is free, but supplies are somewhat slow coming forward. We quote $2.80 per 100 lb. f.o.b. Montreal, and $2.67½ f.o.b. Cleveland. Carlots of 15 tons are quoted f.o.b. Cleveland at $2.45.

GALVANIZED WIRE.—Since the opening of the canal considerable of this material has been moved. We quote: No. 5, $3.70; No. 6, 7 and 8, $3.15; No. 9, $2.55; No. 10, $3.20; No. 11, $2.25; No. 12, $2.65; No. 13, $2.75; No. 14, $3.75. In carlots, f.o.b. Cleveland: No. 5, $2.20; Nos. 6, 7, 8 and 9, $2.15; No. 10, $2.20; No. 11, $2.25; No. 12, $2.30; No. 13, $2.40; No. 14, $2.50. In less than carlots, 12½c. per 100 lb. extra is charged.

SMOOTH STEEL WIRE.—The demand continues fair for staple sizes of oiled and annealed. We quote: Bright and annealed, $2.50 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE STEEL WIRE.—There is no change to note. Discount is 25 per cent., with the following extras: 1 and 2-lb. hanks, 25c. per 100 lb.; ½ lb. hanks, 37½c. and ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—The demand is fair with discount 60 per cent.

PRESSED SPIKES.—A fair trade is passing in these. Discounts are as before, 20 per cent. f.o.b. Montreal, Toronto, Hamilton, London, St. John and Halifax.

FENCE STAPLES.—Demand moderate. We quote: $3 per 100-lb. keg for galvanized staples and $2.80 for bright, with 25c. extra for 25 and 50-lb. packages.

CUT NAILS.—There has not been much improvement in the deliveries of cut nails from the mills yet, but stocks in jobbers hands are moderate. Prices rule steady at $2.50 per keg.

WIRE NAILS.—The movement is fair. Carlots are quoted at $2.40 and small lots at $2.45 per keg f.o.b. Gananoque, Montreal, London, Hamilton, Toronto, Brantford, Windsor, Ont., and St. John.

HORSE NAILS.—There is no change to note and demand is fair. We quote "M" brand, "Oval" and "New City" heads, 55 per cent.; "Countersunk" heads, prices quoted on application. "C" brand, 10, 10 and 7½ per cent. off; "Monarch," 60 per cent. and "Peerless," 50 per cent.

HORSESHOES.—Values are steady with a moderate trade doing. We quote: Iron shoes, light and medium pattern, No. 2 and larger, $3.40; No. 1 and smaller, $3.65; snow pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.55; No. 1 and smaller, $3.80; featherweight, all sizes, 0 to 4, $5.10; toe weight, all sizes, 1 to 4, $6.35. Shoes, more than one size in a keg, 10c. per keg extra f.o.b. Montreal only.

RIVETS AND BURRS.—Trade is fair. We quote: Best iron rivets, section carriage and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS AND NUTS.—There continues to be a scarcity of some sizes of nuts. We quote as follows: Norway carriage bolts, 55 per cent.; common, 50 and 10 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 and 10 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50, 5 and 10 per cent. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3½c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ½c. per lb. is allowed.

SCREWS.—The deliveries from makers is still slow, and the demand is fair. We quote as follows: Round head bright, 82½ per cent.; flat head bright, 87½ per cent.; brass, round head, 75 per cent.; brass, flat head, 80 per cent.

SHOVELS.—There is still a scarcity of shovels, and manufacturers are finding it difficult to catch up to orders.

CORDAGE.—The demand is fair and prices steady. We quote: Pure manila, 14c.; British pure manila, 11½c.; sisal, 11½c.; double lathyarn, 10½c.; single lathyarn, 10c.

BUILDING PAPER.—An active movement is reported in building paper. We quote: Tarred felt, $1.75 per 100 lb.; 2-ply, ready-roofing, 90c. per roll; 3-ply, $1.15 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 55c. per roll; tarred fibre, 60c. per roll, O K and I X L, 65c. per roll; heavy straw and sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN AND WIRE CLOTH.—A fair trade is passing with prices unchanged at $1.42½ per 100 square feet.

FIREBRICKS.—There is a fairly good inquiry for firebricks, but the continued trouble on the wharf checks the movement. Prices are $16 to $22 per 1,000 for English and $17 to $22 for Scotch.

CEMENT.—The market is steady under a good demand, but owing to the difficulty in obtaining goods from the wharf, importers are somewhat hampered. We quote: Canadian cement, $1.90 to $2.25; German, $2.25 to $2.40; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl. ex-store, and American, $2.20 to $2.40 ex cars.

SHOT.—The demand is still good and values remain steady. We quote: Ordinary drop shot, A.A.A. to dust, $6.50 per 100 lb.; chilled Nos. 1 to 10, $7 per 100 lb.; buck and seal, $7.50 per 100 lb.; ball, $8 per 100 lb. Trade discount, 15 per cent. f.o.b. Montreal, Toronto, Hamilton, London, St. John, N.B., and Halifax.

METALS

There has been no material change in the condition of this branch of the trade since this day week. The feature still continues to be the difficulty in getting delivery of goods, as manufacturers and large handlers are still away behindhand. A slightly easier feeling is noticeable in lead, but the undertone to the market for copper, tin, spelter and zinc is firm.

BAR IRON.—Manufacturers are exceedingly busy, they being overcrowded with orders. We quote: Merchants' bar, $2; horseshoe iron, $2.25; forged iron, $2.30.

BLACK SHEETS.—Demand is good and some sizes scarce. We quote: 28

gauge, $2.65 ; 26 gauge, $2.60 , 20 to 21 gauge, $2.50 ; 8 to 20 gauge, $2.50

GALVANIZED IRON.—The strike on the wharf is interfering with shipments, as stocks on hand are not assorted. We quote : 28 Queen's Head, $4.50 ; Apollo, 10¾ oz., $4.30 ; Fleur de Lis, $4.15 ; Comet, $4.10 ; "Bell" brand, $4.05. For less than case lots, 25c. extra is charged.

LEAD PIPE.—There continues to be a fair inquiry for this. We quote as follows : 8c. for composition and waste, and 7c. for ordinary, with discount of 30 per cent.

IRON PIPE.—The feeling is firm under a good demand. Our quotations are as follows : Standard pipe per 100 ft., in lengths under 19 ft.: Black, ¼, $2.40 ; ⅜, $2.65 ; ½, $2.85, ¾, $3.65 ; 1-in., $5.20 ; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20 ; ⅜, $3.45 ; ½, $3.85; ¾, $5 ; 1-in., $7.20 ; 1¼, $10.05 ; 1½, $12.-20 ; 2-in., 416.85. Extra heavy pipe, plain ends, are quoted per 100 ft. as follows : Black, ½, $4.20 ; ¾, $5.25 ; 1-in., $7.55 ; 1¼, 410.55 ; 1½, $12.75 ; 2-in., $17.-60. Galvanized, ½, $5.20 ; ¾, $6.65 ; 1-in., $9.55 ; 1¼, $13.25 ; 1½, $16; 2-in., $21.90. For threads and couplings on extra heavy 5 per cent. net is added. Trade discount, 5 to 7½ per cent.

TINPLATES.—Demand fairly active at steady prices. We quote : Charcoal, $5 to $5.25 and cokes, $4.25 to $4.50.

SOIL PIPE AND FITTINGS.—There is no change to note. Discounts are: Light soil pipe, 3 to 6-inch, 50 per cent.; medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.: extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—The market is strong and prices have an upward tendency.

INGOT COPPER.—Firm at $15.50 to $15.75 per 100 lb.

INGOT TIN.—Inquiry fair at $33 to $33.25 per 100 lb.

PIG LEAD.—Prices unchanged at $3.50 to $3.75.

STEEL.—Feeling very firm. Our quotations are as follows : Mild, $2.05 ; sleighshoe, $2.10 to $2.20 ; tire, $2.15 to $2.25 ; spring, $2.85 to $3 ; reeled machinery, $2.75 to $3 ; toecalk, $2.60 to $2.75 ; machinery (iron finish), $2.10 ; mild steel, $2.05 ; square harrow, $2.15.

TOOL STEEL.—The demand is fair at firm prices. Our quotations are as follows : Black Diamond, 8 to 9c.; Sanderson's, 8 to 9c., according to the grade ; Jessop's, 13c.; Leonard's, 7½c ; Jonas & Colver's, 10 to 20c.; "Air Hardening," 50 to 65c. per lb.

CANADA PLATES.—There has been no actual change in spot prices, and we quote : 52s, $2.60 to $2.70 ; 60s, $2.70 to $2.80 ; 75s, $2.80 to $2.85 ; full polished, $3.75 and galvanized, $4.25 to $4.35 ; galvanized, 60s, $4.45 to $4.55.

TERNE PLATES.—Demand fair and prices steady at $7.75.

COIL CHAIN.—Unchanged and quiet. Our quotations are as follows : No. 6, 11½c. ; No. 5, 10 to 10½c. ; No. 4, 9 to 9½c.; No. 3, 8 to 8½c.; ¼-in., 6½ to 7c. per lb.; 5-16, $5 to $5.20; 5-16 exact, $5.25 ; ⅜, $4.25; 7-16, $4 ; ½, $3.95 to $4.05, 9-16, $3.85 to $3.95; ⅝, $3.65 to $3.75; ¾, $5 to $5.20; ⅞, $3.30 ; 1-in.,$3.15 to $3.25. In carlots an allowance of 10c. is made.

SOLDER.—A fair trade is reported at 20c. for bar and 19c. for wire.

ONTARIO MARKETS.

HARDWARE.

Toronto, May 8, 1903.

THE heavy movement reported last week still characterizes the market. Sorting orders continue to come in from all sides, jobbers stating that the chief difficulty to-day is to get stock rather than to secure orders. The only feature regarding prices is the marking up of quotations on German goods, wholesalers manifesting a disposition to take the difference, which there would be in case of a reduction in duty. The orders for fencing wire continue heavy from all quarters. In Manitoba and other parts of the country into which settlers are arriving, there is a particularly good demand for barb wire, but in the older parts of the province, coil spring wire is still growing in favor. Wire nails are in big request, factories still being behind orders. An exceptionally good trade in rivets and burrs has been noted. The sales of harvest tools are growing steadily. Manufacturers of spades and shovels and lawn mowers are still behind their orders, but are working hard to catch up. The trade has not yet been affected by the longshoremen's strike at Montreal, but is more concerned at the possibility of a strike of the teamsters and freight checkers here. There was talk of a strike to begin here on Thursday, but nothing will be done now for a week, during which time it is hoped that an agreement will be reached.

BARB WIRE.—An excellent trade is reported, though considerable business, formerly booked in this line, has turned to coil spring wire. The market is firm. The base price follows: $2.55 from Cleveland and 10c. less in carlots. From stock, Toronto, $2.80.

GALVANIZED WIRE.—The volume of business done in this line is even larger than last year. Prices are firm, as follows: Nos. 6, 7 and 8, $3.15 to $3.35 per 100 lb.; No. 9, $2.50; No. 10, $3.20 to $3.40; No. 11, $3.25 to $3.45; No. 12, $2.65; No. 13, $2.75; No. 14, $3.75 to $3.95; No. 15, $4.30; No. 16, $4.55. Nos. 6 to 9 base from Cleveland are quoted at $2.27½ in less than carlots.

SMOOTH STEEL WIRE.—Orders are many and generous. Prices are firm throughout. The base price is $2.50 per 100 lb. Oiling 10c.; coppering 60c.; and tinning, $2 per 100 lb. extra. Shipping points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

COIL SPRING WIRE.—The sales of this line continue to expand. Prices are steady. We quote: No. 9, $2.75; No. 11, $3.40; No. 12, $2.95. Freight up to 25c. per 100 lb. allowed on 500 lb. or over. Carlots of 15 tons, 5c. less, with freight up to 20c. allowed.

WIRE NAILS.—Orders are still coming in well and deliveries are hardly yet up to the demands. Prices are as follows: Carlots, $2.40 and small lots, $2.45 per keg f.o.b. Gananoque, Montreal, London, Hamilton, Toronto, Brantford, Windsor, Ont., and St. John.

CUT NAILS.—The demand is steady and fairly large. Prices are firm at $2.50 per keg.

HORSE NAILS.—Trade is but fair. The prices are unchanged, and our quotations are as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "Monarch," 60 and 10 per cent. and "Countersunk" head," 60 per cent.; on "Peerless," 45 and 7½ per cent.

HORSESHOES.—A moderate movement is recorded. We quote as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—A brisk trade is still reported, but offerings are more liberal. Prices are firm. Our quotations are as follows: Flat head bright, 87½ per cent. discount; round head bright, 82½ per cent.; flat head brass, 80 per cent.; round head brass, 75 per cent.; round head bronze, 70 per cent.; flat head bronze, 75 per cent.

RIVETS AND BURRS.—The demand has been particularly active and some sizes are decidedly scarce. Our quotations are now: Iron rivets, 60 and 10 per cent. discount; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.

BOLTS AND NUTS.—The activity continues with a firm market. We quote as follows: Carriage bolts, common ($1 list), 50 and 10 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron, ($3 list), 55 and 10 per cent.; machine bolts, all sizes, 50, 5 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.

BINDER TWINE.—Business is fully as active as at this time last year. Prices are thought to be at a sound level. We quote: 650 ft., 13c.; 600 ft., 12c.; 550 ft., 11¼c.; 500 ft., 10½c.

CORDAGE.—The recent advances have brought the market to a steady level and it is believed that prices will hold to the present figure for some time. We quote: Pure manila, 14c.; British pure manila, 12c.; sisal, 11½c.; double lathyarn, 11c.; single lathyarn, 10½c.; double shingle yarn, 11c.; single shingle yarn, 10½c.

SPADES AND SHOVELS.—Jobbers are still worrying the manufacturers for deliveries, which are, however, becoming more liberal. Prices are firm. The discount is 45 per cent. and the list price has been reduced $3 per dozen for Old's goods, $2 for Gray's and $1 for Burns'.

HARVEST TOOLS.—Orders are coming in better and are calling for a wider assortment. Prices are firm with the discount still at 60 per cent.

LAWN MOWERS.—This line is probably the most bothersome on the list at the moment. The trade is eager for deliveries, but the jobbers cannot procure the goods. Prices are steady. We quote as follows: Woodyatt, 12 in., $7.50; 14-in., $8; 16-in., $8.50; 18 in., $9; 20-in., $10; Star, 12-in., $5.50; 14-in., $5.75; 16-in., $6; Daisy, 12-in., $4.90; 14-in., $5.10; 16-in., $5.30; Ontario, 12-in., $14.25; 14-in., $15.80; 16-in., $16.80; 18-in., $18.90; 20-in., $20.50; Philadelphia, 12-in., $6.50; 14-in., $7; 16-in., $7.50. Discount, 40 and 10 to 50 per cent.

BUILDING PAPER.—A good trade is now doing in all papers. Prices are steady. Quotations are: Tarred felt, $1.75 per 100 lb.; 2-ply ready roofing, 90c. per roll; 3-ply, $1.15 per roll; carpet felt, $2.25 per 100-lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre 50c. per roll; tarred fibre, 60c. per roll, O K and I X L, 65c. per roll; heavy straw and sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN DOORS.—The movement has not yet started in earnest, but inquiries are numerous. We quote: Screen doors, common, two or three panel, walnut stained, 4-in. style, $6.80; stained, yellow or green, $7; in natural colors, oil finish, $8.15; 3-inch style, 20c. per dozen less.

METALS.

A good steady trade is being done in all lines, the only unsettling feature being the uncertainty and annoyance caused by the 'longshoremen's strike in Montreal, which is already causing a reduction of stocks in some lines and will surely lead to a scarcity, unless conditions in Montreal are improved. Pig iron prices show a stronger tone in that metal in the United States, an advance of 25 to 50c. per ton being noted during the week at Pittsburg and other points. Copper and tin, notwithstanding fluctuations during the week, are practically unchanged at outside markets, and are steady here. Steel prices are stiff. Other metals are steady.

PIG IRON.—There is an excellent spot demand and buyers are buying supplies for well into the latter half of the year. An advance is noted in Pittsburg, but there is no change locally. We quote as follows: No. 2 at $22.50 to $22.75; No. 2 Summerlee, $25 on track, Toronto.

BAR IRON.—The activity is even more marked and prices continue firm. We quote as follows: Base price is $2.05. For extras, cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft., by special agreement, according to length and size.

STEEL BOILER PLATES.—A brisk market at firm figures is noted. We quote $1.96 f.o.b. Toronto.

TOOL STEEL.—An excellent demand is recorded. Prices continue firm. Quotations are as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 10 to 20c.; ditto, "Air Hardening," 70c. per lb.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's "Special," 15 to 20c.

MACHINERY STEEL.—The activity continues, with prices firm at $2 to $2.05 f.o.b. Toronto.

STEEL BOILER PLATES.—There is still a good movement. Prices are steady at $1.96 f.o.b. Toronto.

BLACK SHEETS.—Business continues satisfactory, with prices unchanged. We quote: Common, $3.15 for 28 gauge and dead flat, $3.50 for 26 gauge.

CANADA PLATES.—A good demand is noted. Stocks are fairly good, but it is feared they will be reduced even to scarcity if the strike in Montreal continues. Prices are steady. We quote as follows: All dull, $2.90 to $3; half-polished, $2.85 to $3.10 and all-bright, $3.75 to $3.85.

GALVANIZED SHEETS.—There is a splendid demand. Quotations are firm. We quote: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 24 gauge; Bell brand, $4.30 for 28 gauge; Gordon Crown, $4.50 for 28 gauge.

TIN.—An active business is reported, with prices unchanged at $33 to $33.25.

TINPLATES.—The demand is improving. We quote as follows: Charcoals, $4.75 to $5 and cokes, $4.25 to $4.50 per box.

COPPER.—The market is still weak, yet there is a fair business in small lots at unchanged prices. We quote as follows: Ingot copper, $15, and sheet copper, $21 to $22 per 100 lb.

BRASS.—The activity continues at unaltered prices. Discount is 10 per cent.

LEAD.—There is a fair demand at unchanged prices. We quote: $3.50 per 100 lb. for pig lead and $3.75 for bar lead.

IRON PIPE.—A fairly good trade is doing. Prices are firm. We quote: Per 100 ft.: Black pipe, $\frac{1}{8}$-in., $3.25; $\frac{1}{4}$ in., $2.40; $\frac{3}{8}$-in., $2.65; $\frac{1}{2}$ in., $2.85; $\frac{3}{4}$-in., $3.65; 1-in., $5.25; $1\frac{1}{4}$-in., $7.35; $1\frac{1}{2}$-in., $8.95; 2-in., $12.55; $2\frac{1}{2}$-in., $21; 3-in., $25; $3\frac{1}{2}$-in., $32; 4-in., $38.

ZINC SPELTER.—Stocks are still light but the demand is excellent, with prices firm at $6\frac{1}{4}$ to $6\frac{1}{2}$c.

ZINC SHEETS.—An active business is recorded. We quote the base price as follows: Cask lots, $6.75 to $7 and part casks, $7 to $7.25.

SOLDER.—In good demand. Prices are unchanged. Guaranteed half-and-half is quoted at 18 to 19c., and wiping 17 to 18c.

OLD MATERIAL.

This market shows no change this week. The general demand is still fair, and the supply somewhat limited. We quote as follows: Heavy copper and wire, 12c. per lb., light copper, 10c. per lb., heavy red brass, $10\frac{1}{2}$c. per lb.; heavy yellow brass, 9c. per lb.; light brass, 6c.; lead, $2\frac{3}{4}$c.; scrap zinc, $3\frac{1}{2}$c.; iron, No. 1 wrought, $14 per net ton; No. 2 wrought, $5; machinery cast scrap, $16; stove plate, $11; malleable and steel, $7; old rubbers, $6\frac{1}{2}$c. per lb. and country mixed rags, 50c. per 100 lb.

SEEDS.

The seed season is practically over now, although there are a few small orders still coming in. Prices remain firm at last week's quotations. We quote as follows, ex-warehouse here: Red clover, per bushel, $6 to $7.80; alsike, per bushel, $4.80 to $8; timothy, per bushel, $2 to $2.75.

HIDES, SKINS AND WOOL.

This market makes the same showing as last week. Prices hold firm at last week's quotations. We quote as follows:

HIDES.—No. 1 green, $7\frac{1}{2}$c.; No. 2 green, $6\frac{1}{2}$c. per lb.; No. 1 green, steers, 8c.; No. 2 green, steers, 7c. per lb.; cured, per lb., $7\frac{3}{4}$ to $8\frac{1}{4}$c.

CALF SKINS.—Veal skins, No. 1, 6 to 14 lb. inclusive, 10c.; No. 2, 8c.; No. 1, 15 to 20 lb. inclusive, 9c.; No. 2, 7c. Deacons (dairies), each, 60 to 70c.; sheepskins, 40c. to $1.10.

WOOL.—Unwashed wool, per lb., 8 to 9c.; fleece wool, 15 to 16c.; pulled wools, super., per lb., 15c.; extra, 18c.

TALLOW.—Tallow is very scarce. We quote $5\frac{3}{4}$ to 6c. per lb.

WINNIPEG, MAY 4.

"TRADE is good and cannot get goods fast enough," continues to be the staple answer of the hardware trade. The delays in shipments of goods are becoming a regular bug-a-boo with merchants. In paints and oils trade is brisk; turpentine is still weak and the prices of lead have not advanced as anticipated. There is a growing demand for scrap, and all the machine shops and foundries are working at high pressure. Binder twine is selling well, and there is a general feeling that prices will be high this fall. The trade in implements for spring has been fully 50 per cent. ahead of last year. The lines that have sold most freely are plows, harrows, wagons, cultivators and drills. We quote:

WILL IT PAY?

Every business transaction is weighed by one standard.

Will it Pay?

If you handle *oil of any kind* and are considering the purchase of a

BOWSER
Self-Measuring
OIL TANK

Let us ask you a few questions:

Is it worth 10 cents a Day to handle your oil without waste?

Is it worth 10 cents a Day to sell your oil without loss of time and labor?

Is it worth 10 cents a Day to have no leaky, dirty measures and funnels to handle?

Is it worth 10 cents a Day to keep your oil room neat and clean?

We might propound a hundred questions equally as pertinent. If any one of these is worth 10 cents a day, is not the combination of the many worth more than the cost of a **Bowser Self-Measuring Oil Tank**, which will give you all these advantages?

Let us give you full particulars. Ask for Catalogue "A."

NOTES.

Dalton & Co., Wellwood, have added hardware to their general stock.

Clark & Thompson have purchased the business of F. Y. Newton, at Grand View.

Basswood, Man., is to have a hardware store. Mr. Murray, of Winnipeg, is the proprietor.

NOVA SCOTIA MARKETS.

Halifax, May 5, 1903.

THE general activity which has prevailed in the hardware trade for some months still continues, and all the dealers place the business so far in 1903 as beyond the average, although the last few years have been exceedingly good, both as to the volume of business done and the general trade conditions prevailing throughout the Maritime Provinces.

* * *

There are no material price changes to note, but in nearly every line there is a tendency to firmness. The urgent demand for goods at the hands of the manufacturers is given as a reason for such firmness, and the fact that the manufacturers are sold up to date and beyond their capacity to turn out the goods as orders come in. An easier condition was expected this season in this respect, but goods have still to be ordered far ahead to ensure delivery when required. This hampers the trade to some extent and the wholesalers are hoping for a more even balance between supply and demand. This, however, is not likely to occur this season.

* * *

The demand for all lines of builders' hardware continues good. There has also been a good demand for farming tools and implements, and for wire fencing. The demand for the latter is now pretty well supplied and the trade will pass into other seasonable lines. There has also been a fair demand for lumbering and mining supplies of late, but the trade has not been quite up to the average. During the last two weeks the bulk of many orders was for glass, cement, etc., the spring supply of which came by the ss. Pharsalia.

* * *

The retail trade for the last two or three weeks has been quite brisk in the

ers of paints, brushes, glass, putty, nails, screws, etc., for the regular spring opening of the householder. There has also been a fair trade in sporting goods and anglers' supplies.

* * *

There is still considerable comment as to the effect of the German surtax. Large quantities of shelf hardware and cutlery have been imported from that country. Besides the inclination of a good many customers to prefer foreign made goods—supposing them to be superior—it is claimed by the trade that in many lines, especially in cutlery, the "Made in Germany" is more attractive in pattern and more highly finished, thus looking much better and being readier sellers. They seldom, however, equal the British product in their solidity of make or in their wearing qualities. The result may be that a certain proportion, or certain lines, will still be imported and sold at the increased cost. The consensus of opinion remains that the Finance Minister's policy was judicious, although a tariff war is a thing not to be desired.

* * *

The Customs receipts of Halifax have made an abnormal record for April. The record for April, 1902, was $105,229.26, and for the present year, $300,880.18, an increase of $195,319.16. A very large portion of this amount is for sugar duties, the balance being for spring importations, which were especially large, that of hardware exceeding the average for a number of years.

R. C. H.

OBITUARY.

JOHN McARTHUR.

THE death of John McArthur, founder of the paint and oil firm of John McArthur & Son (now McArthur, Corneille & Co.), of Montreal, took place on Tuesday evening, the 5th inst. Mr. McArthur was 90 years old, and had not been in good health for a couple of years before his death.

The deceased gentleman came to Canada from Hamilton, Lanarkshire, Scotland, in 1845, and one year later entered business with the late Alex. Ramsay, father of the senior partner of A. Ramsay & Son, Montreal, under the style of Ramsay & McArthur. This firm, whose warehouse faced Victoria Square, carried on business for many years, till the junior partner commenced business with his son, J. C. McArthur. About 10 years ago he retired from business, and the firm of John McArthur & Son became that of McArthur, Corneille & Co.

Mr. McArthur was prominently connected with several city charities, having been a governor of Montreal General Hospital, the House of Industry and Refuge and other institutions, and was an artist of no little merit, being one of the earliest members of the Art Association of Montreal.

He leaves a son, J. C. McArthur, of McArthur, Corneille & Co., and three daughters.

THE GREAT WEST.

THE trade of the week has been rather quiet, owing to the low temperature which came duly as predicted by Mr. Foster. The lull was only temporary, and no doubt the railway companies hailed it as a special providence in their behalf, for they are all hopelessly behind with shipments, and many country merchants complain that goods now reaching them are so far behind as to be unsaleable. This is especially the case with regard to goods ordered for sale to new settlers.

* * *

The railway companies are making a big struggle; but the traffic is enormous, and, in the case of the C.P.R. particularly, they are reaping the whirlwind for allowing men well accustomed to western conditions to go and replacing them with men from the east who have had no practical experience of similar conditions, and promptly lose their heads. Some of the men who left the company three years ago did so largely because their statements as to the need of increasing the rolling stock and double tracking the road were turned down, and now what they foretold has more than been fulfilled. No amount of strenuous effort now will or can make up for the want of foresight, or, more properly speaking, the want of faith on the part of those in authority in the men who were on the spot and knew the conditions. Most unfortunately it is not the railroad that is paying the piper, but the country at large. Some of the newspaper men who have come up from the east, noticeably the man for The Toronto Star, makes a brilliant plea for the C.P.R., and reviles the people of the west for their complaining. Statements like that may go down in the east, but not here. We are so used to be lied about in the east that we get hardened to it, but statements like that appearing at a time when hundreds of cars of freight are weeks behind in delivery make even the patient western jobber indulge in a few private cuss words.

C.E.H.

MAKING SEVERAL NEW LINES.

J. J. Turner & Son, Peterboro', Ont., are, by their aggressive business methods, building up a particularly strong connection for the supply of tents, flags, awnings, waterproof goods, camping supplies, etc. Since building their new factory last summer they have started to manufacture a number of new lines, including horse blankets, coal bags and the other lines which are sold by the hardware trade. Their catalogue is now ready for distribution.

CONDENSED OR "WANT" ADVERTISEMENTS.

Advertisements under this heading, 2c. a word each insertion; cash in advance. Letters, figures, and abbreviations each count as one word in estimating cost.

SITUATIONS VACANT.

WANTED—Traveller for wholesale iron and steel business; one with practical experience in working steel preferred. State experience and salary expected. P. O. Box 678, Montreal. 16-2 f

BLACKSMITH — First-class; state wages F. Gadsby, Springfield, Ont. f

BLACKSMITH — Good general man; good horseshoer and hammersmith; at once. Apply to Fred Bunt, Vallentyne, Ont.

TINSMITH—Experienced furnace man; some knowledge of pipe fitting; able to estimate; take charge of shop; fifteen dollars week; permanent situation; if married would advance to assist moving; mention experience, age; send recommendations. A. P. Brown, Morden, Manitoba.

TINSMITH—Good at plumbing and pipe fitting; state experience and wages. H. A. Havil, Walkerton, Ont. f

ENGINE erectors wanted—At once; good men; highest wages. J. M. Ross, Sons & Co., Brampton, Ont. f

BLACKSMITH — Good steady single young man; one or two years' experience at horseshoeing; to work in general shop; state wages wanted; good steady job. A. W. Hough, Perry, Michigan. f

BLACKSMITH—Immediately, one or two years, experience at horse shoeing and general work; strictly temperate. John Wilson, Homer, Ont. f

THREE harness makers wanted at once. F. A. Musgrove & Co., Picton. f

TINSMITH — At once; steady job; must be strictly temperate. Apply, stating experience and wages expected. J. & T. M. Piper, Fort William, Ont. f

TRADE IN COUNTRIES OTHER THAN OUR OWN.

IRON SITUATION IN THE STATES.

THREE statements give the situation in the main. Foundry pig iron is weaker and buyers are waiting for the market to settle further before taking hold. Steel making pig irons are strong, with good demand. Finished material in all lines is quiet, but without weakness. This is not the first time in the present long run of prosperity in iron, when foundry iron has been out of harmony with other lines, and the causes in this instance are not obscure. For months buyers have been out of the market except as failures of deliveries on contracts or temporary increase in demand for castings has compelled buying. Increasing production of pig iron and market improvement in freight facilities have demonstrated that foreign iron is no longer needed and that requirements will be more than supplied by domestic furnaces. The discrimination of $1 per ton on Southern iron prices, in favor of eastern buyers, is practically ineffective to-day, and while there has not been business enough to tempt association furnaces to change their own schedule there have been sales of No. 2 iron at $16.50, Birmingham, by outside interests to Central Western melters, and this price does not appear to be absolute minimum. The possibility of a new and uniform price by the associated Southern sellers is already being discussed. It does not appear, with all the weakness and halting in foundry iron, that melters are now doing less business than in the past year or expect any falling off. The contrary is true in very many instances. What is likely to happen is that a very large number of foundries will be in the market at the same time within the next two months. The price of Northern iron has declined within the month, and $20 for No. 2 at Northern furnace is now possible for the second half. Middlesboro' iron is weaker in the east, $17.75 ex-ship having been done. German iron is also lower, and there is some discussion of probable cancellations on existing contracts for foreign iron. The market for steel-making pig iron does not show the weakness of foundry grades. Pittsburg reports about 50,000 tons of Bessemer and basic iron sold in the past week, including a considerable tonnage for May, June and July, on the basis of $19.90 to $20.15 at Valley furnace for the earlier deliveries.—Iron Trade Review, April 30.

HARDWARE TRADE IN THE STATES.

Considering the advance in the season, trade continues in excellent volume. Outdoor activities, especially in agricultural sections, interfere, however, with the leisure of retail merchants, but what is lost in this way finds doubtless some counterbalance to the increase of trade in other directions. Jobbers generally are well supplied with goods, and their purchases have recently fallen off so that the amount of new business coming in to manufacturers is not so heavy as it has been. A noticeable feature of recent trade is the fact that jobbers are placing their orders a longer time in advance of the season when the goods are needed than has been usual during past years. The reason for this is found in the activity of trade and the difficulty frequently experienced in getting goods when required if their purchase has been too long deferred. Manufacturers continue in many lines to be behind their orders, the production of goods being interfered with by the causes with which the trade are familiar—difficulty in getting material, delays in transportation, etc. There is also more or less difficulty experienced in connection with labor, which, in some cases, is scarce and in others restless, if not actually on strike. The various influences at work in the market tend to give strength to prices, and many lines are decidedly firm, even if they have not lately recorded an actual advance. The generally gratifying indications for the crops are influencing the market toward continued strength and confidence.—Iron Age.

BRITISH IRON MARKET.

S. W. Royse & Co., Manchester, Eng., in their monthly report say: "The decline in values in pig iron, which commenced towards the end of March, has since continued steadily, and the total drop is very heavy, being some 4s. per ton in Scotch and Cleveland iron. Naturally, very little business is being done—only of the merest hand-to-mouth description, and there is a large increase in the quantity of iron in the public stores in Middlesboro'."

UNITED STATES MERCHANT IRON PIPE.

Inquiry is very heavy for the larger sizes of pipe and a big tonnage has been closed, though, as a result of the labor situation, demand for smaller pipe is very light. Several big deals for pipe for summer delivery are under way, notably one for 100 miles of line pipe and casing for Joplin, Mo., and for 34 miles of 6-in. pipe for Beaumont, Tex., all of which is to be laid this summer. The slight demand for small pipe has weakened prices, and several sellers believe a reduction will be made in the near future.—Iron Trade Review.

THE AXE TRADE IN THE STATES.

Within the past few weeks the axe market has developed decidedly unsatisfactory conditions. The effort made by the manufacturers to maintain prices has been unsuccessful and there has been a break to a point below that at which contracts were placed a year ago. The jobbing trade in their suspicion of the market, which is thus shown to have been well founded, deferred purchasing to a later date than usual, and it is understood that a great many of them have not even as yet placed their orders. There is, however, a general feeling that the market is not likely to recede further, especially as existing prices are referred to by many of the manufacturers as actually below the cost of production. In the competition which exists the usual differential between manufacturers' and jobbers' brands is not in all cases adherred to, and manufacturers are in some cases selling their own brands at figures that closely approximate prices of special brands. This is done largely on account of their desire to market their own goods and to discourage as much as possible the sale of special brands.—Iron Age.

EASY TIN MARKET.

London cables reported a marked decline in the price of spot tin on some selling pressure, and that the market closed with an easy tone at £1 below Monday's closing figure. Futures were quiet and declined 17s. 6d. In this market trade was reported to be extremely dull and the undertone was easy. While at the call on the Metal Exchange 29.90c. was bid and 30.12½c. asked for spot to May in the open market, there were sellers of stock in store at nearer the first-named than the latter figure. So far as could be learned there were no inquiries for lots larger than 5 tons, consumers not being disposed to enter the market.—New York Journal of Commerce, May 6.

CUT AND WIRE NAILS IN THE STATES

Shipments of cut nails from the mills are delayed to some extent by the continued scarcity of steel. There is a good demand for cut nails, and the mills are working full time, mostly on large contracts placed prior to the recent advance in prices. The tone of the market is strong, and we quote: Steel cut nails, $2.15, base, in carloads and $2.20 in less than carloads; iron cut nails, $2.25, base, in carloads and $2.30 in less than carloads, plus freight in Tube Rate Book to point of destination, 60 days, less 2 per cent. off in 10 days.

There is nothing of special interest to note in the wire nail trade this week. The output of the mills is restricted to some extent by the continued scarcity of steel, but the fact that a large Bessener works of The Carnegie Steel Co., at Youngstown, Ohio, has recently been changed from rails to billets will soon relieve the scarcity of steel to some extent at least. The wire-nail mills are steadily employed, mostly on contracts placed some time since, but a good many new orders are being received. The tone of the market is firm, and prices, we are advised, are being firmly held.—Iron Age, April 30.

PAINT, OIL AND BRUSH TRADES

PAINT AND OIL MARKETS.

MONTREAL.

THERE has been no important change to note in paints or oils, but the tone of the market for turpentine continues easy, and although no further decline in prices has taken place since this day week, yet they have a downward tendency, as supplies in sight are considerable. Business in all lines has been active, there being a good demand from both outside and local jobbers, and wholesale houses are busy filling orders. We quote:

GROUND WHITE LEAD.—Best brands, Government standard, \$5.25 to \$5.50; No. 1, \$4.52½ to \$5.12½; No. 2, \$4.65 to \$4.75; No. 3, \$4.27½ to \$4.37½; No. 4, \$3.90 to \$4., all f.o.b. Montreal. Terms, four months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—\$5 in casks, and in kegs, \$5.25.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100-lb. kegs, 6¾c.; No. 1, zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25-lb. irons, 8c.; No. 1, 7c.; No. 2, 6c.

PUTTY.—We quote: Bulk, in barrels, \$1.60; bulk, in 100-lb. packages, \$1.85; bladders, in barrels, \$1.90; bladders, in 100 or 200-lb. kegs, \$2.05; 25-lb. tins or irons, \$2; 12½-lb. tins, \$2.30. f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax. Three per cent. discount for cash in 30 days.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, \$4.50; in 100-lb. kegs, \$4.75; in less quantities, \$5.75 per 100 lb. No. 1 red lead, casks, \$4.25; kegs, \$4.50 and smaller quantities, \$5.50.

LITHARGE.—Ground, casks, 5c.; less quantities, 5½c.; flake litharge, casks, \$5.25; smalls, \$5.75 per 100 lb.

LINSEED OIL.—Raw, 1 to 4 barrels, 59c.; boiled, 62c.; raw, 5 to 9 barrels, 58c.; boiled, 61c. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gallon advance.

TURPENTINE.—Single barrels, 85c.; 2 to 4 barrels, 84c. Terms, net cash in 30 days.

BENZINE.—25 to 26c.

SHELLAC VARNISH.—Pure white, \$2.35 to \$2.45; orange \$2.25 to \$2.35.

MIXED PAINTS.—\$1.20 to \$1.40 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PURE CANADIAN PARIS GREEN.—Petroleum barrels, 16¼c.; per lb.; arsenic kegs, 16½c.; 50 and 100 lb. drums, 17c., 25 lb. drums, 17½c.; 1 lb. packages, 18c; ½-lb. packages, 20c.; 1 lb. tins, 19c.; ½-lb. tins, 21c.

PURE ENGLISH PARIS GREEN.—Petroleum barrels, 14½c.; arsenic kegs, 14½c.; 50 and 100-lb. drums, 15c.; 25-lb. drums, 15½c.; 1 lb. paper boxes, 16c.; 1-lb. tins, 17c.

TORONTO.

An exceedingly good week's business is reported by most jobbers, the demand being of a general sorting nature, though the staples, such as white lead, oil and turpentine, are not moving any too freely. Paris green prices are still being cut, with but a moderate movement. Turpentine continues easy, owing to the fact that prices continue to decline in Savannah, the price there now being 20c. per wine gallon, equal to 26 2-3c. per Imperial gallon, lower than the high price noted before the new crop started to come in. Linseed oil is featureless as to price. There is no change to note. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, \$5.10 to \$5.25. No. 1, \$4.62½ to \$4.87½; No. 2, \$4.25 to \$4.50; No. 3, \$3.87½ to \$4.12½; No. 4, \$3.50 to \$3.75 in packages of 25-lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. packages; genuine dry white lead, in casks, \$5.02½.

RED LEAD.—Genuine, in casks of 560 lb., \$4.75 to \$5; ditto, in kegs of 100 lb., \$5.25 to \$5.50; No. 1, in casks of 560 lb., \$4 to \$4.25; ditto, in kegs of 100 lb., \$4.25 to \$4.50.

LITHARGE.—Genuine, 6 to 6½c.

WHITE ZINC.—Genuine, French V.M., in casks, \$6 to \$6.25; Lehigh, in casks, \$6 to \$6.25.

SHINGLE STAIN.—In five-gallon lots, 60 to 85c. per gallon.

PARIS WHITE.—90c. to \$1 per 100 lb.

WHITING.—65c. per 100 lb; Gilders' whiting, 80c.

GUM SHELLAC.—In cases, 35 to 37c.; in less than cases, 40 to 42c per lb.

LIQUID SHELLAC.—Pure orange, in bbls., \$2.30 to \$2.40; white, \$2.35 to \$2.45 per gallon; in less quantities, 10c. extra.

GLUES.—Broken sheet, in 200-lb. bbls., 8 to 8½c. per lb.: cabinet glue, in bbls., 11½ to 12c.; emery glue, in bbls., 17c.; bookbinders', ground, 10½c.; finest American, white, 19c.: No. 1 American white, 15c. per lb.

PUTTY.—Bladders, in barrels, \$2.10; bladders, in 100-lb. kegs, \$2.25; bulk in barrels, \$1.80; bulk, less than barrels, and up to 100 lb., \$2.05; bladders, bulk or tins, less than 100 lb., \$2.75.

PARIS GREEN.—Petroleum bbls., 13 to 15½c. per lb.; arsenic kegs, 13½ to 15½c.; 50 and 100-lb. drums, 14 to 16c.; 25-lb. drums, 14½ to 16½c.; 1 lb. packages 15½ to 17c.; 2-lb. packages, 17 to 18c.; 1-lb. tins, 16 to 18c.; ½-lb. tins, 17 to 19c.

PLASTER PARIS.—New Brunswick, \$2 per barrel.

PUMICE STONE.—Powdered, \$2.50 per cwt. in bbls. and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, \$1.20 to \$1.40 per gallon; No. 1, \$1.10 per gallon.

BARN PAINTS.—65 to 70c. per gallon.

CASTOR OIL.—English, in cases, 8 to 9c. per lb.; and 9 to 10c. for single tins.

LINSEED OIL.—Raw, 1 to 2 bbls., 61c.; boiled, 64c.; 3 to 5 barrels, raw, 60c.; boiled, 63c.; 6 to 9 barrels, raw, 58c.; boiled, 61c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 barrels and over of linseed oil sold only f.o.b., Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 77c.; 2 to 3 bbls., 78c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

WINDOW GLASS.

MONTREAL.

The tone of the market for glass is steady, but as there are some good-sized lots on the first vessels from Hamburg and Antwerp, it is possible it might be easier when it comes on the market. Our quotations are as follows: First break, 50 ft., \$2; second, \$2.10 for 50 ft.; first break, 100 ft., \$3.80; second break, \$4; third break, \$4.50; fourth break, \$4.75.

TORONTO.

The demand is particularly active, all parts of the country seeming to feel the influence of the activity in building operations. Prices follow: Star, under 26 in., \$3.80; 26 to 40 in., \$4; 41 to 50 in., \$4.50; 51 to 60 in., \$4.75; 61 to 70 in., \$5; 71 to 80 in., \$5.50. Toronto, Hamilton and London. Terms, four months, or 3 per cent., 30 days.

PAINT AND OIL NOTES.

A company has been formed to drill for oil at Lawrence Station, Ont., and prospects are said to be good.

The directors of The Durham National Gas and Oil Co., Durham, Ont., have secured a complete drilling rig, which is guaranteed suitable for drilling to any depth.

The Raleigh Oil Co. have struck what seems at present to be a very promising well. The company was started last January by a few energetic Chatham, Ont., citizens. Those interested are: E. A. Mounteer, A. W. Merrill, F. Merrill, J. Glassford, George Smith, H. A. Bedford, Alex. McCallum, J. W. Rosebrugh, Wm. McCallum, J. C. McMullen, H. Nelson and James Massey.

BUSINESS MORALITY IN OIL TRADE.

Who is to blame for the dishonesty as to price and quality of goods sold to the trade? Is not the retail merchant as often to blame as the jobber or manufacturer who adulterates his stock and sells it to the retailer below a fair price. The company guilty of such adulteration are certainly guilty of dishonesty; but can the retailer claim to be better, less guilty?

The retail merchant, in order to compete with his neighbor, may properly exercise care, foresight and shrewdness as to the price he pays for his goods, but when he is approached by a traveller representing a house he has not done business with, who quotes a price somewhat below the regular quotations, he can blame no person more than himself if he places an order with the stranger, and later finds he has bought goods inferior to the pure article.

Attention has been drawn to two or three cases of this kind by dealers in linseed oil and turpentine. The goods are staple and their price is well known and well maintained by the leading houses in the trade. Yet within the past ten days three retail merchants from different sections of Ontario have sent samples of linseed oil and turpentine to Mr. Fielding, secretary of the Linseed Oil and Turpentine Association, Toronto, for analysis, a suspicion of adulteration having been aroused in each case.

The analysts' reports abundantly confirm these suspicions. The report of the first case was published in last week's issue of "Hardware and Metal"; the second test showed a sample of turpentine to consist of 50 per cent. light petroleum, 5 per cent. rosin and 45 per cent. turpentine. The boiled linseed oil, on examination, was shown to contain 20 per cent. light petroleum.

"It is not surprising that the retailer who bought this oil got the worst of the bargain," said an authority on the subject. "The best price for which linseed oil could be bought from the crushers, in lots of ten barrels or more, was 58c. at point of shipment. To import would have cost at least 60c. Yet this oil was laid down in a small village in Eastern Ontario at 58c."

Whether to follow up such cases to the securing of conclusive evidence (always difficult to get in such cases) and to press for conviction against the firms selling such stuff, is the question which houses who want to see an honest market have under discussion.

It is debatable whether the law is broad enough to cover the cases definitely enough to secure conviction. Probably an opinion as to the meaning of the Act bearing on the matter will be asked from the Dominion authorities, and if the law is not broad enough, an amendment will likely be asked.

But in the meantime the retail trade have it within their power to prevent the sale of much adulterated linseed oil and turpentine. But if they are eager to buy below the market it would be advisable to be careful from whom one buys.

THE VARIED USES OF PAINT.

In an address before the College of Pharmacy of the City of New York, Dr. Maximilian Toch, is reported by an exchange to have said: "When the word paint is used the general and popular impression is that it is some color which is used as a decorative or protective coating on the wood or ironwork of buildings. It is quite true that numerous quantities of paint are used for such purposes, but taking it all in all the amount of paint consumed on houses and structural work, which is by far larger here than in any other country, is not by any means the largest consumption of paint itself, even though almost every city or town has its paint factory. Paint is used in large quantities for the manufacture of oilcloth, rubber goods, table oilcloth, window shades, wagons, boats, railroad cars, wall paper, linoleum, printing ink, etc. The consumption of house paint is much smaller than in proportion to the consumption of paint for the manufacturing industries." Speaking of the manufacture of chemical paints used as raw materials from which finished colors are made, he said:

"These chemicals or raw materials are ground in a suitable medium or vehicle, such as oil, water, varnish and the like, and they then form oil colors, varnish colors, distemper colors, enamels, etc. Upon the property of the raw material depends the permanency of the finished colors, and as a great many colors or pigments have inherent defects, it is the object of the paint manufacturer continually to improve his products and omit those that are defective."

TURPENTINE PRICES.

Turpentine continues to decline at Savannah. According to The New York Journal of Commerce, it is now quoted at that point at 45c., as compared with 65c. when prices were maintained at the top price of a few months ago. The New York market of Wednesday was reported as follows: "Holders in yesterday's market were firm on price, but buyers were not inclined to come in at the moment in the expectation that in a very short while spirits can be obtained at considerably less. Quotations yesterday were 50c. for machine-made barrels and 49½c. for oils, with practically nothing doing except for export. Arrivals for the latter part of the week are quoted at 48½c. Savannah was unchanged yesterday at 45c."

It will be seen from the following figures of stocks at Savannah, taken from The Savannah News, that stocks are not yet nearly as large as last year:

	1902.		1903.	
Stocks, April 1	5,175		1,241	
Received to April 25	13,077		14,485	
Received last week	7,036		3,742

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

D. G. GAUVIN & CO., general merchants, Rexton, N.B., are offering to compromise at 50c. on the dollar.

M. Boisvert, sporting goods merchant, Shawenegan Falls, has assigned.

A chattel mortgagee is in possession of the hardware business of G. H. Miner.

L. J. Dubord, general merchant, Champlain, Que., has assigned to Gagnon & Caron.

J. E. Maranda & Co., general merchants, St. Ours, Que., have assigned to Lamarche & Benoit.

INCORPORATIONS AND CHANGES.

Thomas J. Howden, builder, Watford, Ont., is removing to Sarnia.

A. Labelle, second-hand furniture store, Montreal, has been registered.

J. W. Hughes & Co., plumbers, Montreal, have been registered.

Imperial Elevator Co., Winnipeg, Man., have been incorporated.

Joseph Lambert & Fils, contractors, Montreal, have been registered.

Jos. Brunet, Fils & Co., contractors, Montreal, Que., have been registered.

W. H. C. Mussen, railway, mining, and contractors' supplies, Montreal, have been registered.

The St. Mary's Portland Cement Co., Limited, St. Mary's, Ont., have been granted a charter.

T. L. Arnett, lumber merchant, Souris, Man., has admitted his brother, J. Arnett, into partnership.

James Larmour, agricultural implement merchant, Elmcreek, has been succeeded by Falconer & Larmour.

W. Grenier & Cie., oyster and fruit dealers, Montreal, have been registered

Howard Lusk, general merchant, Heyworth, Que., has removed to Aylmer, Que.

John Gardiner & Co., general merchants, Wabigoon, Ont., are giving up business.

J. B. McManus, Limited, general merchants, Memramcook, N.B., have been incorporated.

Ross Bros., hardware and general merchants, Edmonton, N.W.T., have been succeeded by Ross Bros., Limited.

Louis Charbonneau, general merchant and cheese manufacturer, Plantagenet, Ont., has disposed of his general store and business.

The style of The Mitchell Mercantile Co., general merchants, Mitchell, has been changed to Midale Mercantile Co., and the firm has located at Havrit, N. W. T.

The notice which appeared in "The Grocer" of a recent date saying that Robinson & Co., Blenheim, Ont., were going to open a general store in Paris, Ont., is incorrect.

SALES MADE AND PENDING.

E. G. Gauthier, general merchant, of Papineauville, Que., has sold out.

Francis Wimmer, foundry, West Lorne, Ont., is offering his business for sale.

E. C. Price & Co., general merchants, Ponoka, have sold out to F. J. Purdy.

The Vernon Hardware Co., Vernon, B.C., are offering their business for sale.

The assets of the contracting business of Lambert & Fils, Montreal, are to be sold.

James D. Adam, hardware merchant, Tavistock, Ont., has sold out to Klein & Ratz.

Francis H. Ringwood, lumber merchant, Lenore, has sold out to the Prairie Lumber Co.

A. G. Buckham, hardware dealer, Brampton, Ont., has sold out to J. A Henderson.

The assets of the general business of L. J. Bourget, Lauzon, Que., are to be sold on May 6.

F. Y. Newton, hardware and implements, Grand View, has sold out to Clarke & Thompson.

McMulkin & Jordan, hardware merchants, St. John, N.B., have sold to J. W. McAlary Co., Limited.

The stock of the general business of T. & E. Mosseau, Campbell's Bay, Que., has been sold at 40c. on the dollar.

The stock of the general business of Mrs. P. Cloutier, St. Eugene, Que., has been sold at 52½c. on the dollar.

John Boyd, lumber and furniture dealer, Deloraine, Man., has sold lumber business to the Prairie Lumber Co., Limited.

W. T. Mollard, builder and lumber merchant, Regina, has sold out the lumber business to the Prairie Lumber Co., Limited.

The general stock of the estate of Young & Morrison, Thamesford, Ont., has been sold to Morrison & Coleridge, at 70c. on the dollar.

J. B. Dyck & Sons, lumber and agricultural implement merchants, Winkler, have sold the lumber business to the Canadian Elevator Co., Limited.

PARTNERSHIPS FORMED AND DISSOLVED.

Eugene Laramee, plumber, Montreal, has dissolved.

F. Duclos & Co., plumbers, Montreal, have dissolved partnership.

I. Lafleche & Son, grocers, Hull, Que., have dissolved; I. Lafleche continues.

McDonald & Son, general merchants, of King City, Ont., have dissolved partnership.

Smith & Miller, general merchants, of Duhamel, have dissolved; George P. Smith continues.

J. C. Callander & Co., general merchants, Hartney, Man., have dissolved; J. C. Callander continues.

Wm. Springbelt, blacksmith and agricultural implements, Red Deer, has admitted R. Pengelly into his business.

A co-partnership has been registered for George A. Mitchell, general merchant, of Mill Village, N.S., to do business as J. P. Mitchell & Co.

FIRES.

R. J. Husband, painter, Rat Portage, was burned out; no insurance.

DEATHS.

W. Masters, of the general business of J. H. Hickman & Co., Dorchester, N.B., is dead.

W. N. Barrie, of the firm of Barrie & Brownlee, general merchants, Lemieux, Ont., is dead.

WORLD'S SUPPLY OF HIDES AND SKINS.

According to The British Trade Review, the supplies of hides and suins in Australasia, China and the Far East, and North and South America, as well as in the United Kingdom, are all very much below those normally held, and are consequently commanding full prices, which, by the way, are in almost every instance considerably higher than they were six months ago. The great famine which prevailed about two years since throughout nearly the whole of the Indian empire had a serious effect upon the goat, sheep and hide trades, the results of which are still being keenly felt in the high rates the two first named are still bringing. Indeed, so high is the cost of goat and sheep of good quality that the ingenuity of leather manufacturers has been severely tested to either buy as few as possible, or, as has been more frequently the case, to fall back upon substitutes, which, of course, come cheaper. The great drought in Australia has been the cause of unprecedentedly heavy losses of sheep and cattle, both by death and wanton slaughter, the latter course being preferred to the cost and risk of trying to keep them. For a time the market was flooded with poor quality famine stuff; but these have now stopped, and exports have almost ceased. From America, where the boom in trade has caused a tremendous demand for raw material, the exceedingly short supply of calfskins and kips has placed values on a high basis.

WILL INCREASE PIG IRON OUTPUT.

The blast furnace which The Nova Scotia Steel and Coal Co. are building at Sydney Mines, N.S., will be ready for bricking in less than two months, and will have the capacity of 100 tons of pig iron per day. It is hoped that this furnace will be turning out pig iron by October. It is further announced that the company will add one additional blast furnace a year till four of these large-sized furnaces have been constructed.

Keeping up the Assortment.

The fellow in the picture is in the employ of one of those merchants who are **wide awake** to the fact that to meet the demands for **ALABASTINE** which come at this season of the year, he must have an assortment of all shades in stock.

CUSTOMERS for ALABASTINE, or anything else for that matter, who have to go elsewhere to get what they want may be lost altogether. At any rate, the opportunity is given the other dealer to explain how people can **always get** everything they call for at **his** store, etc.

ALABASTINE is the goods that are in demand. It has stood the test of time, and people know it is all right. It is made in Canada, by Canadian labor and from rock taken out of Canadian mines. Is your assortment complete?

For sale by Wholesale Hardware and Paint Dealers. Manufactured by

HEATING AND PLUMBING

DRAIN PIPE DIFFICULTIES.

WHAT often causes a very great annoyance and expense to plumbers when applying the smoke test in the spring to work done the previous fall is to find that the winter's frost has had such an effect on the rigid or stationary joints of the breather pipes that before any test can be made the ground has to be again dug up and the joints made tight.

This is caused by the action of the frost on the newly dug ground in causing an upheaval of the earth. The earth, having adhered itself to the iron pipe, carries the pipe up with it, the consequence being that the connection between the iron and tile pipes is parted, rendering it impossible to apply efficiently the smoke test.

By this means work that would have stood the severest test when first completed will not now stand an ordinary test. This is not only a very great inconvenience, but a source of considerable expense and lost time. When the plumber goes to the job with his smoke-testing machine and appliances and attaches them to the breather he finds that there is such a leakage that the test cannot then be made. This necessitates the sending of a drain man to open up the ground and have the joints made tight again. When it is remembered that this test has to be put on in the presence of the city inspector it will be seen that this is often a serious drawback.

It is not so convenient to make dates with the inspectors, and often the plumber has to wait until he can get his final certificate before making his last draw on his work. It is not only the loss of time by his own men in again going to the job to apply the test, but to make suitable arrangements with the inspector.

This question has caused a great deal of thought among the plumbers, and anything that would obviate this would be fully appreciated by the master plumber.

One solution of the difficulty would be the invention of an expansion joint in the iron pipe. Just how best to make this joint seems to be the question, and anyone who can successfully invent such an article would find not only a ready but a large sale for it. If it was made somewhat on the style of a piston rod it ought to fill the want; the expansion would not require to be very great. This joint would, of course, have to be kept below the frost.

Speaking of breathers opens up a debatable question, just as to the great necessity for such an attachment to the drainage system. There is a great difference of opinion as to their utility, and the question arises, does the advantage gained offset the evil effects that may follow? There is a very great possibility of not only offensive smells coming from them but vicious gases as well. This is evidenced in the fact that the Toronto by-law that calls for their use also states that they shall be kept as far away as possible from all windows, which is often a very difficult proposition in a great number of cases, as there is not much spare ground in front of houses and the breather has to be placed on private ground. Even where the breather can be placed away from windows this does not do away with the great danger to children playing around the breather and jumping over it. They must be affected by any foul gas or other offensive odors that come from them.

How few there are that understand what benefit is claimed from their use? The contention is that they supply fresh air to the drain and soil pipes. There is no question of the benefit of fresh air in these pipes, and the more the better. The only question that can be debated is just how best to meet the demand for such air.

The question is whether it is better to fill your pipes from air near the ground where it is of a heavy and pure nature or to fill them from the top, where pure air can be got in abundance. That air can be supplied from the top and be drawn into the pipes needs no stretch of the imagination. For argument's sake we grant that the pipes are full of air. The latter being a solid body fills up the entire internal space of the pipe. Now no other solid body can be entered into the pipes without expelling the air therein. Of course the argument is that the air is forced downward and not upward, which, if so, strengthens the argument that the vicious air is forced up through the breather, and is a possible source of evil.

However, the question now is not as to the expulsion of the air but as to the refilling of the pipes. Again, using the Toronto plumbing by-law as a reference, there can be very little question that the water passing through the pipes causes a suction. The by-law states that all traps are to have a back vent from them. The main reason for this is to prevent the suction of the water out of the traps. The emptying of the traps would allow gas to enter the house.

If all drains were properly trapped sewer gas could not enter the house drainage. This would appear to do away with the need of the use of a breather. However, just at present the by-law calls for their use, and there will be, for some time to come at least, a good demand for the expansion joint. This opens up a demand for a practical article, and the man who can supply the demand will be well repaid.

M.

PROVINCIAL ASSOCIATION NOTES.

There appears to be little chance of a lack of interest in the work of the Ontario Provincial Association. President Mansell, who has had the sub-executive together several times since the London convention, has called a meeting of the full Executive Committee to meet in Toronto on Saturday this week. The Executive is composed of the following: W. Mansell, Toronto; S. P. Gourlay, St. Catharines; W. J. Walsh, Hamilton; E. Russell, London; J. H. Wilson, Toronto; A. A. Brian, Windsor; H. Mahoney, Guelph, and L. Le Grow, Toronto.

It is understood that one of the main features of the meeting is to meet the manufacturers and supply men to talk over trade affairs. The delegates to represent the Ontario Association at the next meeting of the Dominion Association will be chosen. The president is arranging to telegraph fraternal greetings to the National Association of Master Plumbers of the United States, who will be in session in San Francisco, also to the National Master Steam Fitters' Association, who will also be in session.

The plans for the temporary warehouse of The International Portland Cement Co., Ottawa, have been received, and work will be commenced on the construction of the building in a short time.

TORONTO ASSOCIATION OFFICERS.

The regular meeting of the Master Plumbers' Association was held Wednesday in their hall on Richmond street, when the election of officers took place.

The following officers were duly elected:

President—R. Ross.

First Vice-President—Geo. Cooper.

Second Vice-President—F. Maxwell.

Sergt.-at-Arms—W. J. Mason.

Trustees—J. B. Fitzsimons (Ch.), J. McKittrick, J. Sherlock.

Executive Committee—H. Hogarth, W. Mansell, D. Menzies, P. Jessiman, J. Harrison, F. Armstrong.

Arbitration Committee—J. H. Wilson (Ch.), R. Harrison, J. Power, J. Clapperton, L. LeGrow.

Grievance Committee—W. J. McGuire (Ch.), R. Ross, R. Robinson, D. McMullen, C. E. Pickard.

Audit Committee—W. G. D. Adams, C. Wallis, J. E. Fullerton.

Apprenticeship Committee—K. J. Allison, D. Clark, J. W. Erwood, T. W. Slean, H. Richards.

A motion expressing the association's appreciation of the services rendered by J. J. McKittrick as secretary of the Ways and Means Committee for the last two years was unanimously passed. Mr. McKittrick replied, stating that he would still have the interest of the association at heart.

No other business of importance was transacted.

BEATEN, BUT NOT VANQUISHED.

Those who witnessed the defeat of the Toronto master plumbers' baseball team at the hands of representatives of the manufacturers and supply men at Long Branch last year were somewhat surprised when they remembered the two former victories of the plumbers' team. The latter are determined to redeem their lost laurels and are preparing to meet the best aggregation the manufacturers can put up. They are spending their spare time in the "bleachers," noting the various curves, etc., and on the diamond at practice. The challenge will soon be issued.

BUILDING NOTES.

The members of the Fort William, Ont., bricklayers' and masons' unions are out on strike.

Stephen & McKinnon have been awarded the contract for the Rat Portage Lumber Co.'s sawmill at Winnipeg.

R. Buell, president of the Colonial Cement Co., Wiarton, is pleased with the progress being made in the erection of the buildings and in other departments of the work.

Portage la Prairie, Man., reports that there is a rumor that the Government are preparing plans for the erection of an addition to the Home for Incurables there. Willis Chipman, of Toronto, is preparing a report on the proposed water works system of the town.

Blasting operations have commenced on the lot on Yates street, Victoria, B.C., just east of the Dawson hotel building, on the site of the new brick block which is to be erected there for Westcott Bros. John Hagerty is the contractor.

The contract for the metal work, consisting of roofing, ceilings, galvanized iron, etc., in connection with the new public library building at Goderich, Ont., has been awarded to J. H. Worsell, who also has the contract for the metal work on the new church at Nile.

J. M. Diver, manager for the Cleveland-Sarnia Sawmills' Co., Sarnia, Ont., has let to Jas. F. Cox, Lucasville, Ont., a contract to put up twenty dwelling houses during the coming season. The houses are to be of frame, and work has already commenced on them.

Port Arthur, Ont., is experiencing quite an activity in real estate and building affairs. The real estate men of the town are forming a real estate exchange. It is proposed to limit the membership to 60 and to charge a fee of $100. A permanent secretary will be engaged, who will keep a register of all sales and also a rental register.

PLUMBING AND HEATING NOTES.

Geo. Ross & Co., Brockville, Ont., have secured the contract for plumbing in the Electric Light Co.'s works.

Benjamin Welbanks, plumber for Carter Bros., Picton, Ont., was married on Monday last week to Miss Myrtle Mulholland, daughter of the late James Mulholland.

While there is no very great activity in the plumbing trade, still all the master plumbers report work fairly plentiful and that there is little cause for complaint.

W. G. D. Adams, 1484 Queen W., Toronto, reports trade in a flourishing condition, and has recently secured contracts for plumbing work in the following: Residence for M. Daley, on Sussex avenue; dwellings for Capt. J. P. Beatty, on Saunders avenue; residence for Mr. Ross, on Chicora avenue; also a residence for D. Dumbly, on Pearson avenue.

The John Ritchie Plumbing and Heating Co., Limited, Toronto, have secured several contracts recently, among them being plumbing, gasfitting and heating in a large residence in Queen's Park for Mr. White, manager of the National Trust Co.; plumbing in residence for R. C. Hamilton, St. Mary's street; plumbing in Cumberland hall, for D. Eby.

BUILDING PERMITS ISSUED.

OTTAWA.

F. A. Heney, annex to Windsor hotel, $3,000.

Adam Ballantyne, brick shop, Bank street, $7,000.

H. A. Bate, solid brick shop, Lisgar street, $1,000.

John H. Conway, double brick dwelling, Waller street, $6,000.

D'Arcy Scott, addition to dwelling, Chapel street, $6,000.

C. K. Graham, shop and dwelling, Rideau street, $7,000.

Thomas Shore, solid brick dwelling, Somerset street, $3,000.

Thomas Birkett, M.P., change in shop front, Rideau street, $1,000.

Thomas Birkett, jr., alterations to dwelling, Metcalfe street, $1,200.

Albert McKegg, brick veneered dwellings, Cambridge street, $1,000.

J. R. Booth, Ottawa, has taken out a permit for a large building. Particulars are not given, but it is presumed that the building will be the big pulp mill which, it is understood, he intends erecting soon.

TORONTO.

Mr. Kingdom, residence at 382 Brunswick avenue, to cost $7,000.

R. G. McLean, residence on Crescent road, near Scarth road, to cost $7,500.

E. A. Drumner, three attached dwellings, east side Perth avenue, near Royce avenue, to cost $5,000.

Canadian Pacific Railway, one storey building for an acetytene gas plant, York street yard, to cost $4,000; architect, Max Folty.

F. Marks, pair three storey stores and dwellings, corner Bathurst street and Follis avenue, to cost $7,500; Bond & Smith, architects.

The Massey Estate, Toronto, offer to spend $100,000 in improving Massey hall, if Toronto City Council will make certain concessions regarding taxation.

Jarvis street Baptist Church, Toronto, propose to spend $12,000 in overhauling the church edifice. One-half of this sum is to be spent in improving the heating and ventilation.

Humphrey & Webb, four pair semi-detached brick dwellings on Symington avenue, near Royce avenue, to cost $16,000; and for three pair semi-detached two-storey brick dwellings, north side Symington avenue, near Walton avenue, to cost $12,000.

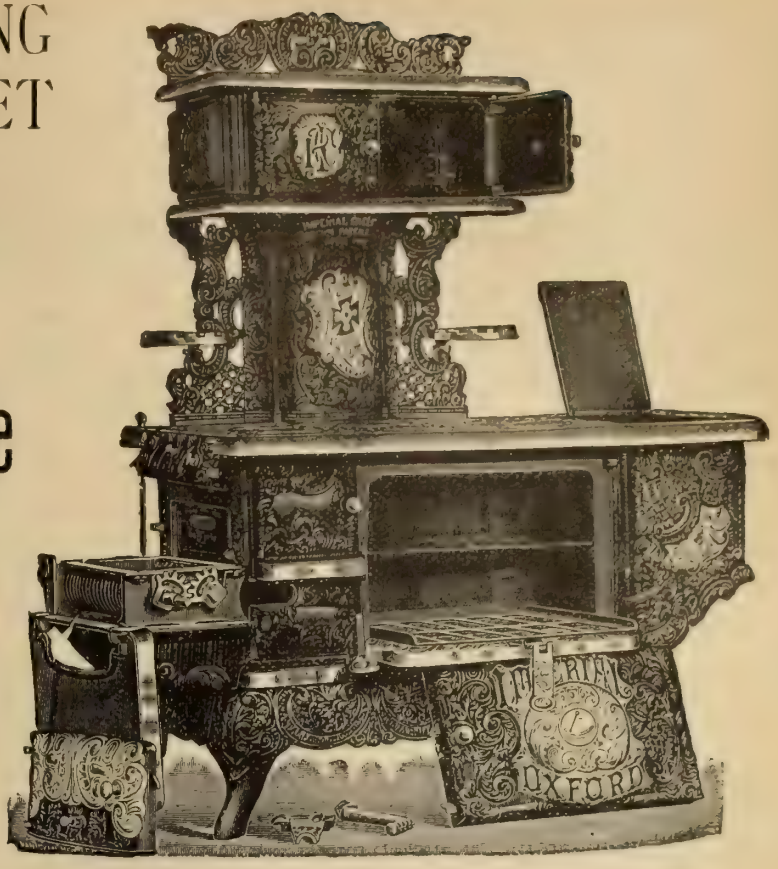
THE EASIEST SELLING RANGE ON THE MARKET

There are so many points of excellence in the **IMPERIAL OXFORD RANGE** which no other range contains, and it has been giving satisfactory service for so many years, that it is, without doubt, the easiest range on the market to sell. When you are selling an

Imperial Oxford Range

you can hold and convince your customer with such points as the Diffusive Flue Construction, Draw-out Grate, Oven Thermometer, Draw-out Oven Rack. All these important features interest a stove buyer and make your sales easy.

This is the most desirable range you could have in stock. **Write for particulars**



THE GURNEY FOUNDRY CO., Limited

Wickless "Blue Flame" Oil Stoves.

A FEW REASONS WHY PREFERRED

IT HAS NO WICK and is easily kept clean.

IT HAS NO JOINTS TO LEAK or packing nuts ; no pressure of oil below the tank; it cannot leak.

IT DOES NOT GENERATE OR EVAPORATE, the oil simply drops into an open brass pipe through which it is conducted to an open burner ring where it burns, producing a powerful blue flame. Could anything be simpler?

IT HAS A REMOVABLE TANK which can be carried to an outer room for filling.

IT IS ABSOLUTELY SAFE.

IT LIGHTS QUICKLY, simply turn on the oil and apply the match.

IT COOKS INSTANTLY. There is no smoke—no delay. As soon as lighted a cooking vessel can be placed over the burner.

IT HAS NO STOPS or automatic regulators to govern the flow of oil. The flame is entirely under the control of the user.

IT MAKES NO DIFFERENCE what quality of oil is used, whether coal oil or gasoline, whether it is good or bad, heavy or light, thick or thin, hot or cold, the stove operates equally well, producing an intensely hot smokeless blue flame. Can as much be said TRUTHFULLY of any other stove?

IT HAS A GLASS SIGHT FEED which shows at a glance the flow of oil, and enables the user to regulate the valve quickly and accurately.

FOR ECONOMY OF FUEL as compared with the coal and wood stove it is beyond comparison Will save what it cost in one season over coal or wood at the average price. It is a friend and helper to the thrifty housekeeper who tries to save what others waste.

ESPECIALLY is it a boon to the country home and suburban residence where fuel gas cannot be obtained.

LASTLY—It is safe, clean, quick, reliable and convenient, and no home can afford to forego the comfort that this wonderful stove brings.

The dealer who recognizes the merits of the "Standard" Wickless and places it on his sales floor will find it a ready and popular seller

The THOS. DAVIDSON MFG. CO., Limited, MONTREAL, P. Q.

Mr. Borden and the Budget

BY ZEO.

House of Commons,
Ottawa, April 30, 1903.

IN writing of Mr. Fielding's budget speech, we promised on a future occasion, to review at some length the reply of the Leader of the Opposition, Mr. Borden. As a general criticism, we may say that he spoke extremely well from the standpoint of his party, making what was generally conceded to be the best effort of his parliamentary career. Never purposely unfair to his opponents, with a very nice gift of pleasant rather than biting sarcasm, he furnishes a model for parliamentary debate which many, on both sides of the House, would do well to study and follow.

Mr. Borden called the attention of the House to the large increase in expenditure since the advent of the Liberals to power, but, unlike some of those who have since spoken on his side of the House, he was most moderate in his criticism under this head. "We all admit," said he, "the necessity of a liberal public expenditure in Canada," and, after furnishing a table of increases by various services, he even went so far as to urge further and larger expenditures in the matter of lighthouse and coast service and government of the Northwest Territories. It would be too much to expect, human nature being what it is, that the Leader of the Opposition should set out actually to justify the expenditure of the Government, but Mr. Borden certainly refrained from any cheeseparing criticism, and spoke in a way that gained for him a reputation for fairness and proved that he is not after the cheap reputation that fiery denunciation without reason brings to those who are masters of that style of clap-trap.

As a matter of fact, Mr. Borden, in common with other big men in Canada, plainly sees that this is no time for parsimony in the Dominion. That what we require is an expenditure in aid of improved transportation and public works in general keeping with the immense expansion of trade and business of all kinds now obtaining. And he is too good a Canadian to even attempt to check what appears to be in the general interests of the country for a mere party advantage.

A very considerable portion of his speech was devoted to a discussion of the British Preference, and he quoted with apparent relish from the speech delivered by the Hon. Jos. Chamberlain at the Colonial Conference, in which that gentleman frankly confessed that while, as an evidence of good feeling, the preference was indeed admirable, it, after all, was of very little value to England financially. Of course, if this be true, it must follow that Canadian manufacturers are not suffering from the Preference as they have claimed to be, but the Canadian Ministers put up a very strong argument against the contention of Mr. Chamberlain which would tend to restore the balance in the case of the agrieved Canadian manufacturers.

Throughout the budget debate, the British Preference has received very considerable attention, and hopes there were many that, with the growing influence of Mr. Chamberlain, a preference in favor of the food supplies of the colonies might at last be given in Britain. All these hopes have been rudely dashed to the ground by the delivery of the British budget speech, which, abolishing the impost on corn, has thus completely swept away the foundation on which such a preference might have been built. With a duty on corn from all countries, a change admitting colonial grain free would have meant a preference to the colonies, and at the same time a remission of taxes to the English consumer. With the duty entirely removed, a re-imposition on the grain from foreign countries, leaving the colonies free, would to that extent be an increase of taxation on the "staff of life," for which the British voter would never stand. And so, good-day for the present to our fond hopes of a measure that would not only have peopled our lands with greater rapidity than ever, but which would undoubtedly have largely settled the question of Britain's food supply in time of war, and have done more to cement the Empire than any other conceivable trade measure.

Coming to the matter of the Intercolonial Railway Mr. Borden's criticism of the "alleged surplus" (as he called it), claimed by the Government, was undoubtedly a strong one. In a word, it was this, that any Government could show a surplus by charging various large outlays to capital account which should properly have been taken out of earnings and that in charging up $1,626,841 to capital, Mr. Blair had achieved nothing either remarkable or praiseworthy in producing by such a method of bookkeeping the small so-called surplus of $57,898.

In justice to the Minister of Railways it must, however, be stated that his methods were similarly attacked last year, and that in a very vigorous speech he defended himself stoutly and utterly refused to surrender to the enemy. This is but another case of political as distinct from business bookkeeping, another case of a Government surplus, when a Government has actually spent more than its receipts, but claims the contrary by the ingenious method of charging all permanent improvements to capital account. It is the fault of neither party, but must be traced back to the first ingenious gentleman who devised the method to show a better result than he was entitled to claim credit for, and having been followed ever since will no doubt continue till the end of the chapter, as any succeeding Minister must, to get a fair comparison with the record of his predecessor, pursue the same lines.

As a matter of fact, the Intercolonial cannot be worked as an ordinary business concern. It is a "political" railroad, in the sense of having been built as a means of binding together the confederated provinces. It is said by the Maritime Canadians to have been the price of Confederation, and following out this idea they claim that it should be administered not to pay dividends, but to give facilities and conveniences to the people, with or without loss. Some day, no doubt, the road will cease to be a drain on Canada, and that day will be when the country through which it runs becomes thickly enough settled to provide a heavy local traffic. With the eyes of the world, including Older Canada, fixed on the cheap and rich lands of the West, this cannot be for many years to come, and we might just as well look upon the matter with complacency as one which is unavoidable.

Coming to the German surtax the Leader of the Opposition seemed to approve of it, though he did not speak in very enthusiastic terms, taking the ground, however, that it had been far too long in coming. He quoted the case of the weak and diminutive curate who received very rough treatment at the hands of the irate old Indian Nabob in whose employ he was unlucky enough to be, and who, after being buffeted all over the room, finally plucked up courage to say, "Now, look heah, if you do that agin, I'll get weal cwoss with you."

Coming to the matter of increased protection Mr. Borden mentioned as suffering industries the woollen, the cotton, the lead, and one or two more, and urged an immediate revision of the tariff in favor of these and of all others which, on inquiry, might be found to be in trouble. He expressed the conviction that the farmers of the West would feel the necessity of local markets, which could not very well be created for them unless our present industries were fostered and new ones brought into existence. For the farmers, too, he has protection in store, if given the reins of Government. He points to the fact that last year we imported from the United States $28,000,000 worth of agricultural and animal products, all of which, or nearly all of which, might have been grown by the farmers of Canada.

Mr. Borden wound up by moving in amendment that "This House, regarding the operation of the present tariff as unsatisfactory, is of the opinion that this country requires a declared policy of such adequate protection to its labor, agricultural products, manufactures and industries as will at all times secure the Canadian market for Canadians. And that the financial policy of the Government should include a measure for the thorough and judicious readjustment of the tariff at the present session."

Mr. Borden was followed by Sir Richard Cartwright in one of his immensely powerful speeches.

NOT AFFECTED BY IT.

Lewis Bros. & Co., Montreal, are notifying their western customers that notwithstanding the strike of the Montreal longshoremen and teamsters they are able to handle all orders promptly. Shipments are now going forward every day, and no delay will be attached to the filling of new orders, the firm having managed to secure sufficient teams to handle their deliveries.

FINANCE AND INSURANCE

DETERMINED and praiseworthy efforts are being made in several cities to drive the bucket shops out of existence. In Halifax true bills have been found against the proprietors, and the New Orleans Cotton Exchange is about to take drastic measures for the suppression of the evil in that city. Colonel Hester, the secretary of the Exchange, says:

> The difficulty is always to prove absence of bona fide intention of delivery when it comes to prosecution of bucket shops, but with New York and New Orleans in control of the quotations, we can command the situation. The other cotton exchanges of the country do not handle future quotations, so New York and New Orleans control the figures. It has been established in the matter of grain and provision quotations that they are the property of the exchanges, not of the telegraph companies, and, with both the New Orleans and the New York cotton exchanges withholding future quotations from all except those of whom we are sure, it is certain that a severe blow will be be struck at bucket shops and a long step taken towards their extermination.

This is a move in the right direction. In Canada we think the evil strongly calls for Government interference.

* * *

Time money in Toronto has recently reached the lowest price for a long while, six months' loans having been negotiated at the end of April at 4½ per cent. Referring to this, Aemilius Jarvis & Co., stock brokers, say that hitherto financial commitments extending to next Fall have not been thought of by banking institutions and no six months' money has been going at anything like a reasonable rate for many months. How much greater must be the feeling of confidence when banks will tie their funds up at such a rate for a period, carrying them right on past the harvest season to that time which was a year ago a veritable Waterloo to many unfortunate speculators, owing to the extreme tightness of the money market. The situation on its face has a better look than for the past few weeks, and it is well known that the bank statements do not do anything like justice to the money situation at present.

* * *

The manager of a prominent financial institution doing business in Toronto was recently importuned for an advertisement by the representative of a certain Canadian newspaper. The solicitor was courteously informed that the company were not desirous of increasing their advertising at the moment. It has since been intimated to the company that by their refusal to advertise they have incurred the severe displeasure of the journal in question, and following this intimation came a marked copy of a paper to the manager indicating the style of adverse criticism which his company might expect in the future. Methods of this description are simply disgraceful, and in calling attention to the matter it is gratifying to know that instances of this nature in Canadian journalism are not common, and when they do occur are generally estimated by the public at the value they deserve.

* * *

The now famous Morgan syndicate, which underwrote the United States Steel Corporation, having completed its duties, has been dissolved. Mr. Morgan and his fellow-members of the syndicate, no doubt regret that their duties have been finished, for they have been most remunerative. During the eight months of the syndicate's existence, no less than $46,000,000 was divided among them.

* * *

The weekly letter of Aemilius Jarvis & Co., Toronto, has the following: "Steel has taken a few spurts, chiefly, we understand, on the basis that some plan will be submitted by Mr. Ross at the meetings of the Dominion Coal and Steel Companies, shortly to be held, which will have a beneficial effect upon the securities of the Steel Company. We feel satisfied that no plan will be seriously considered which will not commend itself to the minority of the shareholders of both companies. Too much public attention has been directed to these concerns to allow controlling interests to dictate a policy unreasonable or unjust for the minority. Mr. Ross has just returned from England.

* * *

The operation of the law of action and reaction cannot always be measured in figures at the Stock Exchange, says a contemporary. It is, in fact, often modified by the actual conditions of monetary affairs or speculative exigencies. Nevertheless, in travelling over a long period of time, the market generally reacts from any extreme or rapid advance and rallies after prices have been carried considerably below the previously prevailing level. A great shrinkage in quotations carries with it important liquidation that tends to benefit the speculative position and put speculators who have sold out at a higher level in financial condition to better undertake operations for a rise or a rally at least. Low prices also work to bring into closer conjunction the return in dividends on the investment and the yield of money loaned on securities or invested in mercantile business.

ANNUAL MEETING OF MANITOBA MORTGAGE AND INVESTMENT COMPANY.

THE 22nd annual general meeting of The Manitoba Mortgage and Investment Company, Limited, was recently held in London, England.

The shareholders are to be congratulated on the very much improved condition of the company, whose affairs are in a much better shape than they have been for years. The chairman, in moving the adoption of the report, stated that previous reports had showed a large debit on the profit and loss account, and things, generally, looked very black. There was always before them, however, the hope of ultimate success; and they were buoyed with the belief—the unchanging belief—that the country was a great and good one and that at last it might come to their rescue. They were able now to state that their confident predictions were beginning to be realized; that a change was coming over the scene, and that they had in sight a revenue which would pay all current expenses, thus increasing the assets year by year, instead of letting them be depleted by having to pay more interest and expenses than they had received as income.

The balance sheet submitted showed that they had at last practically the whole of their property brought back into a revenue producing position and earning an income which exceeded the interest on their debentures and the expenses of managing the company. It was a very gratifying feature that land in Manitoba was now being purchased for settlement instead of speculation. Comment was made upon the low figure at which the directors' fees stood in the accounts, and the chairman having stated in reply to a question, that whereas the board were only receiving £200 per annum, the articles of association allowed them a maximum of £1,000, a resolution was passed

COMPANY UNDERWRITING IN ENGLAND.

THE annual return of the Registrar of Joint Stock Companies, under the new act in Great Britain, contains much that is interesting. The total number of companies registered was 3,365, with a nominal capital of £141,760,333 and a paid up capital of £21,247,327. The total number of companies registered without nominal capital, including those limited by guarantee, was 68. But possibly the most interesting feature of the report was the information in regard to the amount received for underwriting the companies. The diversity of the consideration paid for those underwriting was almost as wide as the poles are asunder, being from practically nil to 100 per cent., although in the latter, of course, the consideration consisted to some extent in the shape of shares. The following may be taken as an example of the amounts paid for the underwriting of some of the principal companies:

Company	Mode of Payment for Underwriting.
Bristol District Super-Aeration Company	10 per cent.
Capillitas Copper Company, Limited	40 per cent. in ord. shares and 60 per cent. in def. shares.
Chindras Gold Mines, Limited	25 per cent. in shares.
Drake and Gorham, Limited	10 per cent.
Klerksdorp Gold and Diamond Co., Limited	£5,000 and to the allottees 3s. 9d. per share for each share allotted.
Lagos Proprietary Syndicate, Limited	50 per cent. of amount subscribed.
New Berca Petroleum Company, Limited	£2,875 and a commission to each subscriber of 3s. 6d. per share.
Peek, Frean & Co., Limited	£3,700, which includes commission on £200,000 debenture stock.
Subil Gold Mines, Limited	25 per cent. in fully-paid shares.
Yorkshire Iron and Coal Company, Limited	11 per cent on pref. shares; 12 per cent. on ord. shares.

THE LATE WM. McCABE.

The death of Wm. McCabe, managing director of the North American Life Insurance Company, took place at his residence, Toronto, on April 23. The late Mr. McCabe was born in Picton in 1841, and graduated from Trinity in 1863. Prior to his connection with the North American Life he was for some years general manager of the Confederation Life Association.

A CANADA PERMANENT ACQUISITION.

The most important local financial deal of recent years has just been closed. By it the business of the Metropolitan Loan and Savings Company of Ottawa is taken over by the Canada Permanent and Western Canada Mortgage Corporation Company of Toronto, better known as the Canada Permanent Company. The financial consideration is in the neighborhood of $300,000. According to the terms of the deal the local office of the Metropolitan Company will be kept open for business until July 1. After that date the affairs of the Metropolitan Company will be managed from the head office of the Canada Permanent Company in Toronto. The Metropolitan Loan and Savings Company was established 32 years ago. Its field of operation is Ottawa and the immediate vicinity.

A NEW INSURANCE COMPANY.

The Mount Royal Assurance Company, incorporated with a capital of a million dollars, recently commenced business in Montreal. The directorate is a most responsible one, and the institution will undoubtedly receive a large amount of local support.

FINANCIAL NOTES.

The Sovereign Bank is opening a branch at Harrow.

The Bank of London is applying for incorporation at Ottawa.

The Bank of Ottawa has decided to open branches at Carp and Finch.

The annual meeting of the Sovereign Bank will be held at their head office in Toronto on June 9.

T. G. Brough, general manager of the Dominion Bank, states that the bank has no intention of increasing its capital at present.

Another bank is seeking incorporation at Ottawa. It will be located at Toronto and be known as the Pacific Bank of Canada.

The Union Bank will shortly open a branch in Barrie, under the management of Walter D. Morton, formerly with the Bank of Toronto.

The many friends of Aemilius Jarvis will be glad to learn that he has greatly improved in health, and everything points to his complete and speedy recovery.

It is generally understood that Geo. D. O'Grady, of the Bank of Commerce, London, will accept the appointment of general manager of the Crown Bank, Toronto.

The handsome premises now in course of erection by the Royal Bank of Canada in the city of Havana, Cuba, are nearing completion, and will be ready for occupancy during the coming Summer.

Harry Symonds, vice-president of the Union Life Assurance Company, has given notice at Ottawa of an application for a new trust company to be established with its headquarters at Toronto.

Hamilton Cassels, Angus MacMurchy and C. E. Clarke, of Toronto, recently visited Ottawa and interviewed the Finance Department in regard to a bill to be introduced this session to incorporate penny banks.

A new bank to be known as the Crown is to be established in Toronto. The capital is placed at $2,000,000. It is understood that Edward Gurney will be president, and R. Y. Ellis, vice-president of the new institution.

Application will be made at the next session of the Canadian Parliament for an act to incorporate a bank to be called the Mount Royal Savings Bank of Canada. Montreal is named as the head office of the new bank.

The present capital and reserve of the Royal Bank of Canada now amounts to $5,841,000, and it is applying for the right to increase its capital by yet another million dollars. The bank has now 43 branches in Canada, the United States and Cuba.

The Bank of Commerce recently established a branch at Sydney, where the works of the Dominion Iron and Steel and Dominion Coal Companies are situated, and purpose opening several additional branches at important points in the Maritime Provinces.

In accordance with the terms of their letter to the shareholders of April 1, the Bank of Toronto allotted to their shareholders 5,000 shares of new stock ($500,000) at a premium of 200 per cent. At the market rates for the stock this allotment netted a handsome bonus to the stockholders.

The west-end branch of the Bank of Toronto have moved into their new quarters, corner of King and Bathurst streets. In connection with their office, which is handsomely finished in mahogany and equipped with every convenience, they have a writing room specially devoted to the use of the lady customers of the bank.

GOING WEST.

A. G. Buckham, hardware merchant, Brampton, Ont., has sold out to J. A. Henderson, of Guelph, a good business at a good price. Stock-taking is in progress. Mr. Buckham goes West for a holiday, and may remain there. The trade thus loses a successful retailer, and many a hardware salesman a cheery greeting.

THE TEMISCAMINGUE RAILWAY

J. W. McDONALD of McDonald & Hay, retail hardware merchants, North Bay, after a couple of weeks' stay in the east, returned on Tuesday to his home. In conversation with "Hardware and Metal," he said that business was very brisk around North Bay and that the outlook was bright, particularly in view of the railway expansion in that part of the country.

In conversation with one of the engineers of the Temiscamingue and Northern Ontario Railway, a few days before I left home, I was informed that it was the intention of the company to begin the laying of rails out of North Bay on about May 15. They have already," said Mr. McDonald, "Forty miles of roadbed ready for the rails, and expect to have 70 miles of railway built this summer. The whole of the road is located from one end to the other except for a distance of about 15 miles. They are now beginning operations at the other end of the line at Alebery.

"In February last I took a trip for about 50 miles through the country through which the Temiscamingue railway is to run. There is enough of pine there to pay for building the road twice over, and then, as to pulpwood, the trees are just like that," exclaimed Mr. McDonald, by way of explanation, as he held up his fingers. "Why, you can hardly get through them. As a great deal of wood in that part of the country is not tributary to any water, the railway will have to bring most of it up."

A MODEL TOWN.

The town of Copper Cliff has 3,000 inhabitants. By supplying the necessary materials at cost the company has made it possible for its employes to own their own homes. Another policy, and one which has contributed much to the happiness of the town of Copper Cliff, is the prohibition of the sale of intoxicating liquors. A visitor from one of the Western mining camps recently visited Copper Cliff. As he looked north from the office, "What," said he, "is that fine building on the top of the hill?" "That," said his informant, "is the Methodist church." "How many churches have you?" asked the Westerner. "Five," was the reply. "And how many dance halls and saloons have you?" "None." "Well," said the American, "in our camp we have five dance halls and no churches." There is no moral to this. It simply shows the conditions which explain the prosperity of the town of Copper Cliff.—Copper Cliff Courier.

LARGE ORDERS FOR HANDLES

The Muskoka Wood Mfg. Co. have booked an order from an Ottawa firm for 500,000 dozen broom handles. This is probably the largest single order for broom handles ever placed with a Canadian wood company. The total number of handles is 6,000,000. Taken at an average length of 4 ft. of handles or 4,545 miles, or, to grasp the enormity of the order, there are enough handles placed end to end to span the Pacific Ocean from Victoria, British Columbia, to Yokohama, Japan.—Orillia News.

GREAT BRITAIN'S STEEL INDUSTRY

ONE hears so much on this side of the Atlantic of "the industrial supremacy of America," that it is really refreshing to hear a modest Englishman express himself frankly.

J. Greville Jones, of Bell Bros.' Steel Works, Middlesboro', Eng., was in Sydney, N.S., a few days ago, after a visit to the principal industrial centres of the United States.

"I have been visiting the best steel plants in America," said he, "but I did not see any with which England did not compare most favorably. We are adopting all the labor-saving appliances practicable, and in this way we keep in the vanguard of progress. We have splendid steel plants in England, far superior to those of Germany, many of which are in the hands of the receivers. The German steel industries are in a bad state.

"In the great Keen Company England has an iron and steel combination fully as powerful as the United States Steel Trust. It has absorbed five or six of the largest steel corporations in England. The company is stupendous, and one well calculated to withstand the competition of America.

"All the big locomotive works of England are now forming themselves into a trust. This combination will also be a powerful one. English steel manufacturers are now contemplating the active development of the vast iron ore properties in South Africa, and which were acquired with the close of the Boer War.

"We are not out of the race for commercial supremacy by long odds yet. As a matter of fact, the iron and steel manufacturers of Great Britain are making great changes and effecting vast improvements in all their plants, with the result that they are turning out larger outputs at a much cheaper cost than heretofore. We are not losing ground. On the contrary, we are going ahead more than is admitted on this side of the Atlantic.

"Our engineering shops in Britain are far superior to any I have seen in the States. We are in the race to stay. England is sending deputation after deputation to the United States, Germany and elsewhere to learn of the most improved methods in every branch of industry and commerce, with the result that there is a general reawakening, and England is on the eve of a forward move that will astonish the world with its colossal and far-reaching effects."

INTEREST IN A COAL MINE.

F. E. Tobias, formerly on the travelling staff of Lucas, Steele & Bristol, Hamilton, is now connected with the Cassiar Coal Developing Co. This coal property is situated on the Bulkley River, about 85 miles from Port Simpson, B.C., the prospective terminus of both the Grand Trunk Pacific Railway and the Trans-Canadian Railway Co. Mr. Tobias has in his possession some samples of the Cassiar coal, and if the bulk of the coal is anything like the sample, the property ought to be a valuable one. Workmen have been engaged in opening up the mines since 1901, and, according to an analysis of the coal by Prof. Coleman, it is equal in quality to anything in British Columbia. Prof Poudier, of the British Columbia Government, has also made an exceedingly good report in regard to the quality of the coal.

A good galvanized-iron worker knows the different makes of his stock, and uses the one that pays him best.

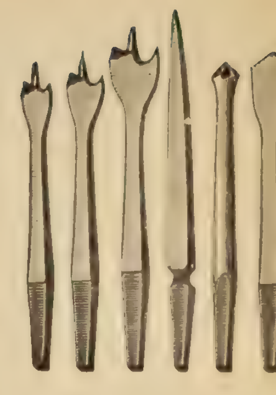
HENRY BOKER'S BRACE BITS for METAL or WOOD.

ANY VARIETY IN QUALITY AND FINISH.

Just ask Your WHOLESALE HARDWARE DEALER!



CURRENT MARKET QUOTATIONS.

May 8, 1903.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors 'n this list, as the desire is to make it perfectly accurate.

For sale by ALL PROMINENT CANADIAN HARDWARE JOBBERS.

It Pays to do Things Right.

In the beginning, we were absolutely sure that a perfectly-made, reasonable-priced line of Huron Stoves and Ranges would command a ready sale. A good article is always appreciated, and now the regular demand for

HURONS

is taxing the capacity of our foundry.

Every purchaser takes a pride in recommending our goods as the most economical and satisfactory. Read what the trade think of them.

Amherstburg, April 14, '03.

Western Foundry Co., Limited, Wingham, Ont.

Gentlemen—Accept our congratulations on your success in turning out the finest Range for the money we have yet seen in Canada.

NEW LAWN GOODS

The "Comfort" Swing Chair

ALL OF THE COMFORTS POSSIBLE IN AN OUT DOOR CHAIR OR SWING WITHOUT THE USUAL EMBARRASSING ANNOYANCE. THE COMBINATION OF SWING AND CHAIR WITH PERFECT AUTOMATIC ADJUSTMENT AND ALL UNDER ABSOLUTE CONTROL. THE INDEPENDENT STANDARDS RENDER THE CHAIR PERFECTLY INDEPENDENT AS REGARDS LOCATION

Materials.

THE materials in the Comfort Chair are principally two kinds—metal and canvas. The centre main frame and base of the standards are round edge flat steel. The long side braces of the standards are round steel rods flattened at the ends, and carefully riveted to the main frame. The centre braces are made of flat steel. The entire frame-work of the swinging part of the chair proper is also made of flat steel. At the head and foot ends and at the loop in the back part of the seat, are strong wooden dowels. The canvas is stretched over these and secured to the dowels at the head and foot which are fitted with special device for keeping the canvas taut. A strong wooden brace at the foot of the seat completes the construction. The material is carefully selected and the very best for this purpose. It is light, but the high quality and the particular method of bracing renders it sufficiently strong for light or heavy occupant. The canvas is fine weave and fancy striped, overlapped in the centre—affording special strength where most needed.

HARDWARE AND METAL

VOL. XV. MONTREAL AND TORONTO, MAY 16, 1903. NO. 20.

Mr. Monk's Insolvency Bill

By a Member of the House.

House of Commons,
Ottawa, May 9, 1903.

ON Monday, May 4, the long promised Insolvency Bill, of Mr. Monk, came before the House, and was exhaustively dealt with by that gentleman, who clearly explained its many and various provisions. His was the only speech of length on the subject, the adjournment of the debate being moved by Mr. Henri Bourassa, on the plea that the hour was late, and that several members not then present in the House desired to participate.

At the very commencement of the argument it was shorn of anything but an academic interest by the announcement of the Finance Minister that "such a measure as this cannot be enacted during the life of the present Session." In spite of this fact, a rather prolonged article on the bill will not be out of place, in view of its immense importance to the commercial life of this Dominion, added to the fact that its principles are steadily growing in favor, and that, while it will come to nothing this year, there is every probability that it will eventually become law.

The measure itself, in identical wording, has before been in the hands of Parliament, fathered by Mr. (now Mr. Justice) Fortin, who very carefully prepared it, and, as Mr. Monk states, "obtained the sanction of the commercial bodies throughout the Dominion and the approval of many legal gentlemen." As Mr. Fortin was a staunch Liberal, the bill cannot in any way be considered as a party measure, and it has numerous supporters and opponents irrespective of the side of the Speaker on which each sits.

Away back in 1875 the old Insolvency Law was repealed, and almost immediately thereafter boards of trade throughout Canada began to move towards obtaining a substitute. Ever since that time legislation has from time to time been before the House, sometimes originating in the Senate, (one bill actually passed that body, but afterwards met its death in the Commons), more frequently in the Lower House, but always sooner or later meeting the same sad end. The bills of 1883 and 1884 were weak because they made no provision for the discharge of the insolvent, and were clothed with no penalties for the punishment of dishonest debtors. One bill got so far in the favor of the Government of the day as to be foreshadowed in the Speech from the Throne, but that, like all the rest, came to an untimely end. Leaving the matter of history, we now come to a discussion of the clauses of the bill.

THE COURTS.

In the first place it is interesting to note that the courts charged with the administration of the act are the county courts in Ontario, Nova Scotia, New Brunswick, P.E.I., Manitoba and British Columbia, the Superior Court in the Province of Quebec, in the Northwest Territories the Supreme Court,—and there is one appeal from the decisions of each of these courts.

WHO ARE SUBJECT TO THE ACT.

The application of the act is confined to those engaged in commercial and manufacturing pursuits, not as in England, to all classes, and on this point Mr. Monk advanced no argument why the Canadian Act should be so confined. To a mere layman there would on the surface at least seem to be no good reason why the act should not relieve all deserving persons, but it is probable that on the resumption of the debate further light will be cast on this point. It is not to apply to incorporated companies either, which are to be left to the provisions of the Winding Up Act.

DEFINITION OF INSOLVENCY.

Next we come to a description of what constitutes insolvency. We cannot give all the cases, but mention some only, as for instance (1) General inability to meet liabilities as they come due; (2) the calling of a meeting of creditors by a person desiring to compound with them; (3) absconding with intent to defraud creditors; (4) the secretion of a part of the debtor's estate with an intent to defraud his creditors; (5) assigning, removing or disposing of property with an intent to defraud; (6) a general conveyance for the benefit of creditors; (7) permitting goods seized under execution, etc., to remain so until within four days of the time advertised for sale; (8) concealing himself with intent to defraud his creditors, etc.

Voluntary assignment is excluded, a forced assignment being requisite when a person commits any of the acts of insolvency above described. The conditions must be proved to the satisfaction of the Court, when a receiving order is handed the sheriff, who thereupon proceeds to take possession of all the assets of the insolvent, preparatory to handing them over to the liquidator.

TO PREVENT HARASSING.

To prevent the possibility of a man being unnecessarily harassed, a condition is inserted in the bill that only a creditor having an unsecured claim for $200 or more, for a liquidated amount, can make the application to the Court to set the law in motion.

The receiving order may be obtained without notice to the insolvent, but he must then be notified, and is given three

days within which to make application to have the same set aside.

DUTIES OF THE INSOLVENT.

When we come to the clauses of the act, dealing with the duties of the insolvent himself, we find that certain obligations are imposed on him, for breach in the performance of which he is heavily penalized. He must at once make the fullest disclosure of all his assets, of all claims he may have against other parties, and of his affairs in general.

These preliminary steps having been taken, a meeting of the creditors is next called, at which a liquidator is appointed, under the necessity of furnishing a satisfactory bond, whereupon the temporary guardian of the estate (the sheriff in most cases) hands over all the assets which have thus far come to him or under his control.

APPOINTMENT OF INSPECTORS.

The creditors may also appoint inspectors, if they think it necessary, who act in conjunction with the liquidator, advising, and to a certain extent, controling him. These inspectors have an extra incentive to the proper performance of their duties in the fact that no remuneration is theirs as of right, but depends entirely on the vote of the creditors.

REMUNERATION FOR INSOLVENTS.

As for the insolvent himself, at least until he has received his discharge, of which more anon, he acts under the instructions of the liquidator, who may remunerate him if he gives good service, so that between the penalties for bad behavior and the prize for good conduct, the bill certainly seems to invoke the aid of all one can think of to produce the cordial co-operation of the debtor. In any case, be he ever so stubborn or sulky, he must appear before the liquidator, and discover under oath all that he knows concerning his affairs. As Mr. Monk tersely puts it, "In fact, the insolvent becomes, as it were, the employe of the liquidator, and is under his control continually." The letters which he or his estate receives are handed over to the liquidator, to whom every opportunity is thus given to become conversant with the business of the estate.

PROVISIONS FOR DISCHARGE.

After the first meeting of creditors the insolvent is permitted at any time to hand to the liquidator a deed of discharge executed by creditors aggregating three-fourths of the value of the total claims, who thereupon calls a general meeting of creditors to consider the question thus raised. Before this, however, it is absolutely necessary that the deed of composition shall provide for the immediate payment in full of all costs in connection with the proceedings, all claims of a privileged nature (we will enumerate them later on) and for the payment within one year of not less than one half of the amount of claims provable against the estate, and even then, the deed must be confirmed by the Court before it comes operative. It is evident to all that this wise provision will give to honest debtors a good chance to become free men once more, while quite preventing the too easy procurement of a release. On the proceedings in Court for the approval of the release, the liquidator is saddled with the duty of proving that all the steps to that point have been strictly correct and in accordance with the requirements of the law as far as procedure is concerned, nor can it be presented to the Court at all, even after the creditors' meeting, until another notice has been duly served of the intention of doing so.

If any possibility of hole-and-corner proceedings or of collusion remains after all this, we would like some ingenious man to point it out, and we feel sure the committee will make the necessary amendment.

The Court must feel satisfied that the conduct of the insolvent has been open and honorable throughout, and on the confirmation of the deed, the property at once passes back to the insolvent. Even then he is not quite free. He must not only promise in the deed; he must live up to his promises, and if he fail to do so, the liquidator may without further formality resume control.

PRIVILEGED CLAIMS.

The privileged claims, to which allusion has already been made, and which are the first charge on the assets, as usual in such cases, include all necessary costs incurred in the proceedings, and wages of employes for a term of three months in full, after which the employes have to rank with other creditors.

With regard to the application of partnership and individual assets in the case of winding up the business of a firm, the provision is not a new one; partnership assets for partnership debts, private assets for private debts, and any excess in either case for the benefit of the short account. As for condition and contingent claims, if an agreement cannot be reached by the liquidator and claimant as to these, the Court is called in to decide the question. The secondary liability of the insolvent on negotiable instruments is provided for, and special provision as to rights under marriage contracts in the Province of Quebec are also inserted, but if we went fully into these minor details, we might as well print the bill in extenso.

CLAIMS OF LANDLORDS.

The claims of the landlord for rent of the premises occupied by the insolvent are fully safeguarded, and while the liquidator may give three months notice of the termination of the lease, the proprietor may claim damages for the breach of contract. At the same time, the liquidator may dispose of the balance of the term of the lease, even though there be express condition to the contrary therein. This strikes one as rather unfair, and that in a bill which otherwise seems equitable throughout. Mr. Monk excuses the provision by saying that this is in many cases (the unexpired term), a most valuable asset. Be that as it may, why should an Act of Parliament step in and despoil a contractor of the benefit of a term in his contract inserted in the fair way of dealing, the bargain being made at a time when both parties thereto are solvent men, and neither under undue pressure from the other.

A CURB ON LIQUIDATORS.

When we come to the distribution of the property we find nothing very new: Dividend sheet, notice of distribution, right to contest, etc. Section 77 gives to an enterprising creditor relief from an over-cautious liquidator, for where the latter refuses to take legal action in connection with some claim for the benefit of the estate, the creditor can go to court and on satisfying the judge that he is bona fide in the transaction, he can proceed in the name of the liquidator, but at his own expense and risk, reaping the reward of a successful litigation, or paying the penalty for the contrary. If, however, he recovers more than the full amount of his claim and costs, the residue falls into the general estate for the benefit of his fellows. Mr. Monk asserts that this is a new and wise provision. It is certainly wise, but the principle, at least, is not new.

The Act has many other provisions, but we have dealt with its main features, and will not trouble our readers with matters of legal detail, unless, perchance, we have to some extent done so already.

NECESSITY FOR THE BILL.

Generally, it may be stated that the proposed legislation or similar legislation, has many sympathisers. No man who has had any experience in business

or law can fail to recall cases of men who have failed through no fault whatever of their own, either in honesty or good management, and who thereafter, if they have not left the country to make a start elsewhere, have dragged out an aimless existence with judgments for hopelessly large amounts outstanding against them. In some cases, no doubt, these men go back into business, as it were, by the back door, operating in the name of wife or friend, but their interest is largely gone, and they are no longer active and useful members of the business world. The Act which we have been considering seems to afford ample protection against the rogue who fails, to make a profit by so doing, and at the same time gives the deserving a chance to start once more even with the world, and to retreive his fortunes not only to his personal gain, but to the advantage of the whole community. When the debate is resumed we will probably be able to summarize the arguments of those opposing this measure, and in this way, as is our wont, present both sides of the case, leaving it to that great jury, our readers, to find a verdict.

IMPROVING ONE OF THEIR STORES

The hardware firm of Ingram & Davey, who have two large stores in St. Thomas, Ont., one in the west end and one in the east, are completing extensive alterations to their east-end store. The store will be enlarged to twice its former size and will be fitted up in the most approved modern style. The cellar is laid in cement, lighted with gas and arranged with departments for storing goods not always in use. A large dry space is set apart for the storing of goods which, when not required above, would cumber the shelves of the store. A separate bin at the rear of the basement will be used for storing charcoal. All the stock of glass is kept in the cellar and arranged conveniently in boxes, resting on the floor, this being the best place for placing glass, much breakage being avoided in this way in removing the plates from the boxes.

The firm of Ingram & Davey have been unusually successful since they began business in St. Thomas, and are now reckoned one of the most substantial business firms in that city.

MANUFACTURERS OF ROOFING MATERIALS.

Lockerby & McComb, Montreal, started business in 1898, over five years ago; the principals being Major D. W. Lockerby and J. H. McComb. Both these gentlemen had spent years in the tarred-felt business before commencing on their own account, and were thoroughly experienced in the manufacture and sale of this product. The enormously increasing sales of their roofing felts, etc., speak volumes for the confidence which the public have in the various brands which they manufacture.

The success of the firm is due to two things. 1st. The use of the very best materials which can be obtained and which gives solid value in every roll made; 2nd. To the straightforward and liberal treatment of their customers throughout the Dominion.

Major Lockerby personally looks after the manufacturing end of the business, and is thoroughly up-to-date in his department. He also calls upon the city trade, with whom he does a large business. Mr. McComb travels the Dominion from the Atlantic to the Pacific, and that he is a popular and successful salesman is very evident, judging from the large business which he controls.

The firm are equipped with the latest machinery, and no better can be obtained on the American continent. Their brands are "Dominion" tarred roofing; the "Shield" brand tarred and dry sheathing; "Good Luck" tarred and dry fibre, and "Shield" brand, 2 and 3-ply ready roofing. They are also large dealers in roofing pitch, pine pitch and coal tar.

Their advertisement appears in another part of this paper.

A TRUST COMPANY'S EXPANSION.

The Toronto General Trusts Corporation have acquired the business of the Ottawa Trust and Deposit Company. The shareholders of the Ottawa company will, it is said, receive a premium of between $50 and $60 on their shares, so that the selling price will be $150 to $160. The capital stock of the Ottawa company was $500,000. The new capitalization will be $1,000,000. An advisory board of Ottawa gentlemen will be appointed in connection with local matters and a branch office will be opened in that city.

THE S-W FAMILY PAINT

For Painting Base-Boards, Shelves, Boxes, and the little things about the house.

A popular and quick-selling line. Packages are attractive—make a splendid showing on the shelves. Color of contents is shown on each label.

Family Paint should form a part of the paint stock of every progressive dealer. There's no other similar line in the market to-day that meets the popular demands so well. Put up ready for use in convenient-sized penny lever cans in twenty-five desirable shades.

We furnish very attractive sample folders in liberal quantities to dealers handling the line; also a handsome counter card, printed in colors.

Family Paint is an article you ought to have on your shelves. Write to day for prices and color cards.

BRITISH COLUMBIA TRADE TOPICS.

From our Vancouver Correspondent

LAST month was, on the whole, a fairly prosperous one for the city of Vancouver, despite the fact that local retail trade has not been up to the mark. This is accounted for by rather backward weather and somewhat uncertain local conditions due to the various strike troubles, some of which are chronic and others incipient. Fortunately it is anticipated that labor matters will be settled satisfactorily before long. Indeed, the only affair to be adjusted now is the strike of the U. B. R. E. and of the longshoremen and teamsters who are out in sympathy. This has been on so long, that in great measure the disturbance caused in trade at first has died away, the railway and transfer companies having hired substitutes to carry on the work in the meantime. The merchants have been the biggest sufferers as a consequence, although shipments are returning to normal conditions and have become fairly regular.

* * *

That the claim of April as a busy month all round is founded on fact the Customs returns for the month may be quoted. The revenue for April was $146,530.72, as against $98,605.76 for the same month last year, an increase of $47,924.96. It is but fair to say that the number of cargoes of goods received by sailing ship from England and European markets had some effect in augmenting the total.

Shipments of goods north, both to cannery points on the British-Columbian coast and for forwarding to Dawson, have repeated this week. The quantity of freight now awiating the going out of the ice in the Yukon river for first shipment down to Dawson must be considerable. The first big lots of live stock have gone forward and more are following. These will, like the shipments of merchandise, be sent from the foot of Lake Labarge on scows down the river, following the ice as it goes out.

* * *

All reports of the spring cleanup in Dawson so far received are very encouraging, the estimate being that it will total at least $15,000,000, which will be greater than last year. The warm weather is setting in and the cleanup will likely be over earlier than usual. Summer diggings are prospected now in the Klondike as freely as or more so than the winter operations and therefore the total for the year is likely to be fully equal to the best in the history of the great camp.

* * *

F. W. Peters, general freight agent of the C.P.R. Western Division, was in the city again from Winnipeg. He is reported as saying that he still has under advisement the demand of the Wholesale Grocers' Exchange for adjustment of the freight tariff, making Calgary the eastern limit of this field and on that basis, putting the wholesalers here on a parity with those of Winnipeg and eastern points. This statement, according to the wholesalemen, is a distinct retraction of the last utterance of the same gentleman, who said at one time that he had definitely decided to leave matters as they were, because he would be under compulsion to respond to demands from Winnipeg and eastern wholesalers to an extent which would bring the standing of the freight rates back to the same relative position as they now are. The wholesalemen feel every confidence that their demand to be recognized as having equal rights to the territory as far as Calgary will be conceded, and if that is so, freights from Vancouver to Calgary, base point, and equi-distant points from that base will be put on the same rate as from Winnipeg to the same points. This concession, if granted, will mean a great deal to the wholesale trade here, which has in many ways been handicapped in reaching out after the Alberta trade on account of existing conditions.

MACHINERY

MACHINERY IN PIONEERING

WHEN one speaks of pioneering in Canada, of "going up country," visions of camping outfits and equipments spontaneously arise, and the central image of the backwoodsman, more picturesque on the canvas of the stand than on the stage of real life, stands out from a background of forest or rock or stream as the prime factor in the country's development.

And yet, how little can man really accomplish with the tools nature has given him! Necessity has taught him that he must have mechanical aid in the simple operation of clearing; a lumber camp would be in sorry plight that did not include a portable forge in its equipment; and the farmer, who imagines he can sever himself from his nearest base, and go "into the bush" to commence agricultural operations without at least a fair collection of tools and impiements, is apt to be rudely undeceived.

True, a man may make a living in the splendid isolation of the untrodden forest by simply using his hands and his brain; he may, even in the bush, "eat bread by the sweat of his brow"; but his progress is not likely to be an example of aught but misdirected tenacity of purpose.

Yet, it is passing strange that in these days when so much is done by machinery, the settler should be content to follow in the wake of those sturdy pioneers who knew naught of the modern appliances for saving time and labor. Hardly any advancement has been made in this country in pioneering machinery, and the time is ripe for improvement in this line.

We are wont to read in our daily papers of the slow methods of the Britisher, compared with our own Canadian energy or with Yankee aggressiveness; but, after all, the opening up of a country difficult of access has never been quite so well accomplished as when the Old Country engineers have had a hand in it.

The lumberman cuts or burns his way into the bush, and trusts to the snow for his "permanent" road, many of the lumber trails being impassable in summer, even to a pack-horse. What is wanted is machinery for making roads, not merely road-graders and traction engines, but a number of other devices not in general use even in the States.

Locomotive steam cranes, for instance, used in America mainly on the wharves to assist in handling freight, are to be seen in Europe in the most impossible places, performing almost impossible tasks.

The Canadian artilleryman well knows he is expected to be able to mount a gun wherever there is standing room for its carriage, yet, strange to say, when the European emigrates to this country and begins pioneer farming, he sees in a few yards of marsh or in a few feet of stubborn rock, an impassable barrier to his machinery, and must negotiate the obstacle without it. The Canadian farmer can but suggest such rude remedies as the lumberman has devised, corduroy roads, gullies crossed on primitive log-piles, and sodden tracks of claybed.

When an obstacle to pioneer roadmaking is encountered, that is just the time and opportunity for the introduction of machinery. Like the artilleryman, the British contractor calculates on the axiom that wherever there is room for its base, he can erect a locomotive crane, and this once done, the crane will do most of the work of clearing and laying its own roadbed, which is, after all, merely a 4 ft. track. It is no uncommon sight in Great Britain to see a "Grafton" locomotive crane skimming along a ledge of rock little more than a yard wide, and swinging before itself load after load of the filling that is to make its further progress over an intervening swamp a practical proposition.

In tree-felling, too, our giant pines must still yield to the time-honored axe, while in Australia, machinery is made to fell the great iron-wood trunks at a rate that would seem incredible to the Canadian lumberman. It is probable that a company of English settlers and capitalists will shortly commence active work in timber-cutting on the Australian principle, in Nipissing South, or the Temiscaming country, and the venture will be watched with interest by the lumber magnates of the Dominion.

In sawmill machinery, America takes the lead, and the wonderful manner in which a log is seized and run through machine after machine until it is metamorphosed into planks, doors, sashes and a legion of other articles, is little short of marvellous.

The chief lack of machinery in Canadian pioneering is noticeable in roadmaking, and whether it be the indifference of the settler to aught but his immediate needs that is responsible, or the average Canadian farmer's almost miraculous ability to sit tight in a buggy over a road whose surface is a miniature Sierra, the fact remains that Canada, or that portion which is being peopled so fast, New Ontario in particular, needs machinery for roadmaking, and men who know how to use it.

Good roads associations, the Government roadmaking organization, and The Good Roads Machinery Co., of Hamilton, have done, and are doing, excellent work, but their sphere of operation generally begins after the real pioneering has been done, and when a considerable population warrants the expenditure of money in fairly large sums.

There is good reason for Canada to lift herself from the inferior position she has occupied with regard to machinery in general, and the signs are that she has commenced this auto-elevation in real earnest.

Still greater reason is there that whatever machinery is available in pioneering should be commandeered by those who are leading the way to agricultural development in lands at present uncleared.

Hardwaremen in touch with lumber work and early farming operations, say, in such districts as that lying between Sturgeon Falls and Sudbury, along the C.P.R. main track, will do well to watch the progress of invention in pioneering appliances.

B.

DREDGING IN LILLOOET.

The William Hamilton Manufacturing Co., of Peterboro', Ont., are building machinery for eight large dredges, each of which will have a capacity of 4,000 cubic yards every 24 hours. The machinery of each dredge will alone weigh 320 tons. The cost will be close on $95,000, and the shipment will commence in about a month, the destination being Lillooet, B.C., where the gold gravel of the Fraser is to be treated for auriferous deposits.

Des Moines, Ia., capitalists are mainly interested, although several of the principal stockholders are residents of Montreal and Winnipeg. These dredges are modelled generally on the bucket principle, but the chief feature that distinguishes them is the way in which the dirt is handled after being brought up by the buckets. The dirt passes over several revolving screens before it passes to the

...ries. These latter are not stationary as is usually the case, but are kept in motion. After passing through several other processes the flour gold, which has hitherto been lost in all dredging operations, is saved by forcing the tailings through quicksilver. Over 90 per cent. of the gold can be saved by this process.

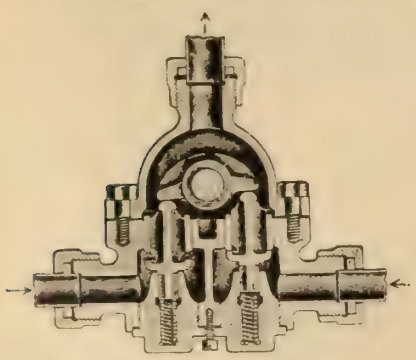
The company will also make a special feature of the saving of platinum, of which a large proportion exists in the black sand which prevails in that district. Special appliances will be put in for the saving of this metal, which is more valuable than gold, and it is estimated that the returns from the platinum alone will be very high.

The company's plans include the operation of their fleet of dredges by electric power, but owing to the fact that generators could not be secured in time, the first dredge will be operated by steam.

GERMAN AUTOMATIC SEPARATOR

Ernest L. Harris, U. S. commercial agent at Eibenstock, reports an important invention emanating from the well-known firm of Schneider & Helmecke, Magdeburg, Germany, for the purpose of drawing condensed water from steam engines. A sectional view is given herewith, which shows how the water is drawn off while the engine is in action.

The advantages of this invention are



that the water is removed from the cylinders without any waste of steam and without the opening of valves and doors. As the apparatus works automatically, it is unnecessary for the engineer to keep watch over it. Its success in Germany has been marked. Those interested should apply to the above address.

A CATALOGUE FOR MACHINERY MEN.

The catalogue of the American Air Compressor Works, Havemayer Building, 26 Cortlandt street, New York, has just reached us. It illustrates and describes the many types of the American air compressors, air receivers, vacuum pumps, carbonic acid gas and high pressure compressors, and the American air lift pumping system. Among the other contents of this catalogue will be found information relative to pneumatic tools and a table showing the flow of air through various size orifices.

The American Air Compressor Works have their own foundry, both brass and iron, pattern and blacksmith shops, and their machine shop is equipped with the very latest and most improved tools. They guarantee their product to be up to date in every respect and strictly first class in workmanship and materials.

Their claim is simplicity, durability, efficiency and economy, all embodied in a machine designed for maximum strength with minimum weight.

The catalogue is the standard 6x9 and will be issued for gratuitous distribution upon application.

MECHANICS AND HORTICULTURE.

There does not seem much in common between the market gardener and the metal craftsman, yet the spheres of mechanics and horticulture have been pressed into economical union by The Horticultural Travelling Structures Company, Limited, 2 White street, London, E.C., in the production of their travelling greenhouses and hothouses. These are so designed, that either with or without their heating apparatus, they can be easily moved from one plot of ground to another, so that directly one crop has been brought on or matured the greenhouses are shifted over the next crop as it stands growing in the soil.

The houses are mounted on small wheels running on light rails, and are invaluable in securing an economical production of succession crops. In England, during the early part of the year, strawberries may be raised; directly after these are marketed the houses are pushed over the tomato patch, and finally, in the autumn, they are placed over the chrysanthemum or mushroom beds.

MACHINERY NOTES.

BRANDON, MAN., is to have another new machine shop, to be operated by Calladon & Arnett.

A 5-h.p. electric motor has been placed in the plant of the Jno. Ritchie Plumbing Co., Toronto, by H. W. Petrie, Toronto.

The Collingwood Shipbuilding Co., Collingwood, Ont., have installed a 6 x 4 x 7 duplex steam pump in their plant. This pump was furnished by H. W. Petrie, Toronto.

A 44 ft. x 12 in. horizontal tubular boiler has been installed in the new plant of the L. Schepp Co., Spadina avenue, Toronto. This boiler was purchased from H. W. Petrie, Toronto.

The Morrow Machine Screw Works, Ingersoll, Ont., are building an annex for the purpose of storing iron and steel stock. The firm's business is extending rapidly under the able management of J. A. Coulter.

A fine 20-h.p. compound portable engine and boiler, also a sawing outfit, steam pumps, shafting, hangers, and all accessories have been shipped to S. Greenwood, New Liskeard, Ont., by H. W. Petrie, Toronto.

The local papers state that the saw and shingle mills at Fenelon Falls, Ont., owned by the Rathbun Co., Deseronto, Ont., will be enlarged and made first class in every respect before next season.

One hundred coke ovens are to be added to the French mine at Frank, N.W.T.

The Mexican Light & Power Company, financed in Canada, is to acquire the City of Mexico Electric Tramway Company, and the City of Mexico Electric Light Company. By securing these companies the Mexican Power Company will control the companies using the largest amount of power in the Republic of Mexico.

J. N. Gillies, of the McCormick staff, Winnipeg, has been promoted to be manager of the Regina branch. His office associates last week presented him with a heavy gold chain and locket. His friends from St. Andrew's Church, where he had been an active worker, presented him with a gold mounted silk umbrella.

A gasoline engine of about 2 h.p. and a drum with reversing apparatus for hoisting lumber is being used by Hawes & Co., Toronto, at a new building which they are erecting. This again demonstrates that there is no limit to the purposes for which one of these engines can be used. The outfit was installed by H. W. Petrie, Toronto.

A new form of rotary pump has been invented by Harold A. Gurney, of Miniota, Man. The invention is fully protected on both sides of the line by patents, and if Mr. Gurney can only succeed in finding a capitalist to push it, he is confident that it will effect a revolution in pump making. It should not be too much to expect that a rotary device will effect a revolution, anyhow.

An interesting and descriptive list has been issued by the D'Olier Engineering Company, Philadelphia, containing excellent cuts and explanations of their steam turbines and centrifugal pumps. The DeLaval machinery is of the best, and has a very high efficiency. The direct-connected steam turbine dynamo deserves special mention, as it is quite free from vibration and requires no special foundation.

An automatic bear-gun has been invented, which renders the old and cumbersome bear-trap obsolete, if all its claims be substantiated. The bear, on taking the bait in his mouth, causes a cartridge to be exploded, a ball from which pierces his skull. In Nipissing, where the device has been tried, it does not seem to have found favor in the eyes of either the trapper or the bear; both scorn it, from slightly different motives.

The Toronto Board of Control on Wednesday considered the tenders for a new pumping engine. The matter was referred to the city engineer, with a recommendation that he shall report on each tender and advise the acceptance of the one he considers best. Canadian firms have tendered the following figures: $170,000, $160,563, $155,000, $130,340, $152,389. An American firm makes an offer to do the work for $149,350.

The Vancouver Power Company have obtained the sanction of the city for a water record of 10,000 inches in Coquitlam Lake. The city draws its water supply from this lake, and this fact gave rise to some objections. Commissioner Robson, before whom the application was made, had certain alterations made to safeguard the civic interest, and as these amendments were satisfactory to Mr. Glover, the local manager of the company, the record was granted, subject to fees amounting to $11,036.

G. A. Crosby & Co., Limited, Sarnia, are making a bold bid for the trade in can-making machinery, looking to the growth of the canning industry that is sure to come. Their works are replete with machines of the latest American pattern, and are under experienced management. Among a host of other machines made by this firm may be noted drills, milling lathes, shapers, dies, presses, and a patent automatic can making machine turning out 30,000 round cans of one size in 10 hours, with solder on the outside of the can.

DEPARTMENT OF ADVERTISING SUGGESTION AND CRITICISM

NOTE. Herein are discussed the principles and practice of advertising. Subscribers are invited to send Mr. Lydiatt specimens of their newspaper and other advertising, for the purpose of review in this department. Address care of Department of Advertising, HARDWARE AND METAL.

Edited by

W. Arthur Lydiatt,

TORONTO.

Don' wait until you publish an especially good advertisement before you send me your ads. for review in this department. Don't be afraid of a little honest criticism. I will only try to point out the faults—if such there be—that you may have ideas for the improvement of your ads. You don't have to follow my advice or act on my suggestions.

I simply want you to send me specimens of your advertising matter—just what you are using now, or what you have been using. I'll tell you of every way in which I see it might be improved. I will call attention to the good points—mention the weak points.

If you spend money for advertising it is surely advisable to see to it that you get your money's worth. And if you tell me just how you are spending it—show me what kind of advertising matter you use—perhaps I'll be able to give you some suggestions which will help you make your advertising more profitable. It's worth trying, anyway. THE EDITOR.

TOO MUCH FAITH.

NOT so very long ago I asked a merchant if he ever realized any returns from the advertising he was doing in the daily papers.

"Oh, we have no doubt it pays us," said he. "We have been advertising for a good many years, and while we have never had any direct evidence that our advertising brought any results, still we have faith in its value, and feel that it does us some good."

There was a man who had too much faith. He felt satisfied that the advertising he was doing was beneficial to his business, and when he didn't get any direct results from his ads. it didn't trouble him much—he didn't worry about it as some do.

Advertising that doesn't bring results is not good advertising. If you cannot see that you are getting direct returns from the advertising that you are doing, you had better look for the reason and change your methods. I have never yet seen a retail business that would not quickly respond to intelligent advertising. There is no retail business anywhere that is not susceptible to the influence of advertising.

The merchant who is not getting direct returns is not getting what he is entitled to. His "faith" only serves to blind him to the faults in his methods. It is all very well to have confidence in the efficacy of advertising in bringing increased business, but it is advisable to look for results—see to it that your advertising pays you a profit. If you don't get the results you should, seek a reason, remedy it, and keep constantly changing your tactics until you are satisfied that you receive the full benefit of your advertising expenditure.

Many men start in advertising as if they did not expect it to pay. Like the general who starts into a battle expecting to be whipped, they are usually not disappointed. The merchant who rents a store, buys a stock of merchandise and opens for business, doubtful of success, is reasonably certain to fail. The man who advertises without expecting any results usually does not realize any.

Have faith, expect to win, determine to succeed. But "be sure you're right—then go ahead." Be sure the methods you adopt are successful when applied to your case. See that you get all that you pay for in advertising. Then go ahead with the confidence born of success, and the extent of your business will only be limited by the effort you put into it.

Don't have too much faith; don't have too little.

KEEPING UP INTEREST.

IT is one of the problems of modern merchandising to keep the interest in one's establishment up to the top notch. The constant appearance of newness, of novelty, is necessary both in the methods of dealing with customers and in the goods offered.

In the case of the goods, novelty may be conveyed by a constant aim to procure articles that are in themselves new, or in reducing the prices on old goods to a scale where the inducement to the public to purchase is found too strong to overcome.

New methods in dealing with one's customers are found difficult to introduce, but in this direction the efforts of the manufacturers might be aroused. For instance, manufacturers of paint, soap, tea or other articles, might be induced to distribute samples through your store. In this way the people would eventually come to regard your particular establishment as one where something new was always waiting their attention—a kind of interest it is not easy to arouse, but one which is valuable when awakened.

It is not only necessary to have all new and seasonable goods on hand promptly, but novelty in arrangement, certain changes, must be made in order to interest and gain customers. Some people question why the large department stores "change about" their counters so frequently. It probably pays—which is a very good reason. A sense of newness, of something different, in order to obtain the best results, must constantly appeal to shoppers who are in pursuit of new goods. The average country merchant does not appreciate this to the necessary extent, for very likely you'll find the same goods arranged on his shelves the same way from one year's end to another—to all appearances, at any rate.

Let the spirit of newness, of freshness, of change, pervade your store. Never mind if the different classes of goods are new and have been arranged to the best advantage ever since the store opened. It will still be wise to change them about, even though for certain reasons the original plan was the one best adapted to the display. Some customers may complain, but it is unlikely, and your trade will surely grow by it.

It is house-cleaning time just now—store-cleaning time, too. Better take things down, dust and clean them up, and if your counters and shelves are not in the best of shape apply a coat of paint, or a bit of "cleaner." Then rearrange the goods—put what you had on one shelf, on another—keep constantly bringing to the front goods that have been kept in the background. Use the shelves behind your main counter as an "exhibition stand," where new things will make their bow to your customers, and where each of the staple articles will be in turn brought to their attention.

Study to keep aglow a lively interest in your store.

Old methods may suit old people, but the new generations want things kept in touch with the spirit of their day.

Mantels, Grates, Tiles, Etc.

Sell MANTELS as well as Hardware—it will pay you.

The Dodge Wood Split Pulley will make money for you.

If you are not handling a line of Dodge Wood Split Pulleys you should, for there is money in it for you.

There is hardly a manufacturing concern in your community who would not purchase these pulleys from you if you carried a stock. It would save them time and make business for you.

Then you don't have to invest such an awful large capital in this stock, for with the interchangeable system of bushings a small stock suffices for immense demands.

Write to-day and let us tell you about the necessary stock to carry to meet the ordinary requirements of any manufacturer.

THE DODGE MANUFACTURING CO.
OF TORONTO, Limited,
TORONTO, ONT.

INDUSTRIAL GOSSIP

THE Fruit Despatch Co., incorporated in New Jersey, has been authorized to do business in Ontario; capital, $10,000.

The Golden Crown Mining Co. of Ontario, Limited, have been authorized to change their style to the Ogilvie Gold Dredging Co., Limited.

W. N. Young, mining engineer, is expected to resume development operations at the French Road copper deposits. Machinery to the value of $75,000 has been idle at this deposit during the winter.

Wiarton, Ont., is asking the Dominion Government to erect a wharf at that place.

About $4,000 of sash, door and blind factory plant and machinery were destroyed in a fire which burned Reddick's factory, Belleville, Ont.

The White Bear Mining Co., Rossland, B.C., proposes to erect new head works at that place.

The Ontario Legislature has decided to erect a steel swing bridge, to cost $16,000, over the Winnipeg river at Rat Portage, Ont.

An Ottawa despatch says that the Ottawa Steel Casting Co., who have adopted the new Hunter process of casting steel, have been compelled to stop operations owing to a shortage of pig iron. Shipments of the latter are expected in a few days.

The Goodrich Polish Co., of Campbello, Mass., have opened a manufacturing branch in Montreal.

Tallman's brass factory, Hamilton, is to be enlarged at a cost of $1,200.

The Sydney, N.S., Post says that Sir A. L. Jones, head of The Elder-Dempster Company, and Sir Alston Dixon, a large shipbuilder in the north of England, have in contemplation the establishment of a steel shipbuilding plant at a port in Nova Scotia, where the best facilities can be obtained for such works.

The Gould Manufacturing Co., Renfrew, Ont., are extending their premises 30 feet and will add four men to their staff of eight. The extension is due to increase in their stove trade.

Mining operations in the Rossland district are more active than they have been, despite a shortage of coke.

A Hamilton, Ont., despatch says that the shareholders of The Nickel Copper Co. have elected James Dixon president and John Patterson secretary. They also approved the borrowing of $65,000 from The Sterling Co., New Jersey, the money to be devoted to the payment of the McConnell property, recently purchased.

A Sault Ste. Marie correspondent writes that on Friday last a test of all the departments of The Lake Superior Consolidated Co., Limited, was made. The pig iron travelled through the converting mill, then the steel went into the finishing mill, coming out as steel rails. Everything is said to have worked satisfactorily.

Emerson & Fisher are now making considerable extensions to their Enterprise stove foundry at Sackville. During the past two years the plant has rapidly grown but the finishing and nickel-plating departments have not been proportionately enlarged. This is now being done, and extensions are being put to one of the buildings which will give an increased length of 140 feet by 40 feet wide.—St. John, N.B., Sun.

The Bruce Mines and Algoma Railway Co., who propose to erect their line from Bruce Mines, a town on Lake Huron, to a point on Hudson's Bay, 400 miles, and who have already built about 17 miles, are asking a subsidy per mile for 100 miles of 7,400 acres of land with timber rights, subject to timber dues of $2 per M. They state that the railway would open up a large rich mineral area.

The Merchants' Rubber Co., Limited, is being promoted in Berlin, Ont., to manufacture rubber goods. The stock has been subscribed and the erection of the works will be started at once.

J. E. Fletcher was presented with a testimonial by his fellow-employes when leaving Robt. Mitchell & Co., brass founders, Ste. Cunegonde, Que.

The Automatic Scale Co., Amherst, N.B., have started in business. The scales for the first year will be manufactured by the Maritime Heating Company, until the trade is established and the company's own plant ready. H. T. Sutherland, New Glasgow, N.B., is president, and O. A. Nickerson, secretary-treasurer of the new company.

RAILWAY TO PHOENIX, B.C.

It has been announced that construction on the V., V. & E. branch of the Great Northern railway from Grand Forks to Phoenix would be put under way at once. The distance between the stations is about 24 miles, and will be rushed through at once. There is a goodly ore tonnage awaiting the line when it is constructed. As work has been started on the fifth and sixth furnaces at the Granby smelter, and part of the machinery has already arrived, long before that railway line is completed that smelter will be able to handle 2,300 tons of ore daily.

MAY START LARGE WORKS.

Wm. Robinson, formerly of Owen Sound, Ont., recently with the Transportation Railway in Costa Rica, proposes to start works in Owen Sound for the manufacture of narrow gauge railway cars such as are used in South America. He would employ about a thousand men, and all he asks is a 20-acre site on the water front and a street railway franchise in Owen Sound. Mr. Robinson is believed to represent a syndicate.

NEW COMPANIES INCORPORATED.

The Walkerton, Ont., Hosiery Co., Limited; capital, $40,000; directors, John Henderson, James Whitehead, J. B. Huether and others, of Walkerton; to manufacture hosiery, gloves and other woollen and cotton goods.

The Ontario Neckwear Co., Limited, Toronto; capital, $40,000; directors, Edward A. Taylor, T. J. Wardell, T. F. Taylor, T. S. Wardell and E. J. B. Duncan; to manufacture and sell neckwear and other smallwares.

The Maple Leaf Harvest Tool Co., Limited, Tillsonburg, Ont.; capital, $100,000; directors, C. J. Shurley, J. C. Deitrich, F. D. Palmer, O. H. Vogt, W. W. Janey, Galt, Ont., and Carl Jansen, Tillsonburg, Ont.; to manufacture and sell farm and harvest tools and agricultural implements, saws, edged-tools, metal bedsteads and machinery, and articles and things made of wood, iron, brass or other metals or of any combinations thereof, and to acquire, manufacture or otherwise provide the raw materials, fuel, articles and things to be used by the company; also to generate and sell power to other companies.

The Keller Heater Co. of Canada, Limited, Toronto; capital, $100,000; directors, H. J. Wright, John Payne, R. Credicott, W. J. Gilchrist, H. Toynbee, Toronto; to manufacture and sell "Keller" feed water heaters, purifiers and hot-water devices and steam-heaters and economizers of all descriptions, and to make and deal in engines, boilers and machinery of all kinds.

The Imperial Peat Co., Limited, Guelph, Ont.; capital, $1,000,000; directors, David Little, F. Frank, Arch. Little, Geo. Chapman, Guelph, and Frank White, Toronto; to manufacture and sell peat, peat-fuel, peat-gas, aluminum, cement, clay and other products.

OFFENSIVE ASSURANCE.

IT is sometimes rather difficult to write a suitable application for a position in reply to an advertisement. It is very hard to tell just what to say in regard to one's ability to fill the position. Solicitors very often say too much, and the application is thrown out as being "cheeky." On the other hand, applications are very often put aside because the writers are either very modest or too honest to say anything about themselves that is not the absolute truth.

The man with plenty of "bluff" is more likely to get on in the world than the man who is afraid to speak up for himself. Everything, however, can be overdone, and the bluffing business is certainly carried to excess.

There is nothing that riles an employer more than to be told that there is no one more suitable for the position than the applicant; that the applicant's services will surely be of advantage to him; and that the applicant would be pleased to accept the position on condition that the salary suits him.

A certain wholesale iron and steel firm advertised for a traveller, one with experience in working steel preferred. Applicants were asked to state experience and salary expected. Among the replies received were two which they considered absolutely impertinent, and they were treated as such.

A few quotations from these letters would not be out of place.

Here is one: "I can fill this position better than nine out of every ten that may make application." A pretty sweeping assertion, is it not? It is also an assertion made merely from guess work, for how was he to know who would make application? It looks very much like a mere boast, more apt to be false than true.

"I am not nor have I ever been looking for a position, but this particular one seemed to me as one that appealed to me, so concluded to write you," is another quotation from the same letter.

According to his own account the writer would make a good practical traveller in the steel business, but from the foregoing quotation, and indeed the whole letter, he does not know as much about composition as about steel. He continues with: "And if the salary you would offer was of sufficient inducement I would consider the matter." A very obliging person, isn't he? The firm ought to be very much flattered by the condescension of such a smart fellow.

It may be unnecessary to state that the writer of that letter did not receive a favorable reply.

The other letter is not quite so bad, but the impression left after perusing it is that the writer has too high an opinion of himself to be a good man for the position.

He starts out with: "I am an experienced traveller of good address and appearance—aged 35 years—speak both languages—successful salesman—genteel manners—dress well—pleasant talker—hustler—energetic—strictly attend to business." Indeed he is just about perfect—in his own estimation. He was also inclined to believe that his services would be of advantage to the firm, and that their relations would be pleasant and profitable. Would such a letter make a very favorable impression? Not much!

His manner of ending it is quite in accordance with the rest of the letter: "Awaiting a favorable and early reply, I remain yours, etc." Of course after giving himself such a good character he would need to have no doubts about receiving "a favorable and early reply."

It is also needless to say that the position did not go to the writer of that letter.

Perhaps the writers of those two letters really think that they are about as good as they claim to be, and perhaps there may be some truth in the assertions; but well, it is a common saying that to get at the real worth of a person who always sets his valuation pretty high himself is to cut it in half. However, it is also true that if you do not respect yourself no one else will, and if you do not stick up for yourself no one else will; but a person can both respect himself and stick up for himself without being either boastful or impertinent.

THE COLLECTOR FIEND.

AN American paper in an article giving "pointers" to collectors, related a story of one persistent collector who, when told by a debtor to "sing for his money," took the advice literally and sang at the top of his voice till the other paid the bill to get rid of him. This story was told as a sort of hint to collectors to "keep everlastingly at it," and they would get what they wanted.

The collector for a New York hardware house thought it good advice and determined to act upon it at the first chance. His experience, related by himself, was this:

"There was a retailer who had stopped trading with us but who had never paid a small balance due. I called again and again, and finally I said, 'See here, Mr. Blank, how am I ever to collect this bill?' 'Well,' he answered with a grin, 'I guess you'll have to sing for it."

"'I am only too glad to do that,' I answered. I sat down near him, and in a high tenor began to sing 'In the Good Old Summer Time.' The old man looked at me; the typewriter paused in her work and looked at me; the clerks and a couple of customers also paused and looked at me.

"The boss stood it about a minute. Then he grabbed me by the collar, thrust me out of the door, and shouted: 'You try any more of your fool tricks and I will call a policeman.'

"We are suing for that account."

The trouble was not perhaps that the advice given was wrong, but that the collector's knowledge of human nature was at fault, and he tried the "music cure" on the wrong man. In another case it might have been successful.

MUNICIPAL TRADING TO BE INVESTIGATED.

A COMMITTEE of five members is to be appointed by the Ontario Legislature to investigate the subject of municipal trading or municipal ownership. The proposal is a timely one.

The tendency of the day in Canada as well as elsewhere is undoubtedly toward public ownership. There is a great deal to be said in favor of public ownership. On the other hand there is a great deal to be said against it. It is well, therefore, that the public should be afforded all the light it can on the question. If we step in the dark we are naturally in danger of stumbling. In municipal ownership there has been a great deal of groping in the dark, and there has consequently been not a little suffering.

In the ideal State, public ownership, confined to certain limitations, is undoubtedly the ideal condition. But the ideal State does not exist in Canada or in any other country for that matter. We have therefore to consider the question on the basis of what is and not what should or ought to be.

Unfortunately, the quality of our municipal bodies has not improved of late years. On the contrary, most observing men have come to the conclusion that there has been a deterioration. And in our parliamentary as well as in our municipal bodies.

One cause of this may possibly be a too rapid extension of the franchise ; but another is no doubt the small proportion of practical business men who are to be found in our legislative bodies from the village council to the highest representative body in the Dominion.

Even by those who are not engaged in mercantile pursuits, it is generally conceded that the business quality is needed in those who make our laws, whether municipal, provincial or Dominion, as well as in those who manage ordinary business enterprises. As we have already pointed out, this desirable element is present in a relatively small proportion indeed.

This in turn is no doubt partly due to the fact that the demands of business are more exacting than they were a few years ago, and that therefore business men cannot devote as much of their time as formerly to the affairs of the municipality or of the State. But whatever may be the cause the fact is patent beyond all question, that it is the voice of the professional politician that is raised loudest in our public bodies and whose handiwork is most apparent in the making of municipal and parliamentary laws. It is this fact that prevents many who, while in principle are favorable to public ownership, from lending their vote or their influence towards committing the State or municipality to the ownership of public utilities of various kinds.

In Great Britain and some of the representative continental countries, great strides have been made in recent years in the direction of public ownership of public utilities, and, no doubt, in many instances the result has been beneficial to the people at large. In many instances, however, they have not been conducive to the public good, while in others the principle has been extended to enterprises which can scarcely be considered within the province of public ownership. For instance, in some parts of Great Britain the municipalities have even gone into retailing commodities such as milk, etc., thus infringing upon the rights of private business concerns.

Where there is a good healthy public opinion and business commonsense is a ruling force in municipal and parliamentary bodies, public ownership in public utilities can be safely undertaken. It is to be hoped that the investigation that is to be made by the Ontario Legislature will give light upon all these points and will prevent the people of Canada, from drifting unreasonably far in the direction of public ownership.

A WARNING TO EASTERN JOBBERS

UNLESS the eastern jobbing houses take a friendly word of warning there is going to be trouble for them before long. Should anything happen the crop between now and harvest it will be this fall, if that crop comes off all right it will be a little later.

A goodly number of eastern houses are setting up men in business in country towns in the west. This is perfectly legitimate and no one will object, not even the rival merchant across the way. But this is not all they are doing. In a good many instances the men who come to manage these new branches are eastern men, with little or no knowledge of western conditions. Almost the first thing is to cut prices. Now it can be said and proved, that prices in the west at the present time are not excessive. There is plenty of competition to prevent it. That prices are very much higher than they are in the east for some lines no one will deny. Taken as a whole, however, prices are pretty close cut for the cost of doing business.

The newcomer starts frequently on a general slaughter of established prices, and the other men in the town have to meet him or lose trade. The result of such a practice is not far to seek, in fact, the result will be rounded up this fall, or many in the west will miss their guess.

The larger of the towns in the west are amply provided with stores already, and there really is no need for any more. In the new towns it is different. There are a number of new towns and in some of them there are excellent openings, but it is an unsound business policy for any new man starting business to antagonize all his confreres at the start. And that is just what nearly all these eastern men are doing.

This is a friendly warning, and nothing more or less. The west is wide, its opportunities are boundless, but the eastern man can bank his last dollar on the statement that he cannot cut prices heavily and make both ends meet at the end of the year.

The jobbing house that supplies him with stock and encourages him to do so will not have its sorrows to seek, to use a homely Scotch proverb.

THE INSOLVENCY LAW QUESTION.

A BILL is again before the House of Commons providing for the enactment of an insolvency law for the Dominion. Ever since the old Bankruptcy Act was repealed, some 20 odd years ago, periodical attempts have been made in the House of Commons to rehabilitate a similar law. Although, at times, the prospect for such a law looked bright, its opponents have been sufficiently strong to either directly vote it down or to, in some way or other, prevent its final adoption. In the late Sir John Abbott the advocates of the general insolvency law had a warm friend, and later on Sir Mackenzie Bowell interested himself in the subject, and at one time succeeded in getting a bill through the House of Commons, but it met its death in the Senate.

The strongest opponents of the insolvency law in Canada have been the banking interests. Their opposition was born of the fact that they were not allowed to rank for double liability. But, judging from the remarks of Mr. Stewart, the managing director of the Sovereign Bank, the opposition from that quarter is possibly scarcely as strong as it was.

The bill introduced by Mr. Monk applies to manufacturers and merchants, but exempts incorporated companies, who come within the Winding-up Act. The debtor can be forced to assign after he has shown evidences of being insolvent, subject to supervision by the court. Provision is made for the discharge of insolvent debtors on consent of the creditors holding at least three-quarters of the claims and a majority of them having claims of $100 and upwards. Before the insolvent can be finally discharged, however, the action of the creditors must be ratified by the court. Auother wise provision is for the curtailing of the preference evil. Under Mr. Monk's bill a preference given 30 days before the date of insolvency is null and void. Taking it all round, Mr. Monk's bill does not differ materially from similar measures which have been brought before the House of Commons of late years.

Doubtless the bill will meet the same fate as previous measures, but that does not, however, alter the necessity of such a measure being placed upon the Statute Book. The boards of trade from one end of Canada to the other have almost year in and year out adopted strong resolutions and appointed committees to endeavor to persuade the Government to introduce an insolvency law. In addition to this representations have time and again been made to the Dominion Government by exporters in Great Britain. A few years ago when Hon. W. S. Fielding was in London a deputation of manufacturers and merchants waited upon him, urging the necessity of the Dominion Insolvency Law. So far these importunities have had no apparent effect upon the Government.

In the meantime the business men of Canada are suffering for want of such a law, while our prestige in Great Britain is being impaired on account of its absence.

HOLDING HOME TRADE

THE opinion of a well-known retail hardwareman in regard to competing in his own locality with the "catalogue houses" is that it would be advisable to sell even lower than the latter in order not only to get the trade but to "get the prestige of selling as cheap as the catalogue houses."

The latter is the more important object of the two, for the natural result of having the "prestige" would be that the "trade" would follow, not the trade alone in those articles which it was necessary to sell lower than the mail-order houses, but in the general list of goods. When a customer can purchase certain things cheaper in one store than another he receives the impression that all other articles are correspondingly low in price; and even if they are not cheap he feels that, at any rate, he is doing as well in this store as in any other he could go to.

The gentleman above referred to, taking it for granted that the catalogue business of the leading houses of the country is a permanent institution, sees the time when all the hardware stores will be department stores themselves. In his own business he had extended the general hardware stock and added some outside goods.

One of these is electric supplies, on which there is a good margin of profit; and they might be added profitably to the stocks of other retailers. Electrical call bell outfits, lighting apparatus, etc., were included in a department by themselves, and after a little reading upon the subject, enough could be learned for all practical purposes in handling the goods. The goods that usually sold for 5 and 10c. he placed in wire baskets on a special counter. This plan resulted in considerably increased sales, and these goods give a large margin of profit.

THE STRIKE OVER.

THE strike of the 'longshoremen in Montreal has been settled by a compromise on both sides. The shippers refused to recognize the union in that they would give preference to union men in employment, but the union badge will be allowed to be worn while the men are at work. The independent labor bureau will be abolished as far as the union men are concerned; that is, they will not be compelled to sign at it.

All the 'longshoremen have now returned to work, and the unloading of the steamers in port proceeds apace. There is still, however, much congestion at the wharves; for though the 'longshoremen agreed to unload the ships, the striking teamsters have not decided yet to draw the goods to the stations and warehouses, and many wholesale and retail houses are still awaiting deliveries of goods. Some of the forwarding companies claim to have nearly their full complement of men at work, but the railway teamsters are still out on strike, and shipments are in consequence much delayed. This state of affairs has done a great deal of harm to the business interests of Montreal.

In the case of perishable goods the damage to trade is particularly severe, and is felt among the farming community besides in the city, as the Grand Trunk railway refused to accept any more perishable goods for Montreal until the settlement of the strike. Butter, cheese, eggs and other farm produce are in consequence at a standstill as far as arrivals to Montreal by the Grand Trunk are concerned.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, May 15, 1903.

HARDWARE.

ONE of the most important features of the week has been the settlement of the longshoremen's strike which has changed the appearance of the docks considerably, but the teamsters' strike is still in progress, and until this is settled merchants will be put to some inconvenience, as it is difficult to get goods delivered promptly, although the railway companies are doing all in their power to relieve the blockade. In general hardware a fair volume of business continues to be done, there being a steady demand for most staple lines. There is a scarcity of galvanized and barb wire in the city at present on accaunt of the slow delivery of the railway companies, while on the other hand, the depleted stocks of bar iron have been relieved by the arrival of large quantities of late. There has been an advance in prices for blasting and sporting powder and wood bench planes have also been marked up about 10 per cent.

CANT HOOKS.—There has been no change and the movement is slow. We quote: No. 12, $10; No. 8, $11.50; No. 7a, $16; No. 6a, $14.50; No. 5a, $11.50.

AGRICULTURAL WRENCHES.—The demand continues slow and values show no change. We quote: No. 6, $9; No. 8, $10; No. 10, $12; No. 12, $14; No. 15, $24; No. 18, $30; No. 21, $36. Discount, 70 per cent.

LAWN MOWERS.—Quiet and unchanged. Quotations follow: 10½-in. wheel x 12-in. cutter, $7.50; by 14-inch cutter, $8.00; by 16-inch do, $8.50; by 18-inch do, $9.00; by 20-inch do, $10.00. Star, 9-inch wheel by 12-inch cutter, $5.50; by 14-inch do, $5.75; by 16-inch do, $6. Daisy, 8-inch wheel by 12-inch cutter, $4.90; by 14-inch do, $5.10; by 16-inch do, $5.30. Philadelphia pattern, 7½-inch wheel by 10-inch cutter, $6; by 12-inch do, $6.50; by 14-inch do, $7; by 16-inch do, $7.50. Grass boxes are quoted as follows: 12-inch, $2.25; 14-inch, $2.25; 16-inch, $2.50; 18-inch, $2.50; 20-inch, $2.75. The discount on all the above is 50 per cent. off.

BARBED WIRE. There is quite a scarcity of this in the city at present, owing to the slow deliveries of the railway companies. We still quote $2.80 per 100 lb. f.o.b. Montreal, and $2.67½ f.o.b. Cleveland. Carlots of 15 tons are quoted f.o.b. Cleveland at $2.45.

GALVANIZED WIRE. Scarce just now on account of slow deliveries. We quote: No. 5, $3.70; No. 6, 7 and 8, $3.15; No. 9, $2.55; No. 10, $3.20; No. 11, $3.25; No. 12, $2.65; No. 13, $2.75; No. 14, $3.75. In carlots, f.o.b. Cleveland: No. 5, $2.20; Nos. 6, 7, 8 and 9, $2.15; No. 10, $2.20; No. 11, $2.25; No. 12, $2.30; No. 13, $2.40; No. 14, $2.50. In less than carlots, 12½c. per 100 lb. extra is charged.

SMOOTH STEEL WIRE. A fair business is passing in staple sizes of oiled and annealed. We quote: Bright and annealed, $2.50 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE STEEL WIRE.—The movement is fair and discounts unchanged at 25 per cent., with the following extras: 1 and 2-lb. hanks, 25c. per 100 lb.; ½-lb. hanks, 37½c. and ¼-lb. hanks, 50c.

BRASS AND COPPER WIRE.—There continues to be a steady demand, and the discount is 60 per cent.

PRESSED SPIKES.—No change, with a fair trade doing. The discounts are as before, 20 per cent. f.o.b. Montreal, Toronto, Hamilton, London, St. John and Halifax.

FENCE STAPLES.—Steady with a moderate demand. Our quotations are as follows: $3 per 100-lb. keg for galvanized staples and $2.80 for bright, with 25c. extra for 25 and 50-lb. packages.

CUT NAILS.—Demand fairly good and prices unchanged at $2.50 per keg.

WIRE NAILS.—Unchanged and moderately active. Carlots are quoted at $2.40 and small lots at $2.45 per keg f.o.b. Gananoque, Montreal, London, Hamilton, Toronto, Brantford, Windsor, Ont., and St. John.

HORSE NAILS.—Trade fairly good. Our quotations are still as follows: "M" brand, "Oval" and "New City" heads, 55 per cent.; "Countersunk" heads, prices quoted on application. "C" brand, 40, 10 and 7½ per cent. off; "Monarch," 60 per cent. and "Peerless," 50 per cent.

HORSESHOES.—No change to note, and our quotations are as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.40; No. 1 and smaller, $3.65; snow pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; X L steel shoes, new light pattern, sizes 1 to 5, No. 2 and larger, $3.55; No. 1 and smaller, $3.80; featherweight, all sizes, 0 to 4, $5.10; toe weight, all sizes, 1 to 4, $6.35. Shoes, more than one size in a keg, 10c. per keg extra f.o.b. Montreal only.

RIVETS AND BURRS.—There is a steady movement. Our quotations are as follows: Best iron rivets, section carriage and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS AND NUTS.—Some sizes of nuts are still scarce. We quote: Norway carriage bolts, 55 per cent.; common, 50 and 10 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 and 10 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50, 5 and 10 per cent. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3¼c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ½c. per lb. is allowed.

SCREWS.—Demand fair, but stocks in jobbers' hands small owing to slow deliveries by makers. We quote: Round head bright, 82½ per cent.; flat head bright, 87½ per cent.; brass, round head, 75 per cent.; brass, flat head, 80 per cent.

SHOVELS.—Supplies in jobbers' hands are still small.

CORDAGE.—Prices steady under a fair demand. Quotations are: Pure manila, 14c.; British pure manila, 11½c.; sisal, 11¼c.; double lathyarn, 10½c.; single lathyarn, 10c.

BUILDING PAPER.—There continues to be a good demand for this article. We quote: Tarred felt, $1.75 per 100 lb.; 2-ply, ready-roofing, 90c. per roll; 3-ply, $1.15 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 55c. per roll; tarred fibre, 60c. per roll, O K and I X L, 65c. per roll; heavy straw and sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN AND WIRE CLOTH.—The demand is fair and values steady at $1.42½ per 100 square ft.

FIREBRICKS.—Demand good and the prices steady. We quote $16 to $22 per 1,000 for English and $17 to $22 for Scotch.

CEMENT.—There has been a good demand for cement of which the arrivals have been quite liberal by late vessels, but owing to the strike of the teamsters importers find it difficult to get goods moved from the wharf, therefore business and general contract operations are delayed. Our quotations are still as follows: Canadian cement, $1.90 to $2.25; German, $2.25 to $2.40; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl. ex-store, and American, $2.20 to $2.40 ex-cars.

SHOT.—There is no change and a fair business is passing. Quotations are: Ordinary drop shot, A.A.A. to dust, $6.50 per 100 lb.; chilled Nos. 1 to 10, $7 per 100 lb.; buck and seal, $7.50 per 100 lb.; ball, $8 per 100 lb. Trade discount, 15 per cent. f.o.b. Montreal, Toronto, Hamilton, London, St. John, N.B., and Halifax.

POWDER.—Blasting and sporting powder has advanced recently.

PLANES.—Wood bench planes have scored an advance of 10 per cent. lately.

BOKER KING CUTTER RAZORS.—New prices to take effect to-day are No. 3251 at $3.50 per dozen and No. 3103 at $14.50.

METALS.

A feature in this department has been the large arrivals of bar iron of late and now stocks are quite complete, as for the past few weeks all small sizes of iron were very hard to get. The general tone of the market has been steady and values, as a rule, show little change.

BAR IRON.—Arrivals have been liberal and stocks of all sizes are now complete. We quote: Merchants' bar, $2; horseshoe iron, $2.25; forged iron, $2.30.

BLACK SHEETS.—There continues to be a good demand for these. We quote: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50; 8 to 20 gauge, $2.50.

GALVANIZED IRON.—The difficulty in getting goods from the wharf is hampering the movement. Quotations are as follows: 28 Queen's Head, $1.50, Apollo, 10¾ oz., $1.30; Fleur de Lis, $1.15; Comet, $1.10; "Bell" brand, $1.05. For less than case lots, 25c. extra is charged.

LEAD PIPE.—The demand is fairly good, and our quotations are as follows: 8c. for composition and waste, and 7c. for ordinary, with discount of 30 per cent.

IRON PIPE.—No change and the demand is good. Our quotations are as follows: Standard pipe per 100 ft., in lengths under 19 ft.: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85, ¾, $3.65; 1-in., $5.29; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.20; 2-in., 416.85. Extra heavy pipe, plain ends, are quoted per 100 ft. as follows: Black, ½, $4.20; ¾, $5.25; 1-in., $7.55; 1¼, 410.55; 1½, $12.75; 2-in., $17.60. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings on extra heavy 5 per cent. net is added. Trade discount, 5 to 7½ per cent.

TINPLATES.—Prices unchanged and movement fair. We quote: Charcoal, $5 to $5.25 and cokes, $1.25 to $4.50.

SOIL PIPE AND FITTINGS.—These lines are steady. Discounts are: Light soil pipe, 3 to 6-in., 50 per cent.; medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.: extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—Liberal supplies of pig iron have arrived by vessels, and No. 2 Summerlee is quoted at $21 to $21.75 and No. 2 Middlesboro at $19 per ton.

INGOT COPPER.—Unchanged at $15.50 to $15.75 per 100 lb.

INGOT TIN.—Demand steady at $33 to $33.25 per 100 lb.

PIG LEAD.—Quiet at $3.50 to $3.75.

STEEL.—Firm and in fair demand. Our quotations are as follows: Mild, $2.05; sleighshoe, $2.10 to $2.20; tire, $2.15 to $2.25; spring, $2.85 to $3; reeled machinery, $2.75 to $3; toecalk, $2.60 to $2.75; machinery (iron finish), $2.10; mild steel, $2.05; square harrow, $2.15.

TOOL STEEL.—Fair trade passing. We quote: Black Diamond, 8 to 9c.; Sanderson's, 8 to 9c., according to the grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 10 to 20c.; "Air Hardening," 50 to 65c. per lb.

CANADA PLATES.—Prices continue to rule steady, and our quotations are as follows: 52s, $2.60 to $2.70; 60s, $2.70 to $2.80; 75s, $2.80 to $2.85; full polished, $3.75 and galvanized, $4.25 to $4.35; galvanized, 60s, $4.45 to $4.55.

TERNE PLATES.—Fairly inquired for at $7.75.

COIL CHAIN. Quiet. We quote: No. 6, 11½c.; No. 5, 10 to 10½c.; No. 4, 9 to 9½c.; No. 3, 8 to 8½c.; ¼-in., 6½ to 7c. per lb.; 5-16, $5 to $5.20; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4; ½, $3.95 to $4.05, 9-16, $3.85 to $3.95; ⅝, $3.65 to $3.75; ¾, $5 to $5.20; ⅞, $3.30; 1-in.,$3.15 to $3.25. In carlots an allowance of 10c. is made.

SOLDER. The demand is fair at 20c. for bar and 19c. for wire.

SCRAP METALS.

A fair trade is reported but prices show no change. We still quote: Heavy copper and wire, 10c. per lb.; light copper, 9c.; heavy red brass, 10c.; heavy yellow, 8½c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2½ to 2¾c.; iron, No. 1 wrought, $17 to $17.50; No. 2, $7.50 per ton; machinery scrap, $17.50 to $18; stove plate, $13; malleable and steel, $6; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6/8 to 6¼c. per lb.

HIDES.

There has been no change in hides and the market is quiet owing to the comparatively small receipts for the season. We quote: No. 1 hides, 8c.; No. 2, 7c.; No. 3, 6c. Caliskins, 9 to 11c.; sheepskins, 75c.; lambskins, 15c.

ONTARIO MARKETS.

Toronto, May 15, 1903.

HARDWARE.

REPORTS from travellers in all sections of the country indicate that the demand has, generally speaking, been even better than was anticipated. Sales have been large and cover practically every seasonable line. The difficulty of the situation lies in filling orders. On the one hand makers of such lines as lawn mowers, spades, shovels and wire nails are still behind their orders from jobbers, while on the other hand, the latter are having much trouble in securing prompt freight service. At least one of the lines has been somewhat demoralized during the past few weeks and many goods have gone astray, while others have taken an unreasonable time to reach their destination in Ontario as well as in the West. Prices are steady throughout, there being no changes to record, except a reduction of 5 per cent. in the discount on soil pipe and fittings.

BARB WIRE.—The demand keeps up, but it has not been easy in some cases to get supplies promptly. The market is firm. The base price follows: $2.55 from Cleveland and 10c. less in carlots. From stock, Toronto, $2.80.

GALVANIZED WIRE. A fair trade is doing. Prices are firm. We quote as follows: Nos. 6, 7 and 8, $3.15 to $3.35 per 100 lb.; No. 9, $2.50; No. 10, $3.20 to $3.40; No. 11, $3.25 to $3.45; No. 12, $3.65; No. 13, $2.75; No. 14, $3.75 to $3.95; No. 15, $4.30; No. 16, $4.55. Nos. 6 to 9 base from Cleveland are quoted at $2.27½ in less than carlots.

SMOOTH STEEL WIRE. The demand keeps up fairly well. Prices are firm throughout. The base price is $2.50 per 100 lb. Oiling 60c., coppering 60c.; and tinning, $2 per 100 lb. extra. Shipping points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

COIL SPRING WIRE.—Sales of this line continue large. Prices are steady. We quote as follows: No. 9, $2.75; No. 11, $3.40; No. 12, $3.65. Freight up to 25c. per 100 lb. allowed on 500 lb. or over. Carlots of 15 tons, 5c. less, with freight up to 20c. allowed.

WIRE NAILS. An excellent demand continues, with makers still having difficulty in meeting all orders. Prices follow. Carlots, $2.40 and small lots, $2.15 per keg f.o.b. Gananoque, Montreal, London, Hamilton, Toronto, Brantford, Windsor, Ont., and St. John.

CUT NAILS. A fair trade continues. Prices are steady at $2.50 per keg.

HORSE NAILS.—A normal demand keeps up. Prices are unchanged. We quote as follows: "C" brand, oval head, 10 and 10 and 7½ per cent.; on "Monarch," 60 and 10 per cent. and "Countersunk" head," 60 per cent.; on "Peerless," 45 and 7½ per cent.

HORSESHOES.—Business keeps up fairly well; prices steady. We quote: Iron shoes, No. 2 and larger, light, medium and heavy, $3.45; snow shoes, $3.70; light steel shoes, $3.55; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.70; snow shoes, $4; light steel shoes, $3.80; featherweight (all sizes), $4.95.

SCREWS.—A good business continues. Our quotations are as follows: Flat head bright, 87½ per cent. discount; round head bright, 82½ per cent.; flat head brass, 80 per cent.; round head brass, 75 per cent.; round head bronze, 70 per cent.; flat head bronze, 75 per cent.

RIVETS AND BURRS.—An excellent trade is noted with prices steady. Quotations are now: Iron rivets, 60 and 10 per cent. discount; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.

BOLTS AND NUTS.—A good trade is doing in all lines, notably carriage bolts. We quote: Carriage bolts, common (S1 list), 50 and 10 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron, ($3 list), 55 and 10 per cent.; machine bolts, all sizes, 50, 5 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.

BINDER TWINE.—A brisk trade is now reported. There has been an advance in United States markets and there is some talk of a rise here. This is not likely to take place for some days, however. We quote: 650 ft., 13c.; 600 ft., 12c.; 550 ft., 11¼c.; 500 ft., 10½c.

CORDAGE.—Business firm. We quote: Pure manila, 14c.; British pure manila, 12c.; sisal, 11½c.; double lathyarn, 11c.; single lathyarn, 10½c.; double shingle yarn, 11c.; single shingle yarn, 10½c.

SPADES AND SHOVELS.—Deliveries are still short and retailers are pressing for the goods. Prices are firm. The discount is 45 per cent. and the list price has been reduced $3 per dozen for Old's goods, $2 for Gray's and $1 for Burns'.

LAWN MOWERS.—"Can't get 'em," is the way jobbers size up the situation. There is, however, a more liberal delivery than has been. Prices are steady. We quote: Woodyatt, 12-in., $7.50; 14-in., $8; 16-in., $8.50; 18-in., $9; 20-in., $10; Star, 12-in., $5.50; 14-in., $5.75; 16-in., $6; Daisy, 12-in., $4.90; 14-in., $5.10; 16-in., $5.30; Ontario, 12 in., $11.25; 14-in., $15.80; 16-in., $16.80; 18-in., $18.90; 20-in., $20.50; Philadelphia, 12-in., $6.50; 14 in., $7; 16 in., $7.50. Discount, 40 and 10 to 50 per cent.

SOIL PIPE AND FITTINGS.—There is an excellent demand. Discounts are 5 per cent. lower. Discounts now are: Light soil pipe, 45 and 5 per cent.; light soil pipe fittings, 50 and 5 per cent.; medium and extra heavy pipe and fittings, 55 and 5 per cent.; 7 and 8 in pipe, 40 and 5 per cent.

BRASS GOODS. There is an excellent, an unusual demand, so much so, that makers are working to the limit to keep up to orders, especially for steamfitters' and shipbuilders' brass goods. In fact, all users of valves for steam purposes are sending in specifications liberally. There is, too, an increasing demand for church altar rails, brass pulpits, etc. The activity seems to cover all districts from Winnipeg to the Atlantic. Prices and discounts are unchanged.

BUILDING PAPER.—An excellent trade is doing. Prices are steay. Quotations are as follows: Tarred felt, $1.75 per 100 lb.; 2-ply ready roofing, 90c. per roll; 3-ply, $1.15 per roll; carpet felt, $2.25 per 100-lb.; dry sheathing, 35c. per roll; tar sheathing, 15c. per roll; dry fibre 50c. per roll; tarred fibre, 60c. per roll, O K and I X L, 65c. per roll; heavy straw and sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN DOORS.—A fairly good trade is now doing. We quote: Screen doors, common, two or three panel, walnut stained, 4-in. style, $6.80; stained, yellow or green, $7; in natural colors, oil finish, $8.15; 3-inch style, 20c. per dozen less.

METALS

The feature of the market has been the reaction in iron prices. Prices of foundry iron have fallen 25 to 50c. in all United States markets and an easier feeling is manifest here. The market here, however, is principally supplied by domestic, with some English iron coming in for mixing. There is a general feeling that other metals, tin, copper, galvanized sheets, etc., are on an unnecessarily high level and are bound to come down sooner or later. At the moment, however, there is no indication of such a drop, as speculators are keeping the larger market stiff. The settlement of the longshoremen's strike has relieved the minds of importers, who now feel that a shortage will be averted. A good business is doing.

PIG IRON.—A decline of 25 to 50c. is noted in Pittsburg, Philadelphia and New York, but as these markets do not at the moment directly affect the local market there is no change here, though the feeling is easier. We quote: No. 2 at $22.50 to $22.75; No. 2 Summerlee, $25 on track, Toronto.

BAR IRON.—A good business is doing and prices are steady. Our quotations are as follows: Base price is $2.05. For extras, cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft., by special agreement, according to length and size.

STEEL BOILER PLATES.—A brisk market at firm figures is noted. We quote $1.96 f.o.b. Toronto.

TOOL STEEL.—The demand continues good. Prices are still firm. Quotations are as follows: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 10 to 20c.; ditto, "Air Hardening," 70c. per lb.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's "Special," 15 to 20c.

MACHINERY STEEL.—The activity continues, with prices firm at $2 to $2.05 f.o.b. Toronto.

STEEL BOILER PLATES.—There is still a good movement. Prices are steady at $1.96 f.o.b. Toronto.

BLACK SHEETS.—Prices show no change. A good business is doing. We quote: Common, $3.15 for 28 gauge and dead flat, $3.50 for 26 gauge.

CANADA PLATES.—A fair amount of business is being done. Prices are steady. We quote: All dull, $2.90 to $3; half polished, $2.85 to $3.10 and all-bright, $3.75 to $3.85.

GALVANIZED SHEETS.—An active demand is noted, without any change in quotations. We quote: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 24 gauge; Bell brand, $4.30 for 28 gauge; Gordon Crown, $4.50 for 28 gauge.

TIN.—A fair business is doing, with prices higher at the larger markets and locally steady at $33 to $33.25.

TINPLATES.—The demand from stock is fairly active. Prices are steady. We quote: Charcoals, $4.75 to $5 and cokes, $4.25 to $4.50 per box.

COPPER.—A good business is being done in both ingot and sheet. Prices are easier in England and New York, but no change is noted here. We quote: Ingot copper, $15 and sheet copper, $21 to $22 per lb.

BRASS.—Unchanged in price and in good demand. Discount, 10 per cent.

LEAD.—Prices are steady. A good trade is doing. We quote: $3.50 per 100 lb. for pig lead and $3.75 for bar lead.

IRON PIPE.—An excellent demand is reported. Prices are firm. We quote: Per 100 ft.: Black pipe, 1/8 in., $3.25; 1/4-in., $2.40; 3/8-in., $2.65; 1/2-in., $2.85; 3/4-in., $3.65; 1-in., $5.25; 1 1/4-in., $7.35; 1 1/2-in., $8.95; 2-in., $12.55; 2 1/2-in., $21; 3-in., $25; 3 1/2-in., $32; 4-in., $38.

ZINC SPELTER.—An active demand is reported with stocks still light. Prices are firm at 6 1/4 to 6 1/2c. per lb.

ZINC SHEETS.—The activity continues. We quote the base price as follows: Cask lots, $6.75 to $7 and part casks, $7 to $7.25.

SOLDER.—In good demand. Prices are unchanged. Guaranteed half-and-half is quoted at 18 to 19c., and wiping 17 to 18c.

OLD MATERIAL.

This week heavy copper is slightly weaker, having dropped 1/2c. per lb. Yellow brass is also somewhat easier, being quoted 1/2c. per lb. lower. Heavy lead has weakened 1/2c. per lb. Demand is fair. We quote: Heavy copper and wire, 11 1/2c. per lb., light copper, 10c. per lb., heavy red brass, 10 1/2c. per lb.; heavy yellow brass, 8 1/2c. per lb.; light brass, 6c.; lead, 2 1/2c.; scrap zinc, 3 1/2c.; iron No. 1 wrought, $14 per net ton; No. 2 wrought, $5; machinery cast scrap, $16; stove plate, $11; malleable and steel, $7; old rubbers, 6 1/2c. per lb. and country mixed rags, 50c. per 100 lb.

SEEDS.

There is still a little doing on the seed market. A few small orders are being filled by dealers. The season is, however, practically over. Prices remain firm at quotations of last issue. We quote as follows ex-warehouse here: Red Clover, per bushel, $6 to $7.80; alsike, per bushel, $4.80 to $8; timothy, per bushel, $2 to $2.75.

HIDES, SKINS AND WOOL.

There is not much change since last week. Although hides have a slightly firmer tendency, there is no quotable change in the price. Tallow is slightly weaker, the price having fallen 1/4c. per lb. We quote as follows:

HIDES.—No. 1 green, 7 1/2c.; No. 2 green, 6 1/2c. per lb.; No. 1 green, steers, 8c.; No. 2 green, steers, 7c. per lb.; cured, per lb., 7 3/4 to 8 1/4c.

CALF SKINS.—Veal skins, No. 1, 6 to 14 lb. inclusive, 10c.; No. 2, 8c.; No. 1, 15 to 20 lb. inclusive, 9c.; No. 2, 7c. Deacons (dairies), each, 60 to 70c.; sheepskins, 40c. to $1.10.

WOOL.—Unwashed wool, per lb., 8 to 9c.; fleece wool, 15 to 16c.; pulled wools, super., per lb., 15c.; extra, 18c.

TALLOW. We quote 5 1/2 to 5 3/4c. per lb

MANITOBA MARKETS.

WINNIPEG, MAY 11, 1903.

BUSINESS continues brisk with a steady trade in nearly all lines. There are several changes in prices to note this week. The drop in turpentine is the first and most important, the decline being from $1 to 82c. per gallon for barrel lots. Sisal rope shows a sharp advance, and all lines of binder twine are higher. There is not much doing in twine, as practically all stocks have been sold. The trade for the balance of the season will be confined to small lots. Attention is called to the quotations for tinned iron, 24 and 26 gauge, the prices for the first being $8 to $8.50 and for the latter $8.50 to $9.

The price list for the week is as follows:

Barbed wire, 100 lb.	$3 25

WILL IT PAY?

Every business transaction is weighed by one standard.

Will it Pay?

If you handle *oil of any kind* and are considering the purchase of a

BOWSER

Self-Measuring

OIL TANK

Let us ask you a few questions :

Is it worth 10 cents a Day to handle your oil without waste?

Is it worth 10 cents a Day to sell your oil without loss of time and labor?

Is it worth 10 cents a Day to have no leaky, dirty measures and funnels to handle?

Is it worth 10 cents a Day to keep your oil room neat and clean?

We might propound a hundred questions equally as pertinent. If any one of these is worth 10 cents a day, is not the combination of the many worth more than the cost of a **Bowser Self-Measuring Oil Tank**, which will give you all these advantages?

Let us give you full particulars. Ask for Catalogue "A."

Eastlake Steel Shingles

The popular choice.

Because they can be so quickly and easily laid —are lightning proof—prevent fire—and are the most economically durable shingles made.

Either Galvanized or Painted.

In demand in all parts of Canada.

The Metallic Roofing Co., Limited

TORONTO MONTREAL WINNIPEG

NOVA SCOTIA MARKETS.

Halifax, May 12, 1903.

THE general activity in the hardware trade, which has been so marked since the opening of the new year, still continues, and good orders are being sent in by the travellers and also by mail. Though some lines of goods are more in demand than others, the state of trade is considered very satisfactory. The prospect of business continuing good through the summer is excellent, and 1903 is expected to show a high record.

* * *

The retail trade of the city is especially good in all seasonable lines which are usually in demand in the spring. Paints, oils, brushes, putty, glass, wire netting and screens, as well as sporting goods are selling freely. Garden and field implements are also in good demand.

* * *

The wholesalers still experience some difficulty in procuring delivery of many lines of builders' materials owing to the oversold conditions of the factories. However, this is a state of things which has prevailed for the last few years, and this season the dealers were better prepared to meet it. Locks, knobs, screws, and some lines of tools are the stocks most difficult to procure promptly. Some lines of saws have to be ordered six months or more ahead. This naturally creates great firmness in these articles.

* * *

Collections are reported more backward than usual. In the mining towns money is plentiful and accounts come in promptly, but in many parts of the province the retailers have to ask for extensions. This condition is not expected to improve for some months. However, hardware trade bills are being paid more promptly than in some other lines of trade. It is intimated that this scarcity of money may be due largely to stock speculation, and the consequent loss when the slump came. Last year's product of the farm, the orchard, and the manufactory was abundant and prices were good, and until lately it was felt that the monetary condition of the province was excellent.

* * *

There has been a large demand this season for cordage, especially on account of the number of new vessels to fit out, both for the seal and the cod fisheries, and also among the lobster men. Sisal is firm and is now quoted at 11¼c. The majority of rope and cordage is now supplied by the Canadian factories, the competition of British roperies, referred to some weeks ago, having been successfully met, and their product is now almost out of the market. As the binder-twine market is now opening in the West, cordage prices are expected to remain firm for some time.

* * *

With reference to the German surtax, F. W. Cragg, of Cragg Bros., hardware dealers of this city, who has just returned from a three months' tour on the continent says: "It means that a portion of our trade will go to England and the United States, but there are certain lines of high-class hardware that we shall still be compelled to buy from Germany. The Kaiser's country is just as far ahead of England in the manufacture of certain goods as the United States is ahead of all other countries in special lines." Since the imposition of the surtax German goods have been marked up 8 to 10 per cent.

* * *

The market for linseed oil and turpentine remains unchanged. Lubricating oils are quoted higher. Lead and lead products are firm, as are also paints and varnishes. Glass and cement orders are being shipped, and there is an easier feeling in these articles. The full effect of the recent advance on screws has not yet been felt here as the wholesalers did not advance to the full extent of the manufacturers' rise. There is still a heavy demand for haying and farm tools, most of which lately advanced 10 per cent. There has been a sharp advance in both lead and zinc. There is a continued heavy demand for builders' materials and plumbers' supplies, and prices are very firm.

R. C. H.

FOREST CITY GOSSIP.

Office of HARDWARE AND METAL,
365 Richmond St.
LONDON, May 14, 1903.

THE wholesale hardwaremen of London are satisfied with all the conditions of business during last week, with only one exception, and that is now becoming an oft repeated story, viz., the non-receipt of needed goods. Non-delivery from the makers of many essential lines is hampering business in a great degree, and is causing considerable annoyance to retail men.

* * *

Retail men are having a splendid business season, there being a good demand for screen doors, window screens, wire cloth, watering cans, garden-rakes, hoes, spades, lawn mowers and other garden tools and requirements. There is some movement in galvanized iron, and iron and steel bars, the prices for these goods being very firm.

* * *

James Wright & Co., wholesale dealers in carriage hardware and trimmings, whose connections are largely amongst carriage builders and blacksmiths, report an increasing demand for their lines from interior places in Ontario, and letter orders from our Northwest Territories and British Columbia.

* * *

The Builders' Supply Co., will operate their new steam brick manufactory for the first time this week. The cost of the works is said to be $30,000. The capacity is 65,000 bricks daily, but only 30,000 will be made daily in the meantime. The works are a model of convenience and are managed by Charles Clexly, formerly of Detroit.

* * *

The Dennis Wire and Iron Co., who had some trouble amongst the blacksmith and machine hands in their employment, stated to your correspondent to-day that 16 in all of the above artisans were dissatisfied because of some changes in the management the firm found it necessary to make owing to the growth of the business; but there was no demand for higher wages, as this had been satisfactorily arranged with all the men two months ago. The wireworkers, platers and polishers did not go out on strike. Six of the strikers have been taken back but a few of the troublesome men will not be re-engaged. By the beginning of next week every vacancy will be filled, and the orders that were necessarily delayed will be rushed. The location for the new factory of this firm is on Dundas street, near the Electric Construction Co., opposite the court house, and the lot on which their premises will be erected is 90 feet front by 200 feet in depth.

* * *

The hardware travellers, jointly with other commercial men of the city, are taking their share in the arrangements for a successful annual picnic. This annual outing of the commercial travellers of London is always anticipated with pleasant thoughts. A great effort is being put forth this year to make it still more enjoyable and famous.

* * *

An extraordinary amount of interest is being taken in the approaching meeting of the London Old Boys. Chicago, Detroit, New York, Montreal, Toronto, Hamilton and nearly every city in Canada and the United States within 500 miles will send their quota. Single fares have been granted by the roads in Canada, and similar rates will very probably be granted on the American side for the double journey. An immense gathering of London's Old Boys is expected here in August.

* * *

Mr. Truman Vandelinder leaves this week on a six weeks' pleasure trip to the Coast. Mr. Vandelinder, who for four years has had the active management of the firm of Clark, Vandelinder & Co., has disposed of his interest to his partner, Mr. Charles Clark. He had become very popular with the trade, and did much toward making London a millinery centre for Western Ontario.

W. H. L.

PERSONAL MENTION.

Mr. Harry Roper, representing Alexander Gibb, Montreal, is now on his spring trip through the Martime Provinces.

Mr. E. Coleman Lewis, of The Niles-Bement-Pond Co., Philadelphia, has been on a business trip to Toronto for some days.

Mr. C. J. Brittain, representing The Fairbanks Co., Montreal, in Toronto and Eastern Ontario, has taken desk room with Baines & Peckover, 124 Bay street, Toronto, which will now be his business address.

Mr. P. D. McLaren, who has been with The James Morrison Brass Manufacturing Co., Toronto, for the past year or two, has severed his connection with that firm, and after June 1 will represent The Fairbanks Co., Montreal, in Winnipeg.

Mr. Edward P. Williams, vice-president of The Sherwin-Williams Co., Cleveland, Montreal, Toronto, etc., died at his home in Cleveland on Monday last week after an illness of some weeks.

TRADE IN COUNTRIES OTHER THAN OUR OWN.

PIG IRON TRADE IN GERMANY.

THE only cloud which hovers over the iron market in Westphalia, as in Upper Silesia, is the uncertainty respecting the American demand. If it continues all will be well, but if it declines Germany will feel the position very keenly indeed, because the inland consumption is out of all proportion to the large production, and it would be unable to counteract any diminution in the orders from the United States. Whether any such decline is possible in the near future remains to be seen, but it is impossible to ignore the rumors which have been in circulation on the German exchanges and which cannot be said to have been prompted by speculators, owing to the indefiniteness of the statements and the impossibility of financial gain. The rumors are to the effect that the Americans are endeavoring to secure the cancellation of the orders given for pig-iron, and that Luxemburg works in particular had been asked to state the conditions under which they would undertake to withdraw from agreements for the delivery of pig iron. An inquiry, addressed to the German Luxemburg Mining and Ironworks Company, of Bochum, resulted in the announcement that no such application has been made to the company, and that it was not aware of any overtures having been made to other works in Luxemburg. It is stated even now that inquiries for pig iron continue to be received from the United States. This is an apparent contradiction of the rumors, but if the latter could be traced to their source, iron producers would be both relieved and grateful.—Correspondence of Iron and Coal Trades Review.

GALVANIZED SHEETS.

It appears to be pretty generally agreed that the demand for galvanized sheets is not quite so good as it has been of late, and occasionally makers are disposed slightly to shade their prices, which, however, cannot be called quotably lower. 24 gauge corrugated sheets are quoted at from £11 10s. to £11 15s. f.o.b. Liverpool, but it is possible to buy at lower figures than these.—Ironmonger.

AN IMPORTANT BUSINESS CHANGE

The hardware firm of Lamplough & McNaughton, Montreal, has been dissolved by mutual consent, Mr. J. P. McNaughton retiring, and Mr. F. W. Lamplough continuing under the firm name of F. W. Lamplough & Co. The business will be carried on in the same premises at 9 De Bresoles street, and the agencies, which are as follows, will be retained :

Theile & Quack, Hamburg, Germany ; Wyersbery Bros., Solingen, Germany ; J. A. Henckels, Solingen, Germany ; Neumann Bros., Liege, Belgium ; Stacey Bros., Sheffield, England ; Columbian Hardware Co., Cleveland ; Kalamazoo Sled Co., Kalamazoo, Mich. ; Richardi & Bechtold, Bellaire, Mich.

Mr. Lamplough's long experience in the hardware business will insure the success of the new company, and the support that the trade has in the past extended to the old firm will no doubt be continued to the new. We join with a large number of the hardware trade in Canada when we wish Mr. Lamplough every success.

Mr. J. P. McNaughton intends to start in business himself, and in a short time he will announce to his friends in the trade the names of the firms which he will represent in Canada.

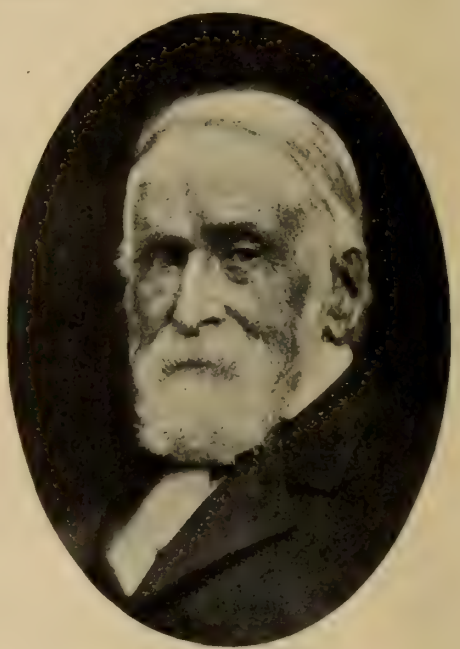
LORING COES.

HISTORY or biography never lacks in interest. The story of a successful career, of a critical business undertaking, of an important invention, never fails to win attention and to arouse interest. It is, therefore, safe to say that many people, especially those connected with the trade, will enjoy reading a booklet covering the history of Loring Coes and his connection with the screw wrench. Mr. Coes was the maker and patentee of the first screw wrench that could be adjusted with the hand that held it.

The invention of the present article was, it seems, the logical result of Mr. Coes' industry and energy. His biography is briefly given in the booklet, When 23 years of age he started in business with his brother, but four years later they were burned out and engaged as pattern makers in a Springfield, Mass., foundry.

At the time there were two styles of wrenches in use. The mechanism of both these wrenches was such that both hands were used to open or close them. This was often inconvenient, such as when it was necessary to adjust the wrench to different openings by the hand in which it was held, leaving the other hand free for other demands of the work.

It occurred to Loring Coes to dispense with the screw on the shaft, as in the Merrick wrench, and to affix by the side of the shaft a small bar in the form of a screw, which should enter another screw formed in the lower or movable jaw of the wrench ; and that the first screw should also have at its lower end, where it should enter the handle, a rosette always in reach of the thumb of the hand that held the wrench. This rosette, being pressed and turned by the thumb, would operate the screw, and the openings and closings of the wrench would be easily effected by one hand.



Mr. Loring Coes.

In November, 1840, the brothers returned to Worcester, Mass., and at once directed their efforts to securing a patent for their invention. When this was secured they started, practically without capital, manufacturing. They were successful from the start, and as they grew other products were manufactured and the plant kept modern by continual improvement.

Mr. Coes' maxim is, "Make the best only—quality first, price afterwards."

MAKING PROMPT SHIPMENTS.

The Canada Hardware Co., Montreal, are making deliveries of their goods to the railway stations and steamers by means of their own teams, and are thus making prompt shipments in spite of the teamsters' strike. It is difficult, however, to get the goods accepted promptly at the railway stations, and for this reason the indulgence of customers is asked.

PAINT, OIL AND BRUSH TRADES

LOWER PRICES FOR TURPENTINE

THE prophecy made in these columns that a further reduction in the price of turpentine would follow the decline of 1c. made three weeks ago, has proven correct. The majority of the houses handling the liquid are now quoting it at 74c. for single barrels, Montreal, Toronto, Ottawa, Hamilton, London and Guelph, and 75c. delivered to outside points. But even more significant is the fact that a quotation at 72c. is freely made in Montreal, Toronto and Hamilton by at least two of the largest dealers.

This low figure is an aggregate decline of 16c. from the highest figures noted during the winter, which is not quite as great as the reduction made at primary point.

It should be pointed out, however, that at the moment there is a distinct stiffening of values at Savannah. Since our last report the market there has advanced 1 to 1½c., and is reported firm at the new figures. It seems that the crop is not proving as prolific as was anticipated, while the demand has been well sustained.

However, stocks are now reported to be fairly heavy in Canada, and the probability is that the low figures noted will prevail for some time to come at least.

LINSEED OIL TO ARRIVE.

The linseed oil market in both Canada and the United States has accumulated much strength during the past few weeks. The price of seeds has been slowly but consistently rising, and it is now claimed that an advance on this market is inevitable.

There is enough strength in the arguments of those predicting an advance to make the purchase of linseed oil at present prices a safe investment. Unless some unlooked-for condition at present entirely unforeseen arises there will be no decline, while it is important in circles generally well posted that an advance will come.

PUSHING PAINT TRADE

A good deal has been said on the above subject by "Hardware and Metal" but not too much. It is a matter of general knowledge that much building which was contemplated early this year will not be done because of the high price of materials and of labor. So it should be the aim of every paint dealer to encourage repainting and redecorating as much as possible.

There is no reason why householders should not, in order to save themselves from the heavy charges of the professional painter, do considerable painting themselves. Many of these have not yet learned how easy, how simple the matter is, so it would surely be a good move to start in to educate the public on this matter.

THE ZANZIBAR PAINT CO.

A final settlement of the affairs of The late Zanzibar Paint Co., Limited, of Toronto, the company which had ample stock subscribed, but which failed after but a short business career, has been reached. The company's liabilities reached $8,000. The shareholders of the company have agreed to pay up $4,000, or enough to pay the creditors 50c. on the dollar.

PAINT AND OIL NOTES.

Development work in the Bothwell, Ont., oil fields is still active.

The painters' strike at Winnipeg has been settled. Now the builders' laborers in that city threaten to strike.

New trouble is expected in Toronto painting circles. Some of the master painters declare that since the wages of the men were advanced from 30 to 35c. per hour they have been unable to get contracts at a profit, and they now talk of reducing all wages at the end of the month.

WINDOW GLASS SITUATION IN THE STATES.

While the window glass market is still in a very unsettled condition, owing to the refusal of 36 factories to heed the order for an early close, still prices are held fairly firm, and remarkably so considering the dulness of trade. For some reason there has been thus far this season but small demand for glass. The promised large building activity has not yet materialized and glass has not moved at all freely. This dulness is more perplexing and annoying to manufacturers and jobbers than the failure to agree on an early stop, for it affects the immediate trade, while the continued operation of the factories affects the future. During the past fortnight it has become more and more evident that something must be done to bring about a more thorough organization of the selling interests of the window glass business, and it is now hoped that this will be accomplished at the Atlantic City meeting, which is to be held in the present month. President Chambers was expected home yesterday and the meeting will probably be called soon after his return from Europe.—Paint, Oil and Drug Review.

PAINT AND OIL MARKETS.

TORONTO.

THE market is in a decidedly unsettled condition, despite the fact that the volume of business being done seems to be almost unprecedented. White lead quotations are admittedly lower than the price of raw material or the condition of the British or United States markets would justify. Yet, it is a fact that competition is so keen that there is almost as much cutting reported as was the case a few months ago. The quotations on paris green range fully 2c. The makers are still holding to their recent advance of 3c., and, it is said, are doing business at that figure. Yet jobbers are still selling from 2 to 2½c. below these quotations. Turpentine, as is pointed out elsewhere, is quoted all the way from 72 to 74c. in the large cities. The crux of the whole situation is that there is "war in the camp," and some lines are bearing the brunt of the battle. The only change to note this week is a reduction of 3 to 5c. in turpentine. Such a range as is quoted does not seem feasible, but such are the quotations reported. The price of sundries is well maintained and an excellent business is being done. We quote:

WHITE LEAD.—Ex-Toronto, pure white lead, $5.10 to $5.25. No. 1, $4.62½ to $4.87½; No. 2, $4.25 to $4.50; No. 3, $3.87½ to $4.12½; No. 4, $3.50 to $3.75 in packages of 25-lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. packages; genuine dry white lead, in casks, $5.02½.

RED LEAD.—Genuine, in casks of 560 lb., $4.75 to $5; ditto, in kegs of 100 lb., $5.25 to $5.50; No. 1, in casks of 560 lb., $4 to $4.25; ditto, in kegs of 100 lb., $4.25 to $4.50.

LITHARGE.—Genuine, 6 to 6½c.

WHITE ZINC.—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6 to $6.25.

SHINGLE STAIN.—In five-gallon lots, 60 to 85c. per gallon.

PLASTER PARIS.—New Brunswick, $2 per barrel.

PUMICE STONE.—Powdered, $2.50 per cwt. in bbls. and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots and 8c. in bbls.

LIQUID PAINTS.—Pure, $1.20 to $1.40 per gallon; No. 1, $1.10 per gallon.

BARN PAINTS.—65 to 70c. per gallon.

CASTOR OIL.—English, in cases, 8 to 9c. per lb.; and 9 to 10c. for single tins.

LINSEED OIL.—Raw, 1 to 2 bbls., 61c.; boiled, 64c.; 3 to 5 barrels, raw, 60c.; boiled, 63c.; 6 to 9 barrels, raw, 58c.; boiled, 61c. delivered. To Toronto, Hamilton and London, 2c. less. All quantities of 10 barrels and over of linseed oil sold only f.o.b., Toronto, Hamilton, London and Guelph.

TURPENTINE.—Single bbls., 72 to 74c.; 2 to 3 bbls., 75c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

MONTREAL.

In this branch of the trade there have been several features this week of importance of which the most striking one is the sharp decline in the price of turpentine of 10c per gallon on account of increased supplies. Ground white lead has also been weak and prices have been reduced 25c. all round. Dry white lead is 25c. lower and shellac varnishes, 10c. Other lines are steady and the volume of business is fully up to the average for the season. We quote:

GROUND WHITE LEAD. Best brands, Government standard, 85 to $5.25; No. 1, $4.27½ to $4.87½; No. 2, $4.10 to $4.50; No. 3, $4.02½ to $4.12½; No. 4, $3.65 to $3.75, all f.o.b. Montreal. Terms, four months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$4.75 in casks and in kegs, $5.

DRY WHITE ZINC. Pure dry, in casks, 6½c.; in 100 lb. kegs, 6¾c.; No. 1, zinc, in casks, 5½c.; in 100 lb. kegs, 5¾c.

WHITE ZINC (ground in oil). Pure, 25 lb. irons, 8c.; No. 1, 7c.; No. 2, 6c.

PUTTY.—We quote: Bulk, in barrels, $1.60; bulk, in 100-lb. packages, $1.85; bladders, in barrels, $1.90.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7½c.; smaller quantities, 8½c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50 and smaller quantities, $5.50.

LITHARGE.—Ground casks, 5c.; in less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

PURE ENGLISH PARIS GREEN. Petroleum barrels, 14½c.; arsenic kegs, 14½c.; 50 and 100-lb. drums, 15c.; 25-lb. drums, 15½c.; 1-lb. paper boxes, 16c.; 1 lb. tins, 17c.

WINDOW GLASS.

TORONTO.

An excellent business is reported, all sizes being in good demand. Import orders are starting to arrive, but it is not likely that all shipments will be in within four or six weeks. Prices are firm, as the Belgium glass market is stiff. Our quotations are as follows: Star, under 26 in., $3.80; 26 to 40 in., $4; 41 to 50 in., $4.50; 51 to 60 in., $4.75; 61 to 70 in., $5; 71 to 80 in., $5.50. Toronto, Hamilton and London. Terms, four months, or 3 per cent., 30 days.

MONTREAL.

Window glass is coming in now and all import orders will be delivered promptly providing the teamsters' strike is settled soon. Quotations are as follows: First break, 50 ft., $2; second, $2.10 for 50 ft.; first break, 100 ft., $3.80; second break, $4; third break, $4.50; fourth break, $4.75.

A TRIAL will convince you that in offering a customer **"ANCHOR" LIQUID PAINT** you are putting before him the best liquid paint on the market. It will back up every statement you make for it.

It is made from the best materials, the best white lead in the world, in modern factories, by skilled workmen.

A NEW POWER FREEZER.

THE North Bros. Mfg. Co., of Philadelphia, are putting on the market this year a new power freezer, designed to meet requirements of manufacturers of ice cream who desire to make up different quantities of cream or ices in one machine by use of different sizes of cans and tubs.

The illustration shows machine with 40 qt. can and tub. Smaller sizes are used by having extension pieces or couplings to reach from gearing to dasher and can of each 18, 24 and 32-qt. sizes. In order to avoid trouble or delay in adjustment for different sizes of tubs, each of the smaller tubs is made with an iron band at bottom, the outside diameter of which is the same as that of the largest tub, so that any of these tubs can be put in machine, pushed up against stops on baseplate and thus in line with gearing of frame. The coupling to connect gearing to can has clutch at each end, one of which engages with clutch on lid of can and the other with clutch on lower bevel gear. The shaft of dasher passes through coupling and engages with upper gear.

As the upper and lower bevel gears turn in opposite directions the can and dasher will do likewise. The clutches in gearing are operated by one small lever at top of machine. In position shown the gearing is engaged with can and dasher to operate freezer. When lever is thrown in opposite position the clutches are separated so that tub with can and dasher may be readily removed. The lever locks the clutch in either position. The arrangement of parts is such that the gearing is never exposed at any time, even during the change of tubs and cans. The cover prevents any possible injury to operator, or the gearing becoming clogged with dirt or ice and salt. There are no loose pieces to be lost or mislaid. The machine is very compact and of great strength. The frame is in one piece and all bearings are accurately bored. The tight and loose pulleys are 18 in. diameter, 4 in. face, and have belt shifter on far side of machine, not shown in illustration. The fly wheel is 30 in. in diameter. The cans and tubs are same as used in the 40 qt. machine freezer. The dasher is of the well known Seaman style, with horizontal beaters, and has metal scrapers on each side and at bottom. The material and workmanship are of the best and most substantial character, so that the machine can be run continuously by taking out one set of tubs and cans and putting in another, transferring the frozen cream to packing cans and putting a new batch in machine can ready for freezing, while one batch is being frozen. All parts are made of standard sizes, and additional apparatus can always be had to fit this freezer.

STEEL WORKS FOR WELLAND, ONT.

The Welland, Ont., Telegraph says: "The air has been full of steel works rumors this week, but so much has been said heretofore that failed of realization that the public are chary of giving credence to all they hear. Mr. Pew says all the preliminary difficulties of organization have now been settled and location of the works here is positive.

There is also information otherwise to the effect that The United States Trust Steel Works being promoted by Mr. Heyd, have selected Welland for a location. The supposition is that Mr. Pew's and Mr. Heyd's enterprises are connected.

"Mr. Pew stated before the council Monday evening that the principal objection to Welland was the lack of accommodation for workmen, but that he had overcome this by guaranteeing that capitalists were ready to come here and put up 500 houses on short notice."

BRITISH TINPLATE MARKET.

The demand from all quarters has been very good during the past week. There is more inclination on the part of both buyers and sellers alike to do business for forward deliveries, and transactions are reported for delivery right up to September and October. Prices, on the whole, are well maintained. The standard size realized 12s., 12s. 1½d., and 12s. 3d. per box, f.o.b. Wales, according to brand and delivery required, prompt plates commanding the higher figures. Makers' quotations run: Bessemer cokes, I C 11 by 20, 112 sheets, 108 lb., 12s. 3d. and 12s. 1½d. per box; Siemens Martin steel, 12s. 3d. to 12s. 6d. per box, f.o.b. South Wales. Some brands are offering at a shade less money, however.—Iron and Coal Trades Review, May 1.

RAIL MILL TO START IT JUNE.

E. H. Clergue, of the Lake Superior Corporation Co., Sault Ste. Marie, while in Toronto on Saturday last, stated that it was the intention of the companies to have the steel rail mills in operation by the middle of June. In reply to recent assertions that steel rails could not be made from the product of the iron mines owned by the company, he said they were untrue. The ore of the Helen mine, at Michipicoten, was a non bessemer ore, but it could be used in the manufacture of steel rails when mixed with bessemer ore. The Josephine mine, in the same locality as the Helen, and owned by the companies, contained bessemer, so that steel rails could be made from the Ontario, Lake Superior, iron ore mines, owned by the companies. It was not, however, necessary that the companies should use only Canadian iron ores in the manufacture of steel rails, as a steel enterprise always bought ore, provided it was the best, at the lowest possible price, and to-day the companies could buy bessemer ore from the Mesaba iron range in Minnesota, near Duluth, at $2.75 a ton, while their own Josephine bessemer ore was worth $5 a ton. Helen ore was rated at $2.75 a ton, so that steel rails made from Helen and Mesaba ore were the cheapest at the present time. The companies had recently acquired some properties on the Mesaba range for their own use.

WESTINGHOUSE BRANCH IN CANADA.

A despatch from Pittsburg says that the Westinghouse officials have taken steps to form a Canadian Westinghouse Company for the purpose of manufacturing in Canada the apparatus needed to supply that market. In order that its plant at Hamilton and its real estate there may be utilized, The Westinghouse Air Brake Company will be included. The capital of the company will be $2,500,000, of which The Air Brake Company will give $550,000 and The Electric Company $950,000, the remainder of the capital stock being taken at par by the Canadians. The arrangement provides for a cash working fund of $1,250,000, not including the money already invested in works and real estate. Ahearn & Soper, Ottawa, are interested in the proposal.

The Eager and Sanderson Co., Limited, Winchester, Ont.; capital, $40,000; directors, Daniel Eager, Thos. Sanderson and S. S. Reveler, of Winchester, and John A. Farlinger, of Montreal, to manufacture cheese boxes, to do a general milling business and to generate power and dispose of surplus of same.

HEATING AND PLUMBING

ONTARIO EXECUTIVE HOLDS IMPORTANT SESSION.

THERE can be no question that the Ontario Provincial Association is in a condition of thorough organization and that everyone is fully alive to the importance of complete unity. In response to notices sent out by the secretary, calling a meeting of the Executive Committee, the full committee, with one exception, responded to their names.

The following were present: W. Mansell, president, Toronto; W. J. Walsh, vice-president, Hamilton; S. P. Gourlay, past-president, St. Catharines; H. Mahoney, Guelph; J. H. Wilson, treasurer, Toronto; E. Lewis LeGrow, secretary, Toronto; E. H. Russell, London. M. A. Brian, of Windsor, was the only absentee.

The meeting took place in the rooms of the Toronto Master Plumbers' Association, and was called to order by President Mansell at 9.45 a.m.

The main purpose of convening the committee was to discuss with the manufacturers of heating goods, trade questions. There has, for some time, been a difference of opinion between the manufacturers and the master heaters, on the question of selling goods.

The following gentlemen were present representing the manufacturers. W. C. Gurney, of The Gurney Foundry Co.; F. J. Travers and M. P. Hulfman, of The Canada Radiator Co.; R. Cluff, of The Dominion Radiator Co., and A. D. McArthur, of The Star Boiler Co.

Gurney, Tilden & Co., of Hamilton, explained that it was impossible for their representative to reach the meeting.

The meeting was of a very harmonious nature and after a very lengthy discussion, the different gentlemen interested reached a favorable agreement suitable to all parties, the manufacturers recognizing the fact that their interest and that of the master heaters were one and the same.

While there is no affiliation between the Ontario Association and the National Association of the United States, it was felt that their interest and the interest of the Canadian Association were the same, and the secretary was instructed to telegraph greetings to the United States organization, which will be in session this week.

It has been felt for a long time that a great need of the Ontario Association was someone to interest themselves in organization work and at the last convention, the executive were instructed to make the best possible arrangements they could to secure an organizer, and expressed the hope that W. H. Meredith, who had been for a considerable time connected with the National and Ontario Associations, could be induced to take charge of the work. After consultation with Mr. Meredith, the committee appointed him corresponding organizer, and it will be his duty to place himself in correspondence with all master plumbers throughout the province who are not connected with the Provincial Association.

The constitution of the association is so framed that there is no master plumber so isolated that he cannot become a member of the association and derive the benefits that may accrue to any of the members. The organizer was instructed to place himself at once in communication with the plumbers of Barrie, and get them thoroughly organized. When these gentlemen consider the advantage of membership, they should at once place themselves in touch with the Provincial Association.

The matter of dealing with the London resolutions came up for discussion, and after considerable attention, it was unanimously decided that action should be deferred for the present and that every effort should be put forth along the lines of organization, it being felt that the putting in force of these resolutions could not be done so effectively as they could be after all master plumbers had become interested in the work of the association, but it is hoped that at the meeting in Toronto, which will take place on Thanksgiving Day next, that everything will be in good shape to go right ahead.

It was decided that the minutes of the Executive Committee should be posted to every member in Ontario as quickly as possible.

The committee discussed the appointment of delegates to the National Association convention to be held in Montreal, and the following gentlemen were appointed as delegates: Wm. Manseli, president, Toronto; W. J. Walsh, vice-president, Hamilton. These gentlemen, with the following, who will be in attendance at the convention in virtue of their connection with the National Association, will represent Ontario at the convention: John McKinlay, past-president of the National, Ottawa; H. Mahoney, Guelph, National vice-president for British Columbia; W. H. Meredith, Toronto, National vice-president for Ontario.

E. Lewis LeGrow and J. H. Wilson were appointed as alternates. For fear that any of these gentlemen could not attend, the executive also named the following as representatives, in the order named: E. Russell, London; M. A. Brian, Windsor; J. H. Neelands, Barrie; R. Ross, Sarnia; Chas. Taylor, Brantford; R. Watt, Chatham; James Scott, Galt.

A resolution was passed, thanking the Toronto Master Plumbers' Association for their courtesy in placing their rooms at the disposal of the committee.

The meeting adjourned to meet again at the call of the president, some time in July. In the meantime the secretary was instructed to arrange with the manufacturers and supply men in plumbing goods to meet the committee at its next session, when matters affecting that branch of the business will be discussed.

APPRENTICESHIP QUESTION.

ONE of the questions which is of vital importance and that commands the attention of master plumbers from time to time, is the best manner in which to deal with the apprentices so that all who will attempt to do the plumbing work in the future will have a thorough knowledge of the profession.

This question becomes somewhat serious in the fact that the journeymen do not take any too kindly to the apprentice and do not impart any too much knowledge to them.

The question is not of a local nature, but is almost universal. We note, from an Australian exchange, The Hardware and Machinery, that the question was discussed at a joint meeting of the masters and journeymen in Wellington, N.Z. Mr. Rounthwaite, the chairman, in explaining the objects of the meeting, said that the trade wished to consider the advisability of establishing a complete system of instruction for apprentices. He believed it was in the interest of the trade and the public generally that the resolution about to be submitted should be carried, which was: "That all apprentices be required to attend the technical school for a full course of instruction."

The school, it was claimed, had already done a good work in giving apprentices

IT'S RAMSAYS

and when you handle it you know you have money pullers—business makers—a paint that sells, and your competitor knows it too.

We assist you in the sale and, better still, we assist you with a pure paint at a pure paint price.

AUER LIGHT CO., 1682 NOTRE DAME ST., MONTREAL.

an insight into the trade, but it might do better. This new departure was not a money making venture, but a matter of the highest importance to the trade if instruction was to be thorough. The motion was adopted, and it was further moved: That an apprentice shall not be entitled to consideration unless he can show a satisfactory report on his year's work from the technical school and his employer."

The course should be for four years and should be as follows: First year Arithmetic, geometrical and model drawing, with elementary practice in setting out sheet lead; second year theory and practice of plumbing, elementary; third year theory and practice of plumbing, advanced; fourth year the same as the third, with the addition of an examination for certificate, the certificate to be issued upon the apprentice reaching the age of 21, providing he had served five years at the trade in accordance with new arrangements being adopted.

This very subject and along lines somewhat similar was discussed at the last meeting of the National Association of Canada, and the apprenticeship committee was instructed to bring in a report at the next meeting dealing with the question. It is a very important subject and one that requires deep thought and careful consideration.

M.

A JOINT PICNIC! WHY NOT?

Some years ago when the National Master Plumbers' Association was in its infancy and efforts were being put forth to create an interest in the venture, a union picnic was gotten up between the cities of Hamilton and Toronto, and it was a very pleasant and successful affair.

For some time the idea has been suggested that now the association has attained such a success it would be a good thing to arrange a jubilee or rejoicing picnic on neutral ground, say, meet each other half way at Oakville.

Since the former picnic the craftsmen from these and other towns have come together in social evenings which have been of great value, but at no time since then have the ladies, wives, daughters and sweethearts of the craft been brought together. This is not right. Surely, with the prosperity that prevails, the ladies can be given this treat. Who will take the lead? Men of the Mountain, lead on!

PLUMBERS MAKE AGREEMENT.

The master and journeymen plumbers of Montreal have signed a contract for a year, ending May 1, 1904. The signatures were those of T. O'Connell and J. A. Gordon, respectively the president and secretary of the Master Plumbers' Association, and J. P. Hammond and J. B. Staton, president and secretary of the Journeymen Plumbers' Union.

By the terms of this contract the minimum wage shall be 25c. per hour, nine hours constituting a day's work. All overtime is to be paid at the rate of time and a half; and for Sundays, Christmas Day, New Year's Day, Labor Day and Thanksgiving Day, double time will be paid. The master plumbers are to employ no one outside of the local union. Five years will be recognized as the term of apprenticeship, until the expiration of which no employe shall be considered a journeyman plumber or be entitled to the protection of the union.

NATURAL GAS WELL NEAR DUNNVILLE.

In the old days Canada was looked upon as a first class agricultural country; a land where the best of grains could be produced. It is true still. Canada is to the fore with her grain, her dairy and her cattle industries. She is, none the less, making strides along the line of manufacturing, and the products of her artisans are rapidly taking front rank. Anything that can assist in cheapening the production of manufactured goods should be hailed with satisfaction.

What appears to be a happy find took place recently near Dunnville, Ont., when a well was sunk and natural gas was struck, which is claimed to be "a veritable gusher, and good for 1,000,000 ft. a day."

If this well turns out to be as valuable as it now appears, with judicious use and care it should be of very great value to manufacturers that can be reached. While it would be unwise to supply the gas at too low a price, the users should be able to get it at a fair price.

It is understood that the company controlling the well have secured a franchise from the City of Brantford extending over a period of 25 years at a maximum cost for manufacturing purposes of 50c., and for domestic purposes, heating and lighting, 90c. per 1,000 ft. The large use of this gas will be a great boon to the plumbers and gasfitters in the towns where it will be used. No doubt the company will use the motto: "Found in Canada; Used in Canada."

BRITISH COLUMBIA IN LINE.

Through the national vice-president for British Columbia, H. Mahoney, Guelph, Ont., comes the statement that Vancouver and Victoria have already organized local associations, and that Nelson is coming into line. Mr. Mahoney is hopeful in having the province he represents to be the next one to organize a provincial association. The convention last year made no mistake in placing Mr. Mahoney as their representative for that province. It is said that his correspondence is of very considerable dimensions and that his report at the forthcoming convention will be of interest.

IT HAS NO WICK and is easily kept clean.

IT HAS NO JOINTS TO LEAK or packing nuts; no pressure of oil below the tank; it cannot leak.

IT DOES NOT GENERATE OR EVAPORATE, the oil simply drops into an open brass pipe through which it is conducted to an open burner ring where it burns, producing a powerful blue flame. Could anything be simpler?

IT HAS A REMOVABLE TANK which can be carried to an outer room for filling.

IT IS ABSOLUTELY SAFE.

IT LIGHTS QUICKLY, simply turn on the oil and apply the match.

IT COOKS INSTANTLY. There is no smoke—no delay. As soon as lighted a cooking vessel can be placed over the burner.

IT HAS NO STOPS or automatic regulators to govern the flow of oil. The flame is entirely under the control of the user.

IT MAKES NO DIFFERENCE what quality of oil is used, whether coal oil or gasoline, whether it is good or bad, heavy or light, thick or thin, hot or cold, the stove operates equally well, producing an intensely hot smokeless blue flame. Can as much be said TRUTHFULLY of any other stove?

IT HAS A GLASS SIGHT FEED which shows at a glance the flow of oil, and enables the user to regulate the valve quickly and accurately.

FOR ECONOMY OF FUEL as compared with the coal and wood stove it is beyond comparison. Will save what it cost in one season over coal or wood at the average price. It is a friend and helper to the thrifty housekeeper who tries to save what others waste.

ESPECIALLY is it a boon to the country home and suburban residence where fuel gas cannot be obtained.

LASTLY—It is safe, clean, quick, reliable and convenient, and no home can afford to forego the comfort that this wonderful stove brings.

The dealer who recognizes the merits of the "Standard" Wickless and places it on his sales floor will find it a ready and popular seller.

The THOS. DAVIDSON MFG. CO., Limited, MONTREAL, P. Q.

Toronto this week on business for his firm.

Messrs. Bros., Guelph, Ont., report trade very brisk and that they are sharing in the good times. They have just secured the contract for plumbing in two houses for A. E. Burgess, Guelph.

What might have been a serious fire started in the workshops of Keith & Fitzsimons, King street, Toronto, one day this week. Fortunately the fire was soon under control, after doing about $600 damage. The firm have made arrangements whereby business is not interfered with.

The Canadian Electrical Association will hold their convention in Toronto, June 10, 11 and 12. The conventions of this association are always large and of an interesting nature. Through their secretary, C. H. Mortimer, the mayor has been asked to welcome the association to the city.

F. Armstrong, 277 Queen street west, has just closed several contracts, amongst others one of considerable size for the Grand Union Hotel, which will be some time under operation. Mr. Armstrong reports trade in good condition.

Tenders for construction of the different works on the Carnegie Public Library, Ottawa, were awarded on Tuesday. The total cost is to be $78,593.30, which is within $1,000 of the architect's estimate. Knox Bros. were awarded the contract for heating and plumbing at $5,647; McFarlane & Douglas the metal work and roofing at $2,257; Ahearn & Soper the electric work at $1,901.30; The Dominion Supply Co. the steel structural work at $4,576; W. J. Carson the painting and glazing at $2,260; T. Lawson the iron staircases at $2,850, and A. K. Mills & Son the marble and mosaic work at $6,600.

It is reported from a reliable source that there is a very keen competition on amongst the master plumbers of Ottawa. This would seem to be an unwise policy to pursue. While honest rivalry is healthy, over-keen competition is injudicious. Ottawa craftsmen can benefit by following other cities that have adopted more businesslike measures.

Joseph Wright, of The Bennett & Wright Co., Toronto, who has been on a business trip through Germany, France and England, sailed for home on the "Cedric," and will reach New York on Sunday. He is expected home on Thursday of next week. Peter P. McMichael, of The Dominion Radiator Co., Limited, accompanied Mr. Wright on the trip. Mr. Wright, Jr., leaves for New York on Friday to meet his father there.

BUILDING NOTES.

GREAT activity is being experienced in Winnipeg building circles. They claim to have 431 structures under course of construction, at a cost of $1,500,000, as against 269 permits, representing $350,000, at the same time last year. This activity seems to be spread over the whole city, while the wholesale district is especially active. Stores and business houses are the chief buildings being erected. New residences are in great demand.

The plans for Mr. Small's new theatre, to replace the Toronto Opera House, are being examined by Inspector Copping, Toronto.

The strikes in Toronto are still unsettling building operations. The carpenters and the structural steel workers are still "out."

A new warehouse is being contemplated for the steamer "Queen," in St. John, N.B. This is to give accommodation for the new boat, and will be about 60 x 30 feet.

The medical profession of Ontario are contemplating the erection of a club house in Toronto for the use of the membership. It will contain the library of the Ontario Medical Association. A Trust Board has been formed to finance the scheme and report at the annual meeting in June.

Vancouver, B. C., is keeping up to the times. About $30,000 is being spent on new buildings, including a $6,000 building on Hastings street; a $4,000 property on Georgia street, and an addition to a warehouse for Wood, Valance & Leggate, to cost $3,000. It is expected that a permit will be issued for a $15,000 building.

Building operations are not confined to any one place but from all over comes word of lively operations in building. Roland, Man., is having quite a few new residences erected. Messrs. Geo. Ross, Jas. Sayers and Jas. Cameron are building new residences, while Jas. Parkinson and Jas. Torce are making large additions to their residences.

Sutherland & Campbell, of Winnipeg, are having a large wholesale block built. Additions are being made to the Gault warehouse. The Union Bank of Canada are pulling down old buildings to make room for their new eight-storey building, and the Land Titles office are erecting a very attractive building, which will be fully fireproof, to cost over $85,000.

A movement is on foot to organize an important new power, lighting and heating company in London, Ont. The promoters have been at work on the proposal for some little time, and hope to be able to make their plans definitely known before long. It is said that the undertaking will be strongly financed.

H. W. Denyes, Marmora, Ont., has purchased the hardware stock of W. R. Singleton & Son, Carleton Place, Ont.

Joseph Cornwath, proprietor of the tinshop at Albert, N.B., will shortly close up his business and engage with his brother, W. J. Cornwath, Riverside, N.B.

THE NO MATTER HOW FAR YOU REACH GET MORRISON GAUGE

If you do this you are sure of getting a perfect gauge. We sell no poor gauges because we warrant every gauge that goes from our shops for a period of two years. THE OFFICE

DEVOTED TO THE OFFICE STAFF OF BUSINESS ESTABLISHMENTS.

THE QUESTION OF CREDITS.

By H. A. Isaac

THERE are three classes of manufacturers: one that sells direct to the retail trade; one that gives the retailer the option of buying direct or through the jobber, and those that do their business through the jobber exclusively. The last named class, no doubt, ship to the retailer when the jobber has refused the business, if they consider that the account is fairly good.

To what extent the manufacturer can sell to the small store with a poor rating on a profitable basis is worthy of some consideration. Presuming the average order that the manufacturer delivers to the retailer, either direct or for the account of the jobber, amounts to the sum of $30, there would be a margin perhaps of

8 per cent. to the jobbers	$2 40
20 per cent. manufacturer's profit ..	5 52
	$7 92

These estimates do not allow for selling expense, which should be permissible in these figures inasmuch as it might be considered additional business and not regular, that should bear its proportion of travellers' salaries and expense. On this basis of figuring five orders would show a profit of $39.60, or the manufacturer could afford to lose in full one account in five and yet have a profit of $31.68. My experience has taught me, however, that of these losses, we collect on an average about 15 per cent., which would leave the manufacturer a profit of $35.25, or over 89 per cent. I have kept a record for some time past of business of this character, and I have found that we lose only part of one account in twelve, although in addition to the orders that are turned down I include any business we accept, whether the merchant has no rating, or $500 and less.

The value of the introduction of the goods should be considered in the proper extension of credit. When merchants without good ratings buy a small assortment, they are forced to take an interest in the goods because they cannot buy competitors' products which results in them establishing a trade in their community, and in the event of their prospering and becoming more successful, it would often be difficult for similar products to displace the ones that they originally introduced with their trade. Furthermore, a great many merchants who are without capital, highly appreciate an opportunity to get goods. They are men that are honorable in their intentions, and would be appreciative of any kindnesses shown them when they became more successful.

A STARTLING FACT.

A STATEMENT made by the Canadian Correspondence College of Toronto in their advertisement in this issue regarding the percentage of business failures has been repeatedly corroborated by the commercial agencies. Thoroughness of preparation is nowadays the chief essential in any business undertaking or career. Some of the foremost insurance companies in Canada have offered great inducements to such of their clerks as will take the insurance course given by the above college. As "The Canadian Grocer" sees it, many of the large manufacturers and merchants throughout the country would make a most profitable investment if they would encourage their clerks to equip themselves more thoroughly by completing some one or the other of the practical courses offered by the Canadian Correspondence College.

BUSINESS CORRESPONDENCE.

THE model business letter—how shall it be described? As it must vary according to the purpose for which it is intended, shall we not define it as that which best accomplishes its purpose, with the least loss of time to writer and reader? asks an exchange.

This definition would at once bar out the theory that the model business letter is as brief as possible; because there are conditions under which a letter may be too short to be entirely clear. It must be long enough to be perfectly intelligible to the recipient; it is only in telegrams that each word becomes an additional expense; and time is frequently saved by writing a somewhat longer letter than the writer at first intended to send out.

Of course, if the purpose of the letter be simply to inform a customer that certain goods have been shipped on a certain day by certain lines, no further words are necessary; perhaps a duplicate bill of lading would be all that would be really required. Custom, however, calls for some slight degree of courtesy.

Each sentence should be so framed that it will convey but one meaning to the reader, and that meaning the one which the writer intended. If you would acquire a perspicuous style, study the sentences in the newspaper, and see for yourself what other interpretations could be placed upon the collocations of words. If the sentence admits of two constructions being placed upon it, it is a bad one; how could it be made better?

A little practice at the careful reading of what others have written will train the mind so that the sentences framed will be clearer, and therefore better, than before this study was given. Practice careful dictation, and it will soon become easy to express your meaning so that he that runneth may read.

PRIVATE CODES.

ARE you scanning your ideas for one that, put into active operation, will bring you into closer touch with your customers; bind them to you more firmly?

Have you, Mr. Ponderer, ever considered the advantages of a private code? Do you know that many firms have accomplished by this means, and permanently, too, an intimacy with their trade, closer, surer, more rapid, and with as much of the element of secrecy as is desired? It is a fact, testified to by hundreds of live firms, and you should not turn down the idea without sifting it thoroughly.

It is not possible in this short article to set forth any of the further advantages of this matter, but this one great benefit should be enough to arouse the interest of wide-awake business men, and, no doubt, all the information desired could be obtained of The American Code Co., of New York City, who are specialists in this line.

OFFICE SPECIALTIES.

A VERY neat catalogue is issued by The Samuel C. Tatum Company, Cincinnati, who handle office specialties and stationers' hardware. The back is of a dark color, almost black, and is relieved by a design in green and gold. The paper and ink used are good, and consequently the illustrations show up well. What makes it very attractive is the illustrating of all quotations.

The office specialties handled are copying presses and stands, loose sheet holders and binders, paper punches, inkstands, copying pads, baths and tanks, stick files, paper weights, letter boxes, etc. There is a large range of inkstands quoted, some of them being exceptionally fine. Particular attention is also paid to copy presses and copy press stands.

Their Cost is so Trifling

Casson & Dixon, dealers in agricultural implements, Dominion City, have dissolved. Wm. Dixon continues.

BRITISH COLUMBIA.

Peach & Chester, plumbers, Vancouver, have dissolved. J. R. Peach continues.

CATALOGUES, BOOKLETS, ETC.

HARDWARE AND META is in receipt of a booklet entitled "Business Vexations and Some Other Things." It is written under the nom de plume of "Piccolo" and is published by W. N. Aubuchon, St. Louis, Mo. It deals in short epigrammatic paragraphs on different phases of trade. The paragraphs are pointed and cleverly written, and in addition to their value for general reading purposes, many of them would no doubt be found useful for advertisements. At random we quote a few paragraphs:

"Competition is the great bug-bear that frightens the wits out of one-half of the people who conduct business. The other half bother very little about it and manage things in the right way and make money."

"Never recognize competition until competition recognizes you."

"The field for ingenuity and originality is as great in one line of business as in another."

"Doing something different is the keynote to business achievement."

"Low prices do not always mean cheap goods."

"Higher priced goods are sometimes better investments."

"We learn things by doing things."

The published price of their booklet is 25 cents.

INQUIRIES ABOUT CANADIAN GOODS.

The following were among the recent inquiries relating to Canadian trade received at the Canadian Government office in London :

1. Inquiry is made for addresses of Canadian mills in a position to furnish regular supplies of leather board.

2. A firm manufacturing all classes of floor and glazed tiles have made inquiry respecting the extension of their business relations with Canada.

3. A general broker in the North of England, who is interested among other things in wood pulp and chemicals, is seeking connections with Canadian producers.

[The names of the firms making the above inquiries can be obtained on application to the Editor of HARDWARE AND METAL.]

BUSINESS TOPICS FROM BRITISH COLUMBIA.

Office of "The Canadian Grocer,"
Vancouver, B.C., April 24, 1903.

SHIPMENTS of goods for the Yukon trade have begun already in anticipation of the early opening of the river. The C. P. N. ss. Princess May, which sailed last night for Skagway, had on board large consignments of merchandise, which will go forward to White Horse, whence they will be transported over the ice on Lake Labarge to the head of navigation on the Yukon. From there the goods will be taken on scows down the river, which will break up earlier than the lake. While it is not yet assured that the opening of navigation will be early, the winter trail is badly broken up. Some assert that the ice in Lake Labarge is very thick this year, which will, of course, delay the starting of navigation down from White Horse.

Nearly all the goods sent in have been staples of food supplies, lines that have run short in the winter stocks of the Dawson merchants. Some luxuries, such as fruits, that the Klondike is debarred from largely in the winter, are also forwarded. These early shipments are designed to catch a bare market, and correspondingly high prices are anticipated. Some of the wholesale houses here have their representatives in Dawson for several weeks, looking up good lines, and these advance orders are a result of private wires from the men on the ground.

* * *

Some improvement in trade with the Kootenays is noted this week. The conditions in the Rossland and boundary mining districts are becoming better since the coal mine strike in the Crow's Nest mines has been settled. Visitors to the coast from Rossland predict a good season. All the mines are shipping steadily, and with all labor troubles there settled as they are now for a period of three years, some degree of prosperity is reasonably expected.

* * *

In local market conditions there is little new to note. Stocks are fairly well maintained, no shortages in any leading lines being noted.

* * *

It may be interesting to record receipts of goods direct from the markets of the Old Country, by sailing ship. Of course, this market is by degrees becoming a larger direct importer from England. Ships come in regularly, and two lines of freighting steamers, the Blue Funnel Line and the China Mutual, are now making Vancouver a port of call with direct freight via the Suez Canal and the Orient. This week a sailing vessel, the Glenalvon, arrived in port with large consignments of merchandise.

The wholesale trade of British Columbia cities is just now very much interested in the refusal of the C.P.R. Co. to accede to the request to put them on the same freight rate basis respecting Alberta trade as the city of Winnipeg. They claim if that were done it would be no more than fair. At present rates from Vancouver to Calgary are higher than from Winnipeg, though the latter is the longer haul. The C.P.R. freight department some time ago discussed the matter with the British Columbia Wholesale Grocers' Exchange, and F. W. Peters, general freight agent, has given his final answer. He says that eastern centres would be sure to follow the concession of any favors to the British Columbia houses with demands for concessions, which, if granted, would put things back to the same basis as at present.

AMALGAMATION OF SCOTCH MILLS

It was announced on Wednesday that the scheme for amalgamating the mills and forges in Scotland had been completed, and that all the works except two had joined the combination; but it is now reported that the announcement is premature. If it is to be that one company is to control the output of practically all the finished iron works in Scotland, it would be by far the largest combination of the kind in the kingdom, and would have an important influence on the future of the industry. Some of the Scotch makers claim to get extra prices for their iron, but, broadly speaking, Scotch iron, like Cleveland, is all of a kind, and there are not the difficulties presented in the Midlands, where almost every brand has its reputation and, perhaps, price.—Iron and Steel Trades' Journal, April 25.

THE HISTORY OF HAT ENAMEL.

In 1898 Henderson & Potts found that one of their customers was using a large quantity of tinlets of their Japanese enamels, and on inquiry were informed that it was being sold to enamel hats with.

They tried it, but found it was not a satisfactory article for this purpose, as it made the hat heavy, and, after a great deal of experimenting, decided to offer the public "Anchor" brand hat enamel.

With a tin of this enamel, which is manufactured in 32 fashionable shades, one can take an old hat and change its appearance so that it will look like one that has just come out of the millinery store. Thus, a blue hat can be changed to white, scarlet, russet, black, or any other color that the owner chooses, and the enamel will not chip, wash, or crack off.

The first year Henderson & Potts placed this hat enamel on the market they ordered 50,000 labels, but before the end of the year they were exhausted and a duplicate order had to be placed. Since then the sales have been enormous, and "Anchor" brand hat enamel can be found in nearly every store in Canada, from the general store to the druggist, and our large departmental stores would find their stock incomplete without a line of "Anchor" brand hat enamel.

HARDWARE AND METAL

VOL. XV. MONTREAL AND TORONTO, MAY 23, 1903. NO. 21.

The Transportation Problem Discussed

By a Member of the House.

House of Commons,
Ottawa, May 18, 1903.

AFTER a breeze in the House raised by the irrepressible member for Labelle, Mr. Henri Bourassa, with regard to some recent utterances by Lord Dundonald, the members got down to more serious business in a debate on the transportation needs of the Northwest, inaugurated by Mr. Walter Scott, the earnest and bright young member who, in 1900, defeated the late Nicholas Flood Davin.

Mr. Scott started his speech, which was in large measure an arraignment of the C.P.R., by the assertion that serious congestion of railway traffic prevailed in the West, and had done so for 20 months. He quoted at length from a recent issue of a Regina newspaper as to conditions there, the article stating that goods ordered in very ample time for the Christmas trade had arrived after that season; for the spring trade too late for that trade. and that

MERCHANTS WERE GETTING AFRAID

to send in the orders they might reasonably do, for fear of non-arrival in time for the particular season for which the goods were required. If this be the case, and there seems to be ample evidence to support the assertion, one can see at a glance what a serious loss follows not only to the local dealers, but to the wholesalers of Eastern Canada as well, to say nothing of the inconvenience to the consumer who is thus deprived of the supply to meet his necessary requirements. The article ended by saying that more than one individual merchant could prove that he had lost hundreds of dollars from the non-delivery, or late delivery, of his orders.

RESOLUTION OF THE WINNIPEG BOARD OF TRADE.

The member for West Assiniboia, after reading the quotation with which we have been dealing, laid a further foundation for his attack on the C.P.R., by saying that it is the only road the people of the Northwest Territories know and do business with, thus fixing it with responsibility for all railway troubles there. He alluded to the promises made a year ago that the inconveniences of 1901 would not be repeated, and yet the fall of 1902 found things worse than ever. Next, Mr. Scott supported his case by a long quotation from a resolution of the Winnipeg Board of Trade, carried after long and earnest consideration, one paragraph of which is so strong that we must quote it verbatim; it runs as follows:- "And, Whereas the passenger service has become so irregular, unreliable, and apparently disorganized that much loss has been inflicted on business men, and the travelling public has suffered great and long continued inconvenience and hardship; and, whereas the equipment of the railway company has fallen into such a condition that the corporation is utterly unable to handle the traffic of Western Canada; Therefore, be it resolved: That this board respectfully urges the Dominion Government to take such immediate action as shall remove the grievous disabilities under which the people of Manitoba and the Northwest Territories labor."

DIVERTING TRADE.

Mr. Scott followed up this blow by reading from an address passed by the Northwest Assembly, reiterating all the charges as to freight congestion, a part of a paragraph of which is most significant, and rather alarming to all good Canadians who wish to see Canadian trade retained in Canadian channels, reading as follows: "And unless it is held desirable to divert part of such traffic through foreign channels, adequate facilities for its transportation must be immediately provided." Those words "unless it is held desirable to divert part of such traffic through foreign channels," are most significant.

PATRIOTISM AND TRANSPORTATION.

It is all very well to talk about patriotism, but the farmer who has his whole year's crop lying in his granary without a chance of converting it into money by shipment through Canadian channels, will most naturally seek whatever outlet he can get to produce the necessary result. Even from the Canadian standpoint, sorry as we all would be to see our trade, or a large part of it, passing out of our country, we must admit that it would be better for our national interests to have it do so, rather than to see his crop kept indefinitely in the hands of the producer who would be ruined in the long run by his inability to get money for his product. This being the case, it comes to this: If we are to continue the development of the Northwest Territories, or even for that matter to hold the settlers we have already induced to enter that country, we must provide railway facilities through Canada to our own seaboard, or encourage shipment over American lines, and as few would be found to advocate the latter course, we arrive at the conclusion that Canada

...st advocate a bold policy in railway mat... assisting colonization roads ... necessary, and measuring the ... cost on the broad basis of nation... development and future returns.

LACK OF SIDINGS.

Mr. Scott attributed most of the trouble to lack of sidings, lack of rolling stock, and lack of men to do the administrative work of the road, asserting that its employes were sadly overworked and in no wise to blame for the dreadful disorganization which he asserted existed. He maintained that the $20,000,000 worth of extra stock authorized last session to be issued by the company on the express condition of removal of abuses, had not been spent as rapidly as it should be, and that the recommendations made by the Western employes of the road, who knew local conditions thoroughly well, were scaled down in Montreal sometimes 60, 70, or even 80 per cent.

C.P.R. MANAGEMENT.

Mr. Scott spoke very bitterly against the C.P.R. management, because he alleged that there was an opportunity to relieve the congestion existing last January by shipping out some 7,000,000 bushels, which the C.P.R. had actually admitted it could not handle in the requisite time, over the Great Northern, if the C.P.R. would hand it over to that rival road.

A STARTLING PROPOSITION.

After his long arraignment he remarked that he might be asked to suggest a remedy. This, he thought, was for the Government, but at the same time, he might make a suggestion. And this he did in the startling proposition that inasmuch as the C.P.R. had been presented with the road by the Dominion Government on the express condition that it would operate the same in a proper and suitable manner, the gift should now be revoked by the Government because of the non-fulfilment of the condition.

No doubt Mr. Scott hardly meant to recommend so severe a course, but rather to warn the C.P.R. that Parliament had an extremely good excuse for regulating and disciplining the railroad at any time it might see fit to do so.

A COMMISSION URGED.

Somewhat later on, after placing the loss to the people of the West in last year alone at $10,000,000, he made the further and more rational suggestion that a commission be appointed to study the conditions, and to report to the Government on a remedy, especially along the line of the purchase of more rolling stock. With one of his last statements, to the effect that it is absolutely useless to encourage people to come to our West in the present large numbers unless we had better accommodation to offer them, we can one and all agree, and the Government may well count on the support of the country at large in any vigorous railway legislation which it may see fit to introduce.

MR. TARTE TO THE HELP OF THE C.P.R.

To Mr. Scott succeeded Mr. J. Israel Tarte, who took up the cudgels for the C.P.R. and punctured some, by no means all, of the arguments previously adduced. For instance, as to the argument of shortage in locomotive power, he asserted that owing to an unusually light rainfall, scarcity of water resulted and that, as a consequence, not 60 per cent. of the actual power could be got out of the engines "Was this the fault of the C.P.R.?" asked Mr. Tarte. He argued that owing to the extremely rapid development of the West no railway could possibly keep pace with it, that the C.P.R. was serving Western Canadians better than Western Yankees were being served by their roads, and that even we in the east, owing to the great prosperity in trade and the abundance in crops had to put up with many inconveniences ourselves in matters of freight transport. He interpreted Mr. Scott's speech as a covert way taken by the Government to prepare the country for the voting of large subsidies for other railways in the West and waxed very indignant, indeed, over the proposition to cancel the charter of the C.P.R. for breach of contract.

SHORTAGE OF SHIPS.

Mr. Tarte referred to the shortage of ships on the lakes as one reason for the wheat blockade, and congratulated the C.P.R. on the fact that this trouble had been lessened by the energy with which that company had been getting the grain to the seaboard by the all-rail route. He referred to the large increase in elevator accommodation provided by the C.P.R., to the big expenditures already made to increase the rolling stock, and to the difficulty in getting what was required, not from unwillingness to spend, but because the market could not in these present days of world-wide expansion, supply the demand.

THE REQUIREMENTS OF A CLERK.

By W. L. A.

APART from downright honesty and uprightness there are four absolute requisites to every successful retail business:—judicious advertising, neat and attractive interior, effective windows and carefully selected clerks, and of these, the question of clerks is not of the least importance. Good advertising will bring customers to the store, thoughtful window displays will allure them inside, neat interiors will predispose them to buy, but the sale itself—the only part which is of vital importance to the merchant—depends upon the clerk to a very large extent. A merchant may have the cleverest advertising man and decorator to be obtained, but if his efforts to please stop there, his business will never prosper as it should.

Fighting for supremacy in the business struggle of to-day with a $50 advertising man and window dresser, and a $6 clerk, is like entering a race with well-developed muscles but no wind. Things look all right, and the first steps rouse the "grand-stand," but when it comes to the home-stretch—the vital part of the affair—certain necessaries, without which the race is lost, are found to be lacking.

I have used the expression "carefully selected clerks," and that adjective was employed advisedly. There is very little hope of producing a successful clerk from a young man, as the raw material, who has none of the attributes so essential to a clerk. The idea that anyone can be a clerk is decidedly erroneous, except in the way that a 15-stone man can be a jockey, but never win any races. There are qualifications born with the good clerk, as there are virtues inherent in the successful business man. A couple of these, that education can have only limited influence on, are good memory and judgment in the treatment of the different kinds of customers.

The advantages of a good memory cannot be overestimated. Nothing pleases a customer so much as a cheerful "good day," accompanied by a look that shows that a clerk recognizes him. A customer who has bought before, enters and asks for a certain article; the clerk, who really is a clerk, turns to the shelf, takes down the particular brand and grade, or color and size, always used by that customer, and much useless talk and trouble is avoided, and the buyer feels his trade is appreciated sufficiently to keep him before the mind of the merchant. Such questions from the clerk as to how the last purchase suited are always appreciated and accomplish much in retaining a customer.

In the case of goods that are not or cannot be marked, a clerk should not find it necessary to consult his lists or his

Limited
HAMILTON, ONT.

employer. Nothing nettles a customer more than to see ignorance of prices displayed by the man who is waiting on him. There somehow intrudes the feeling that the business methods in the store are slack, and that the result may be that he will be asked an unfair price. Instances, such as these, might be quoted to any length showing the benefits that accrue from the possession by the clerk of a good memory.

The use of judgment in the treatment of customers is a trait that requires great care, combined with natural talent. Education and experience have much to do with this, but the inherent foundation is of vast importance. As a rule, nowadays, the clerk who has least to say, sells the most. Particularly is this so among the better class of customers. A man of 45, who knows what he wants before he enters a store, will not endure the talk and arguments of a stripling clerk who feels he should push a certain line, or attempt to give unsolicited advice. When requested he should give all the information he can in as few words as possible, and then stop talking. It does not require ten minutes to inform a customer that "Double Diamond" window glass is thicker and stronger than "Star."

Many clerks have a habit of setting their affections for the moment on the article that appears to please the one upon whom they are waiting. This fault is so common, and yet so disastrous in the majority of cases, that it is a wonder that common sense does not accomplish more in its annihilation. The customer who counts, does not have much faith in a clerk, or the firm that employs him, who first expatiates on the virtues of a certain brand, and then, when another brand appears to be fancied, says that, "yes, taking everything into consideration, that brand is the best!" The idea gains hold that that firm is willing to sell and "puff up" anything.

Although, generally speaking, the quiet, reticent clerk, is the more successful, the proper treatment of customers is more of a study in country villages or towns, where the clerk and customer are acquainted in and out of business. In such cases the conduct of the clerk must be governed by the character of the buyer. Many women and a few men relish a chat with the clerk, and family affairs, politics, and the price of wheat, are all subjects for discussion. Familiarity is not resented by such a class, and it is necessary for the clerk to talk much and freely, but even among friends there are not a few who consider business as business, and nothing else. This is the time when the careful clerk has to excercise great judgment; some he must ask about the baby; some he must treat only as customers; some he must let talk, and flatter by listening, while others, he must be prepared to treat as ordinary acquaintances, exchanging a little talk here and there, but attending, nevertheless, to his business. Jokes take with some, gossip with some (although this can and should be avoided as much as possible), politics with some, the passing of the time of day with some, but a friendly silence and strict attention to business with the great majority.

Again, great thoughtfulness must be displayed in the grade of goods shown to the different classes of people who enter. As a rule, the poorer class do not want to be shown the higher-priced goods, and it is an insult to the rich to display cheap, trashy articles. The clerk must size up his customer and act accordingly. Still, in this connection, it is not wise to endeavor to sell at first the cheaper lines to the poorly dressed, as they will resent with vehemence any apparent reflections on their position in society. In such cases, it is well to show a medium grade, and work up or down, according to the taste of the customer. Definite rules can not be set in dealing with this subject, and it is in this lack of set regulations that the fact appears that a clerk must be born, not made. Judgment in a clerk is as necessary to the success of a business as careful buying, and a good memory as a money backing.

WORKING TOGETHER.

Next to the recognized high quality of ***The Sherwin-Williams Paints and The Sherwin-Williams Varnishes,*** the principal reason why S-W.P. agents are more successful than other paint dealers is the way we work with them.

To get a good agent is only half our aim, the other half is to help him build up his paint business. We work with all our agents from the very moment they place our goods on their shelves. We believe that it is an essential part of our duty to help keep our products moving off the agents' shelves. It is by practising that belief that we have been able to build up the largest paint and varnish business in the world.

Our booklet "B—13" describes fully the way we shall work with you if you will take the agency for our products. Write for copy to-day.

MARKING PACKAGE FREIGHT.

The Canadian Freight Association [illegible] directing attention to the necessity of fully marking all package freight in accordance with this amended rule: "Each package or piece of less than carload freight must be plainly marked with the information necessary to carry it to destination and insure proper delivery, even if separated from the way bill. Old marks must be removed or effaced. Freight consigned to a place of which there are two or more of the same name must not be forwarded unless the name of the country and province be given."

THE METRIC SYSTEM

MANY of the opponents of the metric system base their unwillingness to accept it on the fact that it is [illegible] others only on the ground that it is [illegible], based on a unit that is nearly 40 in. long instead of one that is to suit Scientific American. As regards the second end of it, there is not one of the American objectors who goes to England, who does not complain of duodecimal currency with its various disadvantageous side issues. He finds his own dollar easily enough divisible and easily enough computed in all its divisions and multiples; but he complains of a 20-shilling pound and a 21-shilling guinea, and of the steps 4 x 12 x 20 on the road from farthing to pound. He never confuses the 20 hundredweights of 100 lb. each and the 20 nominal hundredweights of 112 lb. each, for although 2,240 lb. make the only legal ton in the United States, he uses almost exclusively 2,000. He forgets all our "troy" and "apothecaries'" weights, the tables for which used to wear out his soul when he was a boy, and which at 40 years of age he cannot repeat. He probably uses for fine work, if he is a machinist, decimal divisions of the unit, or of one third of the unit, as our United States standard is the yard, not the foot, in preference to the carpenter's eighths and sixteenths. He has no difficulty in laying out or laying off a third or a quarter of an inch on a decimal scale.

Those who base their objections to the system on the meter only, would do so were it divided into twelfths. They seem to think that if we were to measure in meters, we would have to change all our patterns. As a matter of fact, we would not. The designer who has any common sense and experience makes his drawings to some near unit which will give him enough stuff to bear the load or do the work. He gives himself a factor of safety according to the character of the load; and if the dimensions were 39.4 instead of 40 in., it would not cause him any worry nor make his work any the less reliable or suitable. A 3-in. shaft, so called, is really 2 15 16 in. about nine times out of ten, and no one complains of weakness because it is not just 3 in. No one objects to putting in cold-rolled shafting because it is an even 3 in. on the so-called 3-in. size, instead of only 2 15 16. There is no confusion.

It will probably be a long time before British insular prejudice, some of which we have inherited, will consent to the adoption of either decimal subdivision or the metric unit, alone or in combination. Meanwhile there is one thing which we can do, so long as we are saddled with our present standards and subdivisions that is, express dimensions in inches instead of in feet and inches. For instance, we can avoid writing 5' 1", and instead write 61 in.; because the 5 1" is liable to be read 51 in. There are times and places when such misreadings can be not merely annoying, but very expensive

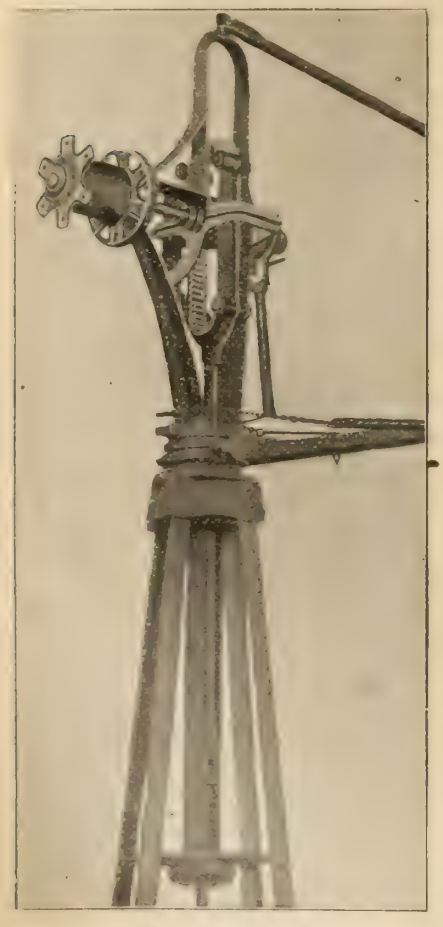
MACHINERY

A VICTORIOUS CANADIAN WINDMILL.

THE wind-engine made by Goold, Shapley & Muir, which carried off the first prize at the recent trials in Great Britain, to which we referred last week, has several points which are unique in windmill construction.

Perfection is made up of trifles, we are told, and certainly the truism is vindicated in the Goold, Shapley & Muir windmill. The head of this engine rests on a turntable that moves on cone roller bearings. The 10 ft. sections of the tower are all butt-jointed, thus doing away



THE VICTORIOUS WINDMILL.

with a shearing strain on the bolts. The foundations are laid 5 ft. below the surface, and bolted down to oak timbers, 14 in. wide and 3 in. thick by cast iron shoeplates. The wheel is 16 ft. in diameter and has 18 sails. The outer rim of the wheel passes through the sails, and is riveted to a bracket of stamped steel fitted to each sail. The hub of the wheel is riveted to a bracket of stamped steel arms carrying the sails to be firmly braced. The end thrust is taken by ball bearings, the 16 in. roller bearings absorbing the friction of the shaft.

The accompanying cut illustrates the angle-rack to which motion is imparted by a pinion. This clever device makes possible the exceptionally long stroke of the pump, which attracted so much attention during the late exhibition. The main pump-rod is of white Canadian maple, 3 in. square.

The engine has also one of the most effective governing devices ever invented, which causes the wheel to present an oblique plane to the wind when a sudden gust strikes it, thus maintaining a fairly even speed.

B.

A MUNICIPAL FLOUR MILL

Experiments in municipal ownership are of peculiar interest just now, and the venture of the Fenelon Falls, Ont., town council is not likely to pass unnoticed.

A by-law has been carried, empowering the council to raise $75,000 for the purpose of acquiring a water-power, electric light and roller flour mill.

The firm that have been running the mill used about 500 h. p., and have been bought out for $35,000. The council will build a power station to cost $25,000, and will then offer current at a low rate to induce industries to locate there. The firm who owned the flour mill prior to its absorption by the council will rent it at $1,200 per year.

ALUMINUM IN BRITAIN.

Of late years aluminum has been put to many uses, but it is only quite recently that its utility has been recognized in connection with electric traction.

The metal is being used largely by electrical contractors, to a considerable extent replacing copper. The British Aluminum Company is British in more than name, as all the raw materials are obtained within the United Kingdom. The company was organized in 1894, and the several works include bauxite mines at Glenravel, Co. Antrim, Ireland; extracting works at Larne Harbor; reducing works at Foyers on Loch Ness, Scotland; and rolling mills at Milton, Staffordshire. The carbons used in the electric furnaces are also made at the company's carbon works at Greenock.

IMPLEMENT DELIVERY DAYS.

The Massey-Harris agents held their annual delivery at Glencoe, Ont., on fair day.

This little news item, culled from the columns of The Glencoe Transcript, sets one wondering whether these "delivery days" are the necessary outcome of modern civilization, or whether they are purely and simply a phase of honest advertising. There is certainly something to be said on behalf of such shipments of machinery, for the expense of freight is considerably reduced to the individual receiver when three or four carloads are sent along at the same time.

So long as the delivery-days for agricultural implements are arranged so as to fall well in advance of the earliest date such machinery will be needed, there need be nothing said against them.

The Massey-Harris firm generally manage to see to this, but it may be timely to give a word of warning to consignors of goods, in that railroads do not always regard freight schedules with due respect; and in view of the increased traffic over the trunk lines from the West next fall, and considering the possibility of strikes and accidents, a generous margin should be allowed the transport companies. They need it. Twenty-eight days for a freight item to come from Port Arthur to Toronto is at least a safe speed, and this was the time taken recently by a case of goods in transit.

TOOLS OF THE ANCIENTS.

It is certain that the past century has seen remarkable advance in the machinery of civilization, that the tools used in the workshops of modern machinery factories are little short of wonders. What is not so certain is whether these wondrous inventions of science are now making their first appearance on earth.

W. M. Petrie has, during a residence of two years in a tomb at Gizeh, Egypt, been forced to the conclusion that the pyramid builders knew all about tubular drills, straight and circular saws, and cutting tools set with jewels. He also shows that their lathe tools were set with jewels, and that the work they did with them would puzzle the modern artisan.

In one place he found the line of cutting on a granite core made by a tubular

MONTREAL WINNIPEG VANCOUVER

drill of a uniform depth throughout, showing that the cutting point was not worn as the work advanced. The regular taper of the core would also go to prove that the drill was set with jewels on the inside and outside alike, thereby facilitating its removal. In some specimens of granite the drill had sunk 1-10 in. at each revolution, the pressure necessary to accomplish this having been at least two tons. The capacity of the tools and the skill of the workmen are illustrated by the clean cut they made through soft and hard material alike. Nothing is known concerning the material of which their tools were made or how the jewels were set. The diamond was very scarce at that time, therefore the only logical conclusion is that corundum was used.

FAN MOTORS.

A dainty little booklet has been issued by The Canadian General Electric Company, setting forth in an artistic and attractive manner the special merits of their electric fans. An interesting chapter on fan history from B. C. 2699 to the present day, forms a fitting preamble, and the engravings and wash drawing cuts illustrative of Egyptian, Indian, Greek and Japanese fans are all in good taste and well printed.

The catalogue should be on the desk of every hardware store in town where electricity is in use.

A SHOCK-PROOF SUIT.

Until lately insulation has been regarded as the only way to secure safety from the effect of contact with live wires carrying a high voltage.

It was left for a Russian scientist, Professor Nikolaus Artemieff, to adopt the revolutionary principle of protecting himself by a suit of highly conductive metal. Professor Artemieff visited the large power stations of Berlin, Germany, recently, and by donning his protective dress and exposing himself to the most dangerous discharges and short-circuits, amply demonstrated the practical nature of his invention.

Electricity flows along the line of least resistance, and upon this principle the Professor constructed a fine, flexible metallic web, lined with linen, thus ensheathing the whole body, including head, hands and feet.

The current, instead of passing through the body, which offers a resistance of 2,000 ohms, runs along the meshes of the web, which have only 0.01 ohm resistance.

Siemens & Halske have acquired the German manufacturing and selling rights.

MACHINERY NOTES.

THE Chatham, Ont., Manufacturing Company will erect a new blacksmith's shop, 150x50 ft., in the near future.

The Truro Foundry is rushed with orders, and several good lathe and vise hands are wanted.

The Kingston Locomotive Works have delivered six new engines to the Intercolonial Railway during the past year.

The Goderich Engine and Bicycle Co. have placed their order for two 3x2x3 duplex steam pumps with H. W. Petrie, Toronto.

A No. 2 Petrie cooking and heating boiler was purchased by The Stratford Mill Building Co., of Stratford, from H. W. Petrie, Toronto.

The Sydney, N.S., Steel and Coal Co. have recently added a new Mogul locomotive to their equipment. It was built in Schenectady, N.Y.

The Town Council of Coaticook, Que., have purchased the electric light plant and water power from the Coaticook Electric Light Company for $36,000.

T. McAvity & Son, St. John, N.B., have purchased the Vulcan foundry, and will fix up the works and operate them in connection with their business there.

A large moulding machine, a self feed rip saw, a revolving bed surfacer and a cut-off saw are being added to the equipment of Wm. Sutherland's shop at Edmonton, Alta.

Canada's trade continues to grow beyond her borders. Instance a large order for plows, placed with the firm of J. Fleury's Sons, Aurora, Ont., for shipment to Tasmania.

A 12-in. Ballantyne, four-side moulding machine has been installed in the plant of The Orillia Export Lumber Co., of Orillia, Ont. This machine was furnished by H. W. Petrie, Toronto.

A number of Calais, N.B., business men, whose stores are on Main and Munroe streets, have decided to instal an up-to-date electric lighting plant, to be run by a gasoline engine with storage battery.

The Laurentide Mica Co., Ottawa, are preparing to double their plant. There is very little machinery used in the works, the operation of splitting the mineral being done by about 60 young girls; the number employed will be over 150 in a few days.

Portage la Prairie farmers are just getting over the latest nine days' wonder which has descended on them in the form of a self binder attachment that carries the bundles along until there are sufficient to form a shock and then places them ready for the loader.

The William Hamilton Manufacturing Co., Peterboro', Ont., are building ten large turbines for The Canada Paper Co.'s new pulp mills at Windsor Mills, Que. The contract for machinery, which amounts to $25,000, also includes a new paper machine, the first of its kind to be built in Canada.

Mr. McKelvie, of McCamus & McKelvie, New Liskeard, New Ontario, spent a few days in Toronto this week purchasing machinery. H. W. Petrie, Toronto, has installed for the above concern a 12x15 centre-crank engine. Mr. McKelvie reports business in fine shape up in his country.

The Linde Dry Air Circulating System has been adopted as the most suitable for use in the Columbian Cold Storage fish-freezing and storage plant at New Westminster, B.C. The St. Mungo Packing Co. have put in the plant, which has been built by The Linde British Refrigerating Co., of Montreal. The plant will be in operation by June 1.

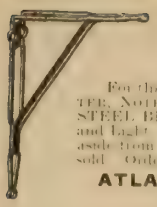
The electric light plant at Owen Sound, Ont., is to be enlarged. Jones & Moore, electricians, will add five arc lights and about 60 incandescents. The latter will be mainly used to replace the acetylene plant at present used in the theatre and restaurant, and the arc lamps will convert the grounds between the restaurant and the dock into a pleasant evening promenade.

A Canadian Westinghouse company, with a capital of $2,500,000, is in process of formation for the purpose of manufacturing Westinghouse electrical apparatus and air-brake machinery in Canada. The location chosen is Hamilton, where the air-brake works are already in operation. The board of directors will include some of Canada's leading magnates of finance, and $700,000 of the stock will be allotted at par within the Dominion, the remainder being furnished by the Westinghouse interests in the United States.

Two large iron lighthouses, weighing several tons, manufactured by The Victoria Foundry Co., Ottawa, have been shipped to Lake Huron, where they will be placed by the Dominion Government. A similar one is being built for north of Belle Isle. These lighthouses are practically immense octagonal lanterns, about 10 ft. in diameter and about 12 ft. in height. They are fitted with plate glass and are mounted on a steel or stone base in the lakes or ocean. The old style of wooden lighthouses is being replaced by these more modern and more durable structures.

There is no saying what Brandon, Man., will do next. The several machine shops are all busy, and so great is the demand for space wherein to grow, that the old town hall building has been commandeered for use as a planing mill. Contractor Ullyot has taken over the building and will equip it with mortising and other machines, to be run by a 15 h. p. Otto gas engine, made in Minneapolis, Minn.

The Aylmer Iron Works Co., Aylmer, Ont., are prepared to build or repair weighing machines with what might be called Shakesperean precision, for, if "the scale turn but in the estimation of a hair," the change of balance is detected. Cheese factories in the neighboring towns are keeping the Aylmer people busy making and regulating scales, and last week the 8-ton balance of the St. Thomas Gas Works was thoroughly overhauled by them.



Will Hold Up a Shelf!

That's what a shelf bracket is for. For this purpose there can be NOTHING BETTER, NOTHING CHEAPER than the BRADLEY STEEL BRACKET. It is well Japanned, Strong and Light. The saving in freight is a good point aside from the lower price at which the goods are sold. Order direct or through your jobber.

DEPARTMENT OF ADVERTISING SUGGESTION AND CRITISISM

Edited by

W. Arthur Lydiatt,

TORONTO.

Notes on the principles and practice of advertising. Subscribers are invited to send Mr. Lydiatt specimens of advertisements and circulars for the purpose of review in this department. Address care of Department of Advertising, Hardware and Metal.

Don' wait until you publish an especially good advertisement before you send me your ads for review in this department. Don't be afraid of a little honest criticism. I will only try to point out the faults—if such there be—that you may have ideas for the improvement of your ads. You don't have to follow my advice or act on my suggestions.

I simply want you to send me specimens of your advertising matter—just what you are using now, or what you have been using. I'll tell you of every way in which I see it might be improved. I will call attention to the good points—mention the weak points.

If you spend money for advertising it is surely advisable to see to it that you get your money's worth. And if you tell me just how you are spending it—show me what kind of advertising matter you use—perhaps I'll be able to give you some suggestions which will help you make your advertising more profitable. It's worth trying, anyway. THE EDITOR.

TRUTHFUL ADVERTISING.

IN these days of keen competition no advertiser can afford to conceal true facts, either about his business methods or his merchandise. Everything must be open and above-board.

The most successful policy which can be adopted in writing any advertisement is to so word it as to win the confidence and respect of the reader. If you can make such an impression on the reader's mind that she will believe you are sincere in what you say—that you really believe it yourself that you are laying the case before her in a plain, business-like manner, without any exaggerations or attempts to mislead, you are pretty sure to get that person's trade.

If you believe what you are saying, you are more apt to express yourself in a convincing manner than if you are simply trying to praise up some value that does not exist. There is only one sure way in which you can gain the confidence of the public, and that is to invariably stick strictly to the truth. Advertising that flatters one's goods is most undesirable advertising.

It may pay to use a few plain simple words, until some one learns to read between the lines, which is likely to be the case when you are trying to exaggerate. Be careful and gentle in your statements. Don't try to claim the earth when all you have to offer is your goods.

Never make a promise that you cannot fulfil. Always fulfil every promise you make. You may for a moment attract attention by a particular advertisement, but if the promises you make are not carried out, your advertisement will be a boomerang to your success. It is sure to react in the future, and the loss in the long run will be much greater than the temporary gain which you may make.

When a retailer's announcement is read, it is perhaps for the moment believed by the reader, but if she afterwards comes to the store and finds that what you have said is not true, she will not only believe you have told a falsehood in this case, but will most likely be suspicious of the truth of future statements. If, however, she finds the full truth has been told, she not only has faith in that one particular statement, but you have clinched your argument and won a customer for many days to come.

It is a good idea to be conservative in your published announcement of a sale, bargain, or special offer of any kind; leaving something of the true value to be discovered on a visit to the store. Tell a part of the "good news"—sufficient to gain interest,—and it will prove doubly interesting to the would-be customer should she come to the store and find you had underestimated the true value of the offer you make.

Be particular that you emphasize the proper thing. There are some goods in which the price is the proper thing to make prominent: everything else is of minor importance. Other goods there are in which price does not cut much of a figure; the quality should be emphasized. Cheap goods sold at a popular price should have that price brought into particular prominence, for it is usually the case that only a very low price will interest people in a low grade of goods. Fine goods—goods of durability—goods which are sold more particularly for their superior excellency than for anything else—should be pushed on a quality argument. It is useless to dwell upon the desirability of the article, and then upon the price for an really standard and first-quality goods the price is pretty generally the same everywhere.

Here's a good ad. about lawn mowers:

LAWN MOWERS

Almost any lawn mower will run easily and cut cleanly when it's new—that's not the test.

It's the way the mower runs and cuts after it has been used a season that distinguishes a good mower from a poor one.

You expect a lawn mower to last more than one summer?

Then come and see the line we carry—our guarantee of true worth goes with every one.

MOWIT & Co.,
Grasston.

I have been wondering if any "Hardware and Metal" readers have used any of the ads. suggested in several different issues. I would be much interested to know. I have not received any copies of papers containing the ad., nor have I had any indication that there are any readers who would appreciate such suggestions in practical form. I hope to hear from some.

NEED OF INSOLVENCY LEGISLATION

ALTHOUGH it is a foregone conclusion that the insolvency bill before the House of Commons will not be adopted, Mr. Monk has served a good purpose in introducing it. It keeps the question before the country.

As a private measure there is not the slightest likelihood of an insolvency law for the Dominion being placed upon the Statute Book. The opportunities for the initiating of important legislation by private members is gradually becoming more and more curtailed in the Canadian as well as in the British House of Commons. A measure like an insolvency bill for the Dominion, if it is ever to be placed upon the Statute Book must be initiated by the Government. There is no question about it.

The bill that is now before the House, or, what is perhaps more properly speaking, nominally before the House, is on the whole a good one. It is not harsh on the debtor and it protects the creditor. The rights of both appear to be amply protected and provision is made for the discharge of the honest but unfortunate debtor, while the clause governing the iniquitous preference evil safeguards the interests of creditors at home and abroad.

On account of the absence of an insolvency law covering the Dominion our credit as a business community has been affected abroad, and at home merchants and manufacturers in one province often hesitate to do business with those in another on account of the diversity of existing laws and the advantage which local creditors have over those in distant parts of the Dominion.

It is about 23 years since the insolvency law of 1875 was repealed. The late law was deficient, costly and consequently unpopular, but the commercial interests of the country have long since come to the conclusion that it would have been better to have amended the Act than to have repealed it altogether. And for several years all the leading Boards of Trade from one end of the country to the other have by resolution of deputations tried to persuade the Government to re-enact another measure. Among the exporters in Great Britain there has been a similar agitation, particularly during the last six years; but, of course, it has not been so pronounced as that which has been carried on in this country. It has, however, been both strong and influential, as the deputation which waited upon Hon. W. S. Fielding a few years ago in London demonstrated.

To-day the apathy of the Dominion Government in regard to insolvency legislation is an enigma to the commercial classes in Great Britain who are interested in Canadian trade. Some have even gone so far as to question our honesty.

On several occasions bills have been introduced in the Canadian House of Commons or in the Senate and on two instances at least by members of the Government, but they were never pushed to a final stage and to-day there does not appear to be anyone in the present administration who is prepared to take up the burden.

Although Mr. Monk's bill has not up to the time of writing been actually defeated, it is at any rate practically dead, as far at least as this session is concerned.

If we are ever to have a Dominion insolvency law a bill creating the same must be introduced by the Government. It is to the task of persuading the Government to do this that the various commercial bodies throughout the country should set themselves.

The experience of the past is not encouraging; but Canada is not the only country in which legislation of this kind has been slow in developing. It took about sixty years to bring the British Act to its present condition, and the Acts dealing with it were nearly as numerous. In the United States it also took years of agitation before the present law was enacted, and experience is teaching them that it needs improving in certain particulars.

KING EDWARD AND BUSINESS MEN.

KING EDWARD has given offence in certain quarters because he associates with business men. It is evident that the day has not yet disappeared when it was considered improper for kings and queens, or even members of the titled aristocracy to mix with those engaged "in trade." It can scarcely, however, be far from its close.

Those who look down on trade are usually not people noted for their intelligence or for their strength of character, and where the King leads many of them are likely to follow, even if it is to the length of associating with business men. And then it must not be forgotten that many of the most brilliant minds among the aristocracy of Great Britain are engaged, either from inclination or necessity, in commercial pursuits.

In aristocratic England as well as in democratic countries like Canada and the United States, the influence of business men is increasing on all sides of life. King Edward evidently recognizes this and the closer his intercourse is with those actively engaged in the mercantile world, the more business like will he be in the affairs of State. It is a good sign when the King of Great Britain or the executive head of any other country has a penchant for the society of business men. He gets his ideas broadened; and the broader they become the better it must necessarily be for the people over whom he rules.

CANADA AND MR. CHAMBERLAIN'S SPEECH.

THE Birmingham speech of Right Hon. Joseph Chamberlain, Secretary of State for the Colonies, on the question of inter-Imperial trade has naturally excited a great deal of interest, not only through the British Empire, but also in Continental Europe and in the United States as well. While what proposition Mr. Chamberlain may have to make in regard to inter-Imperial trade was not clearly defined, it is evident that he is prepared to suggest or to do something which would cause the departure of Great Britain from her old policy of free trade, even to the extent of retaliating upon those countries which at present levy a heavy import tax on British products.

The question of inter-Imperial trade, as far as Canada is concerned, resolves itself into this: How far is Great Britain prepared to go in granting the colonies a preference? What will the British Government demand of us and how far are we as a self-governing colony prepared to go in granting preferential treatment of British products?

Mr. Chamberlain once said that in negotiating for a mutual preference within the Empire it must be on a basis of free trade. This was five or six years ago, and it is possible his views may have become changed or modified since then, but we fancy, on the other hand, that he will demand that at least, if not an additional increase in the Canadian preference, there shall be a regular contribution to a fund for the defence of the Empire.

Canada may give a further preference in the tariff; in fact, Mr. Fielding, in his last budget speech, emphatically declared that the Government had been negotiating with the Imperial Government for a mutual preference on that basis, but on the other hand there is a strong sentiment n this country against both a further increase in the preference and a direct contribution to the fund for the general defence of the Empire. Should occasion arise, as the war in South Africa clearly showed, there would be voluntary response from one end of Canada to the other to any call that might be made for men in defence of the Empire. But our right of self government we guard jealously, and taxation without representation we would never countenance. The contribution to a general fund for the defence of the Empire would be taxation, by whatever name we may choose to call it.

In the building up and developing of our own country and its great natural resources we have no small task before us, particularly in view of the fact that we have to the south of us a powerful and aggressive competitor. If, therefore, we develop our own resources, build our railways, improve and extend our canal system, and contribute our share in men and money toward putting this part of the British Empire in proper state of defence, we are manifestly adding much to the strength of the Mother Country, as well as to the wealth and prosperity of our own land.

We are persuaded that anything that would curtail in the slightest way our present condition of self government would eventually tend to lessen those ties with the Mother Country which are now so dear to the vast majority of the people of this country. It would be unwise and sordid to eliminate sentiment altogether from questions of this kind, but sentiment must not and cannot be the chief factor. As a matter of fact this question of mutual trade relations between Canada and the British Empire is in its essence a business proposition and must be settled on a business-like basis. There was at one time a strong sentiment of attachment between Great Britain and those of her North American colonies which now compose the United States, but this sentiment was killed and the colonies lost because of the action of the British Government in regard to certain matters appertaining to trade and commerce.

The future welfare of Canada depends not upon any special trade relation with Great Britain, the United States or any other country. It depends upon the skill and energy with which we develop our natural resources and the stamp of our national character. At the same time there is no good reason why some arrangement should not be made between Canada and the Mother Country, whereby the products of the one may be given a preference in that of the other, but we must be prepared to give as well as to take, and if we enter upon any negotiation with Great Britain or any other country for that matter in a spirit other than this our efforts are likely to be abortive.

It is sincerely to be hoped that the attitude of the Right Hon. Joseph Chamberlain, on the question of inter-Imperial trade will result in some mutual arrangement whereby the different nationalities—if we can be permitted to use the term—composing the British Empire will help to build each other up and increase the wealth and prosperity of the whole.

It is conceded by nearly every one that the tariff is becoming less and less a party question in Canada. It is certainly not a party question in Great Britain, and if between political parties the tariff is becoming less a cause of party differences and more a business proposition why should not the question be also settled on a business-like basis by the different countries composing the British Empire?

MR. JUSTICE NESBITT.

THE appointment of Mr. Wallace Nesbitt, K.C., to a seat on the Supreme Court Bench has naturally created quite a little interest.

As a rule, appointees to judgeships are selected from the political party which happens to be in power. In this case the appointee comes from the Conservative party. It is this in part which has excited interest. On the other hand, Mr. Nesbitt stands in the front rank of the legal profession, and as such, no doubt, received a larger renumeration than the bench will afford. The honor, however, of a seat on the Supreme Court of Canada is by no means a sinecure, and at the same time the position does not demand as strenuous work as a practice such as Mr. Nesbitt's has been during the past few years.

Mr. Justice Nesbitt has been a man of opportunity. By that, we mean that he has not neglected opportunities for fitting himself for his profession.

He is a man of keen perception, a close student of legal matters, and in addition to this he possesses a large fund of business common sense, which has caused him to be actively interested in more than one commercial enterprise.

SKILLED LABOR WANTED.

IN view of the great need for skilled labor in Canada, it is a matter of some surprise that the Government Emigration Bureau in Great Britain do not put forth a greater effort to secure this class of emigrant for Canada. At present the sole object of these bureaus in England seems to be to encourage emigration only of the ordinary laboring class of workmen, who, though doubtless needed in the country, are not such valuable immigrants as the skilled mechanic or tradesman.

Manufacturers agree that there is room immediately for over 20,000 skilled laborers. One manufacturer made this statement: "If 4,000 skilled workmen landed in Montreal to-day we could find them employment in 36 hours."

The opinion is held that the attitude of the Government in this matter, which almost amounts to a discrimination against the skilled labor in favor of the unskilled, is caused by the objections raised by Canadian trade unions, who are opposed to the importation of this sort of labor on the ground that it would tend to weaken their position. Considering the dearth of skilled workmen in Canada, it would appear that there is plenty of room for all; but whether this is the case or not, it does not seem reasonable that Canadian industries should be refused the opportunity of enlarging and progressing merely that the unions should retain their hold of the labor market.

It is unanimously agreed that the limiting of the production of industries, which was forced upon British employers by the unions, resulted in serious harm, not only to the unions themselves, but to their employers, the manufacturers and the whole country, and though Canadian workmen's unions pronounce themselves against such a policy, yet their present attitude savors very strongly of that which did so much damage to the trade of the British Isles.

A HUGE TRANSACTION.

IT has been definitely announced that the Montreal Rolling Mills Co. have purchased the properties and plant of the Pillow & Hersey Manufacturing Co., the purchase price said to have been $600,000. The intention is to enlarge and extend both concerns, although at present the combination makes the largest of its kind in Canada.

A new company will be formed, with Mr. E. S. Clouston, general manager of the Bank of Montreal, as president in place of Mr. Randolph Hersey, while the general manager of the rolling mills, Mr. William McMaster, will act in a similar capacity for the new company.

In this connection it may be mentioned that Mr. McMaster has been elected a director of the Dominion Iron and Steel Co. Although he refuses to confirm or deny it, rumor says that this is but the first step towards his becoming general manager of that company.

THE PROPOSED BUSINESS TAX.

IT is becoming more and more evident that the final decision in regard to the municipal tax bill now before the Ontario Legislature should be deferred until next year. The bill is undoubtedly an improvement over the existing law, but it is not perfect, and the more time that is given to the consideration of its provisions the more perfect will it necessarily become.

The business tax principle should be considered carefully in all its ramifications, as the bill is now considerably more exacting on some business men than on others. Hon. J. N. Gibson, the Attorney-General, is of the opinion that there is in the bill an inequality between the wholesaler and the retailer, and a deputation of retailers which was before the Special Committee of the Legislature the other day proposed that the tax should be 3 to 5 per cent. on retail merchants and 10 per cent. on wholesale merchants. On the other hand, as Mr. D. E. Thompson pointed out, there are retail merchants who are carrying on a more profitable business than many wholesalers. Undoubtedly this is true. A departmental store may be taken as a case in point.

There appears to be little or no opposition to the business tax in principle. The opposition is born of the method of applying it. It is to be hoped a solution of the defects in regard to this point will be found, so that the burdens of taxation will be equitably adjusted on all classes of business.

The bill now before the Ontario Legislature is based on the report of the assessment commission and in its preparation some of the best authorities on municipal taxation were employed. At the same time, however, it has its defects, and it is in view of this that we urge deferring its final adoption until the next session of the Legislature.

MAKING SALES.

IF a salesman believes in what he is trying to sell, if he knows exactly what he can claim for the article, he has a good chance to sell it. "Absolute confidence in your proposition provides the convincing argument without which you cannot succeed." The man who knows can convince others.

A salesman should always make a careful study of the articles he is required to sell, so that he may tell would-be purchasers the truth about them.

If he does not believe in what he is advocating, how can he convince others? If he does not know everything about it, how can he tell some one else?

Before people buy they want to know exactly what they are buying. If you cannot tell them they go to some person who can.

To be a good salesman one must be a good talker—good not meaning fluent only, but convincing. One may be fluent without being convincing, and it is the convincing argument that the salesman needs.

Things will not sell themselves. They must be talked up, and talked up well, before people take any notice of them.

BUILD YOUR OWN BUSINESS.

Every retail storekeeper should do his utmost to build up the business of his own town. He should be public-spirited, and be willing to assist in public improvement. He should be able to see importance in matters that do not directly benefit himself; he should realize that anything that helps to build up his own town, will, in the end, be helpful to him in his own business.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, May 22, 1903.

HARDWARE.

THERE has been a good movement in general hardware during the week and sporting orders of considerable magnitude continue a leading feature. Wire for fencing material continues in good request, while there is a noticeable movement in cut nails, wire nails, and also in harvesting implements. Horse-shoes have been advanced 25c. during the week, which is the only price change in general hardware of importance.

CANT HOOKS.—Trade is slow. We quote: No. 12, $10; No. 8, $11.50; No. 7a, $16; No. 6a, $14.50; No. 5a, $11.50.

AGRICULTURAL WRENCHES. — In moderate request. We quote: No. 6, $9; No. 8, $10; No. 10, $12; No. 12, $14; No. 15, $21; No. 18, $30; No. 21, $36. Discount, 70 per cent.

LAWN MOWERS.—Less complaints are heard about deliveries, and our quotations are as follows: 10-in. wheel x 12 in. cutter, $7.50; by 14-inch cutter, $8.00; by 16-inch do, $8.50; by 18-inch do, $9.00; by 20-inch do, $10.00. Star, 9-inch wheel by 12-inch cutter, $5.50; by 14-inch do, $5.75; by 16-inch do, $6. Daisy, 8-inch wheel by 12-inch cutter, $4.90; by 14-inch do, $5.10; by 16-inch do, $5.30. Philadelphia pattern, 7½-inch wheel by 10-inch cutter, $6; by 12-inch do, $6.50; by 14-inch do, $7; by 16-inch do, $7.50. Grass boxes are quoted as follows: 12-inch, $2.25; 14-inch, $2.25; 16-inch, $2.50; 18-inch, $2.50; 20-inch, $2.75. The discount on all the above is 50 per cent. off.

BARB WIRE.—Stocks are better assorted this week, and the movement is a noticeable one. We quote $2.80 per 100 lb. f.o.b. Montreal, and $2.67½ f.o.b. Cleveland. Carlots of 15 tons are quoted f.o.b. Cleveland at $2.45.

GALVANIZED WIRE.—A satisfactory movement is noted in this as in all other fencing material. We quote as follows: No. 5, $3.70; No. 6, 7 and 8, $3.15; No. 9, $2.55; No. 10, $3.20; No. 11, $3.25; No. 12, $2.65; No. 13, $2.75; No. 14, $3.75. In carlots, f.o.b. Cleveland: No. 5, $2.20; Nos. 6, 7, 8 and 9, $2.15; No. 10, $2.20; No. 11, $2.25; No. 12, $2.30; No. 13, $2.40; No. 14, $2.50. In less than carlots, 12½c. per 100 lb. extra is charged.

SMOOTH STEEL WIRE.—There is a fair inquiry. Quotations are: Bright and annealed, $2.50 per 100 lb. f. o. b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras per 100 lb. are now as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE STEEL WIRE.—Trade is fair at 25 per cent., with the following extras: 1 and 2-lb. hanks, 25c. per 100 lb.; ½ lb hanks, 37½c. and ¼ lb. hanks, 50c.

BRASS AND COPPER WIRE.—The discounts are unchanged at 60 per cent.

PRESSED SPIKES.—A fair trade is noted with discounts 20 per cent f.o.b. Montreal, Toronto, Hamilton, London, St. John and Halifax.

FENCE STAPLES.—Continue unchanged with a fair trade at $3 per 100-lb. keg for galvanized and $2.80 for bright, with 25c. extra for 25 and 50-lb. packages.

CUT NAILS.—There is a steady, quiet trade in these at $2.50 per keg.

WIRE NAILS.—The movement in these is fair, but jobbers have caught up to their orders now. Carlots are quoted at $2.40 and small lots at $2.45 per keg f.o.b. Gananoque, Montreal, London, Hamilton, Toronto, Brantford, Windsor, Ont., and St. John.

HORSE NAILS.—Quotations are unchanged and business is moderate. We quote as follows: "M" brand, "Oval" and "New City" heads, 55 per cent.; "Countersunk" heads, prices quoted on application. "C" brand, 40, 10 and 7½ per cent. off; "Monarch," 60 per cent. and "Peerless," 50 per cent.

HORSESHOES.—There is a fair trade in these and prices have been advanced 25 per cent. We quote: Iron shoes, light and medium pattern, No. 2 and larger $3.65; No. 1 and smaller, $3.90; snow pattern, No. 2 and larger, $3.90; No. 1 and smaller, $4.15; X L steel shoes, new, light pattern, sizes 1 to 5, No. 2 and larger, $3.80; No. 1 and smaller, $4.05; featherweight, all sizes, 0 to 1, $5.35; toe weight, all sizes, 1 to 1, $6.60. Shoes, more than one size in a keg, 10c. per keg extra f.o.b. Montreal only.

RIVETS AND BURRS.—In good request, with some sizes scarce. Prices are as follows: Best iron rivets, section carriage and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, with the usual proportion of burrs, 45 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes are quoted at 60 and 10 per cent. off list.

BOLTS AND NUTS.—Fairly active and steady. Quotations are as follows: Norway carriage bolts, 55 per cent.; common, 50 and 10 per cent.; full square carriage bolts, 55 per cent.; machine bolts, 50 and 5 and 10 per cent.; coach screws, 66 2-3 per cent.; sleighshoe bolts, 65 and 5 per cent.; blank bolts, 50 and 5 per cent.; bolt ends, 50 and 5 per cent.; plough bolts, 50, 5 and 10 per cent. Tire bolts, 67½ per cent.; stove bolts, 67½ per cent. Nuts, square, 3½c. per lb. off list; hexagon nuts, 3¾c. per lb. off list. To all retailers an extra discount of ½c. per lb. is allowed.

SCREWS.—The movement is still noticeable. We quote as follows: Round head bright, 82½ per cent.; flat head bright, 87½ per cent.; brass, round head, 75 per cent.; brass, flat head, 80 per cent.

SHOVELS.—Complaints still occur regarding deliveries from makers hands, but stocks are better than they were.

CORDAGE.—Prices are firmly held under a fair demand. We quote: Pure manila, 14c.; British pure manila, 11½c.; sisal, 11¼c.; double lathyarn, 10½c; single lathyarn, 10c.

BUILDING PAPER.—There is a fair movement in this. Our quotations are as follows: Tarred felt, $1.75 per 100 lb.; 2-ply, ready-roofing, 90c. per roll; 3-ply, $1.15 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 55c. per roll; tarred fibre, 60c. per roll, O K and I X L, 65c. per roll; heavy straw and sheathing, $30 per ton; slaters' felt, 60c. per roll.

FIREBRICKS.—There is a brisk movement in these. We quote: $16 to $22 per 1,000, as to brand, for English, and $17 to $22 for Scotch.

CEMENT.—Firmness is the rule in cement, and an active movement has been in progress during the week. Prices are as follows: Canadian cement, $1.90 to $2.25; German, $2.25 to $2.40; English, $2.15 to $2.25; Belgian, $1.70 to $1.95 per bbl. ex-store, and American, $2.20 to $2.40 ex-cars.

SHOT.—There is a fair demand for this line in a sorting way. We quote: Ordinary drop shot, A.A.A. to dust, $6.50 per 100 lb.; chilled Nos. 1 to 10, $7 per 100 lb.; buck and seal, $7.50 per 100 lb.; ball, $8 per 100 lb. Trade discount, 15 per cent. f.o.b. Montreal, Toronto, Hamilton, London, St. John, N.B., and Halifax.

POWDER.—Firm, with a fair inquiry at the recent rise.

METALS.

There is a good movement in metals, and since the wharf blockade was lifted an active business has been done in getting goods forward. There has been some reaction in the United States markets, but it has not been of a character to affect prices here which, as a rule, continue steady as last reported.

BAR IRON.—Stocks are now well assorted and a good business has been transacted during the week. We quote: Merchants' bar, $2; horseshoe iron, $2.25 and forged iron, $2.30.

BLACK SHEETS.—Jobbers are better supplied than they were and have been busy getting orders forward. We quote: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50; 8 to 20 gauge, $2.50.

GALVANIZED IRON.—Business has been quite brisk this week, getting goods forward. Our quotations are as follows: 28 Queen's Head, $4.50; Apollo, 10¾-oz., $4.30; Fleur de Lis, $4.15; Comet, $4.10; "Bell" brand, $4.05. For less than case lots, 25c. extra is charged.

LEAD PIPE.—There is a good demand for this at 8c. for composition waste and 7c. for ordinary, with 30 per cent. discount.

IRON PIPE.—In fair demand and unchanged. We quote: Standard pipe, per 100 ft., in lengths under 19 ft.: Black, ¼, $2.40; ⅜, $2.65; ½, $2.85, ¾, $3.65; 1-in., $5.20; 1¼, $7.35; 1½, $8.95; 2-in., $12.55. Galvanized, ¼, $3.20; ⅜, $3.45; ½, $3.85; ¾, $5; 1-in., $7.20; 1¼, $10.05; 1½, $12.20; 2-in., 416.85. Extra heavy pipe, plain ends, are quoted per 100 ft. as follows: Black, ½, $4.20; ¾, $5.25; 1-in., $7.55; 1¼, 410.55; 1½, $12.75; 2-in., $17.60. Galvanized, ½, $5.20; ¾, $6.65; 1-in., $9.55; 1¼, $13.25; 1½, $16; 2-in., $21.90. For threads and couplings on extra heavy 5 per cent. net is added. Trade discount, 5 to 7½ per cent.

TINPLATES.—There has been a brisk movement in these. Prices are unchanged at $5 to $5.25 for charcoal and $4.25 to $4.50 for cokes.

SOIL PIPE, ETC.—Remains as last noted. Discounts are as follows: Light soil pipe, 3 to 6-in., 50 per cent.; medium and extra heavy soil pipe, 2 to 6-inch, 60 per cent.; extra heavy soil pipe, 8-inch, 45 per cent.; light fittings, 2 to 6-inch, 50 and 10 per cent.; medium and extra heavy fittings, 2 to 6-inch, 60 per cent.: extra heavy fittings, 8-inch, 45 per cent.

PIG IRON.—While stocks are more liberal prices are steadily held at $21 to $21.75 for Summerlee, and $19 for Middlesboro'.

INGOT COPPER.—Continues steady but quiet at $15.50 to $15.75 per 100 lb.

INGOT TIN.—In moderate request and unchanged at $33 to $33.25 per 100 lb.

PIG LEAD.—Remains as last quoted at $3.50 to $3.75.

TINPLATES

OPEN HEARTH STEEL

STEEL.—There has been a fair business transacted. Prices follow: Mild, $2.05; sleighshoe, $2.10 to $2.20; tire, $2.15 to $2.25; spring, $2.85 to $3; reeled machinery, $2.75 to $3; toecalk, $2.60 to $2.75; machinery (iron finish), $2.10; ...l steel, $2.05; square harrow, $2.15.

TOOL STEEL.—Continues steady all round. We quote: Black Diamond, 8 to 9c.; Sanderson's, 8 to 9c., according to the grade; Jessop's, 13c.; Leonard's, 7½c.; Jonas & Colver's, 10 to 20c.; "Air Hardening," 50 to 65c. per lb.

CANADA PLATES.—In fairly active request and several sizes continue scarce, but supplies are near at hand. We quote: 52s, $2.60 to $2.70; 60s, $2.70 to $2.80; 75s, $2.80 to $2.85; full polished, $3.75 and galvanized, $4.25 to $4.35; galvanized, 60s, $4.45 to $4.55.

TERNE PLATES.—There is a fair inquiry for these on the basis of $7.75.

COIL CHAIN.—As last reported. No. 6, 11½c.; No. 5, 10 to 10½c.; No. 4, 9 to 9½c.; No. 3, 8 to 8½c.; ¼-in., 6½ to 7c. per lb.; 5-16, $5 to $5.20; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4; ½, $3.95 to $4.05; 9-16, $3.85 to $3.95; ⅝, $3.65 to $3.75; ¾, $5 to $5.20; ⅞, $3.30; 1-in., $3.15 to $3.25. In carlots an allowance of 10c. is made.

SOLDER.—Steady and in fair request at 20c. for bar and 19c. for wire.

ZINC SPELTER.—Continues unchanged at $6.25 to $6.50.

SHEET ZINC.—Fairly inquired for at $6.75 to $7.

SCRAP METALS.

Business in old material has been of fair volume and without any change in prices. We quote as follows: Heavy copper and wire, 10c. per lb.; light copper, 9c.; heavy red brass, 10c.; heavy yellow, 8½c.; light brass, 5c.; lead, 2 to 2¼c.; zinc, 2½ to 2¾c.; iron, No. 1 wrought, $17 to $17.50; No. 2, $7.50 per ton; machinery scrap, $17.50 to $18; stove plate, $13; malleable and steel, $6; mixed country rags, 60 to 70c. per 100 lb.; old rubbers, 6¼ to 6½c. per lb.

HIDES.

This market continues unchanged. We quote: No. 1 hides, 8c.; No. 2, 7c.; No. 3, 6c.; Calfskins, 9 to 11c.; sheepskins, 75c.; lambskins, 15c.

NOTES.

The Northern Iron Works Company had their entire plant destroyed by fire on Thursday morning last. The plant was new and they had the largest lathes in the West. Some 45 men were employed, and they had orders ahead for fully three months. The members of the company are all young men who started here three years ago in a very modest way and had made a surprising success of the business. The insurance was only about 25 per cent. of the value of the plant and the loss is over $15,000. Temporary buildings are being erected to complete the orders and in the meantime, the large new foundry, for which plans had been prepared, will be erected as speedily as possible.

ONTARIO MARKETS.

Toronto, May 22, 1903.

HARDWARE.

THE market is in much the same condition as has been the case for the past fortnight. Orders for prompt delivery are coming in steadily and are being filled as fast as jobbers can supply the goods. The railways are now taking better care of freight, and retailers in Northern Ontario and the Northwest are getting their shipments more promptly and in better condition. Manufacturers of screen doors, lawn mowers, garden and sheep shears, churns, washing machines, wringers, some sizes of nails, screws, bolts and nuts, hinges and wire netting are still behind their orders, so stocks of these goods are not large. There is no change in prices, except an advance of 25c. in horseshoes and an increase in the cost of handles. A new list price of the latter goods is now being issued. Soil pipe and fittings are steady since the recent advance. A firm market prevails throughout.

BARB WIRE.—A good trade continues. The base price is as follows: $2.25 from Cleveland and 10c. less in carlots. From stock, Toronto, $2.80.

GALVANIZED WIRE.—Business is fairly active and our quotations are as follows: Nos. 6, 7 and 8, $3.15 to $3.35 per 100 lb.; No. 9, $2.50; No. 10, $3.20 to $3.40; No. 11, $3.25 to $3.45; No. 12, $2.65; No. 13, $2.75; No. 14, $3.75 to $3.95; No. 15, $1.30; No. 16, $4.55. Nos. 6 to 9 base from Cleveland are quoted at $2.27½ in less than carlots.

SMOOTH STEEL WIRE.—A steady demand is noted. The base price is $2.50 per 100 lb. Oiling 10c.; coppering 60c.; and tinning, $2 per 100 lb. extra. Shipping points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

COIL SPRING WIRE.—The brisk trade keeps up. We quote: No. 9, $2.75; No. 11, $3.40; No. 12, $2.95. Freight up to 25c. per 100 lb. allowed on 500 lb. or over. Carlots of 15 tons, 5c. less, with freight up to 20c. allowed.

WIRE NAILS.—A good demand is reported, with stocks of some lines running short. Our quotations are as follows: Carlots, $2.40 and small lots, $2.45 per keg f.o.b. Gananoque, Montreal, London, Hamilton, Toronto, Brantford, Windsor, Ont., and St. John.

CUT NAILS.—A good business continues at $2.50 per keg.

HORSE NAILS.—A fair trade is doing. The prices are unchanged. Our quotations are as follows: "C" brand, oval head, 40 and 10 and 7½ per cent.; on "Monarch," 60 and 10 per cent. and "Countersunk" head," 60 per cent.; on "Peerless," 45 and 7½ per cent.

HORSESHOES.—An advance of 25c. is made throughout. A fair trade is doing. We quote, f.o.b. Toronto: Iron shoes, No 2 and larger, $3.80; No. 1 and smaller, $4.05. Steel, new light shoes, No. 2 and larger, $3.95; No. 1 and smaller, $4.20. Snow shoes, No. 2 and larger, $4.05, No. 1 and lighter, $4.30. If shipped from factory, 15c. less.

SCREWS.—Business keeps up well with stocks fair. Quotations are as follows: Flat head bright, 87½ per cent. discount; round head bright, 82½ per cent.; flat head brass, 80 per cent.; round head brass, 75 per cent.; round head bronze, 70 per cent.; flat head bronze, 75 per cent.

RIVETS AND BURRS.—A good demand continues. We quote: Iron rivets, 60 and 10 per cent. discount; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 per cent.

BOLTS AND NUTS.—Jobbers are having trouble in getting several sizes. Business keeps good. Quotations are as follows: Carriage bolts, common ($1 list), 50 and 10 per cent.; carriage bolts, full square ($2.40 list), 55 and 10 per cent.; carriage bolts, Norway iron, ($3 list), 55 and 10 per cent.; machine bolts, all sizes, 50, 5 and 10 per cent.; coach screws, cone points, 66 2-3 and 10 per cent.

BINDER TWINE.—Prices are reported to be stiffening, but there is no indication of change on this market at the moment. A good trade is doing. We quote: 650 ft., 13c.; 600 ft., 12c.; 550 ft., 11¼c.; 500 ft., 10½c.

CORDAGE.—Business active. We quote: Pure manila, 14c.; British pure manila, 12c.; sisal, 11½c.; double lathyarn, 11c.; single lathyarn, 10½c.; double shingle yarn, 11c.; single shingle yarn, 10½c.

SPADES AND SHOVELS.—Conditions are unchanged. Dealers are still pressing for deliveries, which are not easy to get in some cases. The discount is 45 per cent. and the list price has been reduced $3 per dozen for Old's goods, $2 for Gray's and $1 for Burns'.

LAWN MOWERS.—There is still a shortage. The prices are steady. We quote: Woodyatt, 12 in., $7.50; 14 in., $8; 16-in., $8.50; 18 in., $9; 20-in., $10; Star, 12-in., $5.50; 14-in., $5.75; 16-in., $6; Daisy, 12-in., $4.90; 14 in., $5.10; 16-in., $5.30; Ontario, 12-in., $14.25; 14-in., $15.80; 16-in., $16.80; 18-in., $18.90; 20-in., $20.50; Philadelphia, 12-in., $6.50; 14-in., $7; 16-in., $7.50. Discount, 40 and 10 to 50 per cent.

SOIL PIPE AND FITTINGS.—A good trade continues. It is noted that much of the demand is at the moment for Northern Ontario for summer hotel extensions. Prices are now steady, with the discounts quoted as follows: Light soil pipe, 45 and 5 per cent.; light soil pipe fittings, 50 and 5 per cent.; medium and extra heavy pipe and fittings, 55 and 5 per cent.; 7 and 8 in. pipe, 40 and 5 per cent.

BRASS GOODS. There is a good general demand for plumbing and steam specialties, particularly the latter. The discounts are unchanged.

BUILDING PAPER.—A good trade reported. We quote: Tarred felt, $1.75 per 100 lb.; 2-ply ready roofing, 90c. per roll; 3-ply, $1.15 per roll; carpet felt, $2.25 per 100-lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre 50c. per roll; tarred fibre, 60c. per roll, O K and I X L, 65c. per roll; heavy straw and sheathing, $30 per ton; slaters' felt, 60c. per roll.

SCREEN DOORS.—Now that trade is opening up well it is apparent that stocks are comparatively light. We quote: Screen doors, common, 2 or 3 panel, walnut stained, 4-in. style, $6.80; stained, yellow or green, $7; in natural colors, oil finish, $8.15; 3-inch style, 20c. per dozen less.

PLUMBING FIXTURES.—Jobbers are having difficulty in keeping up their stocks of earthenware plumbing goods, particularly closets. There is a good demand for all lines. Prices are steady.

FORK HANDLES.—List prices have been changed throughout and the new list carries a discount of 50 per cent.

CEMENT.—As anticipated the market has strengthened materially, an advance of 10c. being noted throughout. We quote in carlots, Toronto, as follows: Canadian Portland, $2.50; German $2.40 to $2.50; English, $2.30 to $2.50; hydraulic, $1.50. Small quantities are 15 to 25c. higher.

PETROLEUM.

The market is quiet. There is some cutting in Canadian grades but the best American oil is reported steady. We quote: Lily White, Canadian, 18c. in bbls.; Silver Light, American, 19½c. in bbls.; Crystal Spray, water white, American, 21c. in bbls.; Pennoline, best American imported, 22c. in bbls. In bulk, 2c. less.

METALS

The market shows an easier tone throughout. Practically all metals, except possibly steel, are lower on outside markets. Pig iron is arousing most widespread attention, as the enormous production and import has caught up to the consumption in the United States and prices are being reduced to meet the aggression of British dealers. Contracts are now being made for the last half of the year and as it is pointed out that fully 95 per cent. of the business done during the last six months was booked prior to last December at considerably lower prices than now prevail, buyers are now waiting till prices are at a lower level once more before making large contracts. The past fortnight has witnessed a reduction of $1, but business will not be secured, it is believed, until further reductions are made. The English market shows signs of responding to the lower prices in the States, and it is probable that the Canadian market will be affected in a similar degree, though no change is yet reported. Bar iron is scarce here and English brands are coming in freely to fill orders. Tin and copper are fluctuating as much as ever on the London and New York markets, the week showing a decline of £1 in tin and 15s. in copper. There is no change here, a quiet, easy tone being manifest.

PIG IRON.—A reduction of 50 to 75c. in Pittsburg has followed last week's decline and prices are easier here in sympathy with the general weakness. A good spot business is doing at steady figures, but few contracts are being booked. Our quotations are as follows: No. 2, $22.50 to $22.75; No. 2 Summerlee, $25 on track, Toronto.

BAR IRON.—English bar iron has been offered rather freely and prices are somewhat easy, though Canadian mills are having all the business they can take. We quote as follows: Base price is $2.05. For extras, cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft., by special agreement, according to length and size.

STEEL BOILER PLATES.—A steady trade is doing with the base price still $1.96 f.o.b. Toronto.

TOOL STEEL.—A big business is doing with prices firm: "B C" and "Black Diamond," 10 to 11c.; Jessop's, Morton's and Firth's, 14c.; Jonas & Colver's, 10 to 20c.; ditto, "Air Hardening," 70c. per lb.; Chas. Leonard's, 8 to 9c.; Park's "Silver," 12 to 14c.; Park's "Special," 15 to 20c.

MACHINERY STEEL.—The activity continues, with prices firm at $2 to $2.05 f.o.b. Toronto.

STEEL BOILER PLATES.—There is still a good movement. Prices are steady at $1.96 f.o.b. Toronto.

BLACK SHEETS. A good demand continues. We quote: Common, $3.15 for 28 gauge and dead flat, $3.50 for 26 gauge.

CANADA PLATES.—Stocks have been light, but shipments are now coming forward from Montreal. Prices are steady. We quote: All dull, $2.90 to $3; half

polished, $2.85 to $3.10 and all-bright, $3.75 to $3.85.

GALVANIZED SHEETS.—A good trade is doing. Prices are unchanged throughout. We quote: Queen's Head, $4.50 for 28 gauge; American, $4.40 for 24 gauge; Bell brand, $4.30 for 28 gauge; Gordon Crown, $4.50 for 28 gauge.

TIN.—Prices are unchanged locally, though the fluctuations of the week have resulted in a net decline of £1 in the English market. We quote $33 to $35.25.

TINPLATES.—The demand from stock is fairly active. Prices are steady. We quote: Charcoals, $4.75 to $5 and cokes, $4.25 to $4.50 per box.

COPPER.—The demand for both ingot and sheet continues good. Prices are steady. We quote: Ingot copper, $15 and sheet copper, $21 to $22 per 100 lb.

BRASS.—Unchanged in price and in good demand. Discount, 10 per cent.

LEAD.—The market is firm with a good business doing. We quote: $3.50 per 100 lb. for pig lead and $3.75 for bar lead.

IRON PIPE.—A particularly good trade is reported by some houses. The prices are steady. We quote as follows: Per 100 ft.: Black pipe, ⅛-in., $3.25; ¼-in., $2.40; ⅜-in., $2.65; ½-in., $2.85; ¾-in., $3.65; 1-in., $5.25; 1¼-in., $7.35; 1½-in., $8.95; 2-in., $12.55; 2½-in., $21; 3-in., $25; 3½-in., $32; 4-in., $38.

ZINC SPELTER.—An active demand is reported with stocks still light. Prices are firm at 6¼ to 6½c. per lb.

ZINC SHEETS.—The activity continues. We quote the base price as follows: Cask lots, $6.75 to $7 and part casks, $7 to $7.25.

SOLDER.—In good demand. Prices are unchanged. Guaranteed half-and-half is quoted at 18 to 19c., and wiping 17 to 18c.

OLD MATERIAL

The demand in this line shows a slight decrease, and buyers expect a weakening of prices on many articles. Scrap zinc is quoted this week ¼c. lower in price, and old rubbers are also ¼c. easier. Other prices as yet remain steady at last week's

WILL IT PAY?

Every business transaction is weighed by one standard.

Will it Pay?

If you handle *oil of any kind* and are considering the purchase of a

BOWSER
Self-Measuring
OIL TANK

Let us ask you a few questions:

Is it worth 10 cents a Day to handle your oil without waste?

Is it worth 10 cents a Day to sell your oil without loss of time and labor?

Is it worth 10 cents a Day to have no leaky, dirty measures and funnels to handle?

Is it worth 10 cents a Day to keep your oil room neat and clean?

We might propound a hundred questions equally as pertinent. If any one of these is worth 10 cents a day, is not the combination of the many worth more than the cost of a **Bowser Self-Measuring Oil Tank**, which will give you all these advantages?

Let us give you full particulars. **Ask for Catalogue "A."**

S. F. BOWSER & CO., Factory FORT WAYNE, IND

quotations, as follows: Heavy copper and wire, 11½c. per lb.; light copper, 10c. per lb., heavy red brass, 10½c. per lb.; heavy yellow brass, 8½c. per lb.; light brass, 6c.; lead, 2½c.; scrap zinc, 3¼c.; iron, No. 1 wrought, $11 per net ton; No. 2 wrought, $5; machinery cast scrap, $16; stove plate, $11; malleable and steel, $7; old rubbers, 6¼c. per lb. and country mixed rags, 50c. per 100 lb.

SEEDS.

There is still a little doing on the seed market. A few small orders are being filled by dealers. The season is, however, practically over. Prices remain firm at quotations of last issue. We quote as follows ex-warehouse here: Red Clover, per bushel, $6 to $7.80; alsike, per bushel, $4.80 to $8; timothy, per bushel, $2 to $2.75.

HIDES, SKINS AND WOOL.

The only thing to be noticed on this market is the slight weakening in fleece wool. The price has dropped 1c. per lb. All other prices remain firm at last week's quotations. We quote:

HIDES.—No. 1 green, 7½c.; No. 2 green, 6½c. per lb.; No. 1 green, steers, 8c.; No. 2 green, steers, 7c. per lb.; cured, per lb., 7¾ to 8¼c.

CALF SKINS.—Veal skins, No. 1, 6 to 14 lb. inclusive, 10c.; No. 2, 8c.; No. 1, 15 to 20 lb. inclusive, 9c.; No. 2, 7c. Deacons (dairies), each, 60 to 70c.; sheepskins, 40c. to $1.10.

WOOL.—Unwashed wool, per lb., 8 to 9c.; fleece wool, 15 to 16c.; pulled wools, super., per lb., 15c.; extra, 18c.

TALLOW.—We quote 5½ to 5¾c. per lb.

NOTES.

Horseshoes are 25c. dearer throughout.

Scrap zinc and old rubbers are ¼c. lower.

A new list on fork handles has been issued by the manufacturers.

The B. Greening Wire Co., Limited, of Hamilton and Montreal, have just received a large shipment of ½-in., ¾-in. and 1-in. galvanized netting, in all widths, and can now fill orders promptly.

MANITOBA MARKETS.

Winnipeg, May 18, 1903.

A STEADY market without much change. Pig lead and zinc have been advanced ½c. per lb. Porcelain door knobs have advanced from $1.10 to $1.15.

The price list for the week is as follows:

Barbed wire, 100 lb.		$3 25
Plain twist		3 25
Staples		3 65

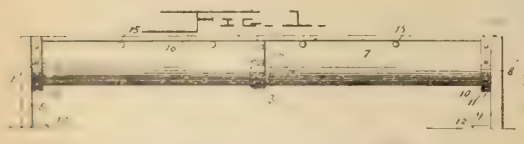
HOG AND FEED TROUGHS.

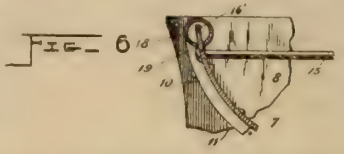
W. Gordon, Tweed, Ont., is offering to the Canadian trade a hog trough which is claimed to be practically indestructible. The desirable points in a hog trough are



that they should be so constructed that hogs could neither chew nor break them. After considerable study it has been found that steel is the best metal for this purpose.

The body of the troughs sold by Mr. Gordon is made of steel boiler-plate; the ends of heavy cast-iron, with a flange (see Fig. 5) to which the steel body is riveted. Cross-bars of ¾ bar-iron are placed every 12 inches and riveted through the sides. This not only strengthens the trough but prevents hogs from either crowding each other or lying in the trough (see Fig. 1).

A piece of wrought-iron pipe is slotted by a special machine and driven on edge of body and riveted through. This makes a very strong edge, and one that the hogs cannot hurt, as well as a very neat round edge (see Cut 6). The body of the trough is round, so if whey freezes in it it can do no harm. A good feature about the trough is that it is made any length to fit pen. One 3 feet long weighs 40 pounds, so they have weight as well as lasting power. They are fully warranted, so that retailers have behind them the maker's guarantee. Write for further particulars.



AN IMPORTANT ANNUAL MEETING.

THE joint annual meeting of the shareholders of The Dominion Iron and Steel and Dominion Coal Companies was held in Montreal on May 13. Senator Cox, vice-president, presided in the absence of the president, James Ross. The annual statement of The Iron and Steel Companies is as follows: Earnings of coal department for ten months, $1,977,323.10, less ten months' rental, $1,333,333.33, leaving net earnings of $643,984.77. The earnings on the steel department were, for eight months, $309,336.90, making a total of $953,881.67. The bond and general interest charges for eight months, with sinking fund, made a total of $410,935.45, leaving the net earnings $542,946.45. After paying preferred dividends for eight months, there was a surplus of $309,612.88.

The total assets of the company are placed at $38,505,567. Capital expenditure on steel works is put at $864,626.46 for eight months and on coal, $641,260.97 for one month, which, with other expenditure credited to capital, brings a total for both companies to $1,730,887.43.

The coal statement shows as follows: Ten months' rental, $1,333,333.33; interest, $28,007.73, a total of $1,361,341.11. Dividends, interest on bonds and expenses were $1,296,481.11, leaving a balance of $64,859.88. The sinking fund for ten months was $130,824.50.

The result of the operations of the company so far was to prove that its plant is able to produce pig iron and steel which meets the most exacting requirements of its customers. These include nearly all the important manufacturing plants in Canada and some of the largest locomotive works and plate mills in the United States.

One million cigars were recently shipped from Ybor city, Tampa, in a single day.

WIRE AND WIRE NAILS IN THE STATES.

NOT much new business is being placed, but prices are being firmly held. We quote: Wire nails, carload lots, to jobbers, f.o.b. cars, Pittsburg, $2; plain wire, carload lots, $1.90, barb wire, carload lots, $2.30; staples, carload lots, $2.20. Galvanizing, 35c. extra. Carload lots to retailers are held at 5c. advance in all lines, and on less than carload lots a further advance of 10c. is charged. Steel cut nails are quoted as follows: Carload lots, $2.15, and less than carload lots, $2.20, f.o.b. Pittsburg, plus freight to point of destination. Iron cut nails are $2.25 in carload lots and $2.30 in less than carload lots. Terms, 60 days, less 2 per cent. off in ten days.—Iron Trade Review.

STEEL RAIL SITUATION.

An unprecedented production of pig in April was accompanied by a decrease in furnace stocks, testifying to vigorous consumption and wholesome conditions in the steel industry. It is not surprising that a somewhat easier tone is noticed, however, because the scarcity of fuel earlier in the season had retarded output and forced quotations above normal, especially on prompt shipments. According to The Iron Age, the weekly capacity of pig iron furnaces in blast on May 1 was 383,897 tons, far eclipsing all previous high-water marks, and this liberal rate of production naturally tends to prevent any inflatation of quotations. On the other hand, there is no foundation for sensational reports of extensive reductions in price of billets, which are in greater demand than supply, imports constantly arriving, while rail mills have been transferred to the making of billets. This is not due to any excess of steel rails, as evidenced by production engaged far in advance and the rejection of orders from foreign railroads.—Dun's Review.

THE UNITED STATES IRON TRADE.

Now that the iron trade has come to the point of normal manufacture and delivery of iron and steel products, the experience is so new that there is some disposition to accept it with misgivings. If inability to do business is a condition to be desired, there is ground for dissatisfaction with the change. In the past week reports have had currency indicating that some in the trade have run ahead of events and allow no intermediate ground between the feast and the famine condition. Easier deliveries prevail in most finished lines, as compared with the winter months and there is increasing freedom in coke shipments. In pig iron lower prices have been named for foundry grades. These are the facts on which a good deal of pessimistic rumor has been built. The associated southern furnaces appear to be doing little business, but outside furnaces have named lower prices on the small tonnage that has been closed, and small though it is it makes the market. The association furnaces appear willing to let the smaller interests develop the situation and take such business as now offers, their expectation being that when the real buying comes the iron of the former will move at a price determined by conditions then existing.—Iron Trade Review.

A DEPRESSED TIN TRADE.

The opening London cables report a depressed market, with the large operators who did so much business yesterday inactive, and some small selling for all positions being done by some of the smaller London traders. Offers for East-Indian shipments continue to be made by London houses, but no offers reach this market direct from the Singapore and Penang exporters, and this continues a puzzling feature of the situation. Good authorities in the East, again in reply to inquiries, cable the exports of tin from the East Indies this year will not exceed late year's shipments. Market here continues very quiet, and except that there is quite a little inquiry from the carload buyers (consumers) there is nothing to say and very little life to the market and absolutely no speculation. It is, we think, safe to say not a ton of tin for speculators is being carried in this market, and it is the first time in years, we think, that this could be said. The consumption of the country is proceeding at a very high level as far as we can trace, and the reason for the few new purchases being made by consumers is that they have for 30 days been getting large deliveries on old purchases and are making no new purchases. The consumers of this country have not for over a year, in our opinion, had as few future supplies bought as to-day, and they are not likely to change their attitude until forced to do so by their actual requirements, or until the foreign markets give some indication of what may be expected in the future. Meanwhile the tin market here is absolutely being influenced by the London speculation, and is satisfied to watch for developments.—American Metal Market, May 19.

TINPLATES IN NEW YORK.

The situation is unchanged. Scarcity on spot continues and mills continue to disappoint buyers on deliveries on old contracts. All producing interests are behind in deliveries and especially the independent tinplate mills.—American Metal Market, May 19.

PAINT, OIL AND BRUSH TRADES

A LARGE PAINT ESTABLISHMENT.

THE firm of P. D. Dods & Co. was established many years ago and to-day ranks among the largest and most successful paint and varnish manufacturers in Canada. Their factory is situated on St. Patrick street, Montreal, and is modern and up-to-date in all departments. On the ground floor two machines are constantly at work making white lead. These are capable of turning out seven tons per day, and are provided with patent ventilators, which draw off all the odor, so that the operator finds no ill effects from his work. Putty is also made in this department and in the rear are large drying kilns in which the different ingredients are dried. On the next flat are the grinding and mixing machines, where the "Island City" house and floor paints are prepared. In another department, on the same flat, the paints are put in tins of different sizes, labelled, and ready for the market.

Upstairs, again, the colors are mixed in large tanks, some 15 in number, and large quantities of material are stored here which are required in the manufacture of the brands the firm make.

A number of girls are constantly employed making sample cards, which are very handsomely gotten up for distribution amongst their customers throughout the Dominion.

In another section, which is in rear of the main building, the different grades of varnish are manufactured, and in a large warehouse many thousand dollars worth of fine carriage and house varnish is stored. Great precautions against fire are taken all through the buildings, a system of sprinklers being in use throughout, and the firm will spend several thousand dollars shortly in installing a more complete system of fire protection. The firm employ numerous travellers in all sections of the Dominion, and their business is increasing rapidly. They have a branch house in Toronto where a complete stock is constantly on hand. Mr. Tougas, the popular head of the firm, is a gentleman of large experience in the paint business, having spent part of his life in the manufacture and sale of the product and is thoroughly practical and up-to-date in all his methods. The offices and warehouse are at 199 McGill street, Montreal.

MARKETING GOODS SUCCESSFULLY.

There are many to-day in business who are quick to complain of the keen competition in all lines. They are also willing to agree that times are not what they used to be, and they find it hard to take a glowing view of modern business conditions. But there are two sides of the question. To-day let the manufacturer make an up-to-date article, possessing merit, introduce it right, and he will find that a live sale awaits it. And he can make more sales in a week under modern conditions than his co-worker in the same line of a few decades ago could in a year. As an instance of this: John Lucas & Company, the paint manufacturers, recently placed on the market a splendid article for removing old varnish and paint. They introduced it to their trade ("Hardware and Metal" was one of the mediums used) in an up-to-date manner by good advertising. The merit of the article was recognized at once and they report that they are filling orders for tremendous quantities of this one product in all parts of the country. This looks as if there is business to be had to-day - and lots of it for the manufacturer who is the first to see and place upon the market the requirements of his trade.

PAINT AND OIL MARKETS.

MONTREAL.

THERE have been no changes in the price of white leads here, though many traders consider that an advance of some kind is warranted. In turpentine the market continues weak, as there has been a further decline of 3c., making 13c. in the fortnight, and the tendency is still somewhat unsettled. Linseed remains as last quoted. The movement of business has been fairly satisfactory, though jobbers' mails from travellers this week complain that the excessively dry, dusty weather is interfering with the consumptive movement of paints to some extent. We quote:

GROUND WHITE LEAD.—Best brands, Government standard, $5 to $5.25; No. 1, $4.27½ to $4.87½; No. 2, $4.40 to $4.50; No. 3, $4.02½ to $4.12½; No. 4, $3.65 to $3.75, all f.o.b. Montreal. Terms, four months, or 3 per cent. off for cash in 30 days.

DRY WHITE LEAD.—$4.75 in casks and in kegs, $5.

DRY WHITE ZINC.—Pure dry, in casks, 6¼c.; in 100 lb. kegs, 6¾c.; No. 1, zinc, in casks, 5¼c.; in 100-lb. kegs, 5¾c.

WHITE ZINC (ground in oil)—Pure, 25 lb. irons, 8c.; No. 1, 7c.; No. 2, 6c.

PUTTY.—We quote: Bulk, in barrels, $1.60; bulk, in 100-lb. packages, $1.85; bladders, in barrels, $1.90.

ORANGE MINERAL.—Casks, 7c.; 100-lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD.—Genuine red lead, in casks, $4.50; in 100-lb. kegs, $4.75; in less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50 and smaller quantities, $5.50.

LITHARGE.—Ground casks, 5c.; in less quantities, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 1 to 4 bbls., 59c.; boiled, 62c.; raw, 5 to 9 bbls., 58c.; boiled, 61c. Terms, net cash in 30 days. Delivered in Ontario, between Montreal and Oshawa, at 2c. per gallon advance.

TURPENTINE.—Single bbls., 72c.; 2 to 4 bbls., 71c. Terms, net cash in 30 days.

BENZINE.—25 to 26c.

SHELLAC VARNISH.—Pure white, $2.20 to $2.35; orange, $2.10 to $2.25.

MIXED PAINTS.—$1.20 to $1.40 per gallon.

CASTOR OIL.—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL.—48 to 50c.

COD OIL.—35 to 37½c.

PURE CANADIAN PARIS GREEN.—Petroleum barrels, 15¼c. per lb.; arsenic kegs, 15½c.; 50 and 100-lb. drums, 16c.; 25-lb. drums, 16½c.; 1-lb. packages, 17c.; ½-lb. packages, 19c.; 1-lb. tins, 18c.; ½-lb. tins, 20c.

PURE ENGLISH PARIS GREEN.—Petroleum barrels, 14½c.; arsenic kegs, 14½c.; 50 and 100-lb. drums, 15c.; 25 lb. drums, 15½c.; 1-lb. paper boxes, 16c.; 1-lb. tins, 17c.

TORONTO.

The market is in practically the same condition as a week ago. Turpentine has steadied in Savannah, but stocks in Canada are large and competition is keeping prices down to close figures. Linseed oil continues strong, but no change has yet been made. White lead and paris green are still being sold underneath the market. The demand for paints and varnishes is exceptionally brisk, while sales of sun

TURPENTINE.—Single bbls., 72 to 74c.; 2 to 3 bbls., 75c. delivered. Toronto, Hamilton and London, 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c. and 10-gallon packages, 80c. will be charged.

WINDOW GLASS.

MONTREAL.

Stocks being better assorted there has been a good movement since last report from jobbers' hands. Prices generally, are steady. We quote as follows: First break, 50 ft., $2; second, $2.10 for 50 ft.; first break, 100 ft., $3.80; second break, $4; third break, $4.50; fourth break, $4.75.

GLYCERINE AS A BY-PRODUCT.

An important article obtained from fat is glycerine, which is brought into commerce as a refined or distilled glycerine, or as an element in glycerine soaps, toilet preparations, roller compounds, etc., says an exchange. Glycerine was once a waste article produced in the manufacture of candles from palm oil. It was found necessary to abstract this substance, as it caused an unpleasant smell when the candles were burning. This substance was allowed to run into rivers, the loss per week at some factories being estimated as high as $2,000. This loss has been eliminated since the valuable qualities of the by-product became known. The application of glycerine in medicine and for technical purposes has made it important to extract and purify this article, and now its value, compared with other fat constituents, is great.

A NEW LIST ON REVOLVERS.

Smith & Wesson, Springfield, Mass., manufacturers of revolvers, have issued a new price list of their firearms for dealers, dated May 1, superseding the previous list of January 1, 1903. The radical departure in this, as contrasted with former issues, is the making of a uniform list for any length in each model, instead of separate prices according to the length of barrel. This means, according to Iron Age, an advance of from 25c. to $1.25 on the bulk of this product with rubber stocks, the advances in revolvers with pearl and ivory stocks being still greater.

FAITH AND PROGRESS.

Don't plume yourself on your incredulity. Doubts are not angels—they are often enemies, remarks an exchange.

Progress depends upon confidence—not disbelief. Cyrus Field was called a crank when he suggested the Atlantic cable, but he was a crank that turned a good many false ideas around. Marconi was laughed at by the wise scientists when he promised to speak across the earth in simple vibrations without visible medium! But now we stand in awe before the revealed power of new laws.

Don't be too slow to accept the New. At least be unprejudiced enough to receive; for you will need great faith in the years just ahead, which promise to unfold marvels hitherto undreampt of, or denied with the scorn of ignorance.

This is the age of Truth, and of its wonders. They are with us. Prepare ye to believe!

MANUFACTURERS LONDON ENGLAND

FOREST CITY GOSSIP.

Office of "Hardware and Metal."
365 Richmond street, London, Ont.

IT is quite refreshing to see the general activity of the wholesale hardware houses. Every firm is busy with orders, both from travellers and by letter from their customers. Builders' materials are the lines that are in best demand, although other general shelf and heavier lines come in for their share.

* * *

Your correspondent to-day made a special visit amongst the plumbing trade, but few master plumbers were to be found at their shops. Nearly all were out looking after contracts upon which they are engaged, both in and around the city. The complaint is common that good tradesmen in this line cannot be got, and the bosses, bookkeepers, clerks, in fact, all hands and the cook, have to tumble in and help out the unusual rush that the abnormally fine warm early season has brought.

* * *

All buildings have been started earlier than usual, and in consequence, the necessary hardware, paints and varnishes, etc., to complete these are being purchased at an earlier time of the year than heretofore.

* * *

Gangs of men in the employ of the city are taking advantage of the warm weather and fine dry nights to lay some miles of granolithic sidewalk within the city. No more wooden sidewalks are to be laid in London, and many new streets recently opened out and being built up are all petitioning for the up-to-date modern sidewalk.

* * *

The McClary Manufacturing Co. management made an effort to have their new shops in operation so that an opening of a notable character might take place on Victoria Day. The effort, however, failed. Now it is felt that all will be in readiness for a celebration on June 6. The occasion will be made very pleasant to all concerned. The opening of this immense new plant will be good cause for congratulation in the Forest City.

* * *

One of the London dailies advertises a prize competition of $10 and $5 for the best original and novel idea for an event in the sports programme of the commercial travellers' picnic. Now then, reader!

* * *

Temperature on the 20th was only 88 in the shade, and there's some talk of raising the price of coal again. Queer!

W.H.L.

RAILROAD THROUGH GALILEE.

The following has been received from U. S. Consul G. Bie Ravndal, of Beirut, under date of April 14, 1903:

The Ottoman Government has bought the English concession for a line of railroad from Haifa to Damascus. It is intended to build a railway through Galilee to Mzerib, by way of Beisan, connecting at Mzerib with the Damascus Mecca line. On the 5th instant five German civil engineers, employed by the Turkish Government, arrived in Haifa, and on the 11th the vali of the province of Beirut unveiled a monument in commemoration of the beginning of operations. The estimated cost of this line from Haifa to Mzerib, by way of Beisan, is $2,000,000. It is to be a narrow gauge line (about 40 in. in width). The Damascus Mecca line has now reached a point east of the Dead Sea. I have reason to believe that this railway, instead of running to the Hejjaz, including Medina and Mecca, will take from Ma'an a southwesterly direction straight to the Gulf of Akaba in the Red Sea. While the line will be built for strategical purposes, it can hardly fail gradually to develop the trans-Jordan country—hitherto another Tibet—by bringing it into touch with the outside world.

MEN AND HOMES WANTED.

With the increase of prosperity Canada is finding a great need of artisans just now. Along with this comes the demand for more homes. Towns and cities that had homes enough for normal conditions are finding a difficulty to house the numbers seeking homes among us.

Adam Taylor, of the Taylor-Forbes Co., Limited, Guelph, Ont., was in Toronto on Saturday last, and in speaking of their city, stated that there was a great demand for men, his firm needing fully 20 more, and another foundry required about 30. When asked as to what class of help was wanted, Mr. Taylor said that while skilled labor was preferable, good reliable handy men would suit. Mr. Taylor was endeavaring to get men while in Toronto. He has faith in Guelph and believes that there is a first class opening there for the investment of capital in erecting homes for the workmen. Not less than 50 houses would meet the requirements.

BUSINESS CHANGES.

The Macdougall Hardware Co., Limited, Montreal, has obtained a charter.

A. E. Perkins, founder, Ottawa, has admitted his son into partnership; the style is now A. E. Perkins & Son.

The Dominion Wrought Iron Wheel Co., Toronto, has removed to Orillia.

QUEBEC.

The Maisonneuve Engine Works, Maisonneuve, have been registered.

The Quebec Nail Manufacturing Co., of Quebec, have been registered.

Henault & Macdonnell, cutlery manufacturers, Montreal and Maskinonge, have been registered.

MANITOBA AND NORTHWEST TERRITORIES.

Mrs. A. S. Stockwell, the hardware merchant, Estevan, has admitted N. T. Kerr as partner.

Gunn & Baker, hardware merchants, of Minnedosa, have given up business at that place.

The Northern Iron Works, Winnipeg, have been burned out.

NEW BRUNSWICK.

Armstrong Bros., foundry, St. John, have sold out to T. McAvity & Sons.

"There is a tide
"in the affairs of men
"which taken at the flood
"leads on to fortune."
—Shakespeare.

THE STORE IS STAMPED AS THE MOST SUCCESSFUL IN TOWN

CHAT

The Brandon, Man., Hardware Company will spend $10,000 in enlarging their premises this summer.

The tinsmiths of McLellan, McFeeley & Co., Vancouver, are asking for 37½c. per hour for an eight hour day, but the firm have refused to grant the request.

Winnipeg bicycle men are forming an association for the regulation of prices.

J. F. Dandy, hardware dealer, Winnipeg, is enlarging his store premises.

Henry Glazier, who has for some time been employed in John Gardiner's tinsmith shop, has accepted a position with Haines & Wylie, hardware merchants, Oxbow, N.W.T.

Frank Hoar, recently employed in Dunstan's hardware store, Bowmanville, Ont., has accepted a position with F. A. Hoar hardware dealer, Oshawa.

W. R. Singleton, tinsmith and hardware dealer, Carleton Place, Ont., has disposed of his hardware stock to H. W. Denyes.

H. Golding, Wolseley, Man., has removed to Egypt, Man., where he will start a hardware store.

The council of St. Henri, Que., are considering a by-law to interdict the use of commercial stamps, coupons, receipts or other acknowledgments to be redeemed by third parties. It will probably be passed.

CHATHAM BINDER TWINE CO. SOLD

M. J. Wilson and Geo. McGarvin, of Chatham, Ont., are organizing a strong company and have purchased the plant and business of The Chatham Binder Twine Co., outbidding The Deering Harvester Co., Chicago, who also made an offer for the works. The purchase price is understood to have been $21,000. The new company propose to start operations by June 1, and as the machinery and equipment are in excellent condition, a busy season is anticipated. Mr. Wilson will be manager of the new company.

HONORS FOR FRED F. QUINN.

Fred. F. Quinn, who, for the past year has been engaged in the hardware business in Chatham, Ont., in partnership with A. B. Patterson under the style of Quinn & Patterson, has sold out his interest in the business to Mr. Patterson and has decided to leave for the Northwest.

Before his departure from Chatham Mr. Quinn was tendered a banquet by the leading citizens of the town, when many toasts to him were given and many addresses delivered, expressing the goodwill of all and the hope that he might be as useful and as appreciated in the Northwest as he had been in Chatham. Genuine regret was shown by all that the town was losing Mr. Quinn, as he had been identified with practically every movement calculated to advance the interests of the town.

MONTREAL Proprietors TORONTO

HEATING AND PLUMBING

Plumbing and Ventilation of the "King Edward" Hotel.

THE Bennett & Wright Co., Limited, 72 Queen street east, Toronto, are among the oldest established firms in the plumbing and heating business in Toronto. During their long business career they have installed many of the most extensive plumbing, ventilating, heating, lighting and sprinkler systems in Toronto, and, in fact, throughout the Dominion.

The fitting of the Toronto City Hall and other large contracts has been carried out by this firm, yet, despite all the works completed by them, they point with justifiable pride to their work in the new "King Edward VII." Hotel, Toronto, which is at once artistic in arrangement and perfect in workmanship.

The minutest detail has been studied, not alone in placing the different fixtures, but in the thorough sanitation. With so great a number of fixtures to be installed this was no small task and would have been a difficult matter for a firm of less experience. One cannot give an elaborate description of the various fixtures and can only give an outline of the system

The firm had to have a new sewerage system put in, extending from Church street to Colborne street, to connect with the hotel drainage. This sewer is of tile to the building, and is 12 in. in diameter The entire drainage system inside the building is of heavy cast iron, starting at 12 in. and reducing to 4 in. in diameter. This is well equipped with a cleaning out arrangement; there are no less than 36 soil pipe stacks of 4 and 6 in. in diameter, extending from the drain up through the roof with open ends. Each stack is fitted with a cleaner, placed directly above the basement floor.

The lavatories and toilet rooms are very conveniently distributed, and are of such a number as to provide ample accommodation for the large number of guests and help.

The main lavatory for gentlemen is situated on the ground floor, in which there are no less than 21 water closets of the "King Edward" syphon jet style, which are fitted with the "Ivanhoe" flushometer valve, and are supplied from large tanks placed on the top floor Each line coming from the tank is controlled by a separate valve. There are in this lavatory nine "Eclipse" urinals, each of the closets and urinals having a separate vent, which is connected with the main ventilation shaft. This insures pure air at all times in the lavatories.

There are also 14 lavatories fitted with the "Gallea" pattern self-closing taps. These taps are fitted with porcelain tops, imported from England, and have the firm's name embossed thereon. The lavatory, urinals and closet stalls are of Italian marble, fully 8 ft. high.

The barber shop, which is most elaborately and artistically arranged, is fully equipped with plumbing fixtures and has four lavatories surrounding a large column two front and two back. These are fitted with a complete outfit of Fuller taps, shampoo taps supplying hot and cold water, tumbler holders and nickel plated waste pipes. The whole room is finished in onyx, fully 8 ft. high, and is plentifully supplied with bevel glass mirrors, presenting in every way a very attractive appearance. Adjoining the barber shop is a lavatory finished in red Tennessee marble, containing a bath, closet and urinal.

The ladies' reception room is also situated on the ground floor on the west

KING EDWARD HOTEL—TOILET ROOM IN CONNECTION WITH SUITE OF ROOMS.

RAMSAYS PAINTS

You all make money when you handle a paint like that. It's a money-making paint because it stands on houses through rain and storm and all sorts of weather.

It's a Canadian paint for Canadian homes, made with just the proper ingredients to make paint right.

Suppose you leave cheap paints alone and pay us a fair price for a high-grade paint, and yet as low as you pay for many cheap paints!

Try it!

AUER LIGHT CO., 1682 NOTRE DAME ST., MONTREAL.

KING EDWARD HOTEL—MAIN LAVATORY, 21 W.C. STALLS.

side, and has a well equipped toilet room, fitted with closet and lavatory.

Most of the apartments have toilet rooms adjoining, which are most elaborately fitted up, the walls being finished in tile, 4 ft. 6 in. high, and the floors are of mosaic. Some of these toilet rooms contain porcelain baths, marble basins and the "King Edward" closets; others are fitted with recess porcelain lavatories, water-closets and shower baths. All points of comfort and utility have been made a feature in fitting up these toilet rooms, hence the showers are not only placed low down, but the spray ring is of such a diameter that the ladies can use them without disarranging their hair, this being an objectionable feature with the ladies to the usual arrangement of the shower bath.

There are also placed on each floor toilet rooms for ladies and gentlemen for the use of guests who occupy rooms without toilet arrangements attached. These lavatories are finished in red Tennessee marble, those for the gentlemen containing four closets, lavatory and urinal; those for the ladies, a bath, closet and lavatory.

There is a lavatory in connection with the grill room, with four closets, two lavatories and three urinals. The grill room itself is fitted with sinks, coffee urns and steam tables.

Not only has the convenience of the guests been looked after, but the help have been well supplied. On the ninth floor there are placed lavatories for male and female help. Those for the males contain four baths, four water closets, a urinal and lavatory; those for the females, baths, water closets and lavatories. There are also lavatories as fully equipped in the basement and are all finished in red Tennessee marble and are just as elaborate as those for the guests. Every arrangement to lessen labor has been installed. The kitchen, which is located in the basement, is most completely equipped with all known useful appliances. There are coffee urns, steam tables, steam cookers, warming closets and dish-washing machines, which are all connected with the steam and water systems. Each steam cooker is also fitted with ventilating shaft. There are 19 large-size sinks situated in the kitchen, culinary, wine room and bottling cellar. These sinks are of cypress wood, and are supplied with hot and cold water.

The laundry, which is situated on the ninth floor, is said to be one of the best-equipped on the continent, being supplied with a complete outfit of steam mangles, washers, rinsers, driers and electric irons. There is a powerful electric motor installed to operate the fixtures, and all the fixtures are connected with the steam and water systems. A rather unique system of disposing of the waste water has been introduced. The washing machines are all placed on a cement floor, which has a trough in the centre, into which all the waste water is emptied. This is connected with a large waste pipe.

The serving-room, in connection with the dining room has also a complete system of warming closets, steam tables, tea and coffee urns, and is supplied with a refrigerating system.

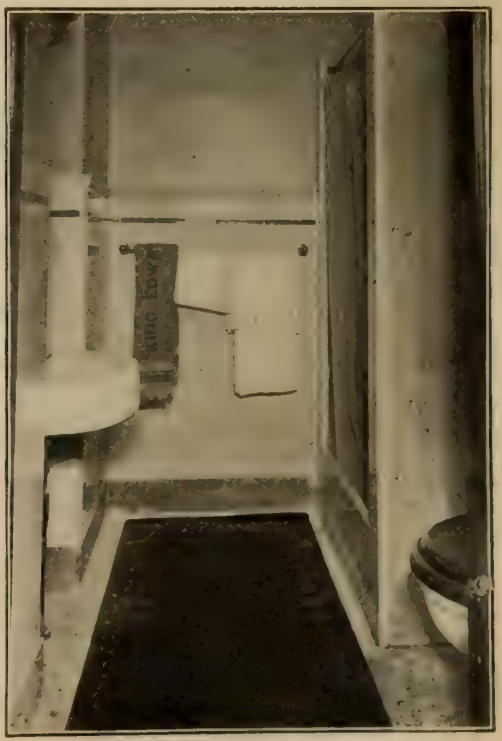
One can hardly grasp the magnitude of the plumbing contract. Possibly the best conception will be given by a detail list of the fixtures installed, which were as follows:

FLOOR.	LAVATORIES.	CLOSETS.	URINALS	BATHS.	SINKS.
Basement	11	14	6	1	
First	24	24	11	1	2
Second	19	20	—	18	3
Messinene	2	2	2	—	—
Third	45	48	1	45	2
Fourth	62	50	1	32	2
Fifth	60	48	1	13	2
Sixth	62	48	1	45	2
Seventh	41	41	—	38	2
Eighth	—	6	—	5	3

The whole system was recently inspected, tested and passed by the City Inspection Department, requiring no less than eight smoke-testing machines, operated by twelve men to make a thorough test.

A fully equipped system for supplying a plentiful amount of fresh air to the building has been installed. This has a direct connected fan and engine. The air is drawn from a point 8 ft. above the roof of the building, through a brick shaft, and is well distributed, bringing a good supply into the basement. This arrangement, with the thorough ventilating system that has been installed, drawing off all foul odors, ensures the purest air to be at all times found throughout the building.

The ventilation is operated by three exhaust fans, located near the roof. The firm has also installed a thorough refrigerating system, which is so arranged that the ammonia passes in coils through the brine tanks and is circulated through the coils in all the refrigerators located in



KING EDWARD HOTEL—TOILET ROOM CONTAINING SHOWER BATH AND PORCELAIN RECESS LAVATORY.

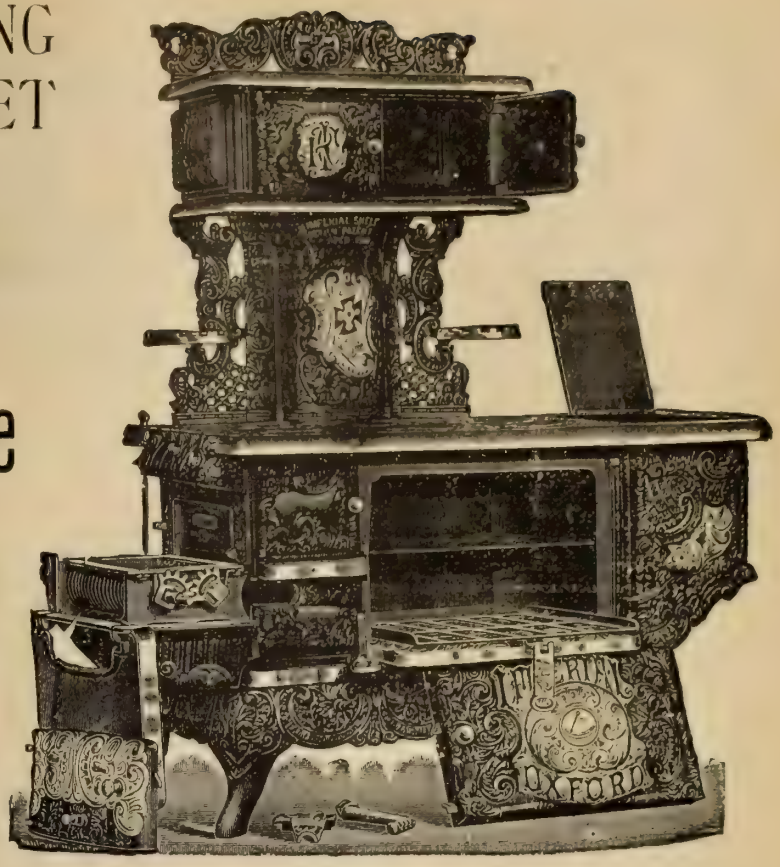
THE EASIEST SELLING RANGE ON THE MARKET

There are so many points of excellence in the **IMPERIAL OXFORD RANGE** which no other range contains, and it has been giving satisfactory service for so many years, that it is, without doubt, the easiest range on the market to sell. When you are selling an

Imperial Oxford Range

you can hold and convince your customer with such points as the Diffusive Flue Construction, Draw-out Grate, Oven Thermometer, Draw-out Oven Rack. All these important features interest a stove buyer and make your sales easy.

This is the most desirable range you could have in stock. **Write for particulars**



THE GURNEY FOUNDRY CO., Limited

TORONTO. WINNIPEG. VANCOUVER.

THE GURNEY-MASSEY CO., LIMITED, MONTREAL.

Wickless "Blue Flame" Oil Stoves.

A FEW REASONS WHY PREFERRED.

IT HAS NO WICK and is easily kept clean.

IT HAS NO JOINTS TO LEAK or packing nuts; no pressure of oil below the tank; it cannot leak.

IT DOES NOT GENERATE OR EVAPORATE, the oil simply drops into an open brass pipe through which it is conducted to an open burner ring where it burns, producing a powerful blue flame. Could anything be simpler?

IT HAS A REMOVABLE TANK which can be carried to an outer room for filling.

IT IS ABSOLUTELY SAFE.

IT LIGHTS QUICKLY, simply turn on the oil and apply the match.

IT COOKS INSTANTLY. There is no smoke—no delay. As soon as lighted a cooking vessel can be placed over the burner.

IT HAS NO STOPS or automatic regulators to govern the flow of oil. The flame is entirely under the control of the user.

IT MAKES NO DIFFERENCE what quality of oil is used, whether coal oil or gasoline, whether it is good or bad, heavy or light, thick or thin, hot or cold, the stove operates equally well, producing an intensely hot smokeless blue flame. Can as much be said TRUTHFULLY of any other stove?

IT HAS A GLASS SIGHT FEED which shows at a glance the flow of oil, and enables the user to regulate the valve quickly and accurately.

FOR ECONOMY OF FUEL as compared with the coal and wood stove it is beyond comparison. Will save what it cost in one season over coal or wood at the average price. It is a friend and helper to the thrifty housekeeper who tries to save what others waste.

ESPECIALLY is it a boon to the country home and suburban residence where fuel gas cannot be obtained.

LASTLY—It is safe, clean, quick, reliable and convenient, and no home can afford to forego the comfort that this wonderful stove brings.

The dealer who recognizes the merits of the "Standard" Wickless and places it on his sales floor will find it a ready and popular seller

The THOS. DAVIDSON MFG. CO., Limited, MONTREAL, P. Q.

parts of the building, and through the pipes in the cold storage rooms. There are two separate pumps required to circulate the system to make it thoroughly circulation and manufacture all the ice required for use in the building. This is what is called the Brine system. It has been so installed that the work is perfect.

Not only has the accommodation of the guests been looked after, but his safety as well. The hotel has been fitted with a fully equipped fire stand pipe. There are four connections on each floor to which are attached 100 ft. of 2½ in. hose, fitted with adjustable nozzles, which will throw either a spray or a stream of water.

Space will not permit in this issue of giving a description of the heating or electric plants. These will be dealt with in another issue.

The Bennett & Wright Co., Limited, are to be congratulated on the manner in which they carried out their contract. It would be a credit to any firm, not only in Canada, but in any country, and furnishes additional evidence that Canadian firms can hold their own against all comers.

M.

ONTARIO GREETINGS.

On behalf of the Ontario Association of Master Plumbers and Steamfitters, Wm. Mansell, president, sent the following greetings to the National Association of Master Plumbers, in session in San Francisco :

E. D. Hornbrook, Esq., President National Association Master Plumbers, California Hotel, San Francisco.

Ontario Master Plumbers and Steam Fitters' Association send greetings to their fellow craftsmen. While we work under two flags—you "Old Glory" and we "The Union Jack"—our aims and interests are one. We clasp hands across the continent.

WM. MANSELL,
President.

HOME AGAIN.

Mr. Joseph Wright, president of The Bennett & Wright Co., Limited, and of The Dominion Radiator Co., Limited, Toronto, returned home from a business trip to Europe on Tuesday, accompanied by Mr. Peter McMichael, manager of The Dominion Radiator Co., Limited.

Mr. Wright expresses great satisfaction with the results of the trip from a business standpoint. The return voyage on the Cedric was, he declares, one of the most enjoyable ocean trips he ever took. An "entertainment committee" of 12 passengers was appointed before the boat was many hours out and he was elected chairman of it. Those who have had the pleasure of meeting Mr. Wright at the master plumbers' conventions will know at once that that was a sufficient guarantee that a good time was in store for the passengers. There were no less than 28 rinks entered for curling matches and shuffle board for gentlemen, also 60 entries for quoit pitching. Of course the ladies were looked after, and competitions were arranged in curling and shuffle board, thread and needle and potato races, while all joined in pillow fights and card and dancing parties. The evenings were given up to concerts, and by the time New York was reached the party were on such friendly terms that they were sorry that the hour of parting had arrived, and all were of the opinion that it was the best trip that they had experienced on the Atlantic.

PLUMBING AND HEATING NOTES.

JARVIS Street Baptist Church has accepted the tender of Andrews & Johnson, Chicago, for a new system of heating and ventilating, at $6,100. The plumbing and lighting will be repaired at a cost of $400.

By the explosion of a gasoline stove he was using, Christopher Teale, a London plumber, was badly burned about the face and hands.

William Fisk, Richmond, Ont., for 17 years with R. Rattray, plumber and tin smith, has opened a shop of his own in The Times building, formerly occupied by Mr. McDonald.

The plumbers of Winnipeg have received a manifesto from the journeymen plumbers' union in which the men demand $5 per diem, nine hours to constitute a working day. The new condition goes into effect on July 1, and if the demands are not acceded to a strike will follow.

BUILDING PERMITS ISSUED.

QUEBEC.

N. Cauchon, for repairing a building on Dorchester street, to the extent of $1,500.

Mrs. Gagnon, for repairing a store on the corner of St. Mary and St. John streets, occupied by C. Cote & Co., estimated cost of which is $1,000.

TORONTO.

Miss Shee, two-storey-and-attic dwelling, to cost $1,500.

A. McClelland, residence, Badgerow avenue, to cost $1,500.

J. Granton, one single and six pair of semi-detached dwellings, 91, 93 and 95 Franklin avenue, to cost $6,000.

Roe & McArdee, two pair of semi-detached two-storey-and-attic brick and stone dwellings, 393-399 Delaware avenue, to cost $1,800.

BUILDING NOTES.

McNab & Roberts are letting contracts for a four-storey-and-basement 40 x 100 ft. warehouse in Winnipeg.

George Brousseau has just completed the work of roofing a large mill at Cedar Hall, Que., belonging to the Quebec Terminal Co., Limited.

The Imperial Elevator Co., Minneapolis, Minn., are building elevators at Waskada and Lyleton, and propose to put one up at Deloraine, Man.

W. H. Munro, of Munro & Co., Pembroke, Ont., are to build a roundhouse, car shops and a tank for the C.P.R. at North Bay. He states that workmen are scarce in the Ottawa valley.

The Granite Club, Church street, Toronto, have sold their present premises to the Canadian Bank of Commerce and are now looking for a site on which to erect a new clubhouse.

A. T. Drummond, Toronto, proposes to erect a summer hotel at Kingston, Ont., and a meeting of the citizens of that place will be held to consider the matter on June 1.

Blackwood Bros. are building a large brewery at Fort Rouge, near Winnipeg.

Mark Fortune is building a large store and office building on Portage avenue, Winnipeg.

Joseph Charlebois, French River, Ont., proposes to erect a large tourist hotel.

Tenders are now being asked for by The Intercolonial Railway for baggage and express room at Levis, Que., tenders to be in by May 25.

Architect Griffith, Winnipeg, is calling for tenders for a 100 x 80 ft. wing to the Brandon, Man., Hospital. He has prepared plans for a hospital near Neepawa, to cost $12,000, also for a branch of the Merchants' Bank at Neepawa.

Joy & Needham, Toronto Junction, have secured the contract for building the postoffice at Toronto Junction, and will begin operations at once. John Paterson has been appointed clerk of the works. The contract price of the building is nearly $24,000.

About $15,000 will be spent on extensions to Queen's Hotel, North Bay, Ont.

B. A. Kennedy, general manager of the Deering branch of The International Harvester Co., says that it will be five years before the works of the company at Hamilton are completed.

The C.P.R. are spending $100,000 in permanent improvements to their plant at Moose Jaw this year. Ten new stalls are being added to the roundhouse. Several old tracks are being lifted and a number of new tracks laid. A new baggage room is to be built, with offices above.

The Canada Foundry Company are projecting more large buildings at Toronto Junction. Their locomotive shop will be 300 feet long by 175 wide. The bridge building will be about the same size, and will be entirely of steel. The company has purchased all the land lying between their works and Dunlop's conservatories.

A party of American capitalists have purchased Glen Island, near Picton, and will build a large summer hotel there which will cost between $50,000 and $75,000.

INDUSTRIAL GOSSIP

The Pope Manufacturing Company has taken over the entire assets of the American Bicycle Co., and the latter company now ceased to exist. Col. A. A. Pope, with apparently unlimited backing, is at the head of the new company. It is worth noting that Mr. Pope was a believer in extensive advertising. The American Bicycle Company tried to reduce expenses by curtailing their advertising, with results disastrous to that company.

The commissioners appointed to inquire into and report upon the most suitable form of dry dock for Montreal district, and the site best adapted for the purpose, have reported against the proposal to establish a floating dock, and favor a permanent structure built of concrete and masonry. The cost of this, with the approaches, would be $925,000. The suggested site is below the current of St. Maurice River.

Harold A. Copp, of W. J. Copp & Son, stove founders, Fort William, Ont., returned last week after a purchasing trip in the east, when he completed the purchases of machinery for the company's work. About 100 tons more of it have yet to arrive. Mr. Copp says the plant will be in full operation by July 1. During his trip he secured the services of a number of skilled men and now, he says, the prospects for his firm are of the best.

A Londonderry, N. S., correspondent says that the new buildings and plant being erected there by The Montreal Pipe Foundry are very near completion, and the company is advertising for a first class foreman for the pipe-shop, in order to have the superintendent the final arrangement for manufacturing and finishing cast iron pipe of all kinds. The machine shops in connection with this part of the works are kept busy filling materials for the new works and repairing machinery for the Iron Company's plant.

John E. Stairs, president of The Nova Scotia Steel and Coal Co., says that by the end of the present year the plant of The Nova Scotia Steel and Coal Co. at North Sydney will be completed, and this will enable the company to more than double the present output of pig iron. The company will continue development work until the entire output is converted into steel. They have secured a permanent market by closing a number of contracts with important manufacturing enterprises in Toronto and western points so they will now go on increasing their capacity as speedily as possible, yet they will confine their plant to the manufacture of light steel plates, hand rails, and axles until they are certain that they can secure a market for the output of the new mills.

NOTES.

C. T. White is erecting a new lumber mill at Apple River, N.S.

Petrolea, Ont., has passed a by-law to build a new iron bridge there.

The Dominion Tar and Chemical Co. have started to build their plant at Sydney, N.S.

Getty & Scott, manufacturers, Galt, Ont., are making large extensions to their plant.

The Peterboro' Hardware Co. and the Trenton, Ont., Electric Co. have offered to buy the Belleville street railway.

The Canada Metal Milling Co., Limited, have been empowered to increase their capital from $50,000 to $150,000.

Toronto iron moulders to the number of 400 have decided to return to work though their demands were not granted.

Wm. McNally & Co., Montreal, have received an order for 36,000 bags of cement from the Montreal Harbor Commissioners.

The Sydenham Glass Co., of Wallaceburg, Ont., Limited, have been authorized to increase their capital stock from $150,000 to $300,000.

Tenders are asked by May 29 for a steel pile trestle bridge over Jeannette's Creek by Alex. Farquharson, clerk of Tilbury East Council, Fletcher, Ont.

Sydney Mines, B.C., has decided to install a water system at a cost of about $78,000. The Montreal Pipe Foundry Co. have received the first order for piping.

The Robb Engineering Co., Limited, have been authorized to do business in Ontario as dealers in steam engines, boilers, electric dynamos and other machinery.

Lord Lyveden, who will bring a party of British peers to Canada this fall, states that a number of distinguished British manufacturers will accompany the party.

Stock of The Tavistock, Ont., Malleable Iron Co., Limited, has sold so freely that the local papers say that there is now no doubt about the industry being started there.

Representatives of the Consolidated Copper Co., of Mackenzie & Mann, and of the Copper Queen Co., have recently examined their properties in Algoma and expect to start development work at once.

A Belleville, Ont., despatch says that Mr. Kirkwood, of Toronto, owner of the Belleville Rolling Mills, has announced his decision to put the plant in operation at an early date, to turn out 30 tons per week.

H. G. Smith, president of The Allith Mfg. Co., Chicago, spent several days last week in Hamilton, Toronto and other Ontario cities looking for a site for a factory wherein to manufacture hardware specialties.

A decline in the price of lumber in New York is feared by New Brunswick lumbermen on account of the labor troubles in the building trades. Practically all lumber cut in New Brunswick is sold in New York or the New England States.

Buntin, Gillies & Co., Limited, Hamilton, have been incorporated with $75,000 capital. The directors are James B. Gillies, David S. Gillies and Chas. W. Graham. The company will manufacture, buy and sell paper, stationery and blank books.

The stock subscription books of The Montreal Steel Works, Limited, have been closed and the underwriters announce that the stock has been largely over subscribed. The allotment includes $400,000 common and $800,000 7 per cent. preferred stock.

The Canadian Pacific Railway requires more locomotives, particularly of the heavier types, and in order to get them it has been found necessary to depart from a long standing principle of the road and order them in other countries than Canada.

The Merchants Rubber Co., Limited, Perlin, have been incorporated with $100,000 capital. The directors are Hon. Samuel Merner, T. H. Rieder, Oliver Kinzie, Peter Rieder, and Daniel Packer. The company will manufacture all kinds of rubber goods.

The Northwestern Smelting and Refining Co., Crofton, B.C., have been incorporated with $625,000 capital to purchase the smelting and sampling works at Crofton, together with all plant, machinery, fixtures, fittings and effects in, upon or belonging to the same.

The Kilbourn Real Estate Co., Limited, Owen Sound, Ont., have been incorporated with $100,000 capital. The directors are John M., Francis H. and George S. Kilbourn, Owen Sound. This company

[illegible] & Co., Limited, Albert, N.B., have been incorporated with $3,000 capital. The directors are J. C. Prescott, W. H. Newcomb, P. W. F. Brewster and [illegible], Albert, N.B. They are to manufacture and sell wagons, carriages and [illegible] and to handle implements, machinery, etc.

The West End Land and Improvement Co., Limited, Montreal, have been incorporated with $35,000 capital. The directors are Wm. and J. A. Mann, Wm. and W. C. Strachan, and Roland Millar, Montreal. To construct, operate and sell [illegible] factories, warehouses and other buildings in Montreal.

The Canadian Transportation and Storage Co., Toronto, have been incorporated. The directors are Frederic Nicholls, Wm. Mackenzie, H. M. Pellatt, A. Angstrom, and Arch. Campbell, M.P., Toronto. The company will construct and operate grain elevators, storage warehouses and freight and passenger steamships.

The Palace House Boat Co., of Midland, Ont., Limited, have been incorporated with $40,000 capital. The directors are James Playfair, D. S. Storey, Joshua Hall, Wm. E. Preston, C. M. Tremeer and H. J. Craig. The company may acquire, construct and operate house boats, passenger and supply boats.

The Starke Hardware Co., Limited, Montreal, have been incorporated with $250,000 capital. The directors are Wm. Rennie and Geo. R. Starke, Montreal; David McGill, Westmount, and Wm. C. Jarvis, Longueuil, Que. The company will carry on a general importing and wholesale hardware business.

The Waterloo Broom & Brush Co., Limited, Waterloo, Ont., have been incorporated with $40,000 capital. The directors are Oliver S. Master, Jacob W. Schneider, and Noah Marten, Waterloo. They will succeed the Berlin Broom Co. as manufacturers and dealers in brooms, brushes, whisks and domestic [illegible].

The Consolidated Telephone Co., Limited, Bath, N.B., have been incorporated with $5,000 capital. The directors are Dr. M. E. Commins and Patrick Corbett, Bath; Patrick Gorey and Patrick McLaughlin, Johnville, N.B. To install and operate a telephone service in the counties of Carleton and Victoria, N.B.

The McDougall Hardware Co., Limited, Ottawa, have been incorporated with $50,000 capital. The directors are D. J. McDougall, J. T. McCracken, J. V. Hawley, J. O. Richard, H. J. McCormick, of Ottawa. The company is empowered to buy and sell hardware and to carry on a hardware business in all its branches.

The Western Construction Co., Limited, Toronto, have been incorporated with $100,000 capital. The directors are H. J. Wright, John Payne, R. Tredicott, W. J. Gilchrist and Henry Toynbee. This concern will build and equip public or private works and acquire, hold or sell bonds, debentures and stocks of other companies.

The Railway Specialty Co. of Canada Limited, St. John, N.B., have been incorporated with $100,000 capital. The directors are E. E. Cane, Bay Side; J. R. and S. S. McAvity, T. H. Hay and Edmund S. Ritchie, St. John. The company may carry on a general foundry and manufacturing business and acquire or develop power for their plant.

The Granby Smelter Co. are constructing two more furnaces in order to enable them to keep abreast of the mine production, which is about 5,000 tons per day. Four furnaces are now in existence at the smelter, three of which are in active operation. It is expected that the two new furnaces will be ready to handle the ore about the end of June.

The Canadian Miller Signal Co., Limited, Welland, Ont., have been incorporated with $1,000,000 capital. The directors are John A. Kennedy and M. I. Failing, Buffalo; W. M. German and G. H. Pettit, Welland; and Joseph Battle, Thorold, Ont. They are authorized to install and equip railroads with the Miller Electric Block System of signaling.

NEW FOUNDRY FOR OWEN SOUND.

Mr. W. J. Christie, business manager for the Canadian Heating and Ventilating Company, Limited, left for Toronto this morning on business connected with the new concern. The contractors are busy this week figuring on the plans, though there are certain modifications that are being arranged with the architect that will materially reduce the cost. The plans, for example, call for a smoke stack 100 ft. high, 6 ft. square at the base, and of solid brick. This will be reduced to a 30 in. base, which will be surmounted by a steel stack, greatly reducing the cost. This illustrates how very carefully the management is looking after the expenditure of the company's funds. They are aiming at putting up the buildings of the company's big plant as economically as possible at the present time without curtailing the efficiency in any way. The foundry building is a large affair of much the same type as the steel casting works of the Wm. Kennedy & Sons Company, Limited, but considerably over 200 ft. in length and 70 ft. wide. The cupola building will form an annex to the foundry. A representative of the Goldie & McCulloch Company, Limited, of Galt, was in town a few days ago arranging with the firm for the engine. Owing to the modifications referred to above, and the fact that Architect Ellis is in Toronto, the contractors will probably be given an extension of time over the date advertised for getting in their tenders. Owen Sound Times, May 11.

YOU'RE EASING YOUR FREEZING WHEN USING

"PEERLESS ICELAND"

ONE MOTION FREEZER.

-31403

Showing Freezer with wrapper.

Showing enclosed gearing and can.

SIMPLY WONDERFUL
IN RESULTS

WONDERFULLY SIMPLE
IN CONSTRUCTION

Construction of dasher.

IT HAS only one motion, all that is necessary for the effective freezing of smooth, delicious ice cream.
the fewest parts of any freezer made.
all outside metal parts heavily galvanized.
tubs of best selected and seasoned material.
enclosed gearings making it impossible to catch ice or salt.

All to Montreal Office
3/6/03
See Cor Book 9
page 24

IT WON'T allow oil or salt to enter the can, owing to the arrangement of the gear frame.
taint the cream as all metal parts coming in contact with the cream are heavily coated with pure block tin.
get out of order when can is removed or replaced, the enclosed gearing prevents it.

IT WILL freeze the cream in three minutes.
leave no soft spots in the centre or lumps on the outside, as it keeps the centre thoroughly agitated.
outlast any other freezer, owing to its superior construction throughout.

"Peerless Iceland" Freezers furnished in 1 to 16 quarts.

THE ONE-PINT "TOY" FREEZER.

A toy in name, but a freezer in fact, just the thing for one or two persons or for the sick room where only a small quantity of cream is needed. It is built in miniature, precisely after the pattern of the larger sizes, but more elegantly finished in detail.

Astonishing how fast they sell.

Include a few with the larger sizes.

8, 10, 12 and 16 quart furnished with fly wheel if desired.

HARDWARE AND METAL

VOL. XV. MONTREAL AND TORONTO, MAY 30, 1903. NO. 22.

Subjects Being Discussed at Ottawa

By a Member of Parliament.

WITH the House rising from Wednesday night till the following Tuesday, with day after day occupied by debates of more or less—generally less—interest, with estimates passing so slowly as scarce to be passing at all, all hopes for a fairly early end to the session are disappearing, and August 1 is now being named as about the probable date.

* * *

The day the Minister of Finance introduced a measure for the improvement of the Dominion election laws, and another dealing with the construction of dry docks, and Government aid thereto, was a busy one indeed.

While the former cannot very well be connected with the trade and commerce of this country—though we fear that at certain periods there is rather a brisk bargain and sale in connection with election contests—it is of such interest to all good citizens that we venture to mention it briefly, even in a journal such as this, the primary mission of which is trade, and trade only. Mr. Fielding moved that a select committee, composed of Messrs. Charlton, Casgrain, Russell, Barker, Demers, Northup, A. T. Thompson, Ingram and himself be appointed to consider the state of the laws respecting Dominion elections, and that the bill of Mr. John Charlton, dealing with the same subject, be referred to and considered by this committee also.

While it must be admitted that irregularities at elections are far too frequent in Canada, it is equally certain that such practices are distasteful to the great mass of both parties, and it is a hopeful sign when prominent gentlemen of Government and Opposition circles are about to meet together to endeavor to devise some remedy for the betterment of existing conditions. As Mr. Fielding remarked in the few words he spoke in introducing his motion, it is human nature itself which wants reforming, if we are really going to have absolutely pure elections, but he thought that something might at least be done to make political sinning more difficult and dangerous than at present, and it was with this object, rather than in the hope of complete redress, that he and others were moving in the matter.

* * *

Coming to the question of the construction of dry docks, we may say that the proposal of the Government is to bonus private companies building such works under Government supervision, through the Public Works Department, at a place to be specified by the Government, within a time limit, etc., and on the actual cost the amount to be allowed will be 3 per cent. per annum for 20 years, the total of such aid not to exceed $30,000 per annum to any one company. The principle is not at all new, similar legislation having been on the Statute Book for 20 years, but the amount previously offered, 2 per cent. per annum instead of 3, has proved inadequate. Under the old provision it is true that Halifax got a dry dock, but even then the building was not done because of the Dominion Government aid alone. The Imperial Government (owing to the requirements of the North Atlantic Squadron) gave assistance, as did also the city itself. The increase in the proposed subsidy, it is confidently expected, will produce a suitable dock at Collingwood for the increasing shipping of the Georgian Bay, and another at St. John, N.B., a long-felt want there.

While the resolution itself is silent, in pursuance of parliamentary practice, as to control of rates, the bill, which in due course will follow the resolution, will provide carefully on this point, so that private interests may be conserved and no monopoly on the part of the dock company permitted.

Mr. Tarte, in giving his support to the measure, made the statement that there is no country in the world which is more lacking in dock accommodation than is Canada, while the only criticism offered by Dr. Sproule was that the percentage offered by the Government was, he feared, still insufficient to induce capitalists to go into this class of investment, and, said he, "I think the Government might very well make it much higher."

The suggestion made by Mr. Bennett that the Government should lay down a rule that the docks should be at a certain distance from each other, or that only one dock should be aided in any particular bay, seems sound sense, and would remove political temptation from this and succeeding Governments. It is true that the resolution leaves it entirely to the Government to say at what point any dock to be subsidised is to be constructed, but this of course leaves the door more or less open to political influence and pull.

Mr. Monk raised a point of interest to the great port of Montreal when he asked if the passing of this resolution meant that the Government would not in the future undertake any dry dock construction work itself.

To this Mr. Fielding replied that the new legislation was only an increase in amount on the old, and that as the old had not excluded Government construction, how could this do so? As to what the Government policy would be, that, of course, was another matter, and one upon which he was not in a position to speak. Mr. Monk pointed out that for years past Montreal had been given hopes

of Government construction, and emphasized the need of superior accommodation of this nature on the St. Lawrence route.

• • •

Very lively and decidedly interesting was the debate on the Treadgold Concession, to which the House was recently treated, Mr. T. Chase Casgrain leading off for the Opposition, and Sir William Mulock taking up the cudgels for the Government. Founding his case upon articles written in Dawson City newspapers and on various petitions sent in to the Government from that place, Mr. Casgrain argued very strongly to show that the concession would be most ruinous to Yukon interests, and that it must have been obtained by gross misrepresentation and fraud.

Unfortunately, Mr. Sifton, in whose Department the administration of the Yukon lies, is still away in England in connection with the Alaskan Boundary Commission, while Mr. Ross, the newly elected member for the Yukon, is absent on account of ill health. In spite of this, however, the Postmaster General, who is at present acting Minister of the Interior, made a stout defence, scoring a very strong point in asserting that if the concession was to be so immensely lucrative as asserted by its opponents, it was strange indeed that after it had been in force for more than two years, the Concessionaires, some of them men of large influence and numerous connections in England, had been unable to interest Old Country capital to come in and do the work.

In view of the fact that Dawson people have asked for a commission of investigation, and that the Government has promised to create one, it would be premature for us to express an opinion on the rights of the case. One thing, however, seems clear, and that is that some corporation, or the Government itself, must enter into business to supply water and power to the miners in that district, in order that work may be continued in the more inaccessible parts after the easier stretches have been exhausted by the individual miners. The expense of such an undertaking would be immense, and any Government would probably hesitate about going into this undertaking. The Government has reserved the right of controlling rates when the Treadgold people have power and water to sell, and this would seem to be at least a fair measure of protection to the miners.

One thing we must remember in considering all these questions arising in our Far North,—that as the climate gets colder, the spirit of the inhabitants gets warmer. We are accustomed to read of the active temperament of the Westerner, but he is but a mild creation indeed compared with his brother of the North. Hence, when we hear prophecies of Dawson streets deserted, of buildings empty, and standing only as a sad memorial of the glory that has been—sad events sure of realization if the Treadgold Concession remains unrepealed—we must not make too literal a translation, but allow somewhat for the poetic fervor and vivid imaginations of those who dwell in the ice palaces of the North.

CIVILITY TO THE TRAVELLER.

THE traveller when he calls on you should always be received with civility, even though you may not be able to give him your order. Civility is due to him, in the first place, to show that you are a gentleman, and also because, looking at it from a selfish point of view, it may be in his power to benefit you in some way or other at some future time. This matter has been well and forcibly put by a writer in Keystone, who says :

" Business is business, and a commercial traveller or any other solicitor for patronage expects to put up with discomfort and annoyance, but no one has the right to ask him to patiently endure unnecessary humiliation. He who does shows an amount of conceit, an ignorance of the world and a capacity for making enemies that sufficiently prove his insignificance as a man and as a merchant. There are men on the road, as elsewhere, who cannot be too severely treated, but they are exceptions. The average travelling man has an exceptional knowledge of the world, exceptional powers of observation and insight into character and conditions, and an inside knowledge of goods and men that makes him a mine of information, a travelling storehouse for the people with whom he comes in contact. With his access to the credit men of great wholesale houses, his acquaintance with other travelling men, and his many relations in the great markets of the country, he is a commercial factor whose influence it is hard to overvalue. What folly it is to excite without provocation the ill will of such a man ! If a merchant cannot see the advantage of having the goodwill of the travelling fraternity, let him remember that credit and the amount of consideration shown the retailer by the wholesale house are often materially affected by the travelling man's favorable or unfavorable attitude towards him. It's a hard thing to be hard on a man whom you like, and the reputation of being a nice man to do business with is a valuable moral asset. Again, it is a good thing to have the goodwill of the men from whom you never have bought and never expect to buy goods. The time may come when they can speak a word for or against you. The prestige for good or evil built up about us by the involuntary estimates or action of other people has its fruit as much as our direct efforts.

SCHEDULE FOR AN UP-TO-DATE NEW YORKER.

8.00 A.M. Jump out of bed.

8.04. Bath and shave.

8.08. Dressed.

8.10. Bound downstairs to breakfast.

8.15. Bolt breakfast and read headlines. Say " yes " and " no " to wife 4 or 5 times.

8.21. Sprint to Elevated.

8.25. Wait one minute for train, and swear at delay.

8.50. Rush into office. Dock three clerks for being 3 minutes behind.

9.00 to 12.30. Do a great business. Telephone 8 times, write 400 letters, see 10 men.

12.34. Hurry to restaurant.

12.36. After waiting nearly 50 seconds to get waited on, cram down a sandwich, a piece of pie, and a cup of hot coffee. Time wasted in doing so, 1 minute and 30 seconds.

12.42. Back at office.

12.50 to 6.00. More business. Telephone 12 times, see 18 men, answer 4 telegrams, and write 150 more letters.

6.15. Rush to Elevated to get Express. See it coming in distance and jump up 4 steps at a time. Last man in.

6.45. Run upstairs to room. Strip off business clothes in 3 minutes. Pull on evening clothes in 3 minutes more.

6.52. Fume because dinner is 2 minutes late.

6.54. One hour at dinner. Awful bore. Fidget all the time. Guests.

7.53. Smoke.

8.00. Theatre. Leave wife at second act to go to club.

9.40. Hearts at Club.

10.15. Hearts too slow. Change to Bridge.

12.00. Home and meet wife on stairs. Kiss her good night and jump into bed. Dead to the world.—N. Y. Life.

HAMILTON, ONT.

MARKING PACKAGES.

Instructions have been issued by the Canadian Freight Association as to the marking of all packages being shipped by rail or water. The rules were adopted for the benefit of steamship and railway agents, and are as follows:

Each package, bundle or piece of less than carload freight must be plainly marked with the information necessary to carry it to its destination and insure proper delivery even if separated from the waybill.

The marks on packages should be compared with the shipping order and bill of lading, and correction, if necessary, made by the shipper or his representative. Old marks must be removed or effaced.

Freight consigned to a place of which there are two or more of the same name must not be forwarded unless the name of the county or province be given.

When freight is consigned to a place not located on the line of a railway, the shipper must be requested to state the name of the railway station at which the consignee will accept delivery, or if destined to a place reached by a water line the name of the railway station at which delivery is to be made to such water line.

INQUIRIES ABOUT CANADIAN GOODS.

Inquiries received by the Canadian Section of the Imperial Institute :

1. A firm of fruit shippers require a large quantity of box shooks cut to dimensions, and wish to hear from Canadian manufacturers who can fill orders.

2. A Bristol house is prepared to contract for supplies of broom handles and invites correspondence from Canadian producers.

3. A firm of London brokers already engaged in the Canadian trade and able to furnish Canadian references, seeks additional agencies in evaporated apples, canned lobsters, fruit and vegetables.

4. A London manufacturers' agent asks to be placed in touch with Canadian manufacturers of basswood piano key boards.

5. A London house wishes to hear from Canadian shippers of hay and potatoes. First-class reference.

6. A gentleman representing an important house in London is desirous of securing the agency of Canadian manufacturers of builders' hardware, machinery and manufacturers of wood, in which he possesses a large connection.

Names of the firms making the above inquiries on application to the editor of HARDWARE AND METAL.

AIDS TO RETAILING.

Poor advertising !

What a load is too often thrown on his shoulders.

Let us study some of the aids that retail advertising should possess :

1. Window displays.
2. Interior displays.
3. Plenty of goods, with values exactly as advertised.
4. Plenty of price tickets which obviate unnecessary questioning.
5. A cheerful, well-lighted, and well-ventilated store.
6. Intelligent, business-like, and courteous employes.
7. Prompt deliveries.
8. Ample capital and the ability on the part of those who control it to use it rightly.

There you have the principal aids to advertising.

Let us consider these eight advertising assistants and how to employ them to the best advantage.—Profitable Advertising.

TRADING STAMPS IN ST. HENRI.

Montreal and Quebec are not the only cities which are taking advantage of the recent provincial law giving to municipalities the power to deal with the trading stamps system. The Council of St. Henri have introduced the by-law to interdict the use of the stamps, and referred the matter to a general committee. The law applies only in cases where the coupons, stamps, etc., are redeemed by a third party. A merchant may get out his own trading stamps, cash receipts, coupons, or whatever he wishes to call them, and redeem them himself if he desires.

TO BUILD AN ELEVATOR.

It is the intention of The Central Milling Co. to erect a large elevator in connection with their mill in Peterboro', Ont. Tenders for the building will be received by Mr. Blackwell up to May 30. The foundation of the mill will be of stone and cement and the superstructure of strips, that is, solid lumber laid face to face. The building will be iron-sheeted and will be five storeys high. The capacity of the elevator will be 40,000 bushels.

WORKING TOGETHER.

Next to the recognized high quality of ***Ohe Sherwin - Williams Paints and The Sherwin-Williams Varnishes,*** the principal reason why S.-W.P. agents are more successful than other paint dealers is the way we work with them.

To get a good agent is only half our aim, the other half is to help him build up his paint business. We work with all our agents from the very moment they place our goods on their shelves. We believe that it is an essential part of our duty to help keep our products moving off the agents' shelves. It is by practising that belief that we have been able to build up the largest paint and varnish business in the world.

Our booklet "B—13" describes fully the way we shall work with you if you will take the agency for our products. Write for copy to-day.

ROD AND NAIL PRODUCTION.

THE American Iron and Steel Association has issued the following:

The production of iron and steel wire rods in the United States in 1902 amounted to 1,574,393 gross tons, as against 1,365,934 tons in 1901; 846,291 tons in 1900; 1,036,398 tons in 1899, and 1,071,683 tons in 1898, showing an increase of 208,459 tons, or over 15 per cent. in 1902 as compared with 1901. Of the total production in 1902, 1,574,187 tons were steel and 206 tons were iron rods. The following table gives the production by States in the last three years, in gross tons.

Production of Wire Rods.

States—Gross tons	1900	1901.	1902.
Massachusetts, Connecticut, Rhode Island, New York and New Jersey	134,502	176,101	201,653
Pennsylvania	240,533	386,037	509,802
West Virginia, Kentucky, Alabama and Ohio	244,731	422,679	440,558
Indiana and Illinois	226,525	381,117	422,380
Totals	846,291	1,365,934	1,574,393

Pennsylvania made the largest quantity of wire rods in 1902, with Illinois second, Ohio third, and Massachuestts fourth. Eight other States, Rhode Island, Connecticut, New York, New Jersey, West Virginia, Kentucky, Alabama and Indiana also rolled wire rods in 1902. With the exception of West Virginia, which first rolled rods in 1902, all the States named also produced rods in 1901.

The following table gives the production of wire nails in 1901 and 1902, in kegs of 100 lb.:

Production of Wire Nails.

States. Kegs of 100 lb.	1901.	1902.
New Hampshire, Massachusetts, Rhode Island and Connecticut	71,553	309,653
New York	136,118	132,854
Pennsylvania	3,118,508	4,219,604
Maryland, West Virginia, Kentucky, Alabama, and Ohio	3,633,894	3,251,918
Indiana and Illinois	2,716,748	3,902,006
Michigan, Wisconsin and California	127,001	166,213
Totals	9,803,822	10,982,236

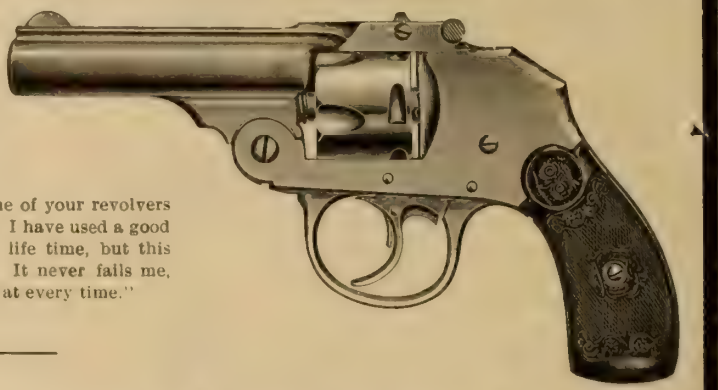
The production of wire nails in the United States in 1902 amounted to 10,982,246 kegs of 100 lb., as compared with 9,803,822 kegs in 1901, an increase of 1,178,424 kegs, or over 12 per cent. In 1900 the production amounted to 7,233,979 kegs; in 1899 to 7,618,130 kegs; in 1898 to 7,118,475 kegs; in 1897 to 8,997,245 kegs; in 1896 to 4,749,860 kegs, and in 1895 to 5,811,103 kegs. The wire nails produced in 1902 were made by 62 works, as compared with 61 in 1901. The production in 1902 was greatly in excess of that of any preceding year. Almost all the wire nails produced in 1902 were made of steel.

A "COMBINE" KITCHEN UTENSIL.

The J. M. Mast Mfg. Co., Lititz, Pa., are offering to the trade a combination cutter, so arranged as to be used either as a slaw cutter or a corn grater. In the manufacture of this useful kitchen utensil this company use seasoned hard wood, with fine tempered steel in the knives and graters, their warranty as well as their name being printed on them. The firm point out that all good cooks know the superiority of grated corn compared with corn cut from the cob, and after once using this grating attachment will understand how superior is this method of grating corn, whereby the inside of the kernel is extracted, leaving the hull attached to the cob.

Corn Grater. Slaw Cutter.

ACCURATE AND DEPENDABLE
Iver Johnson Revolvers



Alfred E. Baker, of Kansas City, Mo., says:

"I have owned one of your revolvers for nearly five years. I have used a good many makes in my life time, but this one beats them all. It never fails me, and I hit what I aim at every time."

Iver Johnson's Arms & Cycle Works,

WINDOW GLASS.

Our Spring Importations are now arriving, and carrying a very heavy stock, we are in a position to fill all orders promptly.

THE ONLY HOUSE IN CANADA manufacturing and stocking EVERY KIND OF GLASS required for Building purposes.

HOBBS MANUFACTURING CO., LIMITED
LONDON, CANADA

A BIG BLAZE.

On Sunday morning, May 24, a fire broke out in the premises of The Montreal Brass Works and did damage to the extent of about $100,000, partly covered by insurance. The fire broke out in the brass-finishing shop and it and the machine shop were entirely destroyed. The foundry, however, was saved and will be in running order shortly. New premises will be sought for the machine shop and brass finishing shop.

Separated only by a narrow lane from the burning building was the establishment of The Thomas Davidson Manufacturing Co., and for a time it was expected that great damage would be done to it also, but by almost a miracle, for the brass works were four storeys high, only a slight amount of damage was done to The Thomas Davidson buildings. This included a few broken windows and a scorching of the walls. No damage, however, was done to the workrooms or machinery, and the work will not be interfered with in the least. Orders will be filled and shipments will be forwarded with the usual promptitude of this well-known firm.
